6.3V @ 400 ma., 14V @ 160 ma., 24V @ 100 ma. (RKF)

Body Size: 2.56 x .78 x .83" (RK, RKP)
3.30 x 1.18 x 1.18" (RKF)

Bracket: Holds 2 to 8 readouts. (RK, RKP)

MS Series Mosaic—0-9 and some alpha-bet is displayed through diode-matrix (not supplied). Decimal points used as colon. High illumination. Figures 25/32" high. 20,000 hr. bulb life. Body size: .827" w. x 1.73" h. x 1.69" d. Available 6 or 14V

MSM Series Mosaic (Miniature)—as above, except smaller. Lamps are 5v 60 ma. Body size: .433" w. x 1.15" h. x 1.18" d. Figures .472" high, 100,000 hr. bulb life.

ELFIN® NEON INDICATORS

The Elfin is a cold cathode neon type of presentation, capable of displaying on a single plane. It's small diameter of .413" allows more figures for panel space. Character height: 0.433". Displays 0 to 9 numerals, +, —, decimal point, and some alpha. 9-Segmented

MG-19 has diagonal bars to give better shaped numerals or a + and — sign. MG-17 has 7 segments and 2 decimal points to use as colon. Suitable for DC or pulsed operation.

ALCO® ELECTRONIC PRODUCTS, INC.

Replacement quality you can depend on...

Zenith engineered and produced Color Picture Tubes!

Every Zenith replacement picture tube is made with the same care and engineering skill that go into the color TV picture tubes which Zenith produces as original equipment.

Zenith's uncompromising quality standards—which include tube testing at elevated line voltages for long periods—assure your customers of tubes with greater dependability and longer life.

Be sure. Order genuine Zenith picture tubes— for color or B&W TV—from your Zenith Distributor.

EXCITING SURPRISES FOR YOU—and Your Family! Fun for all!
Get the details at your Zenith Distributor's Parts Department.

Why not sell the best

ZENITH

The quality goes in before the name goes on

Zenith B&W replacement picture tubes are made only from new parts and materials except for the glass envelope which, prior to reuse, is inspected and tested to the same high standard as a new envelope. Zenith color picture tubes may contain used material which, prior to reuse, is carefully inspected, to meet Zenith's high quality standards.

PICTURE TUBES

COLOR and BLACK and WHITE

RCA SILVERAMA® BLACK AND WHITE PICTURE TUBES

NOTICE: RCA Silverama Picture Tubes contain all new parts and materials except for the envelopes which, prior to re-use, are carefully inspected to meet the standards of original new envelopes.

NOTES

Where replacement type is indicated consult RCA Interchangeability Guide for Replacement information.

For replacement purposes of these types electrical and/or mechanical modifications may be required.

NOTE 2: 21AP4 — "RCA receivers with 21AP4 may be converted to 21ZP4C with conversion kit (RCA Part No. 12B202)."**Pin No. 6 (Focusing Electrode)** of the RCA replacement must be connected to Pin No. 11 at the socket. The original tube did not require an external voltage for focus.**RCA HI-LITE "RARE EARTH" COLOR TELEVISION PICTURE TUBES**

RCA Hi-Lite "Rare Earth" Color Television Picture Tubes contain all new parts and materials.

Replacement information is packed with the tube.

Mounting hardware may have to be modified to accept substitution. In some small cabinet receivers substitution may not be feasible.

PAMOTOR

MINIATURE AXIAL FANS

MODELS 4500A & 4550A (Shaded-pole Type) 4 11/16" x 4 11/16" x 1 1/2" • ALL-METAL • LOW-NOISE LEVEL

*Provides 115 cfm with less than 37.5 dB SIL**

- All-metal precision hubs, impellers, and die-cast housings eliminate warping often found in plastic fans.
- Designed for applications in wide variety of electronic apparatus, such as computers, laboratory and office machines, industrial and military communications equipment, industrial control equipment, sound systems, power supplies, telephone equipment, etc.
- Designed to operate continuously at room temperature (25° C) for over 100,000 hours—even at uppermost limit of 55° C, 20,000 operational hours, continuous duty may be expected.
- Delivers more air at a lower noise level, yet priced under similar conventional plastic fans.
- Powerful shaded-pole motor operates with low internal heat rise—efficient inside-out design.
- Hand-fitted proven broached dual-sleeve bearing system assures longer, more reliable operation.
- Weighs just 1 1/4 lbs. and is interchangeable with similar, less reliable 4 1/2" fans.
- Operates over range of 105 to 125 VAC at dual frequency of 50/60 Hz.
- Has Underwriters' Laboratories Inc. Yellow Card Component Recognition Number E41168.
- Accessories available for use with this model include mounting brackets, filter, metal screen assembly, finger guard, plug and cord assembly.

MINIATURE AXIAL FANS

MODELS 4506 and 4556 (Shaded-pole Type)

$1\frac{1}{16}'' \times 4\frac{11}{16}'' \times 1\frac{1}{2}''$ • ALL-METAL • 115 CFM

ball bearing fans for 85° C

ambient temperature operation

Designed for over 20,000 hours of operation at 85° C.

Low noise level of less than 37.5 dB (Speech Interference Level).

Designed to meet UL requirements.

- Offer same performance characteristics as Models 4500 and 4550.
- Standard accessories available include mounting brackets, filter, metal screen assembly, finger guard, plug and cord assembly.

MODEL 4800 (Shaded-pole Type)

$1\frac{1}{16}'' \times 4\frac{11}{16}'' \times 1\frac{1}{2}''$ • ALL-METAL • 70 CFM

Specifically designed for noiseless performance . . . noise level less than 20 dB SIL.

Designed for applications in Hi-Fi/stereo equipment, TV, office copying machines, etc. where noiseless performance is a prime requirement.

Standard-fitted proven broached dual-sleeve bearing system with large oil reservoir ensures longer, more reliable operation.

UL recognition number E41168.

Characteristic	MODEL 4800
Voltage	115 volts
Frequency*	60 Hz
Air Flow	70 cfm
Speed	1650 rpm
Input Power	10 watts
Weight	1 lb. 4 oz.

*This model also operates at 50 Hz.
Additional data available upon request.

MODELS 4700 and 4750 (Shaded-pole Type)

$\frac{1}{8}''$ (DIA.) $\times 1\frac{1}{2}''$ • ALL-METAL • 65 CFM

Low-cost fans for applications where venturi housing is not needed

"Bracket" models save space and weight when equipment arrangement requires as venturi housing. Attach to heat sinks and reduce space requirements. Designed to meet UL requirements.

Characteristic	MODEL 4700	MODEL 4750
Voltage	115 volts	220 volts
Frequency*	60 Hz	60 Hz
Air Flow	65 cfm	55 cfm
Speed	2800 rpm	2500 rpm
Input Power	21 watts	19 watts
Weight	1 lb.	1 lb.

*These models also operate at 50 Hz.
Additional data available upon request.

PAMOTOR

MINIATURE AXIAL FANS

MODELS 8500 and 8550 (Shaded-pole Type) 3 1/8" x 3 1/8" x 1 1/2" • ALL-METAL • 43 CFM

**Ultra-compact . . . 1/8" thinner
than other 3 1/8" fans**

- Unmatched low noise level of 28.8 dB SIL.
- Ideal for tight dimensional applications.
- Standard mounting dimensions for EIA 3 1/2" rack panels.
- All-metal construction ensures longer life in various low-profile electronic equipment.
- UL recognition number E41168.
- Model 8506 ball bearing fan for 85°C ambient temperature operation also available.

Characteristic	MODEL 8500	MODEL 8550
Voltage	115 volts	220 volts
Frequency*	60 Hz	60 Hz
Air Flow	43 cfm	37 cfm
Speed	3200 rpm	2600 rpm
Input	13 watts	13 watts
Weight	1 lb. 2 1/2 oz.	1 lb. 2 1/2 oz.

*These models also operate at 50 Hz. Additional data available upon request.

MODELS 7500 and 7550 (Shaded-pole Type) 6" (DIA.) x 2" • ALL-METAL • 250 CFM

**use one to replace two or more fans
where max. air movement is needed
with low 40.5 dB noise level**

- High air delivery ideal for cooling large enclosures with high resistance to air flow.
- New design of pressure type blades will sustain delivery as high as 200 cfm at .2 inches of water back pressure.
- UL recognition number E41168.

**MODELS 7506/7556, ball bearing fans
for 85° C ambient temperature operation,
also available**

Characteristic	MODEL 7500	MODEL 7550
Voltage	115 volts	220 volts
Frequency*	60 Hz	50 Hz
Air Flow	250 cfm	220 cfm
Speed	3250 rpm	2700 rpm
Input	40 watts	36 watts
Weight	2 lbs. 11 1/2 oz.	2 lbs. 11 1/2 oz.

*These models also operate at 50 Hz. Additional data available upon request.

MINIATURE AXIAL FANS

MODELS 1000A, 1110, and 1300 (Induction Type)

$1\frac{1}{16}" \times 4\frac{7}{16}" \times 1\frac{31}{32}"$ • ALL-METAL • 125 CFM

ultimate in reliability and performance in a $4\frac{1}{2}"$ fan

impedance protected for longer, more efficient operation.

Universal $4\frac{1}{8}"$ mounting makes these models interchangeable with similar, less reliable $4\frac{1}{16}"$ fans.

Powerful inside-out motor is impedance protected.

Standard accessories include mounting brackets, filter, metal screen assembly, finger guard.

Recognition number E41168.

Characteristic	MODEL 1000A		MODEL 1110		MODEL 1300	
Voltage	115 volts	115 volts	115 volts	220 volts	220 volts	220 volts
Frequency	60 Hz	50 Hz	400 Hz	60 Hz	50 Hz	50 Hz
Air Flow	125 cfm	100 cfm	110 cfm	125 cfm	110 cfm	110 cfm

MODELS 2000, 2050, and 2110 (Induction Type)

$1\frac{1}{16}" \times 4\frac{7}{16}" \times 1\frac{31}{32}"$ • ALL-METAL • 130 CFM

highest free air delivery in a $4\frac{1}{16}"$ package

Standard-fitted sleeve bearings ensure reliable performance.

Extremely low internal heat rise extends life beyond that of conventional fans.

Motor windings for motor are uniform, allowing for minimum magnetic field density within the air gap.

Universal $4\frac{1}{8}"$ mounting.

Recognition number E41168.

Accessories include filter, metal screen assembly, finger guard, and mounting brackets.

Characteristic	MODEL 2000		MODEL 2050		MODEL 2110
Voltage	115 volts	115 volts	220 volts	220 volts	115 volts
Frequency	60 Hz	50 Hz	60 Hz	50 Hz	400 Hz
Air Flow	130 cfm	116 cfm	130 cfm	116 cfm	110 cfm

MODELS 3000 and 3050 (Induction Type)

$1\frac{5}{32}" \times 3\frac{15}{32}" \times 1\frac{31}{32}"$ • ALL-METAL • 65 CFM

Matched design and performance in a compact $3\frac{1}{2}"$ fan

Continuous reliable operation in a compact package . . . dynamically balanced motor.

Extremely low-noise level.

Precision hubs, impellers, and die-cast housings.

Efficient inside-out motor design.

Recognition number E41168.

Characteristic	MODEL 3000		MODEL 3050	
Voltage	115 volts	115 volts	220 volts	220 volts
Frequency	60 Hz	50 Hz	60 Hz	50 Hz
Air Flow	65 cfm	58 cfm	65 cfm	58 cfm

TYPE FC MINIATURE CERAMIC LOW-PASS R.F.I. FILTERS

These filters are supplied in hermetically-sealed silver plated cases and meet moisture resistance requirements of MIL-STD-202. Temperature cycling and immersion, vibration and attenuation also conform to MIL-STD-202.

All units are marked with Aerovox part number and working voltage. Complete technical information is contained in Bulletin NPJ-140.

TV-300-FMI
Tunable Filter
\$4.50

DRAKE AMATEUR LOW PASS FILTERS

...have four pi sections for sharp cut-off between 6 meters and
channel 2, and to attenuate xmtr harmonics falling in any TV channel
and the FM band. 52-ohm.

T-1000-LP

\$16.95

rated 1000 watts input, 200 watts
on 6 meters. SO-239 connectors
built-in.

TV-100-LP

\$5.95

rated 100 watts input, 20 watts
on 6. Solder it in or use your own
SO-239's.

RECEIVERS

NEW!

SOLID-STATE PROGRAMMABLE RECEIVER

net

engineering and the recent
development of the dual gate
make possible the first no-compromise, solid-state receiver.

receivers with bipolar transistors which have poor crossmodu-
lation, intermodulation, AGC, and overload performance; the SPR-4 has
handling capabilities superior to the best tube receiver. In addi-
the SPR-4 has all of the advantage of a solid-state design such as
lower consumption, mechanical and thermal stability, reliability, etc.
SPR-4 can be programmed for short wave listening, amateur radio,
factory, broadcasting, marine radio, etc.

FEATURES:

1. Dual gate FET RF amplifier.

2. FETs in signal path for low cross
modulation and overload.

3. Linear PTO with 1 kHz readout.

4. Frequency coverage: 150-500 kHz
plus any 23 ranges between .500
to 30 MHz. Each range is 500 kHz
wide with large overtravel.

5. Normally supplied with xtals for:

6. .5, 1.0, 1.5, 6.0-6.5, 7.0-7.5,
10.0, 11.5-12.0, 15.0-15.5, 17.5-
20.0, and 21.5-22.0 MHz.

7. Power: 115 VAC, 220 VAC, or 12 VDC.

8. Coverage may easily be changed by
adding or changing xtals and range
selector dial.

9. 4 pole xtal filter in first IF (5645 kHz).

10. 4 pole LC filter in second IF (50 kHz).

11. 3 bandwidths: 0.4 kHz, 2.4 kHz, and
4.8 kHz for CW, SSB, and AM.

12. AVC: Fast attack and slow release
for SSB, fast release for AM, fast
or slow release for CW.

13. Built-in speaker.

14. Power: 115 VAC, 220 VAC, or 12 VDC.

15. Transceiver Adaptor (T-4XB)

16. MSx4 Speaker

17. DC Power Cord

18. Extra Crystals per 500 kHz
range

SW-4A INTERNATIONAL SHORT WAVE BROADCAST RECEIVER DIRECT FREQUENCY DIALING **\$299.00**

- Ultra-precision tuning dial accuracy • Also accurately tunes standard AM Broadcast • Crystal lattice filter for adjacent station rejection and good audio frequency response • Dual conversion • Solid state AF output gives low distortion good frequency response • S-meter for signal strength indication • Preselector gives superior sensitivity by peaking antenna and RF stages • Crystal H. F. Oscillator for exceptional stability on all ranges • Amplified AVC — gives constant AF output for all signal strengths.

FREQUENCY COVERAGE — .15-.5, .5-1.0, 1.0-1.5, 6.0-6.5, 7.0-7.5, 9.5-10.0, 11.5-12.0, 15.0-15.5, 17.5-18.0, 21.5-22.0, and 25.5-26.0 megacycles with crystals supplied. These frequencies cover European LF, American MF and International SW Broadcast Bands. **SIZE** — 5½" high, 10¾" wide. Cabinet depth 11½", overall 12¼". **WEIGHT** — 16 lbs.

ACCESSORIES — Models MS-4 Speaker **\$19.95** and AL-4 Shielded Directional Loop Antenna for .5-1.5 MC **\$19.95**. Model AN-5 SW Antenna Kit **\$8.00**.

RF WATTMETER

Reads forward and reflected power directly in watts
(VSWR from nomogram). Two scales in each direc-
tion. Size: 5½" H x 3¾" W x 4" D.

Model	Full Scale	Calibration Accuracy	Price
W-4	200 watts	±(5% of reading + 2 watts)	\$49.50
(2-30 MHz)	2000 watts	±(5% of reading + 20 watts)	
WV-4	100 watts	±(5% of reading + 1 watt)	\$73.50
(20-200 MHz)	1000 watts	±(5% of reading + 10 watts)	

ELECTRIC WAVE FILTERS

Manufactured and Guaranteed to MIL-F-18327C

See UTC High-Q Coils in inductor section 1800 and Transformers in transformer section 5600.

NEW UTC "FLATS"™ ELECTRIC WAVE FILTERS

Designed, Manufactured and Successfully
Tested to Complete
MIL-F-18327C Specifications

These filters meet today's need for flat component configurations, have excellent attenuation characteristics and are ruggedized to Grade 6, MIL-F-18327C. Straight pin terminals and flat construction make these units ideally suited for printed circuit applications. These filters are hermetically sealed in flat metal cases shielded to reduce hum pickup. FP-A case: 2 x 2 x 1/2" h., 2.5 oz. FP-B case: 2 x 1 1/2 x 3/8" h., 2 oz. Suggested stock price: \$42.00 each net.

FHH-200: Flat package high pass filter, source and load 10K ohms. Units are within 1 db up to 300 Hz, 3 db $\pm$ 1 db at 200 Hz, and have an attenuation of at least 40 db at frequencies below 140 Hz. FP-A case. Mil Type: FR6RX33YY1.

FLH-600: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 450 Hz, 3 db $\pm$ 1 db at 600 Hz, and have an attenuation of at least 40 db at frequencies above 800 Hz. FP-A case. Mil Type: FR6RX11YY1.

FLH-5000: Flat package low pass filter, source and load 10K ohms. Units are within 1 db from DC to 4.2 kHz, 3 db $\pm$ 1 db at 5 kHz, and have an attenuation of at least 40 db at frequencies above 6400 Hz. FP-B case. Mil Type: FR6RX11YY1.

FLL-3500: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 3 kHz, 3 db $\pm$ 1 db at 3500 Hz, and have an attenuation of at least 40 db at frequencies above 4500 Hz. FP-A case. Mil Type: FR6RX33YY1.

FLL-18000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 15 kHz, 3 db $\pm$ 1 db at 18 kHz, and have an attenuation of at least 43 db at frequencies above 23 kHz. FP-A case. Mil Type: FR6RX11YY1.

FL-50000: Flat package low pass filter, source and load 600 ohms. Units are within 1 db from DC to 42 kHz, 3 db $\pm$ 1 db at 50 kHz, and have an attenuation of at least 43 db above 64 kHz. FP-B case. Mil Type: FR6RX11YY1.

NEW, LLP-10 & LLP-15, STANDARD LOW FREQUENCY LOW PASS FILTER

Designed, Manufactured and Successfully
Tested to Complete MIL-F-18327C

The LLP-10 low frequency low pass filter has a loss of less than 3 db at 10 Hz and attenuation of more than 40 db at 20 Hz. The LLP-15 low frequency low pass filter has a loss of less than 3 db at 15 Hz and attenuation of more than 40 db at 30 Hz. Both filters have a source and load impedance of 100K ohms. Both are MIL Type FR6RX11FA1. Dim: 2 1/4 x 2 3/4 x 3 1/2" h., 1 1/2 lbs. Suggested Net Price: \$60.00 net.

NEW 400-CYCLE 115 V. LINE FILTERS

Intended for use on 115 v., 400 cps line
to eliminate harmonic distortion.

UTC No. PLF-25 — Gives 150 v. output into 500 ohm load with $\pm$ 1 db, 375-425 Hz. Will attenuate 800 Hz by 30 db; 1200 Hz and higher by at least 50 db. MIL type, FR4RX11NB1. Meets MIL-F-18327C. Size 4 1/4" w x 5 3/4" d. x 5 1/2" h. Weight, 10 lbs. Suggested Net Each. \$66.00

UTC No. PLP-13 — Eliminates harmonic distortion, rejects 60 and 120 Hz, and gives zero phase shift at 400 Hz. Operating into 1000 ohm load, provides 115 v. output at 400 Hz, within $\pm$ 1 db, 375-425 Hz. Attenuates 800 Hz by 15 db; 1200 Hz by 45 db; above 1200 Hz by at least 35 db, 120 Hz by 20 db; and, 60 Hz by 30 db. MIL type FR4RX22-LB1; meets MIL-F-18327C specifications. Size, 3 1/4" w x 4 3/4" d. x 4 1/2" h. Weight, 6 1/2 lbs. Suggested Net Each. \$66.00

FOR FULL LINE OF
STANDARD FILTERS,
SEE UTC PAGE F-2.

ELECTRIC WAVE FILTERS

NEW STANDARD FILTERS

Base 1 1/4 x 1 1/4"
LMI-150 1 3/8" h.,
wt. 6 oz.
LMI-50 2 1/2" h.,
HML-40 wt. 9 oz.

All UTC filters are designed, manufactured and successfully tested to 18327C environmental requirements. The LMI-50 & LMI-150 are Low Pass stage Filters with source and load impedance of 10,000 ohms. Cutoff frequencies: LMI-50 at 50 Hz; LMI-150 at 150 Hz. The LML-500 is a Low Pass with a source and load impedance of 500/600 ohms, cutoff frequency 50 Hz. HML-40 is a High Pass Filter with a source and load impedance of 50 ohms, cutoff frequency is 40 Hz. Suggested net prices are: LMI-50 — LMI-150 — \$31.50; LML-500 — \$39.00; HML-40 — \$42.00. MIL design LMI-50 & LMI-150, FR6RX11YY1; LML-500, FR6RX11YY1; HML-40, FR6RX11YY1.

BROAD BAND FILTER

The FBH-1 — Flat package Broad Band Pass Filter has a source and load of 10K ohms. Units are

within 3 db from 1 kHz to 2 kHz, and have an attenuation of at least 36 db at frequencies below 500 cps and above 4 kHz. FP-C Case. MIL type FR6RX22YY1. Suggested net price: \$54.00.

FBH-10 — Same as FBH-1, except less than 3 db from 10 kHz to 20 kHz, attenuation of at least 36 db below 5 kHz and above 40 kHz. Suggested net price: \$54.00.

FP-C CASE

Height ... 1/2", wt.

LOW FREQUENCY FILTER (BAND PASS & BAND REJECT)

The LBP-10 Low Frequency Band Pass Filter has a 10 Hz center frequency. The filter has 4 terminals so that it can be used as a band pass filter with a 10K ohm load or with a high impedance load, and in addition as a band reject filter. As a Band Pass Filter, the unit is within 3 db at 9.6 and 10.4 Hz. Attenuation 5 & 20 Hz is at least 30 db with the 10K ohms output load and 35 db the 3.3 Megohm load. As a Band Reject Filter, the unit attenuates 10 Hz minimum of 30 db and varies less than 3 db from DC to 7 Hz, and from 10 to 36 kHz. This filter is MIL type FR6RX22FB1. Suggested net price: \$66.00

For size and weight, see FB, UTC Page T-12 Section 5600.

HIGH Q PRECISION INDUCTANCE DECADE

Invaluable instruments for design and experimental work with tuned circuits, wave filters, and equalizers. The low hum pickup toroid coils employ a new permalloy dust core which, combined with special winding methods, provides very high Q, excellent voltage and temperature stability, and high self resonance frequency. The inductance values are laboratory adjusted to better than 1% precision, with calibration noted on base. Not to MIL specs.

DI CASE
Length 4 1/2"

BM & LM
Series

HM Series

INTERSTAGE AND LINE FILTERS

Available in stock frequencies listed below (numerical part of type number is cutoff frequency in Hz). Compact shielded cases hermetically sealed to MIL-F-18327C specs. BMI, LMI, BML cases: $1\frac{1}{2}'' \times 1\frac{1}{2}'' \times 1\frac{1}{2}''$ h.; wt., 6 oz. HMI, HML, LML cases: $1\frac{3}{4}'' \times 1\frac{3}{4}'' \times 2\frac{1}{2}''$ h.; wt., 9 oz. The BMI filters are band pass interstage units designed to operate between a vacuum tube plate (or 10,000 ohms) and a grid. They provide a gain of 2 at center frequency. BTI units are same as BMI, but 10,000 ohms output. BML band pass filters, similarly, work into a grid, but have an input impedance of 500/600 ohms. They provide a gain of 9. HMI filters are high pass interstage units. LMI filters are low pass interstage units. HML filters are high pass with input and output impedance of 500/600 ohms. LML filters are low pass filters with input and output impedance of 500/600 ohms. LLP low frequency low pass filter, loss of less than 40 db at 20 Hz. Source & load 100K ohms.

BPM

HPM
& LPM

MINIFILTERS*

These units provide almost the same characteristics as the standard interstage units listed to the left, although extremely miniaturized. Hermetically sealed to MIL-F-18327C specs. B type case: $\frac{3}{4}'' \times \frac{3}{4}'' \times 1\frac{1}{8}''$ h.; wt., 1 oz. H and L cases: $1'' \times 1'' \times 1\frac{3}{8}''$ h.; wt., $2\frac{1}{4}$ oz. Cutoff frequencies in Hz indicated by type number. BPM units (BAND PASS) have 2:1 gain. Attenuation is approximately 2 db $\pm$ 3% from center frequency, and 35 db per octave as shown. Input 10,000 ohms, output to grid, tapped for 10,000 ohms to provide for transistor circuits. For tube circuits continuity is on grid side, for transistor use continuity is on input side. BPH units (BAND PASS) attenuation less than 3 db $\pm$ 5% from center frequency, and 40 db per octave. Source and load 500 ohms. HPM units (HIGH PASS) are down less than 6 db at cutoff frequency, and more than 30 db at .67 cutoff frequency, 40 db at .6 cutoff frequency. Input and output 10,000 ohms. LPM units (LOW PASS) are down less than 6 db at cutoff frequency, and more than 30 db at 1.5 cutoff frequency, 40 db at 1.65 cutoff frequency. Input and output 10,000 ohms.

TELEMETERING BAND PASS FILTERS

TMN-4 thru
TMN-1.7
 $1\frac{1}{8}'' \times 1\frac{1}{2}'' \times 2''$
Weight 3.5 oz.
TMN-2.3 thru
TMW-70
 $2\frac{3}{4}'' \times 2\frac{3}{4}'' \times 1\frac{3}{8}''$
Weight 1.2 oz.

MNF-4 thru
MNF-5.4
 $1\frac{1}{2}''$ Sq. x
 $\frac{1}{2}''$ high
Weight 1 oz.
MNF-7.35 thru
MWF-70
 $2\frac{3}{4}''$ Sq. x
 $\frac{1}{2}''$ high
Weight $\frac{1}{3}$ oz.

Both TMN and TMW types are designed for 100 K input and output impedance and have an insertion loss of less than 6 db. Four pin hermetic header matches small Winchester socket. TMN filters are down less than 3 db at $\pm 7.5\%$ of center frequency. They are down more than 18 db at $\pm 25\%$ of center frequency. Attenuation is greater than 40 db beyond 1.75 Fc and .58 Fc. TMW filters are down less than 3 db at $\pm 15\%$ of center frequency. They are down more than 20 db at $\pm 50\%$ of center frequency. Attenuation is greater than 40 db beyond 2.5 Fc and .4 Fc. MNF and MWF (Minifilter) provide same performance as filters described above but are extremely miniaturized. Slanted toward use with transistors. Pin terminals ideally suited for printed circuits.

IMMEDIATE DELIVERY ON ALL ITEMS

TELEGRAPH TONE CHANNEL FILTERS

UTC band pass filters for multiplex transmitting and receiving provide maximum stability in miniature sizes. Stock filters cover all standard transmit and receive bands. All units employ 7 terminal header matching subminiature 7 pin socket.

TGR (receiving) & TGT (transmitting) filters are

600 ohms in and

out. They are

down less than

3 db at ± 42.5

Hz from center

frequency.

TGR units are

down more than

30 db at ± 170

Hz. Attenua-

tion is greater

than 15 db at

adjacent channel

crossover.

TGT units are

down more than

16 db at ± 170

Hz. Attenua-

tion is greater

than 7.5 db at

adjacent channel

crossover.

All units are

MIL type FR6RX-

22YY1.

DABURN ASSORTED SPAGHETTI PACKS

25-99' lengths per pack consists of varnished sleeving of assorted sizes and colors.

DABURN Cat. No.	Standard Package
9-07	Pack 25
9-08	25 Packs in Display Carton 1

HOT AIR GUN AND ACCESSORIES

FOR DAFLEX SHRINKABLE TUBING

Daburn No.

HG1 — For SH265, SH275 & SH290 Series
HG2 — For SH400 & SH621 Series

A flameless heat source; light in weight; portable and/or permanent mounting.

ADAPTOR HGA-02

Concentrates heat and allows use of baffle.

**BAFFLE PLATE HGB-01**

For tubing up to 1 1/4" O.D. Made to concentrate hot air.

**DABURN ALL-WAVE ASSEMBLED ANTENNA KIT**

Designed for reception of overseas radio signals & programs. Utilizes the Hertz principle — balanced line consists of:

- 2—30' coils 7/24 copper wire
- 1—40' coil transmission cable
- 1—Center insulator
- 2—Porcelain insulators
- 2—Lead-in strips
- 1—Ground clamp
- 2—Nail-on knobs

DABURN Cat. No.	Standard Package
9-09	All Wave Kit 12
10-09	Nail-on Knob, Glazed 100

**DABURN FIBERGLASS GUY WIRE**

Gives complete isolation for any antenna system. Non-radiating, non-absorbing, no rot, no shrink, no sag. This non metallic guy wire has an overall (PVC) polyvinylchloride jacket.

DABURN No.	Put-Up	Tensile Strength	Color	Nom. O.D.
10-01	100', 500', 1000'	500 lbs.	Green	.125"
10-02	100', 500', 1000'	1000 lbs.	Gray	.218"
10-03	100', 500', 1000'	2500 lbs.	White	.313"

Doubling the cable will double the strength.

ELECTRONIC HARDWARE

SNAP-IN PLASTIC CABLE TIES

Low-cost, efficient ties for binding wire and cables into a single harness. Unique design permits quick adjustment to any size bundle, insures tight fit. Rugged locking arrangement prevents loosening, yet allows easy release. Snap-in button terminals insert into 3/4" chassis hole for positive hold-down. 4 1/4" length. Shpg. wt.: box of 100, 4 oz.; 1000, 4 lbs.

Mfr's Type	Color	Box of 100	Box of 1000	Example
34-454	Red	1.75	1.75	34-454C 34-454M

**HARDWARE AND
FASTENING DEVICES**
PACKAGED HARDWARE
PACKAGED 3 WAYS — TO MEET ALL YOUR REQUIREMENTS

**SHOW OFF
PACKAGE**

All packages are .59 Net. Quantity varies with item. (See listings.)

BLUE-LINE

All packages contain 100 pieces each, unless shown otherwise. Price varies with item. (See listings.)

BULK PACK

Offers greatest economy. Each bag contains 1000 pieces. Price varies with item. (See listings.)

HOW TO ORDER: Simply use correct PART NO. for quantity desired.

NYLON WIRE CLAMP

Rolling and locking action ratchet teeth on the band engage with matching teeth inside the clamp loop. A small, floating wedge, which cannot fall out, holds the teeth together. Slip clamp around cable, insert tongue, pull tight, push wedge in and cut off extra material. It's a permanently locked, neat cable clamp. Available in sizes from 1/8" to 1-3/4" diameter wire bundles. Natural color.

Part No.	Pkg. of 100	1000 or more Per M
BCN-25	9.90	76.55

NYLON FINISHING WASHERS

Molded Nylon Finishing Washers are made to be used with No. 6, 8, 10 and 1/4" countersunk metal or nylon screws. They prevent scratching of instrument and control panels, cover misaligned screws. Can be used as glides, protective feet, bumpers, insulators, spacers. Glossy finish. Natural nylon; special quotations for color coding.

NET PRICES

AMPROBE INSTRUMENT®

DIVISION OF SOS CONSOLIDATED, INC.

ROTARY SCALE MODELS

Offer you these outstanding features. • Only the voltage or current range you select is visible in the unbreakable magnifying window—avoids confusion—provides greater reading speed and accuracy. • On models RS-3, RS-3A, RS-1000 and RS-1007 ohmmeter scale is also visible. • Pointer-lock "freezes" pointer at reading. • Accurate within $\pm 3\%$ full scale reading. • One hand operation.

MODEL	VOLTS, AC	AMPS, AC	PRICE
RS-1A	0-150/600	0-6/15/40/100	\$49.85

TM-63	one	one	—	one	—	one	—	69.85

EXTENDO-LEADS

Ends awkward, 3 handed voltage readings. Eliminates need for someone or something to hold the instrument while test probes are applied to the circuit. VLK-311 for RS except (RS-1000, RS-1007), VLK-355 for Juniors.

Price: \$3.95

PHASE SEQUENCE ADAPTOR

The Model PSA-1 Phase Sequence Adaptor is used to determine the phase sequence of polyphase circuits. When used in conjunction with any AMPROBE model it permits you to determine phase sequence of motors and other electrical equipment using three phase lines up to 550 volts. Price w/ case:

\$12.85

AMPROBE® DECA-TRAN, A50-1

Extends current range 10 times, up to 1200 Amps intermittent, 600 Amps continuous. Price: \$30.50

AMPROBE® ENERGIZER

The Model A-45L ENERGIZER permits current readings on permanently wired low-current electrical equipment by simplifying series connection. It increases the sensitivity of your ammeter 5x or 10x for more precise readings directly at outlets by "splitting" double conductor line cords while the appliance is connected to the line. Capacity 10 amps. Price w/weatherproof pouch: \$7.25

AMPROBE® JUNIOR MODELS

Advanced, precision snap around testers that anyone can afford. These compact Juniors measure voltage, current and resistance (YO and YTO Models) instantly and accurately on easy to read scales. "B" Case available for all Junior models. Has space for Extendo-Leads VLK-355 and Energizer A45L.

YTO MODEL 2 current ranges, 2 voltage ranges, 25 ohms mid-scale.
Price w/test leads \$34.50

MODEL	AMPS, AC	VOLTS, AC
YT0525/100	0-25/100	0-150/600

Y550	0-50	0-150/600

AMPROBE® JUNIOR TEST-MASTER KITS

The AMPROBE Jr. Test-Master Kit consists of a specially designed case that contains one of the YO AMPROBE Jr. voltage testers, an AMPROBE Energizer, battery attachment and test leads.

The YO models are precision instruments that measure voltage, amperage and resistance, instantly and accurately on a calibrated scale. Price: \$39.85

MODEL	3 AMMETER RANGES (full scale) BASIC INST.	2 VOLTAGE RANGES
TM-YO "525"	0-25	0-150/600

The MASTER — 34th Edition • 8

Fast, accurate point ^{to} point circuit testing

PARAGON PRO-GLO Circuit Testers are simple, inexpensive, easy-to-use instruments for checking non-energized circuits. This little pen-size unit accurately checks for polarity, shorts and opens and continuity in circuits with resistance up to 10 ohms.

The PARAGON PRO-GLO tester consists simply of a plastic case containing two AA penlight batteries and a #222 lamp, a pointed probe and a three-ft. lead wire with alligator. The lead wire holds a new probe protector.

Servicemen and home repairmen appreciate the ease of use of this simple tester. Signal light at point of contact eliminates necessity for shifting eyes to read meter. Speed and accuracy of testing is increased. Low cost of device makes it practical for mass distribution in large service centers. Long operating life is assured — probe and battery contact spring are tin-plated beryllium copper, case is high-impact plastic and wire is heavy-duty, flexible test lead.

Paragon Electric Company, Inc.

Subsidiary of American Machine & Foundry Co.

DEALER NET PRICE \$1.66

- FOR SERVICE SHOPS • HOME TESTING • GARAGES • HOBBYISTS
- FARM USES

Probe-Protector Included

New! Vinyl extrusion Probe - Protector glides easily on the cord—can't be mislaid. Slips over Probe when circuit tester is not being used. This prevents accidental contact with metal that could create a circuit thus minimizing unnecessary battery burn-out.

FRAHM® RESONANT REED FREQUENCY METERS

NEW ... 1½", 5, 9 reeds, 50, 60 and 100 cycle Frahm miniature Frequency Meter with metal case, hermetically sealed.

Catalog No. 2997—2½", 11 reeds, 400 cycle Frahm Miniature Frequency Meter with metal case.

Catalog No. 4997-2—3½", 11 reeds, 400 cycle, Frahm Frequency Meter with square plastic case.

Catalog No. 4967—3½", 11 reeds, 60 cycle, Frahm Frequency Meter with plastic case.

3½" meters available in round plastic, or metal (sealed), or round plastic with square bezel. Portable instruments available in all ranges shown with 3½" cases.

15 TO 1500 CPS (SPECIAL UP TO 1700 CPS) 2 TO 122 REEDS. MOLDED PLASTIC OR METAL CASES. SEALED IF REQUIRED. 1½" TO 8½" • PANEL MOUNTING OR PORTABLE

first resonant reed instrument in the U.S.A. introduced 50 years ago by James G. Biddle. We have maintained this leadership ever since, and place at your service the greatest knowledge of materials, processes, and controls—the finest facilities to produce quality instruments for unfailing accuracy and long life.

Basic specifications are shown in the table at right.

Specialized instruments will be made to meet your requirements.

Write or phone if you have applications which require special modifications of range, methods of mounting, scale graduations or other design characteristics.

For standard specs and prices write or phone for BULLETIN 32 REM.

Voltagess 100 to 150 v—D.C. resistance 100 ohms per volt. Instruments meet MIL Specifications. Cases meet ASA standard diameter dimensions.

LUBRI-TACT® RHEOSTATS AND CARBON PILE RHEOSTATS

Seventy-six standardized ratings available in 8", 10", 16" and 20" sizes. A variety of special non-inductive, double and graded types and Compression Carbon Rheostats also available. Write for Bulletin 41 REM.

The New Look!

3½" FREQUENCY METER

Available with all 5, 7, 9, 10 and 11 reed instruments listed in our Bulletin 32. A handsome addition to any modern panel at no additional cost.

DIELECTRIC TEST SETS

From 5 to 150 kv, both a-c and d-c. Excellent safety features and output voltage regulation.

For information on all ranges—Request file 22 REM.

CORONA TEST EQUIPMENT

For measuring corona starting and extinction voltage, apparent corona charge, relative corona current.

... for use in non-destructive or breakdown dielectric tests on electrical insulating materials, individual insulation structures and insulation of electrical equipment. Write for Bulletin 66 REM.

JAMES G. BIDDLE CO.

Beckman®

TEST AND

RESISTANCE DECADES Model DR Series

High Precision and Stability — Low Zero Resistance — Long Life Switches

DR units provide convenient selection of precise resistance values. Typical applications are found in the areas of circuit design in simulation of various factors and as standard in bridge-type measurements.

Standard units are available with 3, 5, or 7-dials. Each decade inserts a precise ohmic resistance in series with the terminals. The basic

ohmic value of any decade may be multiplied by factors of 0, 1, 2, 3, thru 10 by setting at the appropriate step. Switches are 12 360-degree type. Actual resistance is the zero-resistance and indicated resistance. DR units provide zero-resistance of less than 0.003 ohm per decade.

Model No.	Maximum Resistance	Decade Steps	Accuracy	Overall Dimensions	Weight Lbs.		
					Net	Ship	
DR-4D	1,110	10 x (1+10+100)	±0.25 & ±0.1%	8 x 5½ x 4½	4	6	\$
DR-50D	11,111	10 x (0.1+1+10+100+1K)	±0.25 & ±0.01%	9 x 6 x 4½	5	7	
DR-51D	111,110	10 x (1+10+100+1K+10K)	±0.25 & ±0.1%	9 x 6 x 4½	5	7	
DR-52D	1,111,100	10 x (10+100+1K+10K+100K)	±0.1%	9 x 6 x 4½	5	7	
DR-70D	1,111,111	10 x 0.1+1+10+100+1K+10K+100K)	±0.25 & ±0.1%	17¼ x 5 x 4½	6	8	
DR-71D	11,111,110	10 x (1+10+100+1K+10K+100K+1M)	±0.25 & ±0.1%	17¼ x 5 x 4½	6	8	

WHEATSTONE BRIDGES Model RN

Universally used for the measurement of all types of resistance devices and circuits where high accuracy is required. Models available for performing Murray-Varley Loop tests. Decade accuracy essentially ±0.1%, ratios are ±0.05%. May also be used as a 4-dial precision decade resistance.

Model	Total Resistance of Decade	Ratio Dial Settings	Circuits	Dimensions
RN-1	9 x (1+10+100+1000)	.001, .01, .1, 1, 10, 100, 1000	—	9"8"x6½"
RN-2	9 x (1+10+100+1000)	.001, .01, .1, 1, 10, 100, 1000, M10, M100, M1000	Murray & Varley	9"8"x6½"
RN-3	10 x (1+10+100+9(1000))	1/1000, 1/100, 1/10, 1/9, 1/4, 1/1, 10/1, 100/1, 1000/1, M10, M100, M1000	Murray & Varley	9½"x8"x6½"

Model L MEGOHMMETERS

Type L. Megohmmeters are used for both laboratory and high speed production testing of motor and transformer winding insulation, cable insulation, high value resistors, capacitor insulation, and for the measurement of surface and volume leakage of insulating materials. These instruments meet the requirements for testing insulation resistance in accordance with ASTM D-257, and Federal Specification LP-406B, Method 4041.

Model	Test Voltage	Resistance Range		Power Consumption	Weight Lbs.		Size
		Low	High		Net	Ship	
L-4B	200 or 500 fixed	1 meg. 2.5 meg.	100,000 meg. 250,000 meg.	50 watts	14	17	15"x8"x10"
L-6C	100 to 600*	1 meg.	100,000 meg.	80 watts	15	18	15"x8"x10"
L-7	100 to 600*	1 meg.	5 x 10 ¹³ ohms	75 watts	20	24	8"x10½"x11½"
L-8	10 to 1000**	10 ⁵ ohms	10 ¹⁶ ohms	35 watts	18	22	7½"x11"x13"

* Continuously variable, built-in voltmeter for accurate setting.
** Continuously variable, selectable by switch.

MEASURING INSTRUMENTS

KILOVOTMETER Measures 100,000 volts AC or DC

Large rugged 6 inch precision mirror scale meter, ideal for use in lab or field testing. Completely transistorized with stabilized anti-drift circuitry resulting in sensitivity in the order of a few micro-amperes. Battery operated unit using long life, self-contained mercury batteries. Panel mounted trimmers provide for recalibration when required.

spike bypass circuitry and a novel automatic voltage coefficient compensator for the multipliers. Special high voltage probes supplied with the instrument. The low voltage probe is used on the 5 and 10 V range with the larger high voltage probe used in the higher ranges. Accuracy of the basic instrument is $\pm 1\%$ of full scale on DC, full scale on 60 Hz. The probe accuracy is $\pm 2\%$ on the 5 V range and $\pm 4\%$ on the 50 and 100 KV range.

RANGES: 0 to 5,000/10,000/50,000/100,000 volts DC or 60 Hz AC. Model 50-AC/DC kilovoltmeter is supplied complete with high and low voltage probes. Two Mallory TR-135R mercury cells are also supplied power source.

\$20.00 complete, including probes and batteries.

INSULATION TEST SETS

AC or DC up to 40 kV

Used in testing insulation where both applied voltage and leakage currents may be read simultaneously. Test sets provide voltage outputs of AC only, DC only, or a combination of AC/DC. Metering accuracy is $\pm 3\%$. Automatic current limiter action prevents damage to instrument or sample.

The sets are designed for portability and are recommended for bench or field measurements.

Model	Voltage	Output	Current Meter	Price
3000-AC	0 to 3kV	AC	10 ma	\$200.00
3000-AC/DC	0 to 3kV	AC/DC	10 ma	230.00
1000-AC	0 to 10kV	AC	10 ma	275.00
1000-AC/DC	0 to 10kV	AC/DC	10 ma	330.00
2500-DC	0 to 25kV	DC	100 μ a	400.00
4000-DC	0 to 40kV	DC	50 μ a	600.00

Model P-2B VOLTAGE BREAKDOWN TESTER

Model P-2B Voltage Breakdown Tester furnishes adjustable AC or DC voltage for safely and accurately determining breakdown capability of capacitors or other insulating materials. The unit is self-contained, metered HV power supply which can be adjusted to desired level by the main control knob on the front panel. The user merely inserts the probe into either the AC or DC connector. Trip-points are settable with recessed front-panel controls; when the current reaches a pre-set point, high voltage is automatically de-energized. To re-energize, a reset switch must be depressed. When the trip point has been exceeded, a panel light becomes lit. The trip point can be set to as low as 0.5 mA.

Voltage Range*		Current		Input Power Required	Price
AC (RMS)	DC	AC	DC		
0-3000	0-4000	7mA	5mA	120/240 V, 50-60 Hz	\$315.00

* Accuracy $\pm 5\%$

Model LRO-1 LOW RESISTANCE OHMMETER

The Model LRO-1 Low Resistance Ohmmeter is useful for the measurement of resistance of sensitive relay contacts, fuses, bus-bars and connections, rail joints, pipe or conduit, switch contacts, transformer windings, motor windings, bonding, grounding and similar applications. The current through the unknown resistance never exceeds 110 ma.

PRICE \$175.00

FEATURES: Extreme accuracy for the most critical measurements • Entirely self-contained, including $1\frac{1}{2}$ volt flashlight battery • Ranges: .1 ohm, 1 ohm and 10 ohms • 100 meter scale divisions • Accuracy of plus/minus $1\frac{1}{2}\%$ on LRO-1 based on full scale values. • Full Scale Readings • Maximum current through piece under test = 0.11 amp.

Other electrical test equipment manufactured by Beckman Instruments, Inc., Cedar Grove Operations can be found in current editions of the MASTER. For complete technical details and specifications on test equipment listed here and others request a copy of Catalog RM-68.

DESCO* Circuitracer* GIVES YOU A 3-IN-1 ELECTRICAL TEST LABORATORY

Satisfaction Unconditionally Guaranteed

MODEL CT1-1

Weights only 2 1/2 ozs.

LIST \$5.95

DON'T SEND A MAN TO DO A BOY'S JOB!

Are the technicians in your laboratories and shops using expensive meters and instruments for sample continuity and voltage checks? Speed up production through the use of the tool specifically designed for this application. A meter should be used only when the value of voltage, resistance or current must be known. Under any other conditions a Circuitracer will provide the required information faster and easier than expensive, bulky meters.

CIRCUIT TESTING WITH A CIRCUITRACER IS FASTER because the signal light is in the tip at the point of contact. This makes it possible to determine the existence of a circuit or voltage without removing the eyes from the test point to read a meter.

SAVE METER REPAIR MONEY BY USING DESCO CIRCUITRACERS. An overvoltage across a meter usually results in extensive damage which takes the meter out of service until repaired or replaced. The worst that can happen to your Circuitracer is a burned out lamp that can be replaced by the operator in less than a minute. Total cost, ten or fifteen cents for the lamp!

*T.M. Reg.

The CIRCUITRACER is the only electrical tester (other than expensive meters) that can test dead circuits, low voltage live circuits AND high voltage live circuits. It is made of the finest materials available and is designed for long life.

INSURE CONNECTOR RELIABILITY

Manual probing of harness connectors while circuit testing can damage connectors and impair reliability. Desco Test Probe Adapters were developed to provide a test fitting identical to the pins and sockets in "AN" connectors being tested. They make the same electrical and mechanical contact as the mating connector, and insure against scratching, bending and warping.

The adapters are made in three sizes to fit connectors using #12, #16 and #20 wire gauges. The sockets are gold plated copper with a brass sheath which retains a beryllium copper spring. The pins are stainless steel to insure long life. All are made to rigid MIL-SPECS. The adapters will fit Desco Jumper Wires and the Desco Circuitracer* Tester interchangeably.

THE ULTRA LOW CURRENT

Trantracer*

MODEL TR200 LIST \$12.75

The Trantracer* checks continuity by sending less than 50 micro amperes through the circuits to prevent damage to solid state junctions and micro watt sensitive elements. Continuity is established as Go — No Go through circuit resistances of up to 400,000 ohms.

Maximum voltage applied to very high resistance circuits is 2 volts, low resistance circuits normally see millivolts and micro amperes.

MEGOHMMETERS

Freed can supply a complete range of insulation resistance measuring equipment with fixed and variable d.c. test voltages from 5 to 5000 volts. Insulation and leakage measurements can be made on transformers, motors, cables,

electronic assemblies and components, dielectric materials, electrical appliances and tools, capacitors and resistors.

Type	Resistance Range	Test Voltage	Accuracy	Power Requirements	Size and Weight
1620	0.1 to 4,000,000 megohms 1 to 2,000,000 megohms @ 500 volts	Variable 50 to 1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15" x 9" x 7½" 24 lbs.
1620-A	0.01 to 4,000,000 megohms 0.1 to 200,000 megohms @ 50 volts 1 to 2,000,000 megohms @ 500 volts	Variable 5-100 volts d.c. 100-1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15" x 9" x 7½" 24 lbs.
1620-B	1 to 2,000,000 megohms 10 to 2,000,000 megohms @ 2500 volts	Variable 250-2500 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15" x 9" x 7½" 24 lbs.
1620-C	All features same as Type 1620 with additional circuitry for capacitor measurements	Variable 50 to 1000 volts d.c.	±5% at full scale	105-125 volts 50-60 cycles	15" x 9" x 7½" 24 lbs.
1620-D	0.01 to 40,000,000 megohms 0.1 to 2,000,000 megohms @ 50 volts 1 to 20,000,000 megohms @ 500 volts	Variable 5-100 volts d.c. 100-1000 volts d.c.	±5% at full scale except highest range ±10%	105-125 volts 50-60 cycles	15" x 9" x 7½" 25 lbs.
1020-C	0.1 to 2,000,000 megohms 0.1 to 200,000 megohms @ 50 or 100 volts d.c. 1 to 2,000,000 megohms @ 500 volts d.c.	Fixed 50, 100, 500 volts Regulated	±3% all ranges except highest range ±5%	105-125 volts 50-60 cycles	9½" x 10½" x 8" 18 lbs.
1020-D	0.1 to 2,000,000 megohms 0.1 to 200,000 megohms @ 100 or 200 volts d.c. 1 to 2,000,000 megohms @ 500 volts d.c.	Fixed 100, 200, 500 volts Regulated	±3% all ranges except highest range ±5%	105-125 volts 50-60 cycles	9½" x 10½" x 8" 18 lbs.
* 266	0.6 megohm to 500 teraohm @ 500 v. 0.6 megohm to 100 teraohm @ 100 v.	Fixed 100-500 v.d.c. Regulated	± 5% at full scale	105-125 Volts 50-60 Hz	11½" x 9" x 9" 18 lbs.
* 668	0 to 20,000 megohms @ 1000 v 0 to 50,000 megohms @ 2500 v 0 to 100,000 megohms @ 5000 v	Fixed 1000-2500 5000 v.d.c.	±2.5% of scale length	battery operated transistor supply built in charger	16" x 12½" x 6½" 23 lbs.
2030-A	10 to 2,000,000 megohms	Fixed 500 volts d.c.	±5% full scale	battery operated transistor supply	6" x 8" x 4" 8 lbs.
2030-B	1 to 20,000,000 megohms	Fixed 500 volts d.c.	±5% full scale	battery operated transistor supply	6" x 8" x 4" 8 lbs.
2030-C	1 to 2,000,000 megohms	Fixed 50 volts d.c.	±5% full scale	battery operated transistor supply	6" x 8" x 4" 8 lbs.
2030-D	1 to 2,000,000 megohms	Fixed 100 volts d.c.	±5% full scale	battery operated transistor supply	6" x 8" x 4" 8 lbs.
2030-E	1 to 2,000,000 megohms	Fixed 200 volts d.c.	±5% full scale	battery operated transistor supply	6" x 8" x 4" 8 lbs.
* 667	0 to 10,000 megohm	Fixed 100-250-500 1000 v.d.c.	± 2.5% of scale length	battery operated transistor supply	8½" x 4½" x 5" 4½ lbs.

Rack type available — 1620 series 19" x 10½" x 9½"
1020 series 19" x 7" x 9½"

* Norma Instruments, Freed exclusive U.S. agent.

MEGOHMMETER - NO. 1650

NEW

The Type 1650 Megohmmeter is a versatile ultra high resistance measuring instrument providing variable test voltages from 10 to 1000 v.d.c. Ground and guard terminals are provided for measurement of grounded and ungrounded two or three terminal components. Provision for pre-charging and discharging capacitors is incorporated in the instrument.

Specifications: Test Voltage: 10-1000 v.d.c. — Resistance Range: 50 KΩ to 200 TΩ — Operating Voltage: 105-125 volts, 50-60 Hz — Size and Weight: 11" x 10" x 8" approx. 12 lbs. — Price: \$465.00.

MEGOHMMETER - NO. 2030-G

NEW

The new Type 2030-G Megohmmeter is a portable re-chargeable battery operated high insulation resistance measuring instrument. Battery operation provides stable isolated resistance measurement capability not affected by leakage path through the power lines. Five commonly used test voltages are available from 50 to 500 volts.

Specifications: Test Voltages: 50, 100, 200, 250, 500 v.d.c., ±5% — Resistance Range: 50 KΩ to 100 teraohms in eight ranges: 50 v., 50KΩ to 10 TΩ, 100 v., 100 KΩ to 20 TΩ, 200 v., 200 KΩ to 40 TΩ, 250 v., 250 KΩ to 50 TΩ, 500 v., 500 KΩ to 100 TΩ — Resistance Accuracy: ±5% at full scale to 1 teraohm, ±10% above — Operating Voltage: Re-chargeable batteries — Size and Weight: 11" x 10" x 8", approx. 10 lbs. — Price: \$345.00.

NON-DESTRUCTIVE MEGOHMMETER

NEW

The Type 1625 Non-Destructive Megohmmeter provides three modes of insulation resistance testing: a manual voltage control megohmmeter; an automatic line ramp voltage; and an adjustable leakage current for non-destructive dielectric testing of components. The non-destructive feature will operate in the automatic ramp mode or by manual voltage control. Test voltage is removed from the unknown in milli-seconds when leakage current exceeds the preset value. A voltmeter indicates the test voltage at disconnect and will hold the reading until reset.

Specifications: Test Voltage: Manual or Ramp controlled, 50-1000 v.d.c. — Resistance Range: 0.1 to 4,000,000 megohms, 1 to 2,000,000 megohms at 500v. — Resistance Accuracy: ±5% at full scale — Leakage Current: 15 microamps to 3 milliamps — Operating Voltage: 105-125 volts, 50-60 Hz — Size and Weight: 15" x 9" x 7½", 26 lbs. — Price: \$460.00.

INCREMENTAL INDUCTANCE BRIDGES

Direct in-line readings of inductance and conductance of iron core component at audio frequencies with or without superimposed direct current. The bridge uses the Owens circuit with provisions for measuring the series or parallel inductance and conductance of the unknown inductor; five precision resistance

and capacitance decades are provided to indicate these values. "Q" or storage factor can be measured as the product of the inductive reactance and the conductance.

Type	Inductance Range	Conductance Range	Frequency Range	D.C. Current	Accuracy	Dimensions and Weight	Price
1010-A	1111.1 h to 1 mh 5 decades 1.1 h to 1 μ h 2 decades	0.015 μ mho—100 mho "Q" = 600 max @ 100 cycles	20 cycles to 10 KC	up to 2 amperes	$\pm 0.5\%$ to 5 KC $\pm 2\%$ to 10 KC	21 $\frac{3}{4}$ " x 17 $\frac{1}{2}$ " x 15 $\frac{1}{4}$ " 50 lbs.	545.00
1210-A	111.1 h to 100 μ h 5 decades 0.11 h to 0.1 μ h 2 decades	0.15 μ mho—1000 mho "Q" = 600 max @ 100 cycles	20 cycles to 10 KC	up to 15 amperes	$\pm 1\%$ to 5 KC $\pm 3\%$ to 10 KC	21 $\frac{3}{4}$ " x 28" x 15 $\frac{1}{4}$ " 80 lbs.	825.00
1110-C	111.1 h to 100 μ h 5 decades 0.11 h to 0.1 μ h 2 decades	0.15 μ mho—1000 mho "Q" = 600 max @ 100 cycles	20 cycles to 10 KC	up to 30 amperes	$\pm 1\%$ to 5 KC $\pm 3\%$ to 10 KC	21 $\frac{3}{4}$ " x 33 $\frac{1}{4}$ " x 15 $\frac{1}{4}$ " 100 lbs.	1250.00

IMPEDANCE & ADMITTANCE BRIDGE

An audio frequency bridge for measuring the complex impedances of inductors, transformers, filter networks and capacitors.

Type	Frequency Range	Impedance and Admittance	Accuracy	Maximum Applied Voltage	Dimensions and Weight	Price
1120	20 to 20,000 cycles	XL, XC and R up to 1000 ohms, BL, BC and G up to 1000 microhms	R: $\pm 1\%$ G: $\pm 2\%$ X: $\pm 1\%$ up to 5 KC B: $\pm 1\%$ up to 5 KC	125 Volts	10 $\frac{1}{2}$ " x 12" x 12" 25 lbs.	455.00

UNIVERSAL BRIDGE

The Freed Type 1150-A Universal Bridge offers the laboratory a combination of eight bridges in one instrument. This bridge will measure the reactive and resistive component of impedances, capacitance, resistance and phase angle.

In the Hay and/or Owen bridge configuration the incremental permeability of an inductance can be measured.

Type	Inductance Range	Capacitance Range	Resistance Range	"D" Hay Bridge	Price
1150-A	5 μ h 1110 h	5 pf-10 mf	0.05 Ω -1 M Ω	0.001-10 Q = 0.1-1000	825.00

Accuracy Inductance $\pm 0.5\%$ up to 1 KC. $\pm 2\%$ to 10 KC. Capacitance $\pm 1\%$ @ 1 KC. "D", "Q" $\pm 5\%$ @ 1 KC. Resistance (ac.) $\pm 1\%$ @ 1 KC.				Dimensions and Weight 21 $\frac{3}{4}$ " x 24 $\frac{1}{2}$ " x 17" 65 lbs.	

INDUCTANCE COMPARISON BRIDGE

A complete production unit for comparing transformer and inductor impedances under dynamic conditions against a standard resistor. The instrument has a self-contained metered 500 Ma. d.c. supply, metered 135 volt a.c. source and a direct

reading percentage deviation indicator, provision for connecting external test frequencies up to 10 KC. is provided.

Type	Inductance Range	Deviation Range	Test Frequency	D.C. Current Range	Dimensions and Weight	Price
1870	25 mh - 100 h	$\pm 20\%$, accuracy 1% $\pm 30\%$, accuracy 5%	60-10,000 cycles	0.5 ma., 0-25 ma., 0-100 ma., 0-500 ma.	22" x 19 $\frac{1}{2}$ " x 15" 150 lbs.	550.00

COMPARISON & LIMIT BRIDGE

A rapid and convenient method for laboratory or production testing of resistors, capacitors and inductors. Components may be sorted for tolerances up to $\pm 20\%$ or selected in matched pairs.

Type	Inductance Range	Capacitance Range	Resistance Range	Test Frequency	Accuracy	Dimensions and Weight	Price
10-A	10 μ h-100 h	10 Pf-100 mf.	1 Ω -20 M Ω	50 or 60 cycles 1 KC-10 KC	$\pm 0.1\%$ on 5% range	10 $\frac{1}{2}$ " x 12" x 12" 17 lbs.	350.00

NULL DETECTORS

Sensitive null detectors for bridge measurements, with self contained selective filters to limit the amplifier characteristics at various bridge measuring frequencies.

Type	Sensitivity	Frequency Range	Filter	Power Requirements	Dimensions and Weight	Price
1140-B	10 μ volts @ 1 KC for 15% meter deflection filter in	20 to 20,000 cycles	Fixed 60, 400, 1000 cycles Adjustable $\pm 5\%$ of center Other frequencies available	105-125 volts 50-60 cycles	Cabinet 12" x 8 $\frac{1}{2}$ " x 10" — 18 lbs. Rack—19" x 6" x 10"	250.00
2076	1 μ volts @ 1 KC for 15% meter deflection filter in	20 to 20,000 cycles	Fixed 60, 400, 1000 cycles Adjustable $\pm 5\%$ of center Other frequencies available	Transistorized Battery operated	Cabinet—8" x 6" x 8" Rack—19" x 5 $\frac{1}{4}$ " x 8"	295.00

NULL DETECTOR — VACUUM TUBE VOLTMETER

Designed primarily for a.c. bridge measurements, a dual purpose instrument for indicating bridge balance and the a.c. excitation across the unknown.

Type	Null Sensitivity	Frequency Range	Filter	Power Requirements	Dimensions and Weight	Price
1210-B	10 M volts @ 1 KC for 15% meter deflection	20-20,000 cycles	Fixed 60, 400, 1000 cycles provision for other frequencies	105-125 volts 50-60 cycles	*21" x 12" x 13" 37 lbs.	350.00
	Voltage Range	Input Impedance	Frequency Range	Accuracy	Rack	
	0.1 to 150 volts ac. 0.15-1.5-15-150 volts full scale	500 K Ω in parallel with 25 PF.	20 to 20,000 cycles ± 1 db	2% of full scale	19" x 8 $\frac{3}{4}$ " x 9 $\frac{1}{2}$ "	

D.C. SUPPLY

A constant voltage transformer regulated current source designed for use with the Freed Incremental Inductance Bridges. Solid state bridge rectification, L-C

filters and low internal impedance provides good current regulation with a minimum of circuit complexity.

Type	Current Ranges	Voltage Ranges	Regulation	Power Requirement	Dimensions and Weight	Price
1170-A	4 ranges, 0-5, 25, 100 and 1000 milliamperes	Maximum no load voltage. 1000 Ma, 270V, 100 Ma, 270V, 25 Ma, 85 V, 5 Ma, 48 V	$\pm 1\%$ for line variation 105-125 V	105-125 volts 60 cycles	19" x 10 $\frac{1}{2}$ " x 13 $\frac{1}{2}$ " 66 lbs.	350.00

LOW FREQUENCY "Q" INDICATORS

Direct indication of "Q" at low frequencies, inductance, distributed capacity, impedance and dielectric loss can also be measured. Instrument may be used to study the magnetic properties of iron core material for stability as a function of applied voltage and losses as a function of the frequency.

Two units are available, the 1030-A indicates "Q" as π product of meter readings multiplied by dial settings.

Type	Test Frequency	Q Range	Accuracy	Test Voltage	Power Requirements	Dimensions and Weight	Price
1030-A	20 cycles to 200 K.C.	1-1000	$\pm 5\%$ 20 cycles to 50 KC— to 200 KC at reduced accuracy	Voltage to series circuit, 0.01 to 10 volts voltage across coil variable to 100 volts	105-125 volts 50-60 cycles	21" x 23" x 15" 120 lbs.	1250.00

NON-DESTRUCTIVE AC/DC INSULATION TESTERS

The Freed Series 3000 Non-destructive Insulation Testers feature adjustable leakage current which may be preset for non-destructive dielectric testing of materials and components. Voltage is removed from the test sample when preset current is exceeded. A memory voltmeter will indicate voltage when preset current is removed from test sample and hold reading until reset. Manually variable test voltage.

Specifications: Test Voltage: Model 3000 — 0-3000 v. A.C. RMS/D.C., Model 3001 — 0-5000 v. A.C. RMS/D.C. — Preset Leakage Current: 15 microamps to 5 milliamps — Operating Voltage: 105-125 volts, 50-60 Hz — Size and Weight: 21" x 15" x 10"; 58 lbs. — Price: Type 3000 — \$350.00, Type 3001 — \$375.00.

RAC-1.5/3

DISTORTION METER

The type 1970 Distortion Meter is a wide range low input impedance instrument, designed with passive circuitry resulting in high stability, low residual distortion and hum levels.

Type	Frequency Range	Input Impedance	Input Voltage	Sensitivity	Dimensions and Weight	Price
1970	20 cycles to 1 megacycle	75-150 300-600	1 to 200 volts	Distortion level of 0.02% for 1 volt input	19" x 10½" x 12" 30 lbs.	525.00

A.C. LINE REGULATOR

A distortion free 60/400 Hz electromechanical a.c. line regulator. Features a tubeless fast response phase reversible magnetic amplifier preceded by a transistor comparison amplifier with zener reference.

Type	Nominal Input Voltage-Frequency	Output Voltage	KVA Rating and Regulation Range	Regulation Accuracy	Response Speed Volts/sec.	Dimensions and Weight	Price
R.A.C. 1.5/3	115 Volts 60 or 400 Hz	Adjustable 110-120 volts	3 KVA for ± 10% regulation 1.5 KVA for ± 20% regulation	± 0.25% for ± 10% regulation range ± 0.5% for ± 20%	10@ ± 10% 20@ ± 20%	19" x 7" x 13" 45 lbs.	450.00

DECADE CAPACITORS

The Freed series of Decade Capacitors cover a wide range of values and can be supplied as individual decades from 0.0001 PF. per step to 1 mf. per step or in

various combinations of assembled decade boxes. All capacitors are non-inductively wound and heat treated for stability.

Type	Total Capacity	Dielectric	Dissipation Factor	Accuracy	Dimensions and Weight	Price

*Type 1164 inductors are wound on special nickel alloy laminated cores.

Inductance per step:	1 mh	10 mh	100 mh	1 h	10h
Nominal Accuracy:	±2%	±1%	±0.5%	±0.25%	±0.25%

*Maximum Q depending on inductance value and a.c. voltage across coil.

PHASE SEQUENCE INDICATOR

Model 206 phase sequence indicator is a rugged instant reading instrument for determining the proper connections of motors, meters and relays operating in a 3 phase system. Unit is supplied with permanently connected control leads and operates over a voltage range of 80 to 400/500 volts, 16 to 400 Hz. Weight: 8 oz.; Dimensions: 2½" dia. x 1" thick. Complete with leather carrying case. Price: \$29.50.

ELAPSED TIME METER

Model 1900 is a rugged synchronous drive elapsed time indicator which indicates hours to 9999.9. Operates on 117 volts, 60 Hz; power consumption 1 watt. Mounts in a 1" x 2" opening. Price: \$14.50.

SHORTED TURNS INDICATOR

Type 134 shorted turns indicator is a high sensitivity instrument which will detect the presence of one or more shorted turns in a coil using up to #44 wire. Eddy current losses are minimized by the use of a very low frequency built in test oscillator. The instrument will test most types of audio, power, IF chokes, relays and other coreless coils. Power requirement: 110 Volt, 60 Hz; Wt.: 13.5 lbs.; Dimension: 11" x 9" x 10"; Price: \$395.00.

TRANSFORMER RATIO METER

Type 227 will measure transformer ratio of 1 to 1011 in three decade ranges with an accuracy of 0.1%. The instrument can also be operated as a ratio comparison tester with a deviation range of ±1%. Power requirements: 115 volts, 60 Hz; Size 17" x 13" x 6"; Wt.: 25 lbs.; Price: \$925.00.

*Norma Instruments, Freed Exclusive U.S. Agent.

PANEL METERS

BIG LOOK

AC voltmeter.

HORIZON LINE

Handsome, easy-to-read meters in two styles for all panel and control applications. All DC meters have self-shielded movement with pivot and jewel or taut-band suspension. Taut-band designs give great resistance to shock and increased sensitivity. Zener-diode, expanded-scale voltmeters available for improved narrow-range accuracy on $3\frac{1}{2}$ " and $4\frac{1}{2}$ " sizes. Snap-on, snap-off covers on meters. All types meet ASA Specification C-39.1.

Accuracy: $\pm 2\%$ FS, all DC and AC iron vane; $\pm 3\%$ FS, AC rectifier type (with 60-cycle sine wave at 25°C); $\pm 0.5\%$ of midspan, expanded-scale types. **Overload:** 20% momentary and sustained, voltmeters; 10 times rated current for 10 consecutive intervals of $\frac{1}{2}$ -sec. with 1-min. interval between successive applications, momentary; 20% for 8 hours, sustained, ammeters. **Scale:** Pivot and jewel, 90° rotation; taut-band, 100° .

Insulation: 2600 V rms hi-pot for all but $1\frac{1}{2}$ " models (1600 V rms). **Response Time:** Meet or exceed ASA requirements: 3 sec. max. for microammeters; 2 sec. max. all other DC ratings; 2.5 sec. max. AC ratings. **Damping:** 40% max. overshoot; 2.5 min. damping factor. **Burden:** 5 amps, 0.5 VA, 0.5 power factor for AC ammeter; unity power factor,

BIG LOOK PANEL METERS

Accurate, quick reading with wide, border-to-border scales; free from shadows. Most popular meter design with low-profile, easy-to-read sense. Aluminum frame holds reverse reflections to a minimum. Big, bold numerals over cleanly marked divisions for fast reading. Tapered pointers assure high accuracy. Taut-band suspension provided on all models except $1\frac{1}{2}$ " size. Standard $2\frac{1}{2}$ " and $3\frac{1}{2}$ " models come with sealed cases to protect against hair, dust, chemicals or other foreign particles. Shelf-shielded DC mechanisms; snap-on, snap-off covers.

§Or AW-91. †Or AO-91. ‡Or AO-92. *Back-of-panel and front-of-panel, respectively.

HORIZON LINE PANEL METERS

Distinctive, low profile design for sophisticated styling. Best read with swept-back windows to deflect light from line of sight. Both $3\frac{1}{2}$ " and $4\frac{1}{2}$ " meters may be mounted semi-flush or back-of-panel, recessed, face silhouetted by half-bezel frame to conserve space and in readability. DC types have core-magnet d'Arsonval movement with and jewel, or taut-band suspensions; self-shielded for use on any Zener-diode, expanded-scale voltmeters available. Snap-on, snap-off supplied on $4\frac{1}{2}$ " size.

4" BIG LOOK AC ammeter.

Mark of General Electric Co.

* Do not have sealed terminal studs.

* With external magnetic shield assembled to meter base.

GENERAL ELECTRIC

PANEL METERS

NEW 185 SERIES EDGEWISE METERS

Slim, miniature design can be mounted individually or in space-saving clusters. Choice of horizontal or vertical placement. Flush sides assure tight, case-to-case stacking without mechanism bulge. Magnetically shielded to prevent interaction between meters; no need for special calibration. Optional bezel and mounting brackets available for one, two or three-unit stacking. Meet applicable portions of ASA C-39.1. **Accuracy:** $\pm 2\%$ of full scale, DC meters; $\pm 3\%$ with 60-cycle sine wave at 25°C , AC rectifier-type meters. **Overload:** 20% momentary and sustained, voltmeter; 1000% momentary and 20% sustained, ammeter. **Insulation:** 1800 V rms hi-pot. **Scale:** 1.785" long, 53° rotation. **Response Time and Damping:** Meet or exceed ASA requirements. Response time 3 sec. max., μA meters; 2 sec. max., all other DC ratings; 2.5 sec. max., AC ratings. Damping 40% max. overshoot; damping factor, 2.5 minimum. **Size:** 0.92" w. x 2.258" lg. x 3.44" D., overall. Bezel 1.255" w. x 3.005" lg., single; 2.155" w., double; 3.055" w., triple-unit mounting.

TYPE 236

BIG LOOK™ ELAPSED TIME METER

Offers distinctive appearance and excellent readability; designed to match ammeters and voltmeters with "Big Look" styling. Models are available for every time-measuring application. Both $2\frac{1}{2}$ " and $3\frac{1}{2}$ " sizes for panel mounting, plus $2\frac{1}{2}$ " size for use with conduit type case or portable stand. All panel mounted timers meet requirements of ASA specification C39.1 for four-stud mounting. Available in reset and non-reset types, measuring either minutes or hours. Types listed are 60 cps operation, for 50 cps, add \$1.00 to list price. For 208-volt type specify model desired and add \$1.50 to list price of 240-volt model.

TYPE KT-11 TIME METERS

Ideal indicator for proper servicing and preventive maintenance in industry or for rating component life. Available in $2\frac{1}{2}$ " and $3\frac{1}{2}$ " sizes, round or square cases, for mounting on panel board or in equipment. Diecast zinc bezel with aluminized face. Wide temperature operating range 6-digit register. Extra large counter number white on black background for excellent readability. Last digit in contrasting color indicate tenths. Bezel and plastic case provide dust-resistant enclosure for mechanical parts. Available with or without reset knob. ASA panel mounting specifications. For 50 cps operation, add \$3.00 to list price.

HICKOK

TEST EQUIPMENT

MODEL 539C

New Industrial and Laboratory Portable Tube Tester

Tests VR tubes, low power thyatrons, "4 digit" types. VR test evaluates voltage regulator tubes under actual operating conditions. Tests Nuvistors, Novars, Compactrons, 10-pin types. Provision for separate monitoring of plate current. Panel terminals provide access to grid, plate, cathode and heater circuits, permitting direct measurement of voltages and current for "non-standard" or "tailored" tests. Covers 600 to 60,000 umhos in six ranges. Dual leakage readings: directly on meter or by neon short indicators (Sensitivity to 50 megohms). Complete with socket savers. In black leatherette portable case, 16 $\frac{3}{4}$ " x 18 $\frac{3}{8}$ " x 7 $\frac{1}{2}$ ". 105-125v, 50-400 cycles, 40 watts. Shipping weight, 35 lbs.

Model 539C Industrial and Laboratory Tube Tester—
Net Each

\$595.00

NEW MODEL 752A

New Industrial Communications Portable Tube Tester

Designed for use in maintaining communications equipment and industrial electronic apparatus. New voltage regulator test circuit tests VR tubes to handbook specifications, including firing point, regulating voltage and current range. Tests Nuvistors, Compactrons, Novars, 10-pin types. Push button test for dual-section tubes speeds selection of tubes for balanced or matched characteristics. Covers 1500 to 30,000 umhos in five ranges. Interelement leakage read directly on the meter (Sensitivity to 10 megohms). Illuminated meter and roll chart. Complete with socket savers and pin-straighteners. In black leatherette portable case, 18 $\frac{3}{8}$ " x 16 $\frac{3}{4}$ " x 7 $\frac{1}{2}$ ". 105-125v, 50-60 cycles, 40-70 watts. Shipping weight, 27 lbs.

Model 752A Industrial and Communication Portable
Tube Tester—Net Each

\$415.00

MODEL 123R

Cardmatic® Automatic Tube Tester

Ideal for Industrial and laboratory application. A genuine complete tube tester, card-programs complete "fringe" tests, saturation and cut-off tests, in addition to basic Gm measurement. Gm ranges: 500-26,000 umhos; Current ranges: 100 u to 510MA. Complete with pin straighteners, socket savers and 500 selected cards. In black leatherette portable case, 19 $\frac{1}{2}$ " x 16 $\frac{1}{2}$ " x 9 $\frac{1}{4}$ ". 105-125v, 50-60 cycles, 55 watts. Shipping weight, 57 lbs.

Model 123R—Cardmatic® Automatic Tube Tester—
Net Each

\$725.00

MODEL 6000A

Service Technician's Deluxe Portable Tube and Transistor Tester

Has replaceable socket plate for obsolescence protection. Sensitive, instantaneous inter-element leakage and shorts test (Sensitivity — in excess of 3 megohms) filament continuity test. Covers 3,000 to 15,000 umhos in 3 ranges. Tests Compactrons, Nuvistors, Novars and 10-pin types. 14-position selector switches, no paralleled elements. Also tests transistors and diodes. In red leatherette portable case, 16 $\frac{3}{4}$ " x 11 $\frac{3}{4}$ " x 7 $\frac{1}{2}$ ". 105-125v, 50-70 cycles, 40 watts. Shipping weight, 21 lbs.

Model 6000A Deluxe Portable Tube and Transistor
Tester—Net Each

\$279.50

Model 799 Multi-Socket Tube Tester—Net Each

TEST EQUIPMENT

Model 870

Dynamic Beta Transistor Tester

Measures AC and DC Beta. Collector test current variable up to 2 amperes, permitting Beta measurement on power transistors rated 5 amperes or more. Variable collector voltage and current permits tests according to manufacturers' specifications—tests switching transistors, measures large signal DC Beta on power transistors—small signal AC Beta on low and medium power transistors. Icbo Ranges: 100 ua, 1 ma, 10ma; Beta Ranges: 0-100, 0-300. Complete with replaceable roll chart and test leads in black leatherette portable case 14 $\frac{1}{16}$ " x 11 $\frac{1}{4}$ " x 7 $\frac{7}{8}$ ". 115v-60 cycles, 40 watts. Shipping weight, 22

Model 870 DYNAMIC BETA Transistor Tester—Net Each \$395.00

Model 890A

Dynamic Beta In-Circuit Transistor Test

Utilizes unique new test circuit to measure AC Beta in OR OUT circuit with 5% accuracy. Measures these in-circuit parameters: AC Beta, Ic, Rin (transistor input impedance), Z Ohms base-emitter circuit impedance). Measures AC Beta, Ic, Rin and so out of circuit. Portable, completely self-contained, fully transistorized — battery operated. 10 $\frac{3}{4}$ " x 9" x 6 $\frac{1}{2}$ ". Shipping weight 8 lbs.

Model 890A Dynamic Beta In-Circuit Transistor Tester—Net Each \$215.00

Model 770A

5", Wide-band Industrial and General Purpose Oscilloscope.

Calibrated 4MC DC vertical amplifier has Gaussian roll-off for optimum pulse response. Eight-step attenuator with ranges from 0.01V to 50V/div accurate to within 5%. Built-in square calibrator accurate to $\pm 3\%$. Time base with 5X magnifier, provides 18 calibrated writing speeds from 0.2 usec/div to 1.5 sec/div at $\pm 3\%$ accuracy. Choice of free-running, driven, or automatic sweep modes is also provided. Has flat-face, post-accelerated CRT, illuminated graticule. 13 $\frac{3}{4}$ " x 11" x 17 $\frac{1}{2}$ ". Shipping weight, 57 lbs.

Model 770A 5". Wide-band Industrial and General Purpose Oscilloscope—Net Each \$675.00

Model 677

Wide-Band Service Technician's 5" AC Oscilloscope

5 cps to 4.5MC within 3db. New 1-2-3 circuit approach simplifies peak-to-peak measurements. Pre-set horizontal and vertical sweep positions. Sharp, bright trace with astigmatic correction, facilitates detailed observations of TV sync wave forms, including 3.58MC color burst. Furnished complete with detailed application and instruction book and test leads. 14"x9 $\frac{1}{2}$ "x18 $\frac{1}{2}$ ". Shipping weight, 36 lbs.

Model 677 Wide-Band Service Technicians 5" Oscilloscope—Net Each \$249.50

Model CA-5

Universal Adapter

For testing Compactrons, Novars, 5- and 7-pin Nuvisors, 10-pin types suitable for Cardmatic models and most other models except Models 532, 533, 534, 536, 538, 539A, 546, 600 and 605. Shipping weight, 6 lbs.

Model CA-5 Universal Adapter—Net Each \$59.50

Model 725 Stereo Standard FM Multiplex

Generator—Net Each \$495.00

Model 470A Electronic Volt-Ohmmeter—Net Each \$89.50

Model 209C True Vacuum Tube Volt-Ohm-Milliampere and Capacitance Meter—Net Each \$199.50

Model CR-35 CRT Analyzer/Rejuvenator—Net Each \$99.95

THE HICKOK ELECTRICAL INSTRUMENT CO.

HICKOK

TEST EQUIPMENT

MODEL 615

Sweep and Marker Alignment Generator

For complete TV, IF and RF alignment, including color TV alignment. Also provides harmonic output on UHF. All electronic Sweep with no moving parts. Amplitude modulation less than 0.1db/MC. 110-120v, 60 cycles, 40 watts. Furnished in steel carrying case, 16 1/4" x 8" x 13 1/2" complete with leads. Shipping weight 39 lbs.

Model 615 Sweep and Marker Alignment Generator—Net Each —\$429.50

MODEL 661

Chrom-Aligner NTSC Color Bar-White Dot Generator

Generates individual 100% saturated color bars to NTSC standards. Provides the following demodulator alignment signals: R-Y, B-Y, G-Y, G-Y at 90°, RF output on channels 3 or 4. Crystal-controlled chroma and sync. Separate video output. 110v, 60 cycles, 20 watts. Complete with leads and 3.58MC crystal. Shipping weight, 20 lbs.

Model 661 Chrom-Aligner Generator—Net Each —\$379.50

MODEL GC660

Color Bar Dot/Crosshatch Generator

A completely new design that sets a new standard of stability through liberal use of high-speed silicon switching devices and unijunction transistors. Uses 300-dot, shortstep timer system to assure complete screen coverage, especially important on rectangular tubes. "No flicker" crosshatch pattern because of 60-cycle time base. Dot size based on 0.1 usec pulse is only one line thick and one line wide for maximum convergence accuracy. Standard 10-bar pattern with controllable chroma level for color sync and killer threshold checks. Gun killer permits fast purity checks and actually allows use of picture tube as a 'scope for chroma demodulator alignment. Tunable RF output at 300 ohms, $\pm$ video output, special sync output for Zenith receivers, 10 3/4" x 10 3/8" x 5". Shipping weight, 6 1/4 lbs.

Model GC660 Color Bar Dot/Crosshatch Generator—Net Each —\$179.50

MODEL 288AX

Crystal Controlled AM-FM Sweep and Marker Generator

A complete alignment instrument with built-in decibel meter and crystal frequency standard. (100KC and 1000KC). Covers 35KC to 110MC in 8 bands frequency modulated and 35KC to 160MC in 8 bands amplitude modulated. Includes new ultrasonic range from 35KC to 125KC. Supplied with 100KC/1000KC crystal, cable assembly and meter leads. Case size 16" x 7" x 13". Shipping weight, 33 lbs.

Model 288AX Crystal Controlled AM-FM Sweep and Marker Generator — Net Each —\$385.00

MODEL 860

"Injecto-Tracer" Signal Tracer

An all solid-state instrument for complete troubleshooting of all types of AM and FM radios, including auto radios, and TV sound circuits. Unlike other signal tracers that only inject the test signal, the 860 also picks up, amplifies and detects signals through a tuneable amplifier and allows a complete job of signal tracing. Covers range from 200KC to 1700KC, plus 10.7 MC IF. Regulated, high-current power supply is variable to permit checking distortion, oscillator drop-out, etc. 11" x 8 1/2" x 5 1/2". Shipping weight, 9 1/2 lbs.

Model 860 "Injecto-Tracer" Signal Tracer—Net Each —\$149.50

THE HICKOK ELECTRICAL INSTRUMENT CO.

NON-DESTRUCTIVE HIPOT & INSULATION TESTERS

100 Series

NON-DESTRUCTIVE HIPOT AND INSULATION TESTERS

Model HD 115

The Hipotronics line of non-destructive AC/DC hipot test sets utilize a thyracon-operated overload circuit for unprecedented reliability and speed of operation. Reaction time is remarkably low, sensitivity is variable over a range of 1 to 110% of rated output current. With circuit sensitivity set at maximum, corona discharge or leakage currents of sufficient magnitude will trip the HV before insulation failure occurs.

Each unit is packaged on a rack mounted panel installed in a new, attractive desk-top cabinet. The unit may be removed from the cabinet and mounted in a standard equipment 19" rack in minutes. Controls have been human engineered to provide ease of operation, safety, readability, and an attractive, professional appearance.

Two versions are available: a standard unit with minimal control features, and a deluxe unit with all the most desired controls for laboratory precision testing programs.

FEATURES IN STANDARD MODEL:

• AC input on and off switches • Input fuse and pilot light • Output control continuously adjustable from zero to maximum • Single range, output connected KV meter, 2% full scale accuracy, 3 1/2" arc • Single range current meter in grounded HV return. 2% full scale accuracy, 3 1/2" arc, 0-5 ma AC/DC • Meters are recessed for protection • KV meter recalibration facility continuously adjustable, overload circuit from 50 ua to 5 ma • Failure indicator and reset button • Front panel, re-entrant output jacks with shielded HV output lead and ground lead • AC/DC meter switch with reminder lights over output jacks • External interlock provision • Surge limiting resistor in DC output • Deluxe, 21"W x 19"D x 10"H cabinet (slightly larger for 25 KV unit)

ADDITIONAL FEATURES IN DELUXE (HD) MODELS:

• Zero start interlock with HV on and off buttons—compels operator to start test at zero volts • Triple range KV meter • Triple range DC current meter, 0-50/500/5000 ua DC • High Voltage On pilot light

OPTIONAL EXTRAS (ALL UNITS):

• HV test probe\$10
• Gravity operated output shorting solenoid with discharge resistor\$35
• Audible failure signal\$15

SPECIFICATIONS:

Input 115 VAC, 60 Hz, 5 amps max.
Size & Weight 21"W x 19"D x 10"H; appx. 60 lbs.
Output Current 5 ma. AC or DC at full rated voltage
Meters 2% full scale accuracy, 3 1/2" arc

AC and DC PRODUCTION HIPOT TESTERS A and B Series

Model HD B12

Designed for use by unskilled or semi-skilled personnel in mass testing of electrical components, transformers and appliances. Simple to operate, reliable for go/no-go testing. Indicators provide information on component leakage and internal arcing. Continuously variable output voltage and output connected KV meter provide optimum test accuracy at lowest cost.

FEATURES:

• Detachable test leads enter front panel • Continuously adjustable output from zero to maximum • Output connected KV meter for maximum accuracy • "Arcing" detector employs corona pickup network for best sensitivity • "Leakage" detector sensitivity continuously adjustable from 500 ua to 5 ma • Three-wire grounding cord and plug • Shielded output lead thru re-entrant jack • AC input switch, fuse, and pilot light • Each model has a corresponding deluxe model with an audible failure alarm circuit incorporated in its design.

OPTIONAL:

HV probe\$10

VIBRATING REED FREQUENCY METERS

J-B-T INSTRUMENTS, INC.

31st Year

MODEL 34-FX-ser. A,
a popular 9 reed meter,
shown half actual size.

Superior performance for commercial and military applications is assured by more than 28 years of continuous experience and know-how covering the design and complete manufacturing of hundreds of thousands of these instruments in our Connecticut plant. Current production incorporates several innovations covered by recent J-B-T patents.

• **ADVANTAGES** — At reference temperature of 77°F most models have guaranteed accuracy of 0.3% or better of the frequency being measured, but the tables that follow indicate that certain models may be ordered with accuracy of $\pm 0.1\%$. Accuracy on interrupted DC may be somewhat less. High fatigue strength provides a safety factor for continuous operation. Temperature compensations are not required as frequency change per °F is only .0075%, negative. For example, a 50°F temperature rise causes a 60 cps reed to read only 0.2 cps lower than at reference temperature.

• **USES, Commercial and Military** — J-B-T Vibrating Reed Frequency Meters are used extensively in radio, telephone, television, and radar service, on engine-generator sets and standby equipment, in laboratories, in many types of aviation and electronic equipment, on panel and control boards, in inspection set-ups, and in high-cycle power sources — wherever constant or known frequency is important to accurate and efficient operation of equipment.

• **OPERATING PRINCIPLE** — The patented, simplified design in the J-B-T meter operates on AC or interrupted DC. Each is adjusted to respond by resonance to the frequency shown on dial. As the current excites the driving coil, the reed "in tune" with the frequency in the coil will respond by vibrating rapidly by of permanent magnet polarization and induced magnetism in coil. The instrument is adapted to specified operating voltage by a series resistor. To determine frequency, simply read the

• **RESPONSE PATTERNS** — Breadth of actuation differs with the meters of frequency between reeds. For example, at 60 cycles, cycle steps give the broad response shown below at left, while full cycle steps bring the sharp response at right. In general, the lower the frequency the greater the amplitude, the higher the frequency the less the amplitude. Thus a 25 cycle reed normally will have substantially greater amplitude than a 400 cycle or a 1000 cycle reed.

• **STABILITY** — All meters are permanently calibrated at the factory and do not require subsequent adjustment. J-B-T reeds have relatively high Q characteristics, an especially desirable factor in electronic circuits. Wave form or external fields do not ordinarily have an adverse effect. Built with no pivoted parts and with washers at every critical point, these rugged meters can withstand rougher treatment than many instruments.

• **TRUST THE METER** — If a meter plugged in on a 60-cycle power line does not indicate exactly 60 cycles, trust the meter. Power supply may momentarily be off-frequency due to changing load conditions. All J-B-T Frequency Meters are meticulously calibrated at the factory, entirely independent of frequency of power supply. Production and inspection equipment are checked regularly against National Bureau of Standards frequency signals.

MODEL 21-FX,

VIBRATING REED FREQUENCY METERS

J-B-T

J-B-T INSTRUMENTS, INC.

SEALED FREQUENCY METERS

TYPE Sealed meters, glass-to-metal construction, with solder tabs and detachable flange, supersede the former FHX sealed meters. While JAN-I-6, MIL-M-6B, and MIL-M-10304B (Type MR36) do not refer specifically to frequency indicators, the FHXX series uses identical mounting dimensions of these specifications, and meets or exceeds the sealing requirements, and for 3½" meters, electrical ratings, including 3000 volt breakdown. (1½" and 2½" meters are 100 volt breakdown.†) Electrical characteristics and accuracy are the same as for corresponding F models without the HXX designation. Sampling procedure includes a test in water where absolute pressure of the air above the water is reduced to 2.5 atmospheres of mercury (approx. 57,000 ft. altitude) and is maintained for one minute. Available in 3½", 2½" and 1½" cases. For dimensions see Table, Lines 1, 3 and 8. Standard voltage is 100-130.

REVISED DIAL APPEARANCE

Changes during the life of this catalog may include meters with somewhat different from those pictured here. Dials are being modified to use the revised trademark as adopted during Silver Anniversary Year. Many 3½" frequency meters also carry the designation Series A after the model number (as 34-FX-ser. A on preceding page). Such instruments have unusual ruggedness and sensitivity, and unusually uniform amplitude over the entire span of the meter. However Series A are easily interchangeable as to mounting dimensions and circuit characteristics with other meters bearing the same model number.

VIBRATING REED FREQUENCY METERS

J-B-T INSTRUMENTS, INC.

31st Ye

3" SQUARE-CASED FREQUENCY METERS

FS SERIES. Matching other 3" x 3" meters on a panel with square black molded cases, these meters are otherwise the same as the FX Series. For instance, 33-FS is the same as 33-FX except for the case. See Table of Dimensions, Line 10.

- 33-FS,** 380-420 cps, 9 reeds, 3" square molded case \$38.75
34-FS, 56-64 cps, 9 reeds, 3" square molded case \$31.30

PORTABLE FREQ. TESTERS

FP SERIES. METAL OR MOLDED CASE. Accuracy of $\pm 0.3\%$ meets the exacting test requirements of aviation, signal, and communication equipment. **M-Types** use anodized gray aluminum case, $6\frac{5}{8}$ " long x 4" wide x 3-9/32" deep. Leads permanently attached. See Print SK-63-10. With pertinent name plate, **33-FP-9M** is known as **TS-328 A/U.** **L-Types,** sturdy molded case within top grain leather carrying case 6-3/32" x 4 1/4" x 2 3/4"; 4' leads with 5" test picks and banana plugs.

- 33-FP-9M,** (illustrated) 380-420 cy., 9 reeds, 100-130 volts, 130 ohms per volt, 1.0 watts power consumption; coml. quality and packing... \$54.60
34-FP-9M, 56-64 cy., 9 reeds, 100-130 volts, 140 ohms per volt, 0.9 watt power consumption, coml. quality and packing \$46.75
33-FP-9L, 380-420 cy., 9 reeds, 100-130 volts \$52.50
34-FP-9L, 56-64 cy., 9 reeds, 100-130 volts \$44.90

42- AND 50-REED 400 CYCLE INDICATORS

MODEL 41-FX-42 AND 41-FX-50. Both are widely used in commercial and military testing especially in aviation-electronic trouble-shooting. Model 41-FX-42 (supercedes Model 41-FX) has two banks of 21 reeds: one for 300-500 cps in 10 cycle steps, and for vernier effect, one for 380-420 cps in 2 cycle steps. Model 41-FX-50 has two banks of 25 reeds giving a continuous coverage from 355-600 cps in 5 cycle steps. Black molded case, flush front is 4-3/64" x

4-3/64" x 2-17/32" deep behind panel over studs. Power consumption is 2 watts at 30 volts, 4 watts at 115 volts, and 8 watts at 200 volts. For 41-FX-42, see Print MD-38-11; for 41-FX-50, Print SK-79.

- 41-FX-42,** 100-130 volts only \$137.59
41-FX-42, 3 voltages: 200-240; 115; and 30; 4 studs (without switch) \$154.40
41-FX-50, 3 voltages: 200-240; 115; and 30; 4 studs (without switch) \$198.50

RUGGEDIZED AND ILLUMINATED METERS

Model with "RUG"—Sealed vibrating reed frequency meters and sealed elapsed time meters are available, when so ordered, to the intent of MIL-M-10304B, covering ruggedization of other kinds of meters, and usually are specified only for extra-severe shock and vibration.

LL Construction—Requirements for lighted meter dials have led to illuminating the 3 1/2" FHXX Series of sealed meters. Light from a source behind the panel is admitted through a sealed window built into the meter case. Inquiries are invited.

400 CYCLES, IN 1 CYCLE STEPS; 800 CYCLES

Among the variations which J-B-T produces on special order, are 21-reed, 390-410 cycles in 3 1/2" case; and 11-reed, 780-820 cycles with 4-cycle increments. Quotations on request.

New

FB SERIES FREQUENCY METERS to Match "Big Look" Panel M

SERIES FB METERS. Newest Matchers, combine the GE "Big Look" design with the time-tested accurate J-B-T vibrating reed frequency meter at realistic prices. Typical 3 1/2" for 100-130 volts follow and other cataloged in Bulletin B-419. Line Table of Dimensions below gives ing details. Groupings of 5 to 21 reeds and voltages of 28 to 230 are on order. For further details: 60 models, Drawing SK-182 (A); 400 Drawing SK-183 (A).

- 30-FB,** 10 reeds, dual range, 48-52 and 58-62 cps
33-FB, 9 reeds, 380-420 cps
34-FB, 9 reeds, 56-64 cps

New

FG SERIES for Modern Design; Picture Window Frame Optional

FG FREQUENCY METERS. The sparkling clear-plastic-front and bright textured metal insert below the dial add zest to any panel. FG meters not only match the 3 1/2" wide x 3" high front of the New EG elapsed time meters on the next page, but are interchangeable as to mounting with Triplett and other brands of panel meters. Standard voltage is 100-130 volts; accuracy and electrical characteristics equal corresponding FX frequency meters in the table on preceding page. For example, Model 30-FG differs from Model 30-FX only in the case. FG mounting details appear in line 9 of the Table of Dimensions below and in Prints SK-160 and SK-164. For picture window mounting diagram, use the half-bezel adapter sketched on the next page. Listed below are typical 3 1/2" FG models and others are cataloged in Bulletin G-109. Groupings of 5 to 21 reeds and voltages of 28 to 230 are available on order. Inquiries are invited on a 2 1/2" FG series.

MODEL 34-FG for standard flush-type mounting (match makers) →

Same model with 13A-234 molded half-bezel

- 30-FG,** 48-52 and 58-62 cps, 10 reeds \$34.10
33-FG, 380-420 cps, 9 reeds 41.20
34-FG, (illus.) 56-64 cps, 9 reeds 33.90

- 13A-234** Half-bezel adapter, separate black molded frame and hardware for picture window appearance on any 3 1/2" FG or meter
13A-239 Half-bezel adapter, separate black metal frame particularly recommended for all 3 1/2" FG frequency meters and elapsed time meters; with hardware \$

NOTE ON METER VOLTAGE

J-B-T Vibrating Reed Frequency Meters of all sizes normally are made with two studs and are designed to be connected across or phase of a multi-phase line. The single phase voltage where the meter will be used thus becomes the voltage to be specified for the meter. Special meters with extra studs are made for the purpose of using at two or more voltages, not additional phases.

ELAPSED TIME & FREQUENCY TIME METERS

J-B-T

J-B-T INSTRUMENTS, INC.

Year

S AND ADVANTAGES OF ELAPSED
(RUNNING) TIME METERS

Record operating time of AC electrical and electronic equipment, these self-starting synchronous instruments normally register in 1/10th hour steps to 99,999.9 hours, then automatically reset. They are widely used for tube life, TV equipment, presses, conveyors, oil burners, ground support equipment, maintenance schedules, etc. J-B-T meters recommend the AC type of elapsed time for superior accuracy, especially where voltage and ambient temperature vary widely.

EG SERIES for High Visibility;
Modern Picture Window Optional

EG ELAPSED TIME METERS. These are designed to give a bright, jewel-like look to panels when used alone, in multiples, or in conjunction with other instruments such as the matching new FG series of frequency meters. A gleaming textured metal shroud below the dial and a clear-plastic case front 3 1/2" wide x 3" high give high visibility to the numeral read out. Dimensions are same as line 9 for FG meters on opposite page. For optional picture window frame effect, on panel area 3.83" wide x 2.27" high, add preferred 13A-239 metal, or 13A-234 molded half-bezel adapter. (See panel cut-out and mounting detail drawing on preceding page.) The quiet, sturdy motors and extensively field-tested mechanisms of other J-B-T elapsed time meters are used in the EG series. Two models are catalogued. Other voltages, frequencies and numerals will be quoted.

31-EGW-5 (illus. at top) 5 wide digits, 0-9,999.9 hours, 60 cps, 110-125 volts... **\$21.50**

31-EGW 6 wide digits, 0-99,999.9 hours, 60 cps, 110-125 volts... **22.00**

13A-239 and 13A-234 half-bezel adapters, see opposite page.

MODEL 31-EGW-5
for standard
flush type mounting.

MODEL 31-EGW-5
for standard
flush type mounting.

Same model with
13-239 metal half-bezel.

Dimensions
of FG
meters.

3" SQUARE-CASED ELAPSED TIME METERS

31-ES. The square black molded case has the appearance of other 3"x3" panel meters including FS series of frequency meters described on the preceding page. Unlike line 9, the table shown there, depth behind (b) is 2 1/2", and terminals are located horizontally center line, each spaced 1/2" center (G). Variations can be made for 1/2 hours (suffix U), 230 volts, matte finish cycles. Now supplied with tenths in red units, and units in white on black.

60 cy., 110-125 volts, 0-9,999.9 hours... **\$19.75**

CLEAR PLASTIC ELAPSED TIME METERS

21-EPL. See Print SK-102 (C) for 2 1/2" rectangular Model 21-EPL and (C) for 3 1/2" rectangular Model 31-EPL. Both types are made to the EG Series above is recommended for new designs.

ELAPSED TIME — FREQUENCY METERS

21-EPL. Conserves panel space and provides information by combining elapsed time with frequency reads. A separate coil for the reeds achieves close correlated amplitude and frequency. Reads 0-9 hours and 58-62 cy., with 5 reeds, 130 volts; self starting. Tenths, red on white, all other numerals white on black. Case with front mounting per Table of Dimensions, line 6. Power consumption, 4.7 W. For variations with 7, 9, or 11 reeds, regularly stocked, such as Model 34-FE, Print SK-45 (D).

31-EPL metal case 4-19/32" deep (per Print SK-44 Rev. F—not regularly stocked) like Model E, except with 3 1/2" metal flange permanently attached for MIL-M-6B front mounting per line 7, Table of Dimensions... **40.50**

\$38.75

40.50

BASIC 3 1/2" ELAPSED TIME METERS

New 5-DIGIT WIDE NUMERAL ELAPSED TIME METERS

MODEL 31-EXW-5. Newest in the J-B-T line of elapsed time meters is Model 31-EXW-5 with 5 wide, easy to read numerals. This model is particularly recommended for new equipment because, with superior visibility, rugged construction and attractive price, it is expected to supplant the 31-EX. The meter registers to 9,999.9 hours and automatically resets. Tenths are shown in red on white, units in white on black. Model 31-EXW-5 is interchangeable electrically and mechanically with both 31-EX (below) and 31-EXW shown below. Mounting, which is the same as type MR-34 or MR-35 to MIL-M-6B, also JAN-1-6, and terminal location are per print SK-125 Rev. C.

31-EXW-5, 5 digits, 0-9,999.9 hours, 60 cy., 110-125 volts... **\$17.80**

Model 31-EX. This instrument has been the most widely used of any J-B-T elapsed time meters and continues to be available where parts lists or production runs call for style of numeral and dial appearance, as illustrated. The black molded case, which mounts according to Print SK-80 Rev. E, is interchangeable with the new wide-numeral meters, 5-digit 31-EXW-5 and 6-digit 31-EXW.

31-EX, 5 digits, 0-9,999.9 hours, 60 cy., 110-125 volts... **\$18.80**

31-EX-200, same except 200-240 volts. (Not regularly stocked) 19.80

ELAPSED TIME METERS — Tenths of Minutes

MODEL 31-EXM, 60 cycles, 110-125 volts, reading 0-9,999.9 minutes; for short-run applications or readings at closer intervals than 31-EX. Tenths of minutes in red on white, minutes in white on black numerals otherwise identical with 31-EX... **\$23.00**

6-DIGIT WIDE-NUMERAL ELAPSED TIME METERS

MODEL 31-EXW. One of the most easily-read and most versatile of J-B-T elapsed time meters is Model 31-EXW, illustrated. Easy-to-read, wide numerals register to 99,999.9 hours then automatically reset. Distinctive contemporary dial shows tenths in red on white and units in white on black. This model is interchangeable, electrically and mechanically with Models 31-EXW-5 and 31-EX. The black molded case is also interchangeable with all 3 1/2" FX types of frequency meter. Print SK-125 Rev. E gives mounting information.

31-EXW, 6-digits, 0-99,999.9 hours, 60 cy., 110-125 volts... **\$18.75**

3 1/2" SEALED ELAPSED TIME METERS — 60 Cycles

MODEL 31-EHXX. Where rugged requirements make a completely sealed elapsed time meter desirable, this glass-to-metal construction with flat glass front and 3 1/2" diameter separable flange, often is specified. Heavy-duty solder terminals are supplied. Every instrument is checked in a vacuum chamber. Over-all dimensions and appearances match the FHXX series sealed frequency meters. Maximum voltage between terminals and case, 1,000 volts, R.M.S. The meter registers in 1/10 hour steps to 9,999.9 hours, then automatically resets. Tenths indicator is red on white, all others in white on black. Mount according to SK-85, Rev. C.

31-EHXX, 60 cy., 110-125 volts... **\$21.75**

3 1/2" SEALED ELAPSED TIME METERS — 400 Cycles

MODEL 33-EHXX. This stable, self-starting 400-cycle elapsed time meter is extensively used for preventive maintenance and for reliability testing and checking in a wide variety of equipment. The instrument is entirely enclosed in a 3 1/2" flanged case, glass-to-metal sealed construction with separable flange; heavy-duty solder terminals; flat glass front. 1/10 hours are shown in red on white, all other numerals white on black. The external appearance matches FHXX frequency meter series. For dimensional details see SK-61, Rev. B.

33-EHXX, 400 cy., 0-9,999.9 hours, 1/10 hour steps, 110-125 volts... **\$78.00**

2 1/2" SEALED ELAPSED TIME METERS

MODEL 21-EHXX. A full size counter reading 9,999.9 hours in 1/10 hour steps and a rugged self-starting synchronous motor are built into this 2 1/2" sealed meter. Its front mounting dimensions are the same as Type MR26 electrical indicating instruments in MIL-M-6B. Glass-to-metal seal makes the instrument completely tamper-proof. Ask for Print SK-68, Rev. G. (2 1/2" 400-cycle meter, Model 23-EHXX also is made on special order per Print SK-178.)

21-EHXX, 60 cy., 110-125 volts... **\$32.50**

TEMPERATURE TESTERS AND ACCESSORIES

J-B-T INSTRUMENTS, INC.

31st Year

FOR APPLIANCE SERVICING, QUALITY INSPECTION, AND LABORATORY SET-UPS

OVEN OR HEAT CHAMBER TESTERS

MODEL 23-JP-1. This new edition of a long-time favorite portable indicating pyrometer saves time and furnishes reliable information in temperature testing. For instance, when servicing and setting thermostats, the 23-JP-1 continuously reads appliance temperatures as they change. The 0-650°F. dial, with 2.48" scale arc has 10° divisions, readable to 3°. The pocket-sized, scuff-resistant, black vinyl carrying case measures 4½"x2½"x4¼". Characteristic of more expensive pyrometers, this model is automatically compensated for ambient temperature. Thus, the Tester eliminates calculations, avoids likelihood of serious error, as temperature changes inside the instrument itself, and gives reliable direct readings. Supplied with attached SA-116, 5½' calibrated thermocouple, clip, and convection shield \$33.00

sated for ambient temperature. Thus, the Tester eliminates calculations, avoids likelihood of serious error, as temperature changes inside the instrument itself, and gives reliable direct readings. Supplied with attached SA-116, 5½' calibrated thermocouple, clip, and convection shield \$33.00

MODEL 32-JP-3. This time-tested model has an instrument-type carrying case of natural finished mahogany 6½"x3½"x4½" over hardware. The glass-covered indicator shows 0-650°F. range in 10° divisions readable to 2½° on a 2¾" scale arc. Exceptionally fast, continuous response. Automatic compensation for ambient temperature is a valuable feature whether the tester is used for service work, sales demonstrations, or inspection. Attached SA-116, 5½' thermocouple, clip for affixing to grill and convection shield included \$36.00

MODEL 32-JP-7. This model is recommended as the most versatile and easiest to read of this J-B-T series. The 0-650°F. scale is more than 4" long. Automatic compensation for ambient temperature is included, so that temperatures are read directly and without calculations. The 32-JP-7 also provides color-coded external binding posts. These permit quick attachment or interchanging of various J-B-T thermocouples placed in one or more of the heat zones to be checked. An SA-116 5½' thermocouple with attachment clip and convection shield is supplied and is left attached when the tester is carried. For maximum usefulness in checking irons, washers, toasters, clothes dryers, etc., use appropriate accessory thermocouples. Tester price includes stitched Ever ready case, 5" wide x 5½" high x 2¾" deep, of sturdy, scuff resistant black vinyl. \$40.00

ness in checking irons, washers, toasters, clothes dryers, etc., use appropriate accessory thermocouples. Tester price includes stitched Ever ready case, 5" wide x 5½" high x 2¾" deep, of sturdy, scuff resistant black vinyl. \$40.00

IRON TESTER

MODEL 32-JIT. Self-contained bench-type tester; checks all makes of irons; measures thermostat temperatures; shows open or short circuits. Automatically compensated for room temperature. Also indicates operating temperature of the sole plate (working surface) on non-electric or cordless irons. Black metal base; overall size 10" x 12" x 5½", scale 0-650°F, 15 amp fuse, 6' cord, 110 volt, 50-60 cycles. \$42.50

MULTI-PURPOSE TESTER

MODEL 61-JRT. A 9-in-1 tester to accurately measure temperature, electrical analysis of ranges, relays, test apparatus, etc. Rapidly reads four cold zones —100°F, +80°F, 14" distant; two heat zones 0-600°F, 5½" distant; one voltage range, AC; and, with transformer, two AC ranges, 0-30 and 0-60 amps, AC. Stamped polished walnut case, 15½" x 10" x 4¼". Two color etched metal plates. Separate switches protect bulb and meter circuits. Requires one standard flashlight cell replaceable. Temperature accuracy ±2% of full scale, rectified AC readings ±5%. Accessories as listed may be added for testing appliances. Includes two SA-162 resistance bulbs, two SA-162 thermocouples, electrical leads, and AS-TR-2 built-in transformer. \$100.00

MODEL 61-JRT (LESS TRANSFORMER). Same unit, same scales except reading in amperes; AS-TR-2 transformer omitted. \$75.00

AS-TR-2 Transformers for use with Model 61-JRT to provide readings in two current ranges: 0-30 and 0-60 amp. AC \$25.00

HEAT INDICATORS

MODEL 32-JG PYROMETER IN SN-10 STAND. Mounted in sloping front black unbreakable molded stand, 4¼" h. x 4¼" d. x 3½" w., with 5-way binding posts. Automatically compensated for ambient temperature. Medium resistance system, damped for quick reading on 3.16" scale, assures ruggedness and pointer stability. For ±2% accuracy, use only the type and resistance of thermocouple provided; if extra length—coil it—to maintain calibration. For convenience, an extra thermocouple and lead are suggested. \$10.00

MODEL 32-JG IN SN-10 STAND (Supersedes SN-3 and SN-7 STANDS). 0-650°F-350°C, includes SA-91, SA-84, and CB-1 \$10.00

0-1200°F-650°C, includes SA-87, SA-82, and CB-1 \$10.00

0-2000°F-1100°C, includes SA-87, SA-82, and CB-1 \$10.00

MODEL 32-JG IN SN-11 STAND (not illustrated). With 3 binding posts to accommodate flexible extra lead and thermocouple for hard-to-reach locations. 0-650°F including SA-91 thermocouple, SA-84 lead, CB-1 connector block, and SA-86 flexible leads and thermocouple \$40.00

For certain applications, metal stand, SN-7 with Model 32-J pyrometer is preferred; quotation on request.

Solid-State Regulated DC Power Supplies

Type WP-700A, WP-702A, WP-703A, WP-704A

RCA

Test Equipment
and Accessories

WP-700A

WP-703A
WP-704A

WP-702A

Description

WP-700A, 702A, 703A, and 704A are solid-state, constant dc power supplies. These versatile bench-type supplies are ideally suited for use in circuit design, servicing, industrial, and educational applications. Typical applications include developmental transistor or integrated circuit testing, production line testing of dc operated equipment, aerial maintenance, life testing of devices that require constant supply, and classroom use.

WP-700A and WP-702A circuits are identical, except that WP-702A is a dual unit, with separate controls, output terminals, and meters for each section. The two sections of the WP-702A are electrically isolated from each other.

Output voltage of the WP-700A and WP-702A is continuously adjustable from 0 to 20 volts, at current levels up to 200 milliamperes.

Output voltage of the WP-703A is continuously adjustable from 0 to 20 volts at current levels up to 500 milliamperes.

Specifications

	WP-700A WP-702A	WP-703A	WP-704A
Output Voltage	0 to 20V 0 to 200 mA	0 to 20V 0 to 500 mA	0 to 40V 0 to 250 mA
Output Regulation	30 mV (change in output with power-line variation of 110 to 135 V ac)	7 mV	15 mV
Output Impedance	less than 50 mV (change at rated load)	less than 10 mV	less than 20 mV
Output Ripple	less than 500 uV rms	less than 200 uV rms	less than 200 uV rms
Output Current	0 to 20V 0 to 200 mA	0 to 20V 0 to 500 mA	0 to 40V 0 to 250 mA
Output Selection	Output selected with panel switch		

Features

- All solid-state circuitry
- Continuously adjustable voltage output down to 0 volts
- Electronic short-circuit protection — short across the output terminals won't harm the supplies
- Front-panel overload-indicator lamp signals when maximum current condition is approached
- Negative feedback regulator circuit maintains constant output voltage with low ripple
- Compact and lightweight

The output voltage of the WP-704A is adjustable from 0 to 40 volts at current levels up to 250 mA.

Overload current is limited to prevent damage to the power supplies. No damage will occur even if connected to an external short circuit. A special overload indicator panel lamp will begin to glow when the current approaches the maximum rated level.

A meter is provided to indicate either output voltage or current level. The meter function is selected by a convenient panel switch.

All silicon transistors and diodes are used in the four supplies. Circuit design features include a negative feedback circuit to maintain constant output voltage with low ripple regardless of varying line.

Three convenient output terminals (+DC, —DC, and GND) are provided. The units are equipped with a three-wire ac power cord to permit connecting the external circuit to the power line ground, using the "GND" terminal.

Controls	Continuously variable voltage Power on/off Meter selector V/mA
Output Terminals	DC+, DC—, GND, (Pos. or neg. output)
Short Circuit Protection	Protected from damage due to external short circuit
Overload Indicator	Panel lamp glows when current approaches max. level
Power Cord	Three-wire type
Dimensions	
WP-700A	4 in. x 6½ in. x 3 in., weight 2 lbs., 11 oz.
WP-702A	6 in. x 12 in. x 3 in., weight 4 lbs., 13 oz.
WP-703A and WP-704A	5¼ in. x 8¼ in. x 3¼ in., weight 5 lbs., 13 oz.

Volt-Ohm-Milliammeter

Type WV-38A

RCA
**Test Equipment
and Accessories**

Features

- Measures ohms, DC volts, AC volts, direct current, audio signals in dB units
- 39 total ranges of measurement; easy to read 2-color meter scales
- Special 0.25- and 1.0-volt DC ranges
- Meter movement protected against burnout
- Full-scale accuracy $\pm 3\%$ on DC volts and current; $\pm 5\%$ on AC volts
- Fuse protection for ohms divider network
- 2-color markings on front-panel for simplified operation
- Large 5-inch meter with 50 μ A sensitivity
- Polarity Reversal Switch
- 20,000 ohms/volt DC input resistance

Description

The RCA WV-38A Volt-Ohm-Milliammeter is a rugged, accurate, and extremely versatile instrument designed for service calls, industrial applications, and all-around shop and lab use. The extra-low 0.25 and 1.0 volt DC ranges are specially useful for servicing all types of low-voltage circuits. The wide range current scales are of value in adjusting color TV receivers, TV cameras, and power-supply drains. The ohms scale can be used for trouble-shooting all types of circuits and electronic parts. The special dB scales are ideal for high fidelity and broadcast-audio tests.

A convenient function switch is provided with AC, +DC, and

—DC positions. The +DC and —DC positions of this switch reverse the polarity of the test leads — a feature that is also helpful in checking the front-to-back resistance ratio of electrolytic capacitors and many types of semiconductor devices.

Two special silicon diodes are used to protect the meter movement against burnout due to accidental overload. A fuse protects the precision multiplier in the ohms network.

The WV-38A is completely portable, requiring no external power source. Five internal batteries (not provided) are used: the ohms function (4 penlight cells and 1 "D" flashlight cell).

Specifications

DC Voltmeter (at full scale):

Ranges	0 to .25, 1.0, 2.5, 10, 50, 250, 1000, 5000 V
Input Resistance	20,000 Ω /V
Accuracy	$\pm 3\%$

AC Voltmeter (at full scale):

Ranges	0 to 2.5, 10, 50, 250, 1000, 5000 V
Input Resistance	5000 Ω /V
Accuracy	$\pm 5\%$
Frequency response (reference 1000 Hz) flat within 0.5 dB from 10 Hz to 50 kHz on the 2.5, 10, and 50 V ranges.	

DC Current (at full scale):

Ranges	0 to 50 μ A, 1 mA, 10 mA, 100 mA, 500 mA, 10 A
Insertion Loss	0.25 V
Accuracy	$\pm 3\%$

Ohms:

Ranges	RX 1, RX 100, RX 10,000
	± 3 of pointer position for exact value

AF Output (at full scale):

Ranges	0 to 2.5, 10, 50, 250 mV
An internally connected 0.1 μ F DC blocking capacitor permits output measurements in presence of DC voltages.	

Decibel Levels (Zero dB is 1 mW in 600 Ω) -20 to +50

Dimensions

Height 5 $\frac{1}{8}$ " , Width 5 $\frac{1}{4}$ " , Depth 3 $\frac{1}{8}$ " , Weight 3 $\frac{1}{2}$ lbs.

Equipment Supplied

Red test lead and probe, Slip-on Alligator Clip and Red Insulating Boot, Black Test Lead with Alligator Clip and Black Insulating Boot, Instruction Book. (Batteries not supplied.)

Accessories Available

WG-297 High Voltage Probe, less resistor, WG-210 900 Ω Resistor for H.V. Probe (10 x multiplier for 5000 V. range), WG-211 495 m Ω Resistor for H.V. Probe (100 x multiplier for 250 V. range), WG-352A RF Diode, WG-270A Vinyl Carry Case (includes convenient storage compartment for test lead).

For Prices See Page 863

VoltOhmyst®

Type WV-77E

RCA

Test Equipment and Accessories

Features

- Seven overlapping measurement ranges for:
 - Ohms — 0.2 ohm to 1000 megohms
 - DC volts — 0.02-volt to 1500-volts
 - RMS AC volts — 0.1-volt to 1500-volts
 - Peak-to-peak AC volts — 0.2-volt to 4200-volts measured on separate red scales
- Zero-center DC volts
- Burn-out proof meter circuit
- Precision-ohms-measurement network fused against accidental burnout
- Separate low-voltage AC scale for accuracy
- Color-coded scales, switch settings
- Pilot light

Description

The RCA VoltOhmyst® WV-77E is designed to measure AC rms average voltages from 0.1 volt to 1500 volts, DC voltages from 0.02 volt to 1500 volts, peak-to-peak voltages from 0.2 volt to 4200 volts, and resistance values from 0.2 ohm to 1000 megohms. The AC voltmeter portion of the WV-77E features a vacuum tube as a full-wave signal rectifier. The meter deflection in AC-voltage measurements is a function of the full peak-to-peak value of the measured waveform. The WV-77E features a high input impedance on all DC- and AC-voltage measurements. This high input impedance allows the use of the WV-77E in circuits where instruments with a lower input impedance would result in loading of the circuit under test, and a resultant error in reading the operating voltage.

Specifications

Resistance figures are for line voltage of 120 volts, 60 Hz

Meter:	
Range	0 to 1.5, 5, 15, 50, 150, 500, 1500 V
Resistance with DC Probe (1 mΩ inside probe)	
Resistance Ranges	0 to 11 mΩ
Accuracy	±3% of full scale
Meter:	
Range	
RMS Values of Sine Waves	0 to 1.5 volts on separate scale
	0 to 5, 15, 50, 150, 500, 1500 V
Peak-to-Peak Values of Sine Waves	0 to 4 volts on separate scale
	0 to 14, 40, 140, 400, 1400, 4000 V
Accuracy	±5% of full scale
Frequency Response	±5% 40 Hz to 5 MHz
	On 1.5, 5, 15 rms, or 4, 14, 40, p-p ranges
Minimum Input Voltages:	
When Instrument is set up to measure DC:	1500 V
DC plus AC (peak)	1800 V

The VoltOhmyst utilizes a push-pull balanced DC-bridge circuit with the meter in the plate circuit. This circuit affords excellent linearity of response, good stability, and very high input impedance.

Additional features of the WV-77E include provision for zero-center indication, useful in discriminator and bias measurements; separate scales for low AC-voltage measurements to assure accurate readings; a circuit design which allows measurement of AC in the presence of DC; a separate DC probe with a 1-megohm resistor which minimizes capacitance-loading effects; and electronic protection against meter burn-out. In addition, the resistors in the resistance divider network are protected by a separate fuse.

When Instrument is set up to measure AC:

Maximum AC (rms)	1500 V
Maximum AC (peak-to-peak)	4000 V

NOTE: When AC is being measured, no more than 400 volts DC shall be present in circuit being tested.

Power Supply	
Voltage Rating	105 to 125 V
Frequency Rating	50 to 60 Hz
Battery:	
1.5-volt "C" cell	RCA-VSO35A or equiv.

Dimensions

Height 7¾", Width 5½", Depth 4¾", Weight 5 lbs.

Equipment Supplied

1 DC Probe and Cable, 1 AC-Ohms Probe and Cable, 1 Ground Cable, 1 Instruction Book.

Accessories Available

WG-297 High Voltage Probe, WG-206 Multiplier Resistor for use with WG-297, WG-351A Demodulator Probe, WG-270A Vinyl Carrying Case (includes convenient storage compartment for test leads).

For Prices See Page 863

Senior VoltOhmyst®

Type WV-98C

RCA
**Test Equipment
and Accessories**

Features

- Seven resistance ranges — measures 0.2 ohm to 1000 megohms
- Eight DC-voltage ranges — measures 0.01 volt to 1500 volts
- 0.5 DC-volt scale for transistor circuits
- Seven AC ranges — measures 0.05 to 1500 rms volts
- Measures peak-to-peak sine, complex waveforms to 4200 volts
- Response to 3 MHz
- 200-microampere meter
- Big, readable, 6½" color-coded meter with mirrored scale
- Combination, shielded DC/AC/OHMS probe with switch

Description

The RCA WV-98C incorporates all the time-tested VoltOhmyst features in a deluxe precision instrument with countless uses in audio, radio, TV, and industrial servicing applications. Accurate, dependable, and extremely versatile, it will measure resistance, DC volts, and both rms and peak-to-peak values of sine waves and complex waves.

An input resistance of 11 megohms on all DC-voltage ranges reduces loading of the test circuit.

The WV-98C has convenient mid-scale values of 10, 100, 1000, 10,000 and 100,000 ohms, and 1 and 10 megohms.

All measurements are made with a single-unit probe, the WG-299E DC/AC-OHMS Probe and Cable. The probe is quickly adapted to either DC measurements or AC and resistance measurements by means of a built-in switch.

Included, also, are a zero-center scale, two separate scales for low-voltage AC measurements; a pilot light; and circuit design which permits measurements of the ac component of DC voltage or the DC component of an AC signal.

Specifications

At line voltage of 120 V, 60 Hz

DC Voltmeter:

Range 0 to .5, 1.5, 15, 50, 150, 500, 1500 V
Input Resistance All Ranges 11 MΩ
Over-all Accuracy ±3% of full scale

AC Voltmeter:

Ranges:
RMS Values of Sine-Waves 0 to 1.5, 5, 15, 50, 150, 500, 1500 V

Peak-to-peak Values of Sine-Waves and

Complex Waves 0 to 4, 14, 42, 140, 420, 1400, 4200 V

Overall Accuracy ±3% of full scale
(Accuracy of rms ranges based on use of sine-wave signals having less than 0.5% total harmonic content)

Frequency Response

(1.5, 5, 0, and 15 V AC Ranges) ±1 dB
30 Hz to 3 MHz

Ohmmeter:

Ranges, Seven 0 to 1000 MΩ

Power Supply:

110-130 V, 50-60 Hz

Power Consumption (Approx.) 6 W; Battery 1 RCA VSO36 1½ V "D" cell.

Dimensions

Height 6½", Width 7", Depth 3¾", Weight 6 lbs.

Equipment Supplied

DC/AC-OHMS Probe and Cable (Type WG-299E), 1.5 V Battery (Type VSO36), Slip-on Alligator Clip, Insulator, Instruction Book.

Accessories Available

WG-301A Crystal-Diode slip-on probe for measuring RF from 10 kHz to 250 MHz; WG-411A High-Voltage slip-on probe for measuring up to 50,000 DC volts; WG-206 Multiplier Resistor

For Prices See Page 863

High Sensitivity AC VTVM

Type WV-76A

RCA
**Test Equipment
and Accessories**

Features

- Nine overlapping AC voltage ranges—permits measurements from 0.0002 volt (lowest scale division) to 100 volts (full scale)
- Separate decibel scale for measurements of levels from -40 to $+40$ dB
- Direct/Low Capacitance input probe permits measurements up to 500 volts or $+56$ dB
- Frequency response is flat from 10 Hz to 500 kHz with "Low Cap" probe, 10 Hz to 1.5 MHz with "Direct" probe
- May be used as a preamplifier — 38 dB maximum gain or 10-millivolt range
- High input impedance — permits measurements in circuits sensitive to loading
- Probe and cable shielded throughout its length — eliminates pick-up from stray fields
- Heavy filtering in power-supply section keeps hum at extremely low level

Description

The WV-76A High Sensitivity AC Vacuum-Tube Voltmeter is designed for audio applications in industry, laboratories, and schools. It is also useful in broadcast, design and development, production, and servicing applications. Typical applications include frequency response tests of preamplifiers, amplifiers, and tone-control circuits; feedback-circuit signal tracing, audio-level and power-level measurements, gain measurements, amplifier-balancing operations, and general audio-voltage measurements. Different scales are provided for voltage measurements, a separate scale is provided for decibel measurements. Measurements are made in nine overlapping ranges. Accuracy

of the voltage and decibel measurements is 5% of full-scale reading.

The coaxial-type shielded low-capacitance/direct probe, the RCA WG-300B, supplied with the WV-76A has a sliding switch in the probe housing which provides for switches from direct to low-capacitance input. In the Low-Capacitance position, the probe presents an over-all input resistance of 10 megohms and an input capacitance of approximately 13 pF to the test circuit. This feature permits measurements in circuits which are sensitive to loading.

The WV-76A is also useful as a wide-range audio preamplifier, having approximately 36 dB maximum gain.

Specifications

Calibration of the WV-76A is based on pure sine-wave input voltage.
Accuracy figures are based on a line voltage of 120 volts)

Frequency Range:
WG-300B in "Direct" Position ± 1 dB 10 Hz to 1.5 MHz
"Low-Cap" Position $\pm$ dB 10 Hz to 500 kHz

Voltage Measurements (with WG-300B in "Direct" Position):
Ranges 0 to 0.01, 0.03, 0.1, 0.3, 1 V
..... 0 to 3, 10, 30, 100 V
Accuracy $\pm 5\%$ (full scale)

Measurements* (With WG-300B in "Direct" Position):
Ranges (nine) $-40, -30, -20, -10, 0,$
..... $10, 20, 30, 40$ dB
Accuracy $\pm 5\%$

Characteristics:
Input Connector 1 meg shunted by 58 pF

With WG-300B in
"Direct" Position 1 m Ω shunted by 95 pF
"Low-Cap" Position 10 m Ω shunted by 13 pF

Preamplifier:

Output Voltage 0.8 output V for 0.01 input V
Output Impedance Less than 400 Ω
Gain 38 dB on 10 mV range

Power Supply:

Frequency 50 to 400 Hz
Voltage 105-125 V
Consumption 35 W

Dimensions

Width 5 $\frac{3}{8}$ ", Height 7 $\frac{3}{8}$ ", Depth 4 $\frac{3}{8}$ ", Weight 5 lbs.

Equipment Supplied

WG-300B Direct/Low-Capacitance Probe, "Slip-On" Alligator Clip, Clip Insulator, Instruction Book.

*When the WG-300B is set to the "Low-Cap" position, up to 500 V or $+56$ dB may be measured.
*Zero dB — 1 mW into 600 Ω .

For Prices See Page 863

Solid-State, Battery-Operated VoltOhmyst®

Type WV-500B

RCA
**Test Equipment
and Accessories**

Features

- Excellent stability
- Measures from 2 microamperes to 1.5 Amperes in 8 ranges
- Measures from 0.2 ohm to 1000 megohms in 7 ranges
- Measures from 0.02 volt to 1500 volts in 8 ranges
- Measures from 0.1 to 1500 rms AC volts in 7 ranges plus peak-to-peak voltages of complex waveforms
- 11 megohm resistance on all DC ranges
- Supplied with DC/AC Ohms probe with shielded input cable
- Mirror scale meter—movement electrically protected against burnout

Description

The WV-500B VoltOhmyst is a solid-state, battery-operated electronic voltmeter. The instrument measured DC voltages from 0.01 to 1500 volts, DC current from 2 microamperes to 1500 milliamperes, AC (rms) voltages from 0.1 to 1500 volts, AC peak-to-peak voltages from 0.5 volts to 4200 volts, and resistance values from 0.2 ohms to 1000 megohms.

Seven overlapping ranges are provided for AC rms and resistance measurements, and eight ranges are provided for DC voltage and current measurement. Accuracy for the DC and AC rms functions is $\pm 3\%$ (of full scale reading).

The WV-500B has an input resistance of 11 megohms on all DC ranges to prevent overloading the circuit under test.

Special solid-state circuitry is used in the WV-500B to assure

stable, drift-free operation with minimum effect due to temperature variation. Advantages of solid-state construction include the elimination of warm-up time and a reduction in zero-shift that can occur in tube-operated voltmeters.

Since the WV-500B is battery-operated, the measuring circuit is completely isolated from the ac power line. The instrument can be used to make measurements on equipment with high ground potentials, an important feature in many industrial and laboratory applications.

Additional features include zero-centering of the meter pointer, and a circuit design that permits measurement of the component of an ac signal. The meter movement of the WV-500B is electrically protected against burnout.

Specifications

DC Voltmeter:

Ranges 0 to .5, 1.5, 5, 15, 50, 150, 500, 1500 V
Input Resistance
All Ranges 11 m Ω
Accuracy $\pm 3\%$ of full scale

AC Voltmeter:

Ranges:
rms Values of Sine-Waves 0 to 1.5, 5, 15, 50, 150
500, 1500 V

Peak-to-Peak Values of Sine Waves and
Complex Waves 0 to 14, 42, 140, 420, 1400, 4200 V
Accuracy $\pm 3\%$ of full scale
(Accuracy of rms ranges based on use of sine wave signals having
less than $\frac{1}{2}$ of 1.0% total harmonic content.)

Frequency Response
(1.5 and 5.0 V AC Ranges) ± 1 dB 30 Hz to 3 MHz

DC Current:

Ranges 0 to .5, 1.5, 5, 15, 50, 150, 500 and 1500 mA
Accuracy $\pm 3\%$

Ohmmeter:

Ranges, Seven 0 to 1000

Batteries:

Ohms 1 1.5 volt "C" cell RCA VSO35A or equivalent

Metering Circuit 3 9 volt battery (RCA VS323 or equivalent)

Dimensions

Height 6 $\frac{3}{8}$ " , Width 5 $\frac{1}{4}$ " , Depth 3 $\frac{1}{8}$ " , Weight 3 $\frac{1}{2}$ lbs.

Equipment Supplied

DC/AC Ohms Probe and Cable WG-410B, Slip-On Alligator Clip, 2 current leads: 1 RCA VSO35A Battery, 3 RCA VS323 Batteries, Instruction Book.

Accessories Available

WG-301A Crystal-Diode slip-on probe for measuring RF from 50 kHz to 250 MHz; WG-411A High-Voltage slip-on probe measuring up to 50,000 DC volts; WG-206 Multiplier Resistor

For Prices See Page 863

Power Line Monitor

Type WV-120A and WV-503A

RCA

Test Equipment and Accessories

WV-503A

WV-120A

Features

- **Expanded 2-color scale** — from 100 to 140 volts (WV-120A) and 200 to 280 volts (WV-503A)
- **High accuracy** — $\pm 2\%$ center scale; $\pm 3\%$ at both ends
- **True rms reading** — moving vane type meter gives accurate rms readings, even when line voltage is not pure sine wave
- **Fast meter action** — reveals "bounces" and fluctuations in line voltage
- **Wide frequency range** — From 25 Hz to 400 Hz
- **Large numerals, large pointer, large scale** — provides easy readability from distance of 10 feet or more
- **Convenient wall mounting** — holes are provided in rear of case for easy wall mounting

Description

The WV-120A and WV-503A Power-Line Monitors are designed for use by industries, laboratories, and radio-TV and electronic repair shops where it is important to know the line voltage at all times. These instruments provide a continuous, accurate indication of the AC line voltage at a glance without the inconvenience of handling probes and test leads or the necessity of selecting one of several scales to determine the proper meter reading. In conjunction with a variable isolation transformer, an RCA Power Line Monitor is a valuable aid in selecting line voltages for such applications as TV servicing, test instrument calibration, and the operation of electronic equipment that requires a known line-voltage supply. The RCA WV-120A and WV-503A Power-Line Monitors provide a continuous, accurate indication of the AC line voltage at a glance. These instruments can be used on AC power-line sources of frequencies of 25 Hz to 400 Hz. They feature accuracy of

$\pm 2\%$ at 120 and 240 volts, $\pm 3\%$ at scale ends. The meter has a special expanded scale with large, easy-to-read voltage designations. Also, the tip of the meter pointer is made wide enough to be seen clearly at a considerable distance from the instruments. As a convenient means of reference, the nominal AC line-voltage standard of 120 or 240 volts is printed in red.

The meter movement is a moving-vane type. This type of meter indicates rms values even when the waveform of the power-supply voltage is distorted. (Peak reading and peak-to-peak reading AC voltage measuring circuits, such as used in conventional VTVM's are calibrated on the basis of pure sine-wave voltages, and such meters do NOT indicate the true rms value of distorted waveforms.) The meter movement is only slightly damped and therefore has fast response. This feature is highly desirable because it permits the meter to indicate the presence of line-voltage "bounce" or fluctuations.

Specifications

Frequency Range 25 Hz to 400 Hz
Voltage Range 100 to 400 V (WV-120A)
..... 200 to 280 V (WV-503A)

Meter Accuracy $\pm 2\%$ at center scale, $\pm 3\%$ at both ends

Dimensions

Height $3\frac{1}{8}$ ", Width 5", Depth $3\frac{1}{8}$ ", Weight $1\frac{1}{2}$ lbs.

Super-Portable 3-Inch Oscilloscope

Type WO-33A

RCA
**Test Equipment
and Accessories**

Features

- Flat response to 5.5 MHz handles 3.58 MHz color TV sig with ease
- Exceptional sensitivity — .003 rms volt-per-inch for work with extremely low-level input signals
- Built-in calibration circuit and graph screen for direct read of peak-to-peak voltages — as easily as with a VTVM
- Frequency compensated 3-to-1 vertical attenuators
- Supplied with shielded direct/low capacitance probe cable

Description

The RCA Super-Portable 3-Inch Oscilloscope will help you solve virtually any electronics servicing problem you may encounter inside or outside the shop. The low cost and high performance of the RCA WO-33A have made it popular as a monitor and trouble-shooting 'scope in black-and-white and color TV broadcasting studios, and in professional service shops.

High gain and exceptional bandwidth make this instrument ideal for general servicing and alignment work in black-and-white and color TV trouble-shooting, signal tracing, and measurement; for audio high-fidelity and stereo work; for all types of sweep alignment; and in all types of computer and industrial applications.

A novel feature of the WO-33A is the Vertical Input Attenuator which automatically switches the amplifier from Wide Band

to Narrow Band when in the three highest gain positions.

A phase control is provided for varying the phase of the internal sweep voltage when the "LINE" position of the H/SWEEP SEL control is used, enabling the WO-33A to be phased with an external line-frequency sweep oscillator.

The WO-33A is equipped with a specially designed, single unit Direct/Low-Capacitance probe and cable (WG-349A). When the Low-Capacitance input is used a special high-impedance circuit in the probe is connected in series with test point and the 'scope, reducing circuit-loading effects and permitting the WO-33A to be used in circuits which would not function properly if loaded down by a conventional oscilloscope.

Specifications

Note: Performance figures are for a line voltage of 117 V, 60 Hz.

Frequency Response:

Vertical Amplifier:

Wide-Band Positions (5.5 Hz to 5.5 MHz)	flat within -3 dB
High-Sensitivity positions:	
20 Hz to 150 kHz	flat within -3 dB
3 Hz to 1.5 MHz	flat within -6 dB
Horizontal Amplifier (3.5 Hz to 350 kHz)	flat within -6 dB

Deflection Sensitivity: Vertical Amplifier

	(Wide-Band) position		(High-Sensitivity) position	
	rms	p-p	rms	p-p
At V INPUT connector	0.10	0.3	.003	0.01 V/in
With WG-349A (Direct)	0.10	0.3	.003	0.01 V/in
With WG-349A (Low-Cap)	1.0	3.0	.03	0.1 V/in
Horizontal Amplifier (at H INPUT terminal)				0.9 rms V/in
Rise Time (Vertical Amplifier)				
Wide Band MHz Positions				0.1 μ s

Input Resistance and Capacitance:

Vertical Amplifier:	
At V INPUT Connector	1 m Ω shunted by approx. 50 pF
With WG-349A	

(Direct)	1 m Ω shunted by approx. 90 pF
(Low-Cap)	10 m Ω shunted by approx. 10 pF
Horizontal Amplifier (at H INPUT terminal)	10 m Ω
EXT SYNC Input Terminal	250 K Ω to 500 K Ω
Sweep Oscillator:	
Frequency Range (continuously adjustable)	15 Hz to 75 Hz
Sync	External, Positive and Negative Intensity
Maximum AC Input Voltage (at Lo-Cap Probe):	
(In presence of 400 V dc)	600 p.p.s.
Phase-Control Range	0 to 160 degrees
Power Requirements:	
Voltage	105-125 V, 50-60 Hz
Average Power Consumption	5 W

Dimensions

Height 8 $\frac{3}{4}$ ", Width 6 $\frac{1}{2}$ ", Depth 10 $\frac{1}{4}$ ", Weight 14 lbs.

Equipment Supplied

WG-349A Direct/Low Capacitance Probe and Cable

Accessories Available

WG-350A Demodulator Probe for RF application from 500 to 250 MHz; WG-271A Adaptor for using WG-300B Direct/Low Capacitance Probe; WG-300B Direct/Low Capacitance Probe and Cable.

RF Signal Generator with Sweep Features

Type WR-50B

RCA
**Test Equipment
and Accessories**

Features

- Continuous coverage 85 kHz to 40 MHz in 6 overlapping ranges
- Built-in crystal calibrating oscillator circuit with front panel crystal socket
- Internal 400 Hz audio oscillator
- Sweep output at 10.7 MHz and 455 kHz with return trace blanking for sweep alignment of radio receivers
- Permanently attached shielded RF output cable with built-in DC blocking capacitors
- Modulation level control
- Two-step RF attenuator switch plus a continuously variable attenuator control
- Additional switch for further attenuation of the crystal oscillator output
- Audio output level control
- Easy-to-read dial scale

from 85 kHz to 40 MHz in six ranges. For higher frequencies, harmonics of the high range can be used. A vernier tuning control permits precise setting of the output frequency. The RF output can be modulated with the internal 400 Hz oscillator, or with an external audio signal. The modulation level is adjustable.

A two-position attenuator switch, together with a variable attenuator control provide complete adjustment of the RF output level.

The crystal oscillator circuit in the WR-50B enables the instrument to be used as a crystal calibrator. A convenient crystal socket is provided on the panel. This crystal oscillator can be used as a frequency calibration reference for the variable oscillator, or can be used directly as a crystal-controlled signal source.

Description

The WR-50B RF Signal Generator is a highly versatile, portable test instrument designed for use in the shop or field for general television and radio servicing and applications.

The unit is particularly well suited for such applications as alignment and signal tracing of AM, FM, High-Fidelity and Stereo Band receivers, alignment of low-frequency IF transformers in television receivers, and signal tracing and troubleshooting in nearly all sections of television receivers. The 455 kHz and 10.7 MHz sweep positions make the WR-50B particularly useful for sweep alignment of both AM and FM receivers, especially since the introduction of several new transistor radios in which sweep alignment of both sections is recommended.

The variable oscillator covers the fundamental frequencies

Specifications

Power source: line voltage at 120 volts, 60 Hz

Output:

85 kHz and 10.1 MHz, center-frequencies

Sweep width approximately 10% of center frequency

RF Oscillator:

Ranges (fundamental frequencies) 85 kHz to 40 MHz

Output (all ranges)¹ 0.05 V rms (minimum)

Frequency Calibration Accuracy $\pm 2\%$

Modulating Frequency Approx. 400 Hz

Modulation Adjustable up to 30%

Output At least 8 V rms across 15 k Ω load

Modulation Modulating frequency, 15 kHz max.

Crystal Oscillator²

Maximum Output 0.02 V rms

Internal Mod. Percentage Approx. 20%

Frequency Range 100 kHz to 15 MHz (Fundamental)

Attenuator

VFO and Sweep Output 2-step 10-to-1 attenuator switch with potentiometer for fine adjustment

Crystal Oscillator Output .. Additional 7-to-1 attenuator switch

Power Supply

Voltage Rating 105-130 V 50/60 Hz

Power Consumption 15 W

Sine/Square-Wave Audio Signal Generator

Type WA-44C

RCA
**Test Equipment
and Accessories**

Features

- Sine-wave or square-wave output from 20 Hz to 200,000 Hz
- High output voltages — 8 volts rms or more with rated load
- Separate 60 Hz output for intermodulation distortion measurements
- 10-to-1 step attenuator and continuously adjustable output control
- Durable, attractive brushed aluminum dial with etched lettering, and sturdy metal cabinet

Description

Precision engineered and factory calibrated, the RCA WA-44C Sine/Square-Wave Audio Signal Generator is a compact, high-quality instrument designed for use in audio, high-fidelity and general electronic applications as well as in electronics training, demonstrations, and laboratory work. Covering a range from 20 Hz to 200,000 Hz, the WA-44C is also useful in testing ultra sonic equipment.

Application for this versatile instrument include measuring frequency response of amplifiers determining resonant frequencies of loudspeakers, tuning loud-speaker enclosures, finding input and output impedances, determining values

of unknown inductors and capacitors, and measuring intermodulation distortion.

Operation of the WA-44C is straightforward. The desired frequency is selected by means of the continuous, single frequency dial, together with the appropriate multiplier indicated on the "FREQ RANGE" switch. The type of wave and the amplitude are selected by means of the "SINE-SQUARE" wave selector switch. The output voltages can be adjusted with the continuously adjustable "OUTPUT" control. A separate output at line frequency is also provided, and output voltage is adjustable up to 6 volts.

Specifications

Note: Performance figures are for a line voltage of 117 V, 60 Hz.

Frequency Range 20 Hz to 200 kHz

Amplitude Variation of Output Voltage:
(30 Hz to 100 kHz) ± 1.5 dB

Frequency Stability:
(105 to 125 volts AC line) $\pm 2\%$

Dial Calibration Accuracy:
(20 Hz to 20 kHz) $\pm 5\%$

Sine Wave:
Output Voltage:
(*100 K Ω and 75 pF load) 8 rms V or more

Maximum Total Harmonic Distortion:
(30 Hz to 15 kHz)

Maximum Hum:
(Percent of rated output voltage) Less than

Square Wave:
Output Voltage:
(*100 K Ω and 75 pF load) 10 p-p V or more

Power Supply:
Voltage 105-125 V, 50-60 Hz
Power Consumption Approx.

Dimensions

Height 7", Width 10 $\frac{1}{8}$ ", Depth 6 $\frac{1}{8}$ ", Weight 10 $\frac{1}{2}$ lbs.

*A lower impedance may decrease the output voltage and slightly increase distortion.

Transistorized Sine/Square Wave Audio Signal Generator

Type WA-504A

RCA
Test Equipment and Accessories

Features

- All solid-state — including MOSFET oscillator stage
- Switch selection of sine-wave or square-wave output
- Wide frequency range — 20 Hz to 200,000 Hz
- High output voltages — 10 volts rms or more with rated load
- Low distortion — 0.25% or less over the audio frequency range
- Essentially flat output voltage — ± 1.5 dB from 30 Hz to 100,000 Hz
- Attached, shielded output cable
- 10-to-1 step attenuator and continuously adjustable output control

Description

Engineered and factory calibrated, the RCA WA-504A Transistorized Sine/Square-Wave Audio Signal Generator is a compact, high-quality instrument designed for use in audio, fidelity and general electronic applications as well as electronic training, demonstrations, and laboratory work. Covering a range from 20 Hz to 200,000 Hz, the WA-504A is useful in testing ultrasonic equipment.

Applications for this versatile instrument include the measurement of frequency response characteristics of amplifiers, determining resonant frequencies of loudspeakers, testing loudspeaker enclosures, finding input and output impedances, determining values of unknown inductors and capacitors, and determining the frequency or speed of vibrating objects. The WA-504A facilitates the testing and

servicing of any equipment employing audio or ultrasonic signals.

The RCA WA-504A Sine/Square Wave Audio Generator provides a tunable sine or square wave audio-frequency signal ideally suited for service, industrial, and educational applications. The frequency range extends from 20 Hz to 200,000 Hz.

New solid-state circuit design using six transistors, including an MOS transistor, and two diodes produces a stable signal with an amplitude variation not exceeding ± 1.5 dB from 30 Hz. Total harmonic distortion of the sine wave is less than 0.25% from 30 Hz to 15,000 Hz.

The generator has an attached shielded output cable.

Specifications

Reference figures for line voltage of 120 V, 60 Hz

Frequency Range	20 Hz to 200 kHz (four ranges)
Voltage Variation of Output Voltage	± 1.5 dB
Frequency Stability (105 to 130 volts AC line)	$\pm 0.5\%$
Calibration Accuracy (20 Hz to 20 kHz)	$\pm 5\%$, or 2 Hz, whichever is greater
Output Voltage (100k Ω , 75 pF load)	10 V rms or more
Maximum Total Harmonic Distortion (20 Hz to 15 kHz)	0.25%

Square Wave

Rise and Fall Time (Maximum output)	less than 1.0 μ s
Maximum Tilt	less than 5.0%
Output Voltage	10 V p-p or more

Power Supply

Voltage 105-130 V, 50-60 Hz, Average Power Consumption Approx. 8 watts.

Dimensions

Height 7 $\frac{3}{4}$ " , Width 5 $\frac{3}{8}$ " , Depth 4 $\frac{3}{4}$ " , Weight 3 lbs.

Stereo FM Signal Simulator

Type WR-52A

RCA
**Test Equipment
and Accessories**

Description

The WR-52A Stereo FM Signal Simulator is designed to generate the signals necessary for service, alignment and maintenance of Mono and Stereo FM receivers and multiplex adaptors. In addition to its value as a service instrument, the three low-distortion sine-wave frequencies, the crystal controlled 19 kHz and 38 kHz frequencies, the adjustable 100 MHz carrier make the WR-52A an extremely useful test instrument for FM broadcasters and manufacturers of stereo FM equipment.

A meter is included on the instrument to indicate the RF deviation of the FM signal from 0-75 kHz (75 kHz deviation represents a modulation level of 100%).

Separate color-coded scales are provided for stereo and mono. A calibration mark is also provided on the meter for convenient and accurate adjustments of the 19 kHz subcarrier level.

The RCA WR-52A Stereo FM Signal Simulator provides the following signals:

- Composite stereo output signal for either left or right channel.
- FM stereo output for either left or right channel. The 100 MHz FM carrier is adjustable to permit selection of a quiet point in the FM band. The RF deviation is adjustable from 0 to 75 kHz.

Specifications

RF Signal Output:

Carrier	100 MHz
Center Frequency adjustable	± 800 kHz
Subcarrier	19 kHz*
FM Modulation	Left stereo signal, Right stereo signal, Internal Test (L + R subcarrier modulation), Monaural FM
Deviation	Adjustable 0 to 75 kHz
Sweep Signal	
Center Frequency	100 MHz
Rate	60 Hz
Sweep Width	Adjustable 0 to more than 750 kHz
RF Output Voltage	Adjustable up to 0.1 V, rms (approx.)

Composite Signal:

Output	Left stereo signal, Right stereo signal, Internal Test (L + R subcarrier modulation), 400 Hz, 1 kHz, 5 kHz, 19 kHz*
--------	---

Features

- RF output — connects to receiver antenna terminals
- 100 MHz carrier, tuneable
- Choice of FM signals — Left Stereo, Right Stereo, Mono FM, internal test and 60 Hz FM sweep
- FM stereo deviation adjustable from 0 to 75 kHz
- RF Output attenuator
- RF Deviation Meter
- Composite Stereo Output
- Choice of Left Stereo and Right Stereo signals
- Crystal-Controlled 19 kHz Subcarrier
- 7 Sine Wave Frequencies

- Monaural FM output. A switch is provided to disable the 19 kHz oscillator for low-distortion mono FM output.
- 100 MHz sweep output to check receiver RF/IF alignment. Sweep rate is 60 Hz. Sweep width is adjustable from more than 750 kHz.
- Audio output signals of 400 Hz, 1000 Hz, and 5 kHz.
- Crystal-controlled 19 kHz and 38 kHz signals for multiplex circuit adjustment.
- 67 kHz and 72 kHz output signals for SCA trap circuit adjustments.
- Special Internal Test output to check phase adjustment of WR-52A stereo signal.

The left and right composite stereo signals, left and right stereo signals, and mono FM signals can be modulated with the internal 400 Hz, 1000 Hz, or 5 kHz frequencies. Binding posts are provided so that other AF modulating signals can be applied from an external source. A control is provided attenuating the level of the RF output.

The WR-52A comes complete with two connecting cables. A direct unterminated cable is for use with the composite stereo signal and audio signal outputs, and a terminated cable for RF output to a 75 ohm or 300 ohm receiver antenna input.

Audio Output	38 kHz*, 67 kHz, 72 kHz
Percent distortion of 400 Hz, 1 kHz, and 5 kHz Frequencies	Less than 1%
Composite Signal/Audio Output Level	Adjustable from 0 to 10 V p-p, open circuit
Output source impedance approx.	50 ohms
Power Supply:	
Voltage	115 to 125 V, 50/60 Hz
Power Consumption	100 W

Dimensions

Width 13½", Height 10", Depth 8", Weight 12¾ lbs.

Equipment Supplied

Direct Output Cable, RF Output Cable (terminated), Instruction Book.

*19 kHz and 38 kHz signals are crystal-controlled. Accuracy within ± 0.1 kHz.

For Prices See Page 863

Crystal-Calibrated Marker Generator

Type WR-99A

RCA
**Test Equipment
and Accessories**

Features

- Continuous tuning, 19 to 260 MHz in 8 ranges
- Matched-impedance pad-type attenuator
- Highly stable, fundamental output — no beat frequencies or harmonics used
- Provision for external marker crystals or LC circuits
- Separate crystal check points at 1 MHz or 10 MHz intervals provide accurate calibrating beats throughout entire frequency range
- Internal modulation frequencies — 1 MHz or 10 MHz, 4.5 MHz, a combination of 4.5 MHz and 600 Hz, and 600 Hz
- Most-used television IF and RF frequencies specially marked on dial scale
- Dual sound-and-picture-carrier markers

Description

The RCA WR-99A Crystal-Calibrated Marker Generator combines in one compact instrument the functions of a single-marker generator, crystal calibrator and a heterodyne frequency meter. Featuring extreme accuracy and stability over a wide frequency range, the WR-99A is ideal for servicing aligning color and black-and-white TV receivers, communications and other equipment operating in the frequency range of 19 to 260 MHz.

When used as a heterodyne frequency meter, the frequency of an unknown signal can be quickly measured by feeding the instrument and reading the frequency directly from the dial.

The WR-99A includes crystal-controlled 10 MHz and 1 MHz markers for calibrated accuracy. The VFO frequency as well as the frequency of an external signal may then be checked against internal calibrating beats at 1 or 10 MHz intervals throughout the tuning range.

A switch-type attenuator in the WR-99A provides attenuation in continuous steps over a range of 60 dB on all frequencies. Double shielding of the oscillator reduces leakage to well below the full attenuated signal; permitting control of marker amplitude right down to the noise level of TV receivers. A special coaxial cable is provided with the unit for coupling into the test circuit.

The VFO signal also may be modulated internally with both 4.5 MHz and 600 Hz, a useful feature for adjustment and alignment of sound-IF amplifiers and detectors. The 4.5 MHz signal produces dual sound and picture markers; the 600 Hz modulation will produce a horizontal-bar pattern when the output signal is set to the frequency of the picture carrier or picture intermediate frequency. The 4.5 MHz output signal may be modulated with 600 Hz for visual alignment of the detector.

Specifications

Output Frequencies (fundamentals) ...	19-260 MHz (8 ranges)
Crystal-Controlled	1 MHz
	4.5 MHz
	10 MHz
Output Voltages:	
80 Ranges	At least 0.1 V rms
Output Cable Impedance	90 Ω
10 MHz Crystal Calibrator:	
Accuracy	$\pm 0.01\%$
Number of 10-MHz Check Points	242
1 MHz Calibrator:	
Accuracy	$\pm 0.01\%$

Number of 1-MHz Check Points	24
4.5 MHz Crystal Oscillator:	
Accuracy	$\pm 0.02\%$
Internal Modulation	1, 10, 4.5 MHz and 600 Hz

Power Supply

Voltage 105-125 V, Frequency 50-60 Hz, Power Consumption 45 W.

Dimensions

Height 10", Width 13½", Depth 7", Weight 17 lbs.

Equipment Supplied

1 Output cable, 1 red and 1 black phone tip, instruction book.

Chro-Bar Solid-State Color-Bar Generator

Type WR-502A

RCA
**Test Equipment
and Accessories**

Features

- All solid-state circuitry
- Sound carrier, pattern, RF output, and color subcarrier crystal controlled
- Rock-solid stability
- Battery operated — completely portable
- Provision for spare battery with selection switch
- Battery test meter
- Gun killer switches

Description

The RCA WR-502A CHRO-BAR is a solid-state, battery operated color-bar generator, designed to provide the test signals required for adjusting convergence, color-phasing, matrixing, purity, and linearity of color television receivers. Patterns generated by the CHRO-BAR include color bars, dots, crosshatch, vertical lines, horizontal lines, and blank raster.

The instrument includes slide switches for shorting out the control grids of the color picture tube. This feature enables the red, blue, or green color guns to be "killed," as required in convergence and purity adjustments. Leads are provided for connection to the control-grid leads of the color picture tube socket.

The color-bar pattern provides ten bars simultaneously, including R-Y, B-Y, I and Q signals, spaced at 30 degree phase intervals. This pattern is for use in checking color phase and matrixing circuits, and adjusting the automatic frequency phase control. (AFPC). Narrow brightness pulses are added at the edges of each color bar to aid in checking the "fit" or registration of the brightness and color signals.

A crystal-controlled 4.5 MHz sound carrier is added to the

color-bar pattern in the "PATTERN & SOUND CARRIER" function. This sound carrier produces beats in the color-signal to permit making an accurate fine tuning adjustment.

The dot pattern provided by the WR-502A is used primarily for convergence adjustment. The crosshatch, vertical line, and horizontal line patterns are for use in adjusting linearity both black and white and color receivers, and as an alternate pattern for adjusting convergence. The crosshatch pattern consisting of a fixed number of vertical and horizontal lines can also be used to check receiver overscan adjustment.

The blank raster function is useful for both purity and color temperature adjustments.

Crystal-controlled RF output is provided on channel 3 (WR-502A), or channel 4 (WR-502AVI). The output cable connects directly to the antenna input terminals on the receiver.

The WR-502A is powered by a 4.2 Volt mercury battery. For convenience, the instrument has provision for an alternate battery that can be switched in easily when the first battery becomes weak. A meter is provided on the panel to indicate the condition of the batteries.

Specifications

Output*

Frequencies	Picture carrier 61.25 MHz (Channel 3)
	Sound carrier 65.75 MHz (Channel 3), unmodulated
Voltage	Picture carrier 10,000 MV (approx.)
Horizontal Sync	15804 Hz
Color Subcarrier	3,563,741 kHz, ± 20 Hz, keyed at 189 kHz
Sound Oscillator	4.5 MHz
Output Impedance	Approximately 300 Ω

Test Patterns	Color bars (variable chroma level), crosshatch (H+V)/horizontal lines, vertical lines/blank raster
Battery	Unit powered by a 4.2V mercury battery RCA V or equiv. Includes provision for alternate battery with selector switch
Meter	Indicates condition of battery
Dimensions	Width 7½", height 6½", depth 4", weight

*Note: All output signals crystal-controlled.

For Prices See Page 863

Color/Black-and-White Picture-Tube Tester

Type WT-509A

RCA
**Test Equipment
and Accessories**

Features

- Tests over 1,000 color and B&W picture tubes for emission quality, interelectrode leakage, and shorted elements
- Includes "activate" function to improve performance of some low-emission tubes
- Supplied with five test sockets including unique "universal" test adaptor which can be used with any type of tube or socket arrangement
- Includes sensitive adjustment to establish proper cut-off point for each tube
- All solid-state — triac device controls internal voltage for accurate testing regardless of variations of line voltage
- Input jack for high voltage probe — measures picture tube anode voltage up to 50,000 volts
- Includes 1500 volt input to measure picture tube grid and cathode voltages
- Comes complete with sturdy, luggage type carrying case with convenient storage compartment

Description

WT-509A is a precision instrument that tests both color and black-and-white picture tubes for emission quality, interelectrode leakage, and shorted elements. Complete solid-state circuitry is used, including a triac device for controlling internal voltages. Test data is provided for testing more than 1,000 picture tube types.

Five socket adaptors are supplied, including a versatile "universal" adaptor that can be connected to the base of any picture tube.

Socket Adaptors

Five socket adaptors are provided with the WT-509A, permitting testing of the most commonly found in both black and white and color picture tubes to be tested. The socket to use for a particular tube is listed in the Test Data Booklet. The sockets are identified by number. Sockets 1, 2, 3, 4, and 7 are provided with the Tester. Sockets 5 and 6 are available as accessories, and can be obtained from your local RCA Test Equipment Distributor, using stock numbers listed at right (use socket specified in test data booklet, part E1 255, supplied with instrument).

A sensitive cut-off adjustment establishes the proper cut-off point for testing each tube. The internal B+ and bias voltages of the Tester are regulated to assure an accurate and reliable test of picture tube performance.

A special "activate" function is provided to improve the performance of some low-emission tubes. Additional features of the WT-509A include a 50,000 DC volt range for use with an RCA WG-297 High-Voltage Probe to measure picture tube anode voltage. A 1500 volt input is also provided for measuring picture tube electrode voltages.

In-Circuit/Out-of-Circuit Transistor Tester

Type WT-501A

RCA
**Test Equipment
and Accessories**

Features

- Battery Operated — completely portable
- Tests both high-power and low-power transistors
- Measures NPN and PNP Transistors (I_{cbo}), (I_{ceo}), and Seta
- Adjustable collector current permits most transistors tested at their rated current level
- Front panel NPN and PNP sockets for convenient matching in complementary symmetry applications
- Reliable in-circuit testing of transistor current gain
- Includes zero control to cancel the effect of leakage on in-circuit current gain reading
- Tests relative front-to-back ratio of diodes at appropriate current levels
- Mirrored scale

Description

Completely portable and requiring no external power source, RCA's WT-501A tests transistors both in-circuit and out-of-circuit, tests both low and high-power transistors, and has both NPN and PNP sockets to allow convenient transistor matching for complementary symmetry applications. Three color-coded test leads are provided for in-circuit testing. Special low-impedance circuitry assures reliable in-circuit testing.

The instrument is designed to test transistor for dc beta from 1 to 1000, collector-to-base leakage (I_{cbo}) as low as two-microamperes, and collector-to-emitter leakage (I_{ceo}) from 20 microamperes to one-ampere. Collector current is adjustable from 20 microamperes to one-ampere in four ranges, permitting most transistors to be tested at their rated current level.

Power transistors can be tested with I_c up to one-ampere. A DC forward current transfer ratio curve can be plotted. The instrument can also test the relative in-circuit DC current gain of a transistor.

A 100 microampere meter movement is used in the measuring circuits for the various test functions, and precision resistors are used to insure accurate test results. Normal maintenance includes only replacing the batteries as necessary.

The WT-501A is also a convenient instrument for making check of the relative front-to-back ratio of diodes. An important feature is the ability to check the diode at an appropriate current level.

Specifications

DC Beta (hFE)	
Range	1 to 1000
Accuracy	±5%
Collector Current (I_c)	100 μ A to 1 Amp. in four ranges
Collector-to-Base Leakage (I_{cbo})	0 to 100 μ A

Collector-to-Emitter (I_{ceo})	0 to 1 Amp.
Battery Voltage	two 1½ V "D" cells, RCA VSO36 or equivalent

Dimensions

Height 6½", Width 5¼", Depth 3½", Weight 2¾ lbs.

Transistor/Diode Checker & Resistance-Capacitance Circuit Box

Type WC-506A WG-412A, and WG-412A(K)

RCA
**Test Equipment
and Accessories**

Features

- Fast relative gain and leakage measurements of NPN and PNP transistors
- Forward and reverse diode-current checks
- Panel socket and test leads for out-of-circuit measurements
- Battery operated
- Small, compact, inexpensive
- Panel switch for high-and-low leakage transistors
- Quick-connect diode test terminals

Description

The RCA WC-506A is a compact, battery-operated instrument especially designed to provide a quick, simple check of relative gain and leakage levels of out-of-circuit transistors. All measurements are indicated on an easy-to-read meter with an single red/green scale.

Both NPN and PNP transistors can be checked on the WC-506A. A panel switch is provided to adapt the circuit to accommodate checking high-leakage transistors, such as most germanium power types. The checker includes a transistor socket, and color-coded test leads.

The relative front-to-back current ratios of diodes can also be checked on the WC-506A. Special spring terminals for connecting diodes are located on the panel.

The WC-506A weighs 14 ounces and measures 3 3/4 inches x 6 1/4 inches x 2 inches. Power is supplied by two 1.5 volt penlite batteries (not included). The unit is contained in a sturdy bakelite case.

**WG-506A**

Features

- Available in wired (WG-412A) or kit form (WG-412A(K))
- 36 resistors in standard values from 15 ohms to 10 megohms (1 watt power rating, tolerance $\pm 10\%$)
- 18 capacitors from 100 pF to 0.22 μ F (600V rating, tolerance $\pm 10\%$)
- Simplified switching for separate R or C, or series or parallel RC
- Standard 3/4" terminal-jacks — accommodates dual banana-plug
- Complete with plug-in test leads and alligator-clip connectors

**WG-412A**

Description

The RCA WG-412A provides a convenient selection of standard resistors and capacitor values available either separately or in series or parallel RC combinations. The unit includes 36 resistors ranging in value from 15 ohms to 10 megohms and 18 capacitors from 100 picofarads to .22 microfarads. The uses of the R-C Circuit Box include component identification in servicing and circuit design applications and checking R-C circuits for checking impedance, reactance,

and frequency characteristics. The unit is also useful for classroom applications to demonstrate Ohm's Law, capacitive reactance, and other circuit effects caused by introducing various resistance and capacitance combinations.

The RC Circuit Box is provided with plug-in test leads with convenient alligator clip connectors (WG-413A). The unit measures 6 7/8 inches by 5 3/8 inches by 2 3/8 inches and weighs approximately one pound, 12 ounces.

TV Isotap

Isolation and Autotransformers

Type WP-26A and WP-25A

RCA

Test Equipment and Accessories

WP-26A

WP-25A

Features

- Provides instant high-low-medium line-voltage testing
- Speeds up servicing . . . cuts down returns
- Minimizes shock hazards . . . prevents damage to test equipment
- Delivers 500 volt-amperes from autotransformer winding; 400-volt amperes from isolated secondary winding (A less expensive model, WP-25A, is available. It delivers 275 volt-amperes max. from isolated secondary winding)
- Heavy duty rotary switch adjusts primary to match line voltage over range of 130 volts in 5-volt steps

Description

The RCA WP-26A and WP-25A Isotaps are designed for use as either an adjustable isolation transformer or as an adjustable autotransformer to facilitate testing and trouble-shooting of radio and television receivers, and other electronic equipment. A seven-position selector switch permits adjustment of the Isotap in five-volt steps to operate from any 50 to 60 Hz supply-line voltage from 105 to 130 volts. Output voltages of approximately 105, 115 and 130 volts are provided throughout

the supply-line voltage range.

Three outlets, marked DIRECT, are connected to the autotransformer or primary winding, and three outlets, marked ISOLATED, are connected to the secondary winding.

The three receptacles marked ISOLATED provide isolation from the supply-line for any connected equipment, minimizing shock hazard usually associated with the chassis, and other exposed parts of transformerless equipment.

Specifications

(All voltages with $\pm 5\%$)*

Supply Line:

Voltage range 105-130 V
Frequency 50-60 Hz

Output Voltages

DIRECT receptacles (with 500 max. VA load and selector set to value of supply-line voltage):

LOW 105 V
MED 115 V
HIGH 130 V

ISOLATED receptacle (with resistive load of 400 max. VA and selector set to value of supply-line voltage):

LOW 105 V

MED

HIGH

Load Rating:

Continuous operation:	WP-26A	WP-25A
DIRECT receptacles	500 VA max.	500 VA max.
ISOLATED receptacles	400 VA max.	275 VA max.

Intermittent operation:

DIRECT receptacles	750 VA max.	750 VA max.
ISOLATED receptacles	450 VA max.	450 VA max.

Shurite[®] PANEL METERS

MODEL 950 SERIES
(metal case)
ZERO ADJUSTER
OPTIONAL ON DC

MODEL 350 SERIES
(crystal clear front)
EDGEWISE METER

MODEL 550 SERIES
(metal case)
RIMLESS ROUND TYPE

MODEL 850 (actual size) ZERO ADJUSTER OPT

Manufactured in SHURITE'S new Connecticut plant, these meters are attractive, rugged, dependable indicators with accuracy well within $\pm 5\%$, and the ability to duplicate readings. DC meters are polarized-vane solenoid type (moving-magnet or bridge-type construction where indicated); AC meters are double-vane repulsion type with jeweled bearing. The jewel construction costs more to build, but it pays off in continuing accuracy during a longer useful life. Models 550 and 950 fit 2-5/32" hole; Model 850 fits 2-5/32" to 2-1/32" hole.

FEATURES

GUARANTEE: One year to user if returned to factory prepaid with 50c handling charge. **ALL METAL DIALS** — age and moisture resistant. **HIGH RATIO TORQUE-TO-WEIGHT** — gives fast pointer response. **VISCOSITY DAMPING** — effectively damps pointer overtravel. **CLEAR-PLASTIC 850 CASE** — crystal-clear, high-temperature, high-impact polystyrene case brings light to longest scale arc in its field; case back same material except black. **WIDE SELECTION** — Shurite offers the broadest line of standard meters in the economy-priced field. Distributor stocks are backed by an extensive factory inventory.

NEW AUTO BATTERY CONDITION TESTER

STOCK NO. 4153 — Four-color dial shows condition of 12 volt battery for starting and running, also charging rate of generator as too low or too high. May be left connected permanently, if desired, as it draws less current than an auto clock. Attractively blister-packed, with cigarette lighter plug, 24" cord, and mounting material. **\$4.50**

LIGHTING LEVEL INDICATOR

STOCK NO. 7902-FC — Simply place this pocket-size meter (molded case 3 1/4" x 2 1/8" x 1 1/8") on bench, desk, or other work surface and read illumination value in foot candles on a 300-fc scale. Shielded to minimize the effect of external magnetic influences. Developed for utilities in Edison Electric Institute for training in providing suitable lighting. Individually boxed. **\$9.75**

COLD-ZONE TESTER MODERATELY PRICED

STOCK NO. 8380-RT — Place the thin, flat resistance bulb inside a refrigerator, deep freezer, air conditioner or other cooling equipment, close the door on the polyethylene ribbon lead, allow the bulb temperature to stabilize, and get a direct reading from -40 to $+120^\circ\text{F}$. Saves time, builds customer confidence. Red pointer; 2 1/8" scale arc, readable to $\pm 2^\circ$; accuracy well within commercially accepted standards of $\pm 5^\circ$ ($\pm 3\%$). For further details, ask for Bulletin CT-1. Tester comes in gray vinyl case 5" x 5" x 4 1/2", complete with 8 ft. Model SA-309 thin, fast responding bulb and 7 1/2 volt standard battery. **\$20.50**

AC-DC LINE VOLTAGE TESTER

Stock No. 5406-LT — Plug-in to read line voltage, then demonstrate voltage drop or inadequate wiring by plugging in TV set, iron, toaster, washer, air-conditioner, shop equipment, etc. Features of this handy tester: a) attached plug receptacle permits continuous reading while loads are changed; b) reads to 150 volts AC or DC; c) cord allows convenient angle for reading; d) jewel bearing construction provides continuing accuracy. **\$4.85**

VU, S, and FIELD STRENGTH METERS

VU METERS — Read volume levels in audio transmission circuit scale -20 to $+3$ VU, red and black. AC rectifier type; pointer normally at -20 VU; 1400 ohms $\pm 5\%$ int. res. See Bulletin VU application circuitry. High-temperature clear-plastic cases.

STOCK NO. 8801Z — 850 Series, zero adjuster included; as illustrated.

STOCK NO. 3801 — Edgewise case, zero adjuster not available.

S METERS — To measure relative signal strength; black and red basic movement 0-5 Ma. DC with 1000 ohms int. res. $\pm 5\%$; for notation notes and circuits, see Bulletin VUS-67. High-temperature plastic cases.

STOCK NO. 3333 — 350 Series, 0-40 db, shown above, pointer normally at 40.

STOCK NO. 8333* — 850 Series; 0-60 db, pointer normally at 60. *For zero adjuster, add 35c to price and Z to stock number.

FIELD STRENGTH METER — When this meter — a variation of D.C. Milliammeter — is built into an elementary circuit (supplier's quest), antenna systems may be easily checked, tuned, matched to transmission lines.

STOCK NO. 8903Z — 850 Series case; top scale marked .1, .5, 1, 5, 7, 10; bottom scale marked 2, 4, 6, 8, 10; zero adjuster in meter only.

3-HOLE MOUNTING ADAPTER

MODEL 5-A — 2 3/4" black flange attaches from front, converts (round) meter to 3-hole flange type.

MOUNTING DIMENSIONS

IMPORTANT — HOW TO ORDER

Give (1) Model Number, (2) Range, (3) Stock Number, ZERO ADJUSTER (Z) 35c extra; see footnotes as to availability. **PANEL CALIBRATION (S)** Normally for non-magnetic panels, panel mounting, give thickness and size; add S to stock number. **SEE YOUR DISTRIBUTOR** Authorized Shurite distributors can model and can obtain your other needs promptly.

Prices Effective Nov. 1, 1969; F.O.B. Factory; Individually Boxed; (Subject to Change.)

NO ZERO ADJUSTER ON AC METERS; EXCEPT ON MODEL 850.

*For zero adjuster add 35c to price and Z to stock number.

**Supplied with external resistors.

EDGEWISE METERS — MODEL 350 SERIES

High-temperature crystal polystyrene front adds beauty to panel de-
 signs and 1.2" scale length offers easy reading. Uses less than half the
 panel space of other Shurite meters. Horizontal mounting; weight under
 2 ozs.; accuracy well within $\pm 5\%$; black escutcheon plate supplied.
 Case back normally black; available in light-transmitting frosted
 polystyrene on special order.

*Bridge-type construction; internal magnet design minimizes effects of
 external magnetic forces.

POCKET TYPE METERS

Please ask for General Catalog 49 which describes 13 types of battery
 testers (pocket meters). Their stock numbers begin with the digit 4.
 Typical is Stock No. 4151, 0-7 DC volts, approx. res. 670 ohms \$3.25

Prices Effective Nov. 1, 1969; F.O.B. Factory; Individually Boxed; (Subject to Change.)

Simpson

WIDE-VUE PANEL INSTRUMENTS

CALIBRATION — All DC Wide-Vue meters listed below have the Simpson self-shielded movement (calibration not affected by stray magnetic fields or magnetic mounting). All AC Wide-Vue meters have the Simpson Iron-vane type movement. AC Milliammeters and Ammeters are calibrated for use through 800 Hz. All AC Voltmeters are calibrated for use on 25 through 125 Hz. Calibration at frequencies up to 800 Hz can be made. Contact your local Distributor for prices.

*External Multipliers, Model 183, are furnished on 1½" DC meters 500 volts or higher; on 2½" DC meters or higher; and on 3½" and 4½" DC meters 1000 volts or higher. All others are self-contained.
†1½" DC Ammeters are self-contained through 10 amps. 15 amps and higher are supplied as 50 MV meters used with external shunts. 2½", 3½" and 4½" DC ammeters are self-contained through 50 amps. Higher ammeters are 50 MV meters to be used with external shunts. Shunt listings are on page 19.

NEW WIDE-VUE MOUNTING BEZEL AND ILLUMINATION KITS

For that modern, streamlined appearance — Mounting Bezels, made for wide-vue panel meters are changeable with flush and recess type meters of many popular styles. Designed for behind panel on material thickness of 1/8" to 3/16". Groove and flange style construction. Each bezel of die cast metal has an attractive black enamel satin finish and is supplied with mounting hardware and template.

Bezel Mount Kit consists of bezel brackets and screws and installation instructions.

†Simpson VU meters meet all the Electrical and Ballistic specifications established by Bell Laboratories and American Standards Association as required by broadcasting, communication and sound engineers. They are available with either type A or B scale. Type A scale stresses the level in VU for monitoring wire lines. Type B scale stresses percent use of transmitter output and is the standard for broadcast service. Impedance is 3900 Ω @ "0" VU deflection.

††External Multipliers, Model 183, (Featured on page 19) are furnished with meters having a range of 500 volts or higher. All others are self-contained. ‡2½" AC ammeters are self-contained through 50 amps. 3½" and 4½" ammeters self-contained through 75 amps and have an impedance of approximately .0005Ω. Higher range AC ammeters are 5 amp meters to be used with external current transformer. See page 18 for current transformer.

Simpson

DESIGNER and BOLD-VUE INSTRUMENTS

DESIGNER SERIES

UNCLUTTERED LOOK
MAXIMUM READABILITY IN
MINIMUM HEIGHT

Made for today's compact equipment designs—without sacrificing readability. The 4½" 524 models take up less than 3" of panel height, yet the scale is over 3½" long. Clean and crisp look, too. Excellent reliability, they feature self-shielding spring-backed jewel movements and $\pm 2\%$ accuracy. Attractive case is molded black phenolic, with glass window.

†These meters are 5 amp meters with scales as indicated and require external current transformers. See listings on accessory page.

Simpson

CENTURY PANEL INSTRUMENTS

Introducing Simpson's new panel instrument design concept. Now you can have a modern design with rugged phenolic and glass construction.

CALIBRATIONS

All DC meters listed below have the Simpson self-shielded movement (calibration not affected by stray magnetic fields or magnetic mounting). All AC meters have the Simpson Iron-vane type movement. AC Milliammeters and Ammeters are calibrated for use on 25 through 800 Hz. All AC Voltmeters are calibrated for use on 25 through 125 Hz. Calibration at frequencies up to 800 Hz can be made. Contact your local Distributor for prices.

son VU meters meet all the Electrical and Ballistic specifications established by Bell Laboratories and American Standards Association as required by broadcasting, communication and sound engineers. They are available with Type A or B scales. Type A scale stresses the level in VU for monitoring lines. Type B scale stresses percent use of transmitter output and is standard for broadcast service. Impedance is 3900 @ "0" VU deflection.

ROUND and RECTANGULAR INSTRUMENT

2 1/2", 3 1/2", 4 1/2" ROUND and RECTANGULAR STOCK INSTRUMENTS

CALIBRATION

All DC meters listed below have the Simpson self-shielding movement. (Calibration not affected by stray magnetic fields or magnetic mounting.) All AC meters have the Simpson Iron Vane type movement. AC Ammeters and Milliammeters are calibrated for use on 25 through 800 Hz. AC Voltmeters are calibrated for use on 25-125 Hz. Calibration at frequencies up through 800 Hz can be made. Contact your local Distributor for prices.

Wattmeters listed below have the Simpson dynamometer movement calibrated for either magnetic or non-magnetic panels and for a frequency range of 25-125 Hz. Standard wattmeters $\pm 2\%$, compensated wattmeters $\pm 3\%$.

†Simpson VU meters meet all the Electrical and Ballistic specifications published by Bell Laboratories and American Standards Association as required for broadcasting, communication and sound engineers. They are available in either type A or B scales. Type A scale stresses the level in VU for monitoring wire lines. Type B scale stresses per cent use of transmitter output and is standard for broadcast service. Impedance is 3900 Ω at "0" VU deflection.

SIMPSON AVERAGE SENSING, TRUE RMS AND DC SEGMENTAL INSTRUMENTS

Segmental Voltmeters and frequency meters make it possible to measure very small changes in input conditions. The significant portion of the overall voltage or frequency range is expanded to occupy the full scale length. Thus, only that segment of the range that is important appears.

A.C. segmental voltmeters are available in either average sensing or true R.M.S. sensing units. When working with sine wave currents or when other

measurements will be made with average sensing equipment, the average sensing meters are preferred.

When working with distorted waveforms, as is encountered in constant voltage transformer S.C.R. circuits, D.C. to A.C. solid state inverters, similar equipment, the true R.M.S. sensing would probably be preferred. In addition to standard expansions and accuracies shown, segmental voltmeters can be built on special

EDGEWISE PANEL INSTRUMENTS

EDGEWISE INSTRUMENTS BARREL TYPE CONSTRUCTION 1½", 2½"

When panel designs call for making every square inch count, or when weight-saving is important, Simpson edgewise meters solve these many design problems. These meters are supplied with complete hardware which includes the bezel and two nuts. Mounting is fast and easy.

EDGEWISE PANEL INSTRUMENTS STACK HORIZONTALLY or VERTICALLY 1½", 2½"

Simpson's new miniature edgewise panel meter has a unique Self-Shielding Core Magnet Movement* that eliminates the protruding barrel which is prevalent in other edgewise meter designs. It lends itself to a design that is sharp, modern, extremely compact and with a meter scale that extends nearly to the full width and height of the meter. An optimum scale display area allows for the use of large, easy-to-read numerals on a horizontal plane.

Simpson

NEW! DIGITAL PANEL INSTRUMENT

MODEL 2800

Accuracy: $\pm 0.1\%$, ± 1 DIGIT

EASY TO READ NON-BLINKING DISPLAY

STORAGE CIRCUITRY HOLDS NUMBER
WHEN INPUT CHANGES

MODERN COMPACT DESIGN — FRONT
PANEL ZERO ADJUSTMENT

So much to your new equipment design: easier readouts, better accuracy, and the most up-to-date appearance. Simpson's Model 2800 digital panel meters are reliable miniature instruments, which easily mount on equipment panels. The non-blinking readouts, with storage circuitry to hold the number, assures fast and clear readings. Solid state circuitry (except for readout tubes) is used throughout for reliability. Bezel is an attractive black matte finish with tinted window.

PANEL CUTOUT REQUIREMENT:
4.37" (111.0 mm) x 2.80" (71.1 mm)

* Overrange limited to 10% on this unit.

SPECIFICATIONS

Accuracy: $\pm 0.1\%$ (F.S.), ± 1 digit.

Resolution: 1 part in 1000.

Sample Rate: 5 readings per second, continuous.

Display: Non-blinking, with storage.

Number of Full-Time Readout Digits: 3

Readout Digits: Cold-gas glow tubes, 200,000 hour rated life.

Circuitry: Integrated circuits and solid-state components (except readout tubes).

Overrange: 100%. Number "1" automatically lights to the left of other digits to indicate overrange. When measured value exceeds overrange capacity, the "1" flashes — preventing erroneous readouts.

Underrange: Reverse polarity is automatically indicated by a light to the right of other digits. Linear 15% underrange permits reading negative values. Readout is a complement of actual reading.

Common Mode Rejection: Greater than 90 dB at 60 Hz with 1K-ohm unbalance.

Series Mode Rejection: Greater than 35 dB at 60 Hz.

Ambient Temperature Range: To maintain rated accuracy: $+15^{\circ}\text{C}$ to $+35^{\circ}\text{C}$.

Power Required: 117 volts, 60 Hz., 9 VA (nominal).

4½" PYROMETERS

Model 29

Model 3324

Available in two versions: Standard phenolic Model 29 and Model 3324 Rugged Seal for extreme cond Both models are compensated for ambient temperature changes and include copper circuit compens ±2% accuracy.

Each pyrometer is furnished with an external adjustable series resistor to permit use of lower tance thermocouples in the field.

PANEL INSTRUMENT ACCESSORIES

THERMOCOUPLES

Stock thermocouples are iron-constantan, calibrated to 5 or 10 ohms ±1% per table.

Types 21221 and 21224 are iron constantan thermocouple wire in a stainless steel overbraid for rugged service application where flexing or abrasion would cause deterioration of standard thermocouples.

Types 21222 and 21223 are iron-constantan thermocouples with a glass cloth overbraid. These thermocouples are suited for most general purpose use or for permanent mounting in protected sheaths or conduit.

CURRENT TRANSFORMERS — FOR USE WITH 0-10 VAC METERS AND CONTROLLERS

Model 166

Designed for use with 0-10 volt meters. Available from stock, they vert meter relays to AC current cc units. Transformer may be locate motely from indicating meter. Re from 0-50 milliamperes up to 0-50 peres are available for immediate livery. Frequency Range: 30 Hz. kHz. Accuracy: ±2%. (May be used any 0-10 volt, 1000 Ω/volt, or 200 volt, AC rectifier type meter.) No use in circuits where sustained loads are possible.

ELECTRO-MECHANICAL COUNTERS

NEW! SIMPSON COUNTERS

Simpson Electro-Mechanical Counters provide accurate counting in vending machines, duplicating equipment, packaging machinery, and in many production line applications. They feature instant number switching, so that only complete numbers are visible.

SPECIFICATIONS

RATED SPEED: 1 count per 100 milliseconds (10 counts per second, 600 counts per minute).

MINIMUM PULSE DURATION: 50 milliseconds "on", 50 milliseconds "off"

VOLTAGE INPUT: $\pm 15\%$ of the rated voltage.

POWER CONSUMPTION: 4.2 watts (nominal).

MAXIMUM INDICATION: 9,999.

NUMERALS: White on black, 0.2" high, 0.15" wide.

NUMERAL SWITCHING: Ratchet principle, adding one count each time the operating coil is opened. At any given time only whole numbers are visible, for clear readouts.

NUMERAL RESET: Front-panel push-button instantly resets numerals to 0000.

CONSTRUCTION: Bezel of rugged thermosetting materials; black matte finish. Heavy steel frame with a formed aluminum cover.

INSTRUMENT RELAYS and CONTROLLERS

• "RUGGED SEAL" CONTACTLESS TYPE

Maximum reliability design and control, alarm, or limit applications. Photoconductor sensing eliminates all interference with the indicating meter. High gain transistor switch circuit provides accurate switching and a "dead band" of no more than 0.5% of full scale. Fail safe circuitry opens output relays in the event of power failure. Output relays are DPDT, with 10-ampere contacts. New pyrometer types are available for use with I/C or C/A thermocouples. Taut band types are available from stock with 10 μ A full scale sensitivity. Rugged Seal construction withstands rigorous environmental conditions.

• PHENOLIC CASE CONTACTLESS TYPE

Now available with **contactless** control point sensing, same as used in Simpson's "Rugged Seal" controller. Contactless operation offers better control accuracy, no "dead band," and absolute freedom from interference with the indicating meter. High gain amplifier is all solid-state for maximum reliability.

• PHENOLIC CASE CONTACT TYPE

Model 29XA is also available in a contact type design. This type is well suited for general purpose applications. Low cost and reasonable reliability are primary considerations.

VOLT OHM MILLIAMMETERS

260® The World's Best Selling VOM Family of Instruments NEW! TAUT BAND MOVEMENT

260® Series 5 is famous for rugged dependability and advanced features. The 50-microampere movement is self-shielding and shock-proof... for outstanding accuracy and repeatability. Varistor protects the movement from even 200,000% overloads. A replaceable 1-Ampere fuse guards the input circuits. Wide selection of accessories are available, including high-voltage probes, carrying cases, and exclusive Add-A-Tester plug-in adapters.

The 260® family includes Volt-Ohm-Milliammeters with special features, such as mirror scales (260-5M, 261-2, 270-3), 1.25% DC accuracy (270-3), and temperature ranges (255). The chart on the next page has specifications for the entire 260® family. Complete with operator's manual, test leads (No. 07500), and batteries.

260-5		\$
260-5RT (Roll-top protective case)		\$
260-5M (Mirror scale and knife-edge pointer)		\$
260-5MRT (Mirror scale and roll-top case)		\$
Ever-Redy Vinyl Carrying Case, for above. No. 00805		\$

260-5P The Famous GOOF PROOF VOM — TAUT BAND MOVEMENT

Virtually 100% protected! Makes burned components, bent pointers, and blown rectifiers a thing of the past. Ideal for use when exploring unfamiliar equipment, especially if no schematic is available. Also popular in schools, or wherever a VOM must be used by inexperienced personnel. No other VOM has all these features:

1. Reset button pops out to indicate overload.
2. Circuits cannot be reset while overload is present.
3. Does not require massive overloads to activate.
4. All ranges protected except those not feasible in a portable instrument (1000 and 5000 VDC, 10 Amperes DC.)

Uses same accessories as the 260-5, including Add-A-Tester adapters.

261-2 and 270-3 HIGH ACCURACY VOLT-OHM MILLIAMMETERS—TAUT BAND MOVEMENT

Designed for VOM applications requiring higher accuracies. They have all the features of the 260-5M, including mirror scale, varistor protected self-shielding movement, and Adjust-A-Handle. Special calibration circuits and components, combined with strict manufacturing controls, produce outstanding accuracy. 270-3 has built-in temperature compensation. Both use all the accessories, including plug-in Add-A-Tester adapters.

255 VOM with TEMPERATURE RANGE — TAUT BAND MOVEMENT

Designed by Simpson for a major utility company to meet the specific needs of servicing the gas appliance, electrical heating and appliance fields — for servicing and installation. Important features of 260® VOM, plus temperature range of +100°F. to +1050°F. Low voltage drop on DC current ranges for servicing new solid-state controls. AC clamp-on adapter model 150 is available to check AC currents up to 250 Amperes, without disconnecting or opening the circuit.

Complete with operator's manual, test leads with prods (No. 00115), 5 foot thermocouple (No. 00163), and batteries.

AMP-CLAMP PLUG-IN ADAPTER FOR AC AMPERE MEASUREMENTS

Clamp-on AC ammeter adapter allows measurement to be made without breaking circuit being tested. Simply plugs into 260®, 261, 270, 250 or 255 VOM. Ranges: 0-5, 10, 25, 50, 100, 250 AC Amperes. Read-out is on VOMs 0-2.5 VAC scale. May be used with any VOM having 0-2.5, or 0-3 VAC range. When used with 0-3 VAC adapter ranges are from 0-6 to 0-300 AC Amperes. Rugged construction, and easy to use.

MULTI-TESTERS

NEW! IMPROVED 160 HANDI-VOM

Now even better... with $\pm 2\%$ DC and $\pm 3\%$ AC accuracy. Just $3\frac{3}{4}$ " wide, and a mere 12 ounces in weight, yet the 160 Handi-VOM has the accuracy and sensitivity of a full size VOM. The self-shielding Taut Band movement features outstanding repeatability and freedom from stray magnetic fields. And the movement is varistor protected from even 200,000% overloads. Built for today's VOM needs, including solid-state circuit testing, the 160 has 0-0.25 VDC and 0-50 DC μ A ranges. Five resistance ranges are provided for easy and accurate ohms measurements. Optional accessories include probe-tip leads, and a new vacuum-formed carrying case.

Complete with test leads and operator's manual.

160 Handi-VOM\$55.00

NEW MULTI-TESTERS MEASURE:

- VOLTAGE • CURRENT
- CAPACITANCE • RESISTANCE

Both of these new Simpson VOMs have built-in capacitance and high Megohm ranges! The high voltage necessary for these measurements is supplied from an external source (which can simply be line voltage where AC is required). Overload circuit breaker protects all ranges except 100 volts and higher. Supplied complete with test leads and operator's manual.

Model 256\$105.00

Model 257\$ 95.00

Manufactured in Austria

Model 355 MIDGETESTER®

So small ($2\frac{3}{4}$ " x $4\frac{1}{2}$ " x 1") it easily slips into your shirt pocket. No wonder the 355 Midgetester® is popular with those who must make basic voltage and resistance measurements "in the field."

Complete with test leads and operator's manual.

355 Midgetester®\$50.00

NEW Model 208 and 209 AC-DC VOMS

Bright new ideas in VOM packages:

- AC current ranges
- Illuminated scales
- Combined current-voltage measurement
- Light-up continuity check

Both of these new Simpson VOMs have AC current built-in. Separate inputs for voltage and current allow combined measurements using two sets of leads. All you do to read current or voltage is flip the range switch. Complete with test leads and operator's manual.

VOLT-OHM-MILLIAMMETERS

EV! Model 202 ACCU-LOG VOM

First VOM to give you consistent "percent-of-reading" accuracy... anywhere on the readout scale!

ACCU-LOG has a special quasi-logarithmic scale. It gives you "percent-of-reading" accuracy anywhere on the readout scale, yet still allows easy zero adjustment with a linear portion at the low end. There's no need to keep readings at the high end of the scale, or worry about "percent-of-full scale" accuracy variations. Other features you'll like: two low power ohmmeter ranges, over-protected taut band movement, and a large 7" antiparallax mirror scale.

THE RANGES

0.3-0.33; 0.1-1.1; 1-11; 10-110; 30-330; 100-1100 volts

TAUT BAND RANGES

0.1-0.11; 0.1-1.1; 1-11; 10-110; 100-1100 milliamperes

LOW POWER RESISTANCE RANGES

1 ohm center, 2.7 mW maximum load; Rx10 (40 ohm center, 0.27 mW maximum load)

POWER RANGES

1 (7k-ohm center); Rx10k (70k-ohm center); Rx100k (700k-ohm center)

SENSITIVITY

10k Ω /V AC: 5k Ω /V

ACCURACY

$\pm 2\%$ of reading AC: $\pm 3\%$ of reading Resistance: $\pm 3^\circ$ of arc

NEW VOMs

NEW 269-3

EASIER TO READ 7" SCALES

NEW! MODEL 269 SERIES 3

100,000 Ω /V

VOLT-OHM-MICROAMMETER

Now improved!... with a self-shielding Taut Band meter movement that gives better repeatability, plus faster pointer action. This new meter movement is combined with a new mirror scale; and knife-edge pointer, eliminating parallax errors. Large, readable scale is over 6 inches long. Accuracy is $\pm 2\%$ DC and $\pm 3\%$ AC, with new range coverage, too. One switch selects all 27 ranges. Battery replacement is quick and easy with the snap-on compartment. And the new 269-3 is protected from overloads with a replaceable 1.5 Ampere fuse at the input, and a varistor at the meter movement.

Complete with No. 00115 test leads, 4000 volt DC probe extension, and operator's manual.

Model 269-3\$98.00

MODEL 262-3 • DC/AC VOLT-OHM-MILLIAMMETER

Model 262-3 Volt-Ohm-Milliammeter is very compact with 33 ranges on a large, easy to read 7" scale that makes accurate repetitive readings easy to attain. Meter movement furnished with diode overload protection. One control selects range and function. Self-shielded meter movement incorporates spring backed jewels which eliminates damage to the meter pivots that could result from shock and vibration — dependability and longer life are ensured. Complete with test leads No. 00115 and operator's manual.

Model 262-3\$83.00

MODEL 263 • NEW DUAL SENSITIVITY VOM DC/AC VOLT-OHM-MILLIAMMETER

Dual sensitivity Volt-Ohm-Milliammeter with accuracies of $\pm 1\frac{1}{2}\%$ DC and $\pm 3\%$ AC F.S. Overlapping ranges offers greater accuracy expressed as a percentage of reading. Diode overload protection (Prevents movement burn-out even on 200,000% overload). External compartment makes battery replacement easier. Uses 1½ volt alkaline battery to insure greater stability on low ohms scale. Complete with test leads No. 00115 and operator's manual.

ELECTRONIC VOLT-OHMMETERS

MODEL 312
ELECTRONIC VOLT-OHMMETEROFFERS 40% LESS CIRCUIT LOADING THAN MOST
CONVENTIONAL VTVM'sLarge easy-to-read
7" Meter Scale

INPUT RESISTANCE IS 16 MEGOHMS—NOT THE USUAL 11

This Simpson VTVM, Model 312, offers a tracking error of less than 1% and video accuracies of $\pm 3\%$ on all AC and DC ranges. The instrument has a specially designed circuit that protects the meter against burnout. Its $\frac{1}{2}$ volt DC meets today's solid state testing requirements.

Rugged, phenolic case and large easy-to-read seven inch scale.

Model 312 with AC ohms/DC probe No. 00150 and operator's manual

Dual Voltage Model 312, 220/110 volts, 50/60 Hz

R. F. Probe, Cat. No. 00152

High Voltage Probe (30,000 V. Max.), Cat. No. 00155

Carrying Case, Vinyl with Lead Storage Space, Cat. No. 00577

Sponge Lined Leather Case, Cat. No. 01565

LINE VOLTAGE

105/125V, 50/60 Hz

Size: $7\frac{3}{4}" \times 6\frac{3}{4}" \times 3\frac{3}{4}"$. Weight: 4 $\frac{3}{4}$ lbs.

VOLTAGE RANGES

DC: 0-0.5, 1.5, 5, 15, 50, 150, 500, 1500

(16 Megohms input impedance)

AC: (R.M.S.): 0-1.5, 5, 15, 50, 150, 500, 1500

(1 Megohm minimum input impedance)

AC: (Peak to Peak): 0-4, 14, 40, 140, 400, 1400, 4000

RESISTANCE RANGES

RX1 (10 Ω center), RX10, RX100, RX1k, RX10k, RX100k, RX1M

FREQUENCY RESPONSE

$\pm 3\%$ from 15 Hz to 3 Megahertz on all AC voltage ranges through 150
With R.F. Probe: 10kHz to 250 MHz ± 1 dB. R.F. probe usable up to 40 volts

ACCURACIES

DC: $\pm 3\%$ of full scale

AC: $\pm 3\%$ of full scale

Resistance: $\pm 3\%$ of arc

MODEL 311-3 AC/DC Electronic Volt-Ohmmeter

Model 311 is the most advanced vacuum tube volt-ohmmeter in its field which features: High DC input impedance (22.0 Megohm). This reduces circuit loading and permits measurements in high impedance circuits. Direct readout of RMS and peak to peak values. Excellent accuracy for low DC voltage measurements in transistorized circuitry.

LINE VOLTAGE

105/125 v, 50/60 Hz

Size: $7\frac{1}{2}" \times 5\frac{5}{8}" \times 4\frac{1}{2}"$. Net Weight: 5 lbs.

Model 311-3 with DC/AC ohms probe No. 07594,
ground lead No. 00733 and operator's manual\$91.00

High Frequency Probe, Cat. No. 00174 16.00

High Voltage Probe (30,000 V. Max.),
Cat. No. 00732 17.00

MODEL 303-2 AC/DC Electronic Volt-Ohmmeter

Model 303 is a worthy companion to the World Famous 260 volt-ohm-milliammeter. Model 303, a ruggedly built instrument with high accuracy, features low current consumption, wide voltage and resistance ranges, and a large, easy-to-read $4\frac{1}{2}$ inch scale.

LINE VOLTAGE

105/125 v, 50/60 Hz

Size: $7" \times 5\frac{1}{4}" \times 3\frac{3}{8}"$. Net Weight: 4 lbs.

Model 303-2 with DCV probe No. 00067, ACV-
ohm probe No. 00068, ground lead No. 00069
and operator's manual\$92.00

Model 303-2RT (in roll top safety case) 97.00

Part No. 00073, R.F. Probe 11.75

High Voltage Probe, 30,000 VDC at No. 00074.... 17.00

Dual Voltage Model 303-2, 220/110 v, 50/60 Hz 98.00

Dual Voltage Model 303-2RT, 220/110 v, 50/60 Hz 104.00

MODEL 715 AC Electronic Volt-Ohmmeter

High input impedance, multi-voltage ranges and wide frequency response offers a greater versatility for general purpose applications. Ideal for hi-fi and general low level audio work such as hum and ripple measurements, IF gain and vibration analyzing. Model 715 features a specially designed meter scale that provides dB markings on both the voltage range positions and the meter scale.

INPUT POWER REQUIREMENTS:

110 to 125 VRMS, 50/60 Hz at 10 watts

Size: $7\frac{1}{2}"$ W, $5\frac{1}{2}"$ H, $3"$ D. Net Weight: 3 lbs. 12 oz.

Complete with operator's manual and shielded
input cable\$84.00

Dual Voltage Model 715, 220/110 v, 50/60 Hz 91.00

RANGES

DC: 0-1.5v; 5v; 15v; 50v; 150v; 500v; 1500v.
(22 Meg Ω input impedance)

AC: 0-1.5v; 5v; 15v; 50v; 150v; 500v; 1500v.

(RMS) (Min. 2.2 Meg Ω input impedance)

PP: 0-4v; 14v; 40v; 140v; 400v; 1400v; 4000v.

(Min. 2.2 Meg Ω input impedance)

AF: 0-1.5v; 5v; 15v; 50v; 150v; 500v; 1500v.

(30 Hz to 110kHz $\pm 5\%$)

RF: 1.5v; 5v; 15v; 50v; 150v.

with probe (50 Hz to 100MHz, 0-150 VRMS)

RESISTANCE RANGES

1k Ω (10 Ω center); 10k Ω (100 Ω center);

100k Ω (1k Ω center); 1 Meg Ω (10k Ω center);

10 Meg Ω (100k Ω center); 100 Meg Ω (1 Meg Ω

center); 1000 Meg Ω (10 Meg Ω center).

FREQUENCY RESPONSE

$\pm 5\%$ to 100 kHz (with RF probe, usable
to 250 MHz)

ACCURACY

DC VOLTS:

$\pm 3\%$ of full scale.

AC VOLTS:

$\pm 5\%$ of full scale.

DC RESISTANCE:

$\pm 3^\circ$ of linear arc.

AC-DC: 1.2v; 12v; 60v; 300v; 1200v.

AF: 1.2v; 12v; 60v.

RF: 20 volts maximum. (With RF Probe)

DB: -20 to +63 dB in five ranges.

RESISTANCE RANGES

1k Ω (10 Ω center); 100k Ω (1000 Ω center);

1 Meg Ω (10k Ω center); 10 Meg Ω (100k Ω

center); 1000 Meg Ω (10 Meg Ω center).

INPUT IMPEDANCE

10 Megohms (all ranges) on DCV;

275K ohms shunted by 210 pF on ACV.

FREQUENCY RESPONSE

AF: Flat to 100 kHz on the three low AC ranges

RF: 20 kHz to 100 MHz (with RF probe)

DC VOLTS:

$\pm 3\%$ of full scale.

AC VOLTS:

$\pm 5\%$ of full scale.

DC RESISTANCE:

$\pm 3^\circ$ of linear arc.

$\pm 5\%$
of full scale.

FET-INPUT VOM

MODEL 313 SOLID-STATE VOM

FEATURES...with VOM CONVENIENCE

accuracy and high impedance in a portable instrument. Operates 300 hours on inexpensive, easily obtained batteries. Switch battery condition to be checked instantly. A "power on" indicator provided. Built for rugged use, the self-shielding movement is shock and overload protected. All voltage range inputs are fully protected, AC line voltage can be applied on ohms ranges without damage Field Effect Transistor input. Readouts are quick and easy on the scale. Accuracy of the new 313 is assured with built-in frequency temperature compensation.

MODEL 385-3L TEMPERATURE METER

Model 385-3L is ideal for those fast, accurate temperature checks from —50°F. to +70°F. Lightweight, portable, fits easily in your hand. Three lead model. Takes temperature readings in three different locations with a simple flick of the selector knob. Standard Model has Fahrenheit scale. Supplied with one No. 00010 15 ft. thermistor lead and operator's manual.
Size: 3"x5½"x2½". Wt. 1½ lbs. \$45.00

MODEL 388-3L THERM-O-METER

Simpson's popular wide range Therm-O-Meter tester measures the temperature of practically anything within —50°F. to +1000°F. Standard model has combination °C. and °F. scale. Sensing Element: Thermocouple (Iron-Constantan). Supplied with internal battery and one 8' general purpose probe No. 00190 and operator's manual. Order additional probes as required.
Size: 7½"x6"x2½". Weight: 4 lbs.
Model 388-3L for three probes \$84.00

MODEL 389-3L DUAL RANGE THERM-O-METER

Model 389-3L temperature tester, using three leads, makes temperature readings in three different locations at the same time; i.e., in a refrigerator, one lead could be connected to the evaporator plate, another to the wall of the food compartment and the third in the center of the food compartment. Readings are made quickly in 15 to 30 seconds depending on the medium being checked. Supplied with °C. and °F. scale. Model 389-3L....\$79.00

APPLIANCE TESTER

MODEL 387 MILLIVOLTMETER
Make gas unit servicing faster, more accurate. Use Simpson's Millivoltmeter. Simply place the probe across the thermocouple terminals and test for the correct value. Checks Safety Thermocouples on Gas-Fired Units.
• Furnaces • Boilers • Hot Water Heaters
• Heaters • Dryers • Refrigerators

* ALL MICROTESTERS HAVE RUGGED PHENOLIC CASES AND MEASURE APPROXIMATELY 3" x 5 1/2" x 2 1/2". WEIGHT: 1 1/2 LBS.
(Microtesters not illustrated are similar in appearance to those shown above.)

MODEL	DESCRIPTION	RANGES	PRICE
230 AC/DC VOM	One of the smallest AC and DC service instruments, yet it contains sufficient ranges to do a complete servicing job. Specifically designed for telephone, teletype and marine use. Excellent troubleshooter. Case, including the front panel, is molded of black phenolic for protection against high voltages.	1,000 Ohms per Volt AC-DC. Voltage Ranges DC: 10v; 50v; 250v; 1,000v. AC: 10v; 250v; 1,000v. Current Ranges DC: 10 ma; 50 ma; 250ma. Resistance Ranges: 0-1000Ω, 0-100kΩ. Accuracies: DC volts ±3% F.S.; AC volts ±4% F.S.; DC resistance ±3° of linear arc from absolute value of resistance measured.	\$45.00 Complete with tests lead 08375 and operator's manual
371 AC Voltmeter	Designed primarily for testing line voltages applied to motors, heating equipment and many other industrial applications.	Ranges: 0-150, 0-300, 0-600 volts. Accuracy: ±3% of full scale.	\$39.00
376 AC Voltmeter	Rectifier type, 1000 ohms per volt. Useful in circuits where limited current is present. An excellent output meter when used with proper condenser.	Ranges: 0-5, 10, 25, 50, 100, 250, 500, 1000 AC volts. Accuracy: ±5% of full scale.	\$39.00
377 DC Voltmeter	Resistance, 1000 ohms per volt. Useful in radio servicing and industrial applications.	Ranges: 0-1, 2.5, 5, 10, 25, 50, 100, 250, 500, 1000 DC volts. Accuracy: ±3% of full scale.	\$39.00
240 AC/DC VOM	The "Hammeter." Specially designed for general application around labs, class room, ham shack, etc. Has voltage ranges of 3000 volts AC or DC to check high voltage on transmitters and receivers.	1,000 Ohms per Volt AC-DC. Voltage Ranges DC: 15v; 75v; 300v; 750v; 150v; 750v; 3,000v. AC: 15v; 150v; 750v; 3,000v. Current Ranges DC: 15ma; 150ma; 750ma. Resistance Ranges: 0-3,000Ω (30Ω center); 0-300kΩ (3kΩ center). Accuracies: DC volts ±3% F.S.; AC volts ±4% F.S.; DC resistance ±3° of linear arc from absolute value of resistance measured.	\$45.00 Complete with tests lead 08375 and operator's manual
362 Low- Ohmmeter	The two ranges are essentially linear and permit highly accurate readings between 0.1 and 25 ohms. For checking motor armatures; switch and relay contact resistances; shorts between windings and grounds in radio chassis wiring; electrical equipment, etc.	Ranges: 0-5, 0-25 ohms. Accuracy: ±3% of linear arc length.	\$39.00 Complete with calibration test leads No. 08375
372 Ohmmeter	Provides wide range of resistance measurements in a small package. .2 ohm to 500 megohms. Ideal for use in schools, on test benches or at inspection facilities.	Ranges: 0-500, 0-5000, 0-50,000, 0-500,000 ohms; 0-5, 0-50 megohms. Center Scale: 5, 50, 500, 5,000, 50,000, 500,000 ohms. Accuracy: ±3° of linear arc length.	\$39.00 Complete with tests lead 08375 and operator's manual
375 DC Ammeter	Provides complete range from a fraction of an amp to 25 amps without external shunts. Ideal unit for use with unmetereed power supplies.	Ranges: 0-1, 2.5, 5, 10, 25 amperes. Accuracy: ±3% of full scale.	\$39.00
370 AC Ammeter	Ideal for checking small motors, line loads, etc., where AC current measurements are required. 60 Hertz. Self-contained current transformer.	Ranges: 0-1, 0-2.5, 0-5, 0-10, 0-25 amperes. Accuracy: ±5% of full scale.	\$39.00
373 DC Milliammeter	General purpose tester. Valuable in a number of applications. Provides DC current measurements from .02 to 1000 ma.	Ranges: 0-1, 5, 10, 25, 50, 100, 250, 1,000 ma. Accuracy: ±3% of full scale.	\$39.00
378 AC Milliammeter	Five separate ranges. Typical applications are transformer vacuum tube tests. Contains current transformer and indicating instrument in one case.	Ranges: 0-5, 25, 100, 250, 1,000 ma. Accuracy: ±5% of full scale.	\$39.00
379 Battery Tester	Provides accurate indications of condition of all standard flashlight, hearing aid (mercury cells), radio batteries.	Ranges: 0-1.5, 4.5, 6.0, 7.5, 9.0, 15.0, 22.5, 30.0, 45.0, 67.5, 90.0v.	\$39.00 Complete with tests lead 08375 and operator's manual
374 DC Microammeter	Can be used with external resistors or multipliers as high sensitivity voltmeter at 20,000 ohms per volt. Can be shorted out of circuit by use of selector knob.	Ranges: 0-50, 100, 250, 500, 1,000 microamperes. Accuracy: ±3% of full scale.	\$39.00
390 AC Volt-Amp- Wattmeter	The most popular tester for AC/DC volts, AC amps and AC watts with one meter. Rugged... useful for practically any appliance.	Volts: 0-150, 300. Amps: 0-3, 15. Watts: 0-300, 600, 1,500, 3,000. Accuracy: ±5% of full scale.	\$70.00 complete with test cord and No. 08418 and operator's manual
391 AC-DC Volt- Wattmeters	Simultaneous reading of volts and watts. Has separate meters, built-in cord and plug for connection to line outlet... separate switches for range selection.	3,000 Watts Maximum AC or DC Range Volts: 0-130, 0-260. Watts: 0-1,500, 0-3000. Accuracy: ±5% of full scale.	\$64.00 Supplied with cord, plug and operator's manual. Leatherette Carrying Case Part No. 03413 — \$12
392 AC-DC Volt- Wattmeters	Simultaneous readings of volts and watts. Has separate meters, built-in cord and plug for connection to line outlet... separate switches for range selection.	5,000 Watts Maximum AC or DC Range Volts: 0-130, -260. Watts: 0-1,000, 0-5000. Accuracy: ±5% of full scale.	\$69.00 Supplied with cord, plug and operator's manual. Leatherette Carrying Case Part No. 03413 — \$12

Ever-Redy Carrying Case, Part No. 04299 \$10.50 — for all Micro-Testers except Models 391 & 392.

Models 391 & 392 Carrying Case, Part No. 03413 \$12.00

AC CURRENT LEAKAGE TESTER

NEW!

Model 229 CURRENT LEAKAGE TESTER
 Complete with test leads, batteries, and
 operator's manual\$90.00
 in carrying Case, Leather, No. 00805\$14.00

- MEASURES AC CURRENT AS LOW AS 5 MICROAMPERES
- TESTS FOR CURRENT ABOVE THE "THRESHOLD OF PERCEPTION"

- DETECTS SHORTS AND NEAR SHORTS
- MEETS U.S. STANDARDS COMMITTEE PROPOSED SPECIFICATIONS (C101.1) FOR AC CURRENT LEAKAGE TESTS

IS THE EQUIPMENT YOU MANUFACTURE OR SERVICE SAFE?

Even small leakage current can cause trouble. Current above the "threshold of perception" can cause a violent reaction out of fear — resulting in physical injury.

Simpson's new model 229 is designed to test 120 volt AC appliances and electrical equipment in accordance with the proposed U.S. standard. It approximates the normal perception curve to within ± 1.0 dB, and measures currents as small as 5 microamperes.

The 229 is ruggedly built for use on production lines and "in field" servicing. Operation is simple, and all ranges are protected from damage if accidentally subjected to line voltage. It's the ideal instrument for checking the safety of your equipment.

SPECIFICATIONS

RANGES: AC Current: 0-0.3; 1; 3; 10 mA / AC Voltage: 0-150 Volts / Battery Test: Replace — Good.

RESOLUTION: 5 μ A on 0-0.3 mA range.

ACCURACY: $\pm 2\%$ at 60 Hz.

ACCURACY vs. FREQUENCY: Approximates Dalziel's "Percentile 50 Threshold of Perception Curve" within ± 1.0 dB.*

INPUT IMPEDANCE: 1.5 k-ohms, shunted by a shaping network, on all current ranges.

INPUT RESISTANCE: 500 k-ohms on voltage range.

OVERLOAD PROTECTION: Fully protected up to 150 VAC on all ranges.

* See AIEE Proceedings, Volume 69, Section 0184. The mean value of perception on individuals in test was 1.067 mA at 60 Hz. (Available at major technical libraries.)

OSCILLOSCOPES AND CAPACITOR TESTER

Model 466 HANDISCOPE® with 5" Screen

- Compact — Light Weight
 - Rugged Construction
- Ideal for general purpose applications in radio and TV servicing and for industrial use. The Handiscope® contains horizontal push-pull amplification for the X axis, vertical push-pull amplification for the Y axis, and an intensity modulation input for the Z axis. Horizontal deflection may be obtained from either the internal sweep circuits or from the external signal voltage. Rugged construction... yet the Handiscope® weighs just 19 lbs.

466 HANDISCOPE® Complete with operator's manual and No. 00100 test leads (for 110 VAC operation)\$190.00
Dual voltage 466 Handiscope® for use on 220/110 volts, 50/60 Hertz 214.00

Model 458 — 7" COLORSCOPE

FEATURES:

- 7" Cathode Ray Tube.
- Wide band operation, the frequency response is flat within ± 1.0 dB to 4.5 MHz. Faithfully displays COLOR BURST frequency with a sensitivity greater than 40 Mv rms per inch of vertical deflection.
- Narrow band operation, the frequency response is flat within ± 2 dB from 10 Hz to 300 kHz with a sensitivity greater than 15 Mv rms per inch.
- Good square wave response provides accurate representation of sync pulses and composite wave-form pattern for trouble-shooting video, sync, and sweep circuits.
- Horizontal sweep, to 250 kHz, for expansion of high frequency wave-form detail and color burst.
- Vernier and Compensated Decimal Step Attenuator for better signal controls.
- Provision for Intensity Modulation of CRT.
- 1 volt peak to peak calibrating voltage.

458 COLORSCOPE Complete with operator's manual\$420.00
 Accessory probes: See Model 739 in accessory section on back cover.

Model 383A
CAPACOHMETERIN-CIRCUIT Capacitor
Leakage Tester

"ONE PACKAGE FLEXIBILITY"

- Measures the leakage resistance of defective paper, mica, or ceramic capacitors.
- Indicates directly the capacitance of good paper, mica, or ceramic capacitors over a range of 10.0 pf to 10.0 mf.

A pulse technique detects many marginal capacitors. All measurements are made under load conditions. No adjusting of a bridge circuit and balancing controls. Borderline capacitors which cause costly "call backs" are detected immediately with the pulse test.

Line Voltage: 105/125v, 60 Hz.

Shipping Weight 12 lbs.

Complete with test leads and operator's manual

Test Lead Assembly — Cat. No. 07509.. 3.25

STRIP CHART RECORDERS

• 4 BUILT-IN
CHART SPEEDS

• OPTIONAL
AUTOMATIC
TAKE-UP
REEL

NEW MODEL 603 RECORDERS

Available in a wide selection of ranges, these new Simpson chart recorders use inkless pressure sensitive paper. No pens to re-fill. No ink mess. The specially formulated paper will not fog or blur with age, assuring clear and accurate readings. The rugged Taut Band movement is shockproof. In addition to recording, the recorder provides continuous readings of the measured value. Four built-in chart speeds are available with a switch selected. Available in AC voltage, AC current, DC voltage, and DC current measuring ranges. Each has a built-in event indicator, too. The 603 is compact for easy panel mounting and portable use. Mounting hardware included.

INSTRUMENTATION PRODUCTS

CHART RECORDERS

■ 604 MULTICORDER

Has 22 switch selected recording ranges. Dependable inkless recording system produces a clean, clear chart every time. High torque taut band movement cannot develop friction from shock or vibration. Dual trace records both the measured value and the range selected.

604 complete with chart paper, test leads, and operator's manual\$200.00

SPECIFICATIONS

Ranges:

DC mV: 100, 500
DC Volts: 2.5, 10, 25, 100, 250, 500
AC Volts: 10, 25, 100, 250, 500
DC μ A: 50, 250
DC mA: 1, 5, 25, 100, 250
DC Amperes: 1
AC μ A: 200

Accuracy: $\pm 2.5\%$ of full scale.

Sensitivity: 20 $k\Omega/v$ DC, 5 $k\Omega/v$ AC.

Chart Speeds: 1, 3, 12 inches/hr.

Power Required: 115 VAC, 60 Hz.

■ 605 MULTICORDER

Same outstanding features as the Model 604 listed above, but with a different selection of ranges. Records AC current up to 6 Amperes. AC voltage ranges cover standard AC line voltages. Like the 604, it offers dependable recording at less than \$10 per range.

605 complete with chart paper, test leads, and operator's manual\$215.00

SPECIFICATIONS

Ranges:

DC mV: 12, 30, 60
DC Volts: 3, 15, 60, 300, 600
AC Volts: 6, 30, 150, 300, 600
DC μ A: 600
DC mA: 1.5, 3, 6, 30, 150
DC Amperes: 1.2, 6
AC mA: 3, 15, 60, 300
AC Amperes: 1.2, 6

Accuracy: $\pm 2.5\%$ of full scale.

Sensitivity: 666 Ω/v AC and DC.

Chart Speeds: 1, 3, 12 inches/hr.

Power Required: 115 VAC, 60 Hz.

■ 2750 PRECISION LONG-TERM RECORDERS

Panel mount in panel space of just 3 $\frac{3}{4}$ " square. Dependable inkless recording — operates for over a month at 20 mm/hr chart speed. Available from stock in these ranges:

Range	Terminal Resistance	Catalog No.	Price
0-10 DC Microamperes	1,500 Ω	22000	\$167.00
0-50 DC Microamperes	1,100 Ω	22002	153.00
0-100 DC Microamperes	970 Ω	22003	147.50
0-500 DC Microamperes	280 Ω	22004	142.00
0-1 DC Milliampere	20 Ω	22005	140.00
0-1/0-1 DC Milliampere (Dual Channel)	20 Ω	22024	165.00
0-0.4...25 DC Millivolts (Adjustable)	>50 Meg Ω	22030	250.00
0-50 DC Millivolts	1,000 Ω/v	22008	142.00
0-5 AC Amperes	$\pm 0.014\Omega/v$	22113	153.00
0-150 AC Volts	$\pm 1,000\Omega/v$	22110	148.00
93.5-126.5 AC Volts (Segmental Scale)	$\pm 1,000\Omega/v$	22115	175.00
0-300 AC Volts	$\pm 1,000\Omega/v$	22116	148.00

SPECIFICATIONS

Accuracy: $\pm 1.5\%$ of full scale.

Chart Speeds: 20, 120 mm/hr. (Interchangeable gearboxes available from your distributor for other speeds up to 120 mm/hr.)

Panel Mounting Bracket: Included with recorder. Requires just one 3.6 x 3.6 cutout.

Portable Operation: Carrying handle available from your distributor.

Paper Take-up: Automatic with built-in motor driven take-up reel.

Power Required: 115 VAC, 60 Hz.

■ 2761 and 2762 TEMPERATURE RECORDERS

New multi-range temperature recorders:

Model 2761 — Range	Cat. No.	Price
-50° to +50°F, +50° to +150°F, +150° to +250°F (3 ranges, switch selectable)	23151	\$190.00
Model 2762 — Range	Cat. No.	Price
-40° to +60°F, +50° to +150°F (2 ranges, switch selectable). Dual channel (same range recorded on both channels, 2 inputs).	23152	210.00

SPECIFICATIONS

Accuracy: $\pm 2^\circ F$. ($\pm 3^\circ F$ with Model outside of 0-120°F range).

Sensors: Thermistor.

Other specifications are the same as Model 2750 listed above.

■ 2755 EVENT RECORDERS

Each has ten event channels. Uses no more space than the compact Model 2750.

Voltage	Power Per Solenoid	Catalog No.	Price
10 Channels, 6 Volts DC	1.2 watts	22203	\$175.00
10 Channels, 12 Volts DC	1.2 watts	22202	175.00
10 Channels, 24 Volts DC	1.2 watts	22201	175.00
10 Channels, 115 Volts AC, 60 Hz	2.2 VA	22200	175.00

SPECIFICATIONS

Accuracy: Solenoid response time in milliseconds (nominal).

Other specifications are the same as Model 2750 listed above.

DIGITAL INSTRUMENTS

2700 DIGITAL SYSTEM

Integrated circuit design for compactness and reliability. Plug-in function modules are available for DC voltage, DC current, and resistance measurements. Has 4 full-time digits plus auto-overrange and polarity indications.

Complete with DC voltage range module, test leads, and operator's manual\$615.00

SPECIFICATIONS

Ranges (with DC voltage module): 1, 10, 100, 1,000 DC volts.

Accuracy: $\pm 0.05\%$. ± 1 digit.

Input Impedance: 10.2 Meg Ω .

Overrange: Linear to 10%.

Polarity Selection: Automatic, with indication.

Response Time: 5 seconds, maximum.

Sampling Rate: Variable, from 20 milliseconds to "hold."

Power Required: 115 or 220 VAC ($\pm 10\%$), 50-60 Hz., at 11.5 watts.

OPTIONAL PLUG-IN FUNCTION MODULES

Interchangeable plug-in modules take just seconds to change. New function and ranges are shown on dial plate carried by module.

Resistance Module: 1 k Ω , 10 k Ω , 100 k Ω , 10 Meg Ω .
Model 22901\$100.00

Current Module: 1 mA, 10 mA, 100 mA, 1 Amp.
Model 22903\$100.00

SPECIFICATIONS

Accuracy: $\pm 0.05\%$ of reading (except 10 Meg Ω range of resistance module: $\pm 1.0\%$ of reading).

Accuracy of 2700 system after interchanging modules: $\pm 0.1\%$ of reading (without recalibration). $\pm 0.05\%$ of reading (with recalibration).

2725 ELECTRONIC COUNTER

Five-digit counter measures frequency from 5 Hz to 20 MHz. Also measures frequency over time periods, time intervals, and totalizes. Panel switch has "self test" position which checks the instrument's logic circuitry — assures accurate readouts you can depend on.

Complete with probe and operator's manual.\$525.00

SPECIFICATIONS

Ranges:

Average Frequency: 5 Hz to 20 MHz.

Frequency Ratio: 1 to 1.99999 $\times 10^5$.

Time Interval: 300 μ seconds to 1.99999 $\times 10^5$ seconds.

Time Periods: 300 μ seconds to 0.2 second.

Totalization: 1 to 1.99999 $\times 10^5$ counts.

Accuracy: $\pm 0.01\%$, ± 1 digit.

Input Impedance: Channel "A": 1 Meg Ω . Channel "B": 10 k Ω .

Time Bases: 6 bases, crystal controlled.

Overrange: Automatic indication.

Power Required: 115 or 220 VAC ($\pm 10\%$), 50-60 Hz., at 17 watts.

2724 ELECTRONIC COUNTER

Features as the model 2725 shown above, but with 4-digit resolution.

Complete with probe and operator's manual\$450.00

2701 DIGITAL MULTIMETER

Complete digital VOM has AC-DC voltage, AC-DC current, and resistance ranges. Fast and accurate. Simply set magnitude switch and press a button. Reading appears as a 3-digit number with polarity sign and decimal point. Decimal point automatically switches over three ranges. No errors from scale interpolation when used by unskilled personnel.

Complete with test leads and operator's manual\$835.00

SPECIFICATIONS

Ranges:

AC/DC mV: 10, 100, 1,000.

AC/DC Volts: 10, 100, 600

AC/DC mA: 1,000

AC/DC μ A: 10, 100, 1,000

AC/DC mA: 10, 100, 1,000

Ohms: 100, 1,000

k-Ohms: 10, 100, 1,000

Megohms: 10, 100, 1,000

Accuracy:

DC: $\pm 1.0\%$ of reading.

AC: $\pm 1.5\%$ of reading.

Resistance up to 1,000 k Ω : $\pm 0.5\%$ of reading.

(Accuracy on all ranges limited to $\pm 0.2\%$ of full scale).

Power Required: 105-130 VAC, 60 Hz., at 60 watts.

W! R-L-C BRIDGE

MODEL 2785

Multi-purpose bridge measures capacitance, inductance, resistance, and "Q". Powered by two 9-volt batteries, a built-in generator operates at the standard test frequency of 1 kHz. Used for all resistance measurements. Long scale dial and sensitive galvanometer make it easy and fast to use.

Complete with batteries, test leads and operator's manual\$350.00

SPECIFICATIONS

Ranges:

0.05 Ω to 11 Meg Ω in 8 ranges.

0.5 μ -Henrys to 110 Henrys in 8 ranges.

5 p-Farads to 1100 μ -Farads in 8 ranges.

Qx1, tan-d $\times 0.01$, tan-d $\times 1$.

Accuracy:

R, L, C: $\pm 1.0\%$ (except 1 Ω , 10 Meg Ω , 10 μ H,

100H, and 1,000 μ F ranges: $\pm 2.5\%$).

Q: $\pm 5\%$.

Power Required: Two 9-volt batteries (NEDA type 1603).
Rated Life: 150 hours.

TO-6 TEL-OHMIKE® CAPACITOR ANALYZER

TO-6 TEL-OHMIKE capacitor analyzer is a must for checking all capacitors. It is a moderately priced instrument with laboratory quality and accuracy—the highest accuracy of any instrument of its type available to the service trade!

- **LEAKAGE CURRENT** of electrolytics measured directly on meter. Four ranges; .06, .6, 6, and 60mA. Three ranges of DC voltage (continuously variable within each range) permit testing capacitors at exact rated voltage up to 600 volts.
- **POWER FACTOR** of electrolytics, up to 50% measured by Wien Bridge.
- **METER PROTECTOR** of solid-state design allows severe accidental over-loads without burn-outs.
- **MAGIC-EYE TUBE** simplifies bridge balancing for capacitance and power factor measurements. High gain amplifier provides greatly improved sensitivity.
- **PUSH-BUTTONS** color-keyed for instant range selection.
- **MODERN CASE:** Silver-grey hammertone finish, panel is charcoal grey with highly contrasting white designations. Measures 8 7/8" high, 14 1/8" wide, 6 1/8" deep. Weight only 13 pounds.

MODEL TO-6 115 VAC/50-60 cy

CAPACITANCE BRIDGE measures up to 2000 μ F. Five overlapping ranges include exclusive 1 pF to 100 pF range. Special shielded transformer for bridge voltage. Extremely low AC voltage; 1.35 volts for electrolytic capacitors, 2.85 for all others, permits safe testing of all low voltage capacitors.

ISULATION RESISTANCE of papers, ceramics and micas directly read on large meter. No guessing with neon lamps. Full range—to 10KM Ω @ 30V for low voltage units . . . to 10KM Ω @ 150V for higher voltage components. Fast charge rate speeds testing of high capacitance units.

TEL-OHMIKES FOR RACK MOUNTING

Electrically identical to TO-6 and TO-6S. These models have a standard 19"w. x 10 1/2"h. panel so that it can be mounted in standard relay racks.

TYPE 850W PRECISION DECADE INDUCTORS

Indispensable For Design and Experimental Work on Audio Filters, Equalizers, and Tuned Circuits. Frequency Range is 10 to 20,000 Cycles per Second

Excellent Stability With Respect to Current and Ambient Temperature Changes

Four Decade Inductors May Be Connected in Series to Provide 1,110 Steps of Inductance

- Housed in Blue Aluminum Case with Sloping Front to Facilitate Bench-Top Readings. Measures 3" Wide, 2 1/2" High, 5 1/2" Long. Fitted with Five-way Binding Posts.
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 90,500.

GENERAL PANEL METER INFORMATION

Triplett meters offer $\pm 2\%$ accuracy, rugged construction, high overload capacity and long-term reliability. **DC meters** are D'Arsonval type with pivot & jewel construction except for certain microammeters with high-sensitivity suspension movement; linear scales; extra light moving coil; self-shielded Bar-Ring magnet; one-piece diecast frame. **AC meters** are moving iron vane type, air damped, with light moving parts. All have jewel bearings; specially treated pivots; white enameled metal dials; ceramic pointer stops; molded zero adjusters, case and base.

Accuracy: $\pm 2\%$ except AC rect. type, $\pm 3\%$. **Repeatability:** Suspension type, $\pm 0.5\%$; pivot, $\pm 2\%$. **Overload Capacity:** 1 second; current, 1000% except AC rect. and RF, 150%; voltage, 0-100V, 1000% except AC rect., 150%. **Continuous Overload:** 120% except DC current, 150%. **Damping Factor:** 2.5 minimum. **G-Series Meters (Fig A):** Flexible and interchangeable design with optional mounting bezel for mounting behind panel. Large dial area for multiple scales. Natural aluminum insert.

DC PANEL METERS—2.5", 3.5" AND 4.5" SIZES

Four basic styles, in three nominal sizes. Table below indicates dimensions of DC and RF meters. **To Order:** Specify both Model and Triplett Part Number, from appropriate tables below. Example: Model 220-G, Number 1049602, is a DC ammeter, 0-1 range, in a G-Series case.

Model	Meter Type	Nom. Size	Fig.	Scale Lgth.	Flange Size, In. x H.	Body Size, In. x Depth	Term. Extend

NULL METERS

Suspension-type, in G-Series case. Sensitivity at null point, 0.3 μ A per degree. End scale value is 40-0-40 ($\pm 20^\circ$). Center spot mirrored to eliminate parallax. Resistance, 1700 ohms.

Triplett Number 8069752 Model 320-G, 3/4". Net Ea. \$39.00.

Triplett Number 8069852 Model 420-G, 4 1/2". Net Ea. 40.40.

DC VOLT METERS

Filmi type resistors; 1000 ohms/volt.

*Supplied with external resistor board.

VU METERS

For measuring sound or noise levels. Essentially a low range rectifier type voltmeter with D'Arsonval element. Internal impedance, 3900 ohms. Steady state reference, 1 mV. For 600 ohm line. Available with "A" (-20 to +3 VU top arc, 0-100%) or "B" (-20 to +3 VU bottom arc, 0-100%) scale.

EDGEWISE 3 1/2" AND 4 1/2" METERS

Two popular sizes, designed for strikingly clean appearance. Occupy minimum panel space, with the performance of conventional meters. Bar-Ring movement permits meter stacking for maximum instrumentation in minimum space. Anti-parallax pointer minimizes reading error. Scale Length: 3 1/2" models, 2.75"; 4 1/2" models, 3.87". Panel Hole Required: 3 1/2" models, 3.421" x 1.281"; 4 1/2" models, 4.25" x 1.5". Depth Behind Panel: 3 1/2" models, 2.583"; 4 1/2" models, 3.53".

To Order: Specify both Model and Triplet Part Number from tables below. Example: Model 320-E, Number 1013502, is a 3 1/2" DC milliammeter, range 0-1 ma.

Mounting Bezels for Edgewise Meters: For behind-panel mtg. Triplet Number 11977A—For 3 1/2" meter. Net Each... **\$1.60**
Triplet Number 11967A—For 4 1/2" meter. Net Each... **1.60**

R-SERIES 3 1/2"-4 1/2" AND G-SERIES 5 1/2" M
R-Series (Fig. A): Distinctive modern design in transparent black molded plastic. Provides dominant scale in limited space. Self-shielded for accuracy and reliability. DC meter Bar-Ring movement for high torque, fast response. Fluted shutterproof window, screw-fastened front.

G-Series (Fig. B): 5 1/2" meter with modern design for flexibility and interchangeability. DC meters have self-Bar-Ring magnet and one-piece diecast frame.

To Order: Specify both Model and Triplet Number.

RUGGEDIZED 1 1/2", 2 1/2" AND 3 1/2" METERS

Model 127-HR: Rugged, modern construction with meter front designed for maximum readability. Meets government specifications. Nom. size, 1 1/2". Scale Length: 1.5". Flange, 1.75" sq. Body, 1.51" dia. x .400" deep.

Model 221-HR: 2 1/2" meter meets MIL-M-10304-C specifications. Heavy diecast window bezel seals window to case with gasket and screws for easy servicing. Gasket-sealed studs provide additional protection. Scale Length: 1.76". Flange, 2.695" dia. Body, 2.21" dia. x 1.281" deep.

Model 321-HR: Same as 221-HR, but 3 1/2" size. Scale Length: 2.38". Flange, 3.51" dia. Body, 2.8" dia. x 1.281" deep.

To Order: Specify both Model and Triplet Part Number.

G/P PORTABLE LAB INSTRUMENTS

Consists of G-Series 3 1/2" panel meter, mounted in molded plastic case. Choice of 25 models, with 55 standard ranges. Ideal for schools, labs or shop use. DC meters have Bar-Ring self-shielding movements, with diode overload protection. AC movements are fuse-protected. Accuracy, $\pm 2\%$ except AC Rectifier and Ohm models, $\pm 3\%$. Knife-edge pointers. Aluminum panels, 5-way binding posts. Size, 4 1/4" x 3 3/8" x 4 1/4". Special ranges available on order, at extra cost.

INSTRUMENTS

MODEL 601 SOLID-STATE V-O-M 11 MEG INPUT

1. 14 Ohmmeter ranges with 7 Low-Power ranges (LP Ω) at 75 mV DC for Transistorized and Integrated circuits.
2. Voltage ranges from 10 mV AC and 100 mV DC full scale; plus AC & DC Current ranges from 10 μ A full scale.
3. Modern easy-to-use push button selection of DC polarity, AC and Low-Power Ohms (LP Ω) functions.

Single range selector switch, easy to use. Large 4½" Suspension meter movement. Special Low-Power Ohms circuit has only 0.1 mW of power, permits in-circuit resistance measurements in solid state circuitry. Simple to read uncluttered dial provides quick readings using only four scales for all 52 ranges. 11 Megohm input resistance on all voltage ranges. AC and DC current ranges never before available on a similar unit. Accuracy is $\pm 2\%$ of Full Scale on DC, $\pm 3\%$ AC, (Current, $\pm 3\%$ and $\pm 4\%$).

RANGES

Nine DC Volt Ranges: 0-0.1-0.3-1-3-10-30-100-300-1,000 at 11 Meg. Eleven AC Volt Ranges: 0-0.01-0.03-0.1-0.3-1-3-10-30-100-300-1,000 at 11 Meg. Fourteen Ohms Ranges: 0-1K-10K-100K-1 Meg-10 Meg-100 Meg-1,000 Meg (Standard 1.5 V, 55 mW.) 0-1K-10K-100K-1 Meg-10 Meg-100 Meg-1,000 Meg (Low-Power 0.1 mW, 75 mW). Center Scale value 10 ohms on x1 range. Four DC Current Ranges: 0-10-100-1,000-10,000 μ A at 100 mV. Four AC Current Ranges: 0-10-100-1,000-10,000 μ A at 10 mV. Eleven dB Ranges: -40 to +60 dB in 10 dB steps. Case: Molded, black high impact material, ¾" x 5½" x 6½".

Batteries: 10 "AA" cells NEDA #815. Complete with leads, alligator clips, batteries, instruction manual with complete calibration instructions. Shipping weight 5 lbs.

MODEL 310-F.E.T. VOLT-OHM-MILLIAMMETER HANDSIZE ALL SOLID-STATE V-O-M

- 1—All Solid-State (F.E.T.) with 10 Megohm input resistance, Battery operated.
- 2—High sensitivity (300 mV DC fs) for transistor bias measurements, resistance measurements to 5,000 Megohms.
- 3—Handsize with single selector switch and provision for attaching AC clamp-on adapter.

GENERAL

Now, a hand held, battery operated Volt-Ohm-Milliammeter featuring field-effect-transistorized circuitry, 10 megohm input resistance on all DC voltage ranges, sensitivity ten times greater than the conventional bench-type VTVM, and ohms reading to 5000 megohms.

Designed by Triplet to meet the technological requirements of the space age, Model 310-F.E.T. will handle new types of circuit measurements that spring from recent advances in the state of the art.

FEATURES

- All Solid-State (F.E.T.) with 10 Megohm input resistance.
- Battery operated, one 7 V NEDA #1501, and one 1½ V ASA Type N.
- Battery Check position on range switch reads by touching lead to Battery check button on tester and reading BATT OK area on dial.
- High sensitivity (300 mV fs) allows transistor bias measurements.
- Resistance Measurements, to 5,000 Megohms. Open ckt. voltage 1.5 V on all ranges. Max. short ckt. current 30 mA. Max. pwr. across device under test 11 mW.
- Handsize with provision for attaching Clamp-on AC Ammeter adapter.
- Rugged suspension meter movement.
- Accuracy is $\pm 3\%$ of Full Scale on DC, and $\pm 4\%$ on AC. $\pm 3\%$ of DC arc on Ohms.
- Zero Center mark for null measurements.
- Weight is approximately 14 oz.
- Leads 42 inches long (1 black, 1 red).
- Polarity reversing switch for DC and Ohms.
- Case of molded black material measures 2¾" x 4¼" x 1½".
- 3" Extension Probes available Catalog Number 11968A. Suggested U.S.A. User Net Price\$1.70 pr.
- Alligator Clips available for use with probe extensions or standard 310-F.E.T. leads. Catalog Number 2451A-59. Suggested U.S.A. User Net Price.....\$.70 pr.
- Model 310-F.E.T., complete with leads and instruction manual. Catalog Number 3027. Suggested U.S.A. User Net Price.....\$70.00

WORLD'S MOST POPULAR MINIATURE V-O-M

Volt-Ohm-Milliammeter

MODEL 310

1. Hand size V-O-M with provision for attaching AC clamp-on ammeter.
2. 20,000 Ohms per volt DC sensitivity; 5,000 AC.
3. One selector switch minimizes chance of incorrect settings and burnouts.

Self-shielded for checking in strong magnetic fields;
Rugged, high torque, bar-ring instrument.
Unbreakable plastic meter window.
Fitting interchangeable test prod into top of tester makes it the common probe, freeing one hand.
Standard sensitivity 20,000 ohms per volt DC, and 5,000 ohms per volt AC.

Spring-backed instrument jewels for ruggedness.
Accuracy 3% DC, 4% AC.

RANGES

DC Volts: 0-3-12-60-300-1,200 (at 20,000 ohms per volt). **AC Volts:** 0-3-12-60-300-1,200 (at 5,000 ohms per volt). **Ohms:** 0-20,000-200,000. **Megohms:** 0-2-20. **DC Microamperes:** 0-600 at 250 millivolts. **DC Milliamperes:** 0-6-60-600 at 250 millivolts. **Weight**—Approx. 14 oz., complete with batteries.

Case—Molded, black, 2 3/4" x 4 1/4" x 1 5/8".

Complete with leads, battery and instruction manual. Shipping wt. 2 lbs.

Model 310 Catalog No. 3018 **\$44.00**

Volt-Ohm-Milliammeter

MODEL 310-C

New 310-C is the same as Model 310, above, (except 600 volt ranges replace 1200 volt ranges of model 310) plus the following features:

1. Hand size V-O-M with provision for attaching AC clamp-on ammeter.

2. 15,000 Ohms per volt AC sensitivity; (20,000 DC same as 310).
3. Single fully enclosed lever range switch, plus DC polarity reversing.

Model 310-C Catalog No. 3022 **\$56.00**

V-O-M and Clamp-On Ammeter Set

MODEL 100

Handsomely packaged set includes: Model 310 V-O-M, Model 10 Clamp-On Ammeter Adapter; Model 101 Line Separator; Model 379 Leather Case; Model 311 Leads. (\$83.20 Value Separate Unit Purchase Price.)

Model 100, as above, you save \$5.20 over individual purchase price. Shipping wt. 7 lbs.

Model 100 Catalog No. 3014 **\$78.00**

Model 100-C Same as above but with Model 310-C.

Model 100-C Catalog No. 3010 **\$88.00**

Clamp-On Adapter

MODEL 10

CHECKS LINE LOADS WITH MODEL 310 OR 310-C

(Also can be used with Models 630, 630-A, 630-NA, 631, 630-PL, 630-APL, 630-M, 630-NS, 630-PLK, 630-L by means of 611 leads.)

Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switching. Model 10 Clamp-On Adapter AC Ammeter ranges: 0-6-12-30-60-120-300. Clips around single wire to read A.C.

Ampere direct. Used with Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC V-O-M only. The only change is to remove the lead plug from the Model 310 V-O-M jack and insert it in the jack provided in the Model 10 housing. Case black molded plastic with engraved white markings.

Model 10 Catalog No. 60211 **\$20.00**

No. 611 LEADS

In addition to use with the Model 310, the No. 10 Adapter also can be used as a Clamp-On Ammeter with any Volt-Ohm-Milliammeter having a 3 AC Volt scale at 5,000 Ohms per Volt or above, such as Triplett Models 630, 630-A, 630-

NA, 630-PL, 630-APL, 630-NS, 630-M, 630-PLK, 630-L, 631, etc. (see illustration). This is done by means of a long lead attachment (No. 611) making possible easy readings in difficult locations.

611 Leads Catalog No. 79-160 **\$3.20**

No. 311 LEADS

The Model 10 can be separated from the Model 310 (in the same way as above) by using No. 311 lead attach-

ment. This permits readings in difficult locations.

311 Leads Catalog No. 79-161 **\$3.20**

Line Separator

MODEL 101

Plugs into AC outlet to divide instantly two-conductor cords. Increases ammeter sensitivity 10X and 20X. Use up to 30 AC Amperes from 0.3 to 30 in nine steps. Also has provision for Voltmeter

prods for voltage measurements. Case, black molded plastic with engraved markings.

Model 101 Catalog No. 60218 **\$8.00**

TRIPLETT ELECTRICAL INSTRUMENT COMPANY

THE WORKHORSE OF THE ELECTRONIC INDUSTRY

VOLT-OHM-MILLIAMMETER

1. One selector switch minimizes chance of incorrect settings and burnouts.
2. 4.4 Ohm center scale, reads from 0.1 ohm up to 100 megohms resistance in 4 ranges.

3. 20,000 ohms per volt DC sensitivity; 5,000 AC. Popular streamlined tester with long meter scales arranged for easy reading. Outstanding resistance ranges: low reading .1 ohm, high 100 megs. Fuse affords protection to the resistors in the ohmmeter circuit, especially the X1 setting. Spring-backed instrument jewels for ruggedness. Accuracy $\pm 2\%$ DC, $\pm 3\%$ AC.

RANGES

DC Volts: 0-3-12-60-300-1,200-6,000 at 20,000 ohms per volt.

MODEL 630

AC Volts: 0-3-12-60-300-1,200-6,000 at 5,000 ohms per volt.

Ohms: 0-1,000-10,000.

Megohms: 0-1-100.

DC Microamperes: 0-60 at 250 millivolts.

DC Milliamperes: 0-1.2-12-120 at 250 millivolts.

DC Amperes: 0-12.

DB: -20 to +77 (600 ohm line at 1 MW).

Output Volts: 0-3-12-60-300-1,200; jack with condenser in series with AC ranges.

Usable with frequencies through 500 kHz.

Case: Molded, black, $3\frac{1}{2}'' \times 5\frac{1}{2}'' \times 7\frac{1}{2}''$.

Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.

Model 630 Catalog No. 3030

\$61.00

POCKET VOLT-OHM-MILLIAMMETER

1. One selector switch.
2. Three resistance ranges to 3 megohms.
3. Five volt ranges to 5,000 AC and DC volts.

Hand-size—the ideal tester for electrical maintenance. Recessed range knob enables tester to fit in tool kit.

AC rectifier pre-calibrated unit for easy replacement.

Banana jacks at top of the panel lessen possibility of leads falling over the meter dial. Accuracy 3% DC, 4% AC.

RANGES

DC Volts: 0-10-50-250-1,000-5,000 at 1,000 ohms per volt.

AC Volts: 0-10-50-250-1,000-5,000 at 1,000 ohms per volt.

Ohms: 0-3,000-300,000.

Megohms: 0-3.

DC Milliamperes: 0-10-100 at 250 MV.

DC Amperes: 0-1 at 250 MV.

Output Volts: 0-10-50-250-1,000.

Case: Black molded, streamlined, handy pocket size, $3\frac{1}{8}'' \times 5\frac{7}{8}'' \times 2\frac{1}{8}''$.

Complete with leads, alligator clips, batteries and instruction manual. Shipping wt. 4 lbs.

Model 666-R Catalog No. 3066

\$44.00

VOLT-OHM-MILLIAMMETER

1. One selector switch minimizes chance of incorrect settings and burnouts. Polarity reversing for DC.
2. 4.4 Ohms center scale, 0.1 ohm to 100 megohms resistance.
3. Meter movement diode protected against instantaneous overloads.

Polarity reversing switch. Tester usable with frequencies through 500 kHz. Instant-vision, wider spread scales; streamlined case, handsome modern design. Unbreakable plastic window.

Fuse affords extra protection to the resistors in the ohmmeter circuit, especially the X1 setting. Spring-backed instrument jewels for ruggedness. High Sensitivity: 5,000 ohms per volt AC; 20,000 ohms per volt DC.

Accuracy $\pm 2\%$ DC, $\pm 3\%$ AC.

Case: Molded, black, $3\frac{1}{2}'' \times 5\frac{1}{2}'' \times 7\frac{1}{2}''$.

Complete with leads, alligator clips, rubber feet, batteries and instruction manual. Shipping wt. 5 lbs.

Model 630-PL Catalog No. 3050

\$61.00

COMBINATION V-O-M AND VTVM

1. One selector switch.
2. Complete V-O-M in combination with battery operated VTVM.
3. 11 megohm input to VTVM.

Two fundamental units at the price of a single tester; VTVM stability assured by long life battery operation.

Sensitivity plus—sensitivity of the 1.2 volt (VTVM) range is equal to over nine million ohms per volt. Usable with frequencies through 500 Kc.

A V-O-M for general use and a VTVM when needed; ranges entirely adequate for servicing needs.

Large meter easy to read; unbreakable meter face. Spring-backed instrument jewels for ruggedness. Accuracy 3% DC, 4% AC, VTVM 4%.

TRIPLETT ELECTRICAL INSTRUMENT COMPANY

LABORATORY ACCURACY V-O-Ms

ONE MILLION OHMS PER VOLT SENSITIVITY

Volt-Ohm-Milliammeter

MODEL 630-M

TYPE 1

630-M

1. 1,000,000 Ohms per volt DC for greater accuracy on high resistance circuits. 20,000 ohms per volt AC.
2. 1 μ a Suspension Meter Movement. No pivots, bearings, or rolling friction. Extremely rugged. Greater sensitivity and repeatability.
3. 61 Ranges, usable with frequencies through 100 kHz. Temperature compensated. 1½% DC accuracy, 3% AC in horizontal position.

Now the input impedance of a VTVM with the convenience of a V-O-M. Reads as low as 20 nanoamperes. Components mounted on quality glass epoxy etched circuit board. Meter protected by diodes against accidental overload.

RANGES

DC Volts: 0-0.6-3-12-60-300 at 500,000 Ohms/Volt.
0-0.3-1.5-6-30-150 at 1,000,000 Ohms/Volt.

0-1200 at 125,000 Ohms/Volt.
0-600 at 250,000 Ohms/Volt.
AC Volts: 0-3-12-60-300-1200 at 10,000 Ohms/Volt.
0-1.5-6-30-150-600 at 20,000 Ohms/Volt.

Megohms: 0-1-10-100 (4400-44,000-440,000 Ohms center scale)
Output: Condenser in series with AC Volt ranges
Case—Heavy, molded black case, 3-11/32" x 5½" x 7½", with removable black leather strap handle. Shipping wt. 5 lbs.

Model 630-M Cat. No. 3108 \$220.00

NOT 20,000 BUT 200,000 OHMS PER VOLT

Volt-Ohm-Milliammeter

MODEL 630-NS

630-NS

1. 200,000 Ohms per volt DC sensitivity for greater accuracy on high resistance circuits. 20,000 ohms per volt AC.
2. Suspension Meter Movement. No pivots, no bearings, no hair-springs; no rolling friction. Extremely rugged.
3. 62 Ranges. Temperature and frequency compensated. $\pm 1\frac{1}{2}\%$ DC Accuracy, $\pm 3\%$ AC.

The unit is precision designed to give maximum coverage, to withstand accidental overloads and to offer greater reading accuracy. Usable with frequencies through 100 kHz. Accuracy 1½% DC, 3% AC.

RANGES

DC Volts: 0-0.6-3-12-60-300-1200 at 100,000 Ohms/Volt.

Output: Condenser in series with AC Volt ranges.
CASE—Molded, black, 3-11/32" x 5½" x 7½". Shipping wt. 5 lbs.
Model 630-NS Cat. No. 3102 \$110.00

Volt-Ohm-Milliammeter

MODEL 630-NA

TYPE 2

Suspension Movement

1. One selector switch minimizes chance of incorrect settings and burnouts.
2. 70 Ranges: 1½% DC accuracy on meter; with mirrored scale and diode overload protection.
3. Temperature and frequency compensation.

The super deluxe of V-O-Ms. Usable with frequencies through 500 kHz. Large open front meter easy to read. Unbreakable window. Mirror scale. Meter has special diode protection against the most severe overloads. A fuse affords protection to resistors in the ohmmeter circuit (especially the X1 setting) should too high a voltage be applied. Accuracy 1½% DC, 3% AC.

RANGES

DC Volts: 0-6-3-12-60-300-1,200-6,000 at 10,000 ohms per volt.
0-3-1.5-6-30-150-600-3,000 at 20,000 ohms per volt.

0-0.120 at 60 microamperes.
AC Volts: 0-3-12-60-300-1,200-6,000 at 5,000 ohms per volt.
0-1.5-6-30-150-600-3,000 at 10,000 ohms per volt.

630-APLK

DELUXE LAB STYLE

Volt-Ohm-Milliammeter

MODEL 800

TYPE 2

1. 8" Suspension Meter with 6.95" mirror scale for greater readability plus diode overload protection.
2. $1\frac{1}{2}\%$ DC and 3% AC accuracy with temperature and frequency compensation.
3. 67 Ranges with a DC polarity reversing switch and fused ohm-meter circuit.

No other V-O-M offers all the Deluxe features of the Model 800. 3% AC ACCURACY to 1200 volts; mirror and knife-edge pointer to eliminate parallax; USABLE with frequencies to 100 kHz; WIRED CIRCUIT, HIGH FLUX BARRING self shielded magnet; DUAL SENSITIVITY provides extra ranges, DC volts at 20,000 and 10,000 ohms per volt, AC at 10,000 and 5,000 ohms per volt. Shatter-proof meter window, molded transparent plastic; fully antistat treated.

RANGES

DC Volts: 0-0.6-3-12-60-300-1200-6000 at 10,000 Ohms per Volt. 0-0.3-1.5-6-30-150-600-3000 at 20,000 Ohms per Volt. 0-120 at 60 Microamperes. **AC Volts:** 0-3-12-60-300-1200-6000 at 5,000 Ohms per Volt. 0-1.5-6-30-150-600-3000 at 10,000 Ohms per Volt. **DB:** -20 to +70 in 10 ranges. **DC Microamperes:** 0-60-600 at 120 MV. 0-120 at 240 MV. **DC Milliamperes:** 0-6-60-600 at 120 MV. 0-1.2-12-120-1200 at 240 MV. **DC Amperes:** 0-6 at 120 MV. 0-12 at 240 MV. **Ohms:** 0-1K-10K-100K (4.4-44-440 at center scale). **Megohms:** 0-1-10-100 (4400-44,000-440,000 Ohms center scale). **Output:** Condenser in series with AC volt ranges.

CASE—Heavy, molded black case, $7\frac{1}{2}$ " x $6\frac{1}{4}$ " x $3\frac{3}{8}$ ", with an insulated, movable handle, which can also serve as a tester stand. Shipping wt. 7 lbs.

Model 800 Cat. No. 3070 **\$110.00**

ALL PRICES ARE SUGGESTED U.S.A. USER NET, SUBJECT TO CHANGE, SPECIFICATIONS SUBJECT TO REVISION.

TRIPLETT ELECTRICAL INSTRUMENT COMPANY

TVO TRANSISTORIZED VOLT-OHMMETER

1. F-E-T Circuitry — Battery Operated with 11 Megohm Input Impedance (Field Effect Transistor).
2. 400 DC Mv range at 2.7 Megohm Impedance for Solid State circuit testing.
3. One Selector Switch with 23 ranges plus a Polarity Reversing Switch.

Superior voltage measuring capabilities plus resistance ranges to 100 Megohms. .4 Volt full scale range on DC. Exceptional for use in low voltage solid state circuits with greater overlapping of ranges providing better reading accuracy. Accuracy is $\pm 3\%$ on both

ELECTRONIC VOLT-OHMMETER

1. Long 7" easy-to-read scale.
2. .5 DCV range for transistor circuits.
3. High stability — meter connected in cathode circuit of 12AU7.

This extremely versatile Electronic Volt-Ohmmeter has superior voltage measuring capabilities, plus resistance ranges to 1000 Megohms.

ELECTRICAL PROTECTION of meter against burn-out. FREQUENCY RANGE — from 15 Hz to 3 MHz. SEPARATE SCALE on easy-view meter for Peak-to-peak readings. SINGLE UNIT PROBE — with built-in switch for AC/DC/OHMS. 11 MEGOHM INPUT RESISTANCE on all DC Voltage ranges. Line voltage: 115 VAC 50-60 cycles. Ground type plug. Spring-backed instrument jewels for ruggedness. Accurate within $\pm 3\%$ on AC and DC. Ohms accurate within $\pm 3\%$ of full scale based on DC scale.

RANGES

Eight DC Volts Ranges: 0-.5-1.5-5-15-50-150-500-1,500.

BURN-OUT PROOF VOLT-OHM-MILLIAMMETER

1. Burnout proof solid state overload protection.
2. One selector switch minimizes chance of incorrect settings. DC polarity reversing.
3. 4.4 Ohm center scale, 0.1 ohm to 100 megohms resistance in 4 ranges.

Transistorized electronic switching circuit (patent #3,359,457) guards against accidental burn-outs. Now you can virtually eliminate bent pointers, burned-out resistors, damaged pivots, overheated springs, burned-out coils, changes in accuracy due to overheating, in fact nearly any need for repairs. Life of transistor circuit battery is nearly that of shelf life. Automatically checked by using X100K ohms range. Overload protection on meter in addition to transistorized circuit that protects tester.

Accuracy $\pm 2\%$ on DC, $\pm 3\%$ AC. High sensitivity: 20,000 Ω /V DC; 5,000 Ω /V AC. Shipping weight 5 lbs.

LOW OHMS V-O-M VOLT-OHM-MILLIAMMETER

1. 2 Low power ohms ranges (X1 and X10). 140 Mv. ohmmeter circuit voltage.
2. One selector switch minimizes chance of incorrect settings and burnouts.
3. Designed for testing in solid-state circuitry.

RANGES

DC Volts: 0-2.5-10-50-250-1,000-5,000 at 20,000 ohms/volt.

AC Volts: 0-3-10-50-250-1,000-5,000 at 5,000 ohms per volt.

VTVM COMBINATION V-O-M AND VTVM

1. Combination Volt-Ohm-Milliammeter and battery operated Vacuum Tube Voltmeter.
2. 11 Megohm input to VTVM.
3. One selector switch, 34 ranges.

Two fundamental units at the price of a single tester; VTVM stability assured by long life battery operation. Sensitivity plus — sensitivity of the 1.2 volt (VTVM) range is equal to over nine million ohms per volt. Usable with frequencies through 500 kHz.

A V-O-M for general use and a VTVM when needed; ranges entirely adequate for servicing needs. Spring-backed instrument jewels for ruggedness. Accuracy 3% DC, 4% AC, VTVM 4%.

V-O-M RANGES

DC Volts: 0-3-12-60-300-1,200 (20,000 ohms per volt).

AC Volts: 0-3-12-60-300-1,200 (5,000 ohms per volt).

Ohms: 0-1,500-15,000.

MODEL 600

AC and DC. Single unit probe with built-in switch for AC/DC/OHMS. 11 Megohm input resistance on all DC Voltage ranges except .4 and .8. AC impedance is minimum of .75 megohms.

RANGES

DC Volts: 0-0.4-0.8-1.6-4-8-16-40-160-400-1,600.

AC Volts: 0-4-8-16-40-160-400-800.

Ohms: 0-1,000-10,000-100,000-1 Meg.-10 Meg-100 Meg. Center scale value 10 Ohms at X1. Complete with leads, batteries, and instruction manual.

REPLACEMENT AC-DC — Ohms probe

assembly for Model 850 ...79-192 \$7

RF PROBE FOR 631

With this probe and Model 631 RF measurements can be made up to 20 volts at 250 MHz. ...79-145 \$9

HIGH VOLTAGE PROBES

Completely insulated polystyrene test probe with guard-type handle. Probe is 11 1/4" long with 48" high-voltage wire lead with banana plug at tester end.

MODELS 630, 630-A, and 631

0-30,000 D.C. Volts	79-70	\$17
0-30,000 A.C. Volts	79-71	17
0-60,000 A.C. Volts	79-152	17

Models 630-PL, 630-APL, 630-PLK, 630-M

0-10,000 D.C. Volts	79-83	\$17
0-25,000 D.C. Volts	79-130	17

0-6,000 D.C. Volts	79-247	17

TESTER STAND

Metal stand holds Model 630, 630-A, 630-APL, 630-NA, 630-NS, 630-PLK, 630-APLK, 631, 630-M or 630-L tester in approximate 45° angle; will enable you to make easy readings.

STAND ONLY—Shipping wt. 1 lb. 255-A \$2.

PROBES FOR MODELS 310 AND 310-C

PROBE EXTENSIONS for 310 & 310-C lead insulated, 3 inches long. 11968A \$1.75
MINIATURE ALLIGATOR CLIPS for use with 310-310-C Probe extensions. 2451A-59 \$2.50

PROBES FOR MODEL 850

Auxiliary Diode Probe for voltages to 1000 volts with frequencies to 250 MHz. 79-215 \$9.00

High Voltage Probe for DC Voltages to 1000 KV ...79-196 \$25.00

All Prices Are Suggested U.S.A. User Net Subject To Change. Specifications Subject To Revision. (Slightly Higher West of Rockies and in Canada)

TEST EQUIPMENT

TRUE DYNAMIC MUTUAL CONDUCTANCE TUBE ANALYZER MODEL 3444-A

1. Measures the characteristics at variable currents and voltages.
2. Snap-in roll chart in separate compartment for easy removal and updating.
3. Reads directly in micromhos with a self-checking true Gm circuit.

The only tube tester under \$1,000 that is simple and fast to operate and will measure tube characteristics at KNOWN readable potentials. Provides readings to: (a) Plot the tube characteristic curves. (b) Measure grid current at known potentials. (c) Compare cut-off characteristics of dual tubes. Reads directly in micromhos with a self checking Gm circuit.

CHECKS PLATE current cutoff. CHECKS GAS under actual operating conditions (measures to approximately one UA of gas current). CHECKS RECTIFIERS under load. CHECKS THYRATRON firing voltage and grid current. (To 50 ma. anode current.) CHECKS DUAL section tubes with only one lever movement. PROVIDES SHORTS and leakage measurements from 0-10 megohms using a filtered DC supply of 85 volts. PROVIDES cutoff measurements on voltage amplifiers. **RECESSED SOCKET SAVERS** (under-the-panel-mounted) are easily removable for replacement.

Case: Wood, gray leatherette covered, 15 $\frac{1}{8}$ " x 18 $\frac{1}{8}$ " x 7 $\frac{3}{4}$ ". Shipping wt. 30 lbs. **\$470.00**

FASTER, FLEXIBLE TUBE TESTER

MODEL 3414

1. Fast, easy to use, GO-NO-GO testing.
2. Input filament continuity test.
3. Wide range of filament voltages prevents obsolescence.

Modified circuit for better correlation on Gm. Rejects burned out tubes instantly without waiting for the filament to heat. NEON INDICATOR SHORTS TEST, new, fast and accurate. Full range filament voltages—0.65 to 117 in 23 steps. Improved lever switching for com-

plete control of each tube element. Quick-change roll chart. TV picture tube test by means of adapter (available extra, see below) without removing tube from receiver. Large, clearview meter has three-color GOOD-?BAD scale.

COUNTER-PORTABLE TYPE CASE. Ultra-professional appearance; Wood, dark gray leatherette covered; 15 $\frac{7}{8}$ " x 11 $\frac{1}{2}$ " x 6 $\frac{1}{2}$ ". Hinged removable cover. Chrome hardware and feet. Etched panel. Shipping wt. 17 lbs. **\$132.00**

TRANSISTOR ANALYZER FOR COMPLETE TRANSISTOR ANALYSES

MODEL 3490-A

RANGES

1. Ideal for schools and labs. Makes H parameter measurements.
2. High current and high voltage AC and DC beta measurements.
3. Reads leakage current in NANO-AMPERE region.

Test DC Beta, AC Beta at 1KC, leakages (Ico, Ieo, Iceo), Alpha, Reach Through Voltage, Saturation Voltage, Floating Potential. The 3490-A's flexibility allows plotting of transistor characteristic curves along with setting up nearly any type of transistor test. Input bias reversing switch gives added versatility. THREE INDEPENDENT Power Supplies. Model 3490-A also tests diodes, rectifiers, zener diodes, SCR, etc.

Input Current (Emitter or Base): 0-100-300 ua, 0-1-3-10-30 Ma, 0-1-3-1-3 Amp.

Collector Current: 0-300 ua, 0-1-10-30 Ma, 0-1-3-1-3-10-30 Amp.

Iceo, Ico (Icbo): 0-6 Ma, 0-600 ua, 0-60 ua, 0-6 ua.

Collector Voltage: 0-120 V, 0-60 V, 0-30 V, 0-12 V, 0-6 V, 0-3 V, 0-1.2 V.

Emitter or Base Voltage: 0-12 V, 0-1.2 V.

Tetrode: 0-10 V Calibrated Control. Shipping wt.: 30 lbs.

Case: Wood, gray leatherette covered, 18 $\frac{1}{8}$ " x 15 $\frac{1}{8}$ " x 8" with removable cover, and sloping etched aluminum panel. **\$441.00**

TRANSISTOR TESTER

MODEL 2590

FIVE SCALES

1. Tests Beta amplification, Ico, Ileo for both power and signal type transistors. Tests for shorts and leakage. Checks and forward currents on diodes.
2. Simulated operating test conditions.
3. Simple and straightforward operation. No roll chart or special data needed, always up-to-date.

Case: 11 $\frac{5}{8}$ " x 8 $\frac{5}{8}$ " x 5 $\frac{1}{8}$ ".

0-1 MA for Signal Transistor ICEO

0-100 MA for Power Transistor ICEO

0-500 Microamp for Signal Transistor ICBO

0-1 MA for Power Transistor ICBO

5-100 Beta Range; also shows on GOOD-?—BAD scale

Shipping wt. 9 lbs. Power—115 volts, 50-60 cycle AC. **\$71.00**

SIGNAL GENERATOR

MODEL 3432-A

1. High RF output.
2. Fundamentals to 110 MHz, harmonics to 220.
3. Ideal as marker generator for TV alignment.

Complete frequency coverage 160 KC to 10 MC fundamental with seven bands (220 MC harmonics). R.F. circuits are double shielded with copper steel shields. Large easily read etched aluminum dial. Cathode follower output provides good stability by acting as a buffer to the oscillator. 400 cycle audio frequency with variable control for 0-100 per cent modulation.

Band

A	160-370 KC
B	360-735 KC
C	715-1875 KC
D	1825-4950 KC
E	4.85-13 MC
F	12.5-35 MC
G	34-110 MC
G (Harmonics)	68-220 MC

Case: Metal with black baked enamel suede finish, 15 $\frac{1}{32}$ " x 11 $\frac{1}{32}$ " x 6 $\frac{1}{4}$ ". Black leather strap handle, rubber feet. Shipping wt. 30 lbs.

\$144.00

All Prices Are Suggested U.S.A. User Net Subject To Change. Specifications Subject To Revision.

WIRE • CABLE • TUBING • MIL/COMM. • SWITCHES • ELECTRONIC HARDWARE

OFF-THE-SHELF

DABURN TRANSISTOR HEAT SINKS and RETAINER CLIPS IMMEDIATE DELIVERY

Transistor heat sinks made with beryllium oxide, which is unique among inorganic materials, operates electrically like a ceramic, but conducts heat like a metal. Where electrical applications require both dielectric insulation and hi-heat transfer from device to chassis, only beryllium oxide (BeO) can provide a satisfactory solution to design problems. Heat generating devices will operate at higher power levels longer and more reliably, with beryllia cooling.

BERYLLIUM OXIDE HEAT SINKS OFFER THESE ADVANTAGES:

Extremely resistant to shocks, vibration and fatigue.

Low resistivity — low dielectric loss

Prolonged transistor life and output

Freedom from outgassing, infinite shelf life

PHYSICAL PROPERTIES & DIELECTRIC STRENGTH

GREATER THAN: 300 Volts/MIL

CHEMICAL PURITY: 99+% Beryllium oxide

DENSITY: 2.9 Grams/CC

MELTING POINT: 4650°F

HEAT CAPACITY AT 350°: 0.3 BTU/LB

THERMAL EXPANSION: $3.2 \times 10^{-6}/^{\circ}\text{F}$

THERMAL CONDUCTIVITY: 140 BTU/FT² HR°F-FT

TRANSVERSE STRENGTH: 25,000 PSI

ELASTIC MODULES: 40×10^6 PSI

Immediate Delivery from stock. All available "Off the Shelf" in JEDEC-TO, DO and MT Nos. Standard thickness $\frac{1}{16}$ ". Also available in $\frac{1}{32}$ " thickness

BERYLLIUM OXIDE FOR TRANSISTOR RETAINER CLIPS, HEAT DISSIPATION AND ELECTRICAL INSULATION

TRANSISTOR RETAINERS: Optimum thermal conductivity, with absolute electrical insulation reliability, is offered by spring clip transistor retainers. The retainers provide electrical isolation for the semiconductor by means of a disc of beryllium oxide ceramic brazed to the base of the beryllium copper retainer. Solid ceramic disc, in contrast to a thin insulating coating, is practically immune to loss of insulating value thru cracking, abrasion, chipping or other results of rough treatment in assembly. Heat transfer from the semiconductor to chassis or heat sink is not sacrificed since the high purity BeO has thermal conductivity to that of aluminum metal. Maximum soldering temperature — 300°C.

JB[®] Polystyrene

ROD TUBING SHEET

For radio and electronic applications, because of its very low loss factor at ultra high frequencies, Polystyrene is the ideal material for insulators, coil forms, shields, etc. It has excellent arc resistance, is non-tracking and has splendid insulating properties. Because its water absorption is practically zero it has excellent dimensional stability.

POLYSTYRENE ROD — Transparent

AVAILABLE IN 12" OR 48" LENGTHS

Catalog Number	Diameter	Net Price	
		12" lgth.	48" lgth.
JB-100	1/8"	\$.03	\$.12
JB-101	3/16"	.07	.28

Classic

Motors and Gearmotors

Available up to 1/4 hp. Gearmotors from 1 to 750 rpm, up to 13 in. lb. torque, continuous duty. Universal and DC shunt models, induction and variable speed types, base or flange mounted. Ball bearing, high quality die cast construction. Ideal for SCR motor controllers, pumps, la. stirrers, machine drives. 3/16" dia., 6 1/16" long. Shaft, 1/16" dia., weight 5 lbs. Ask for "Classic" catalog.

Any of the shunt or PM models listed are available for 12 to 115 volt DC. Universal types from 12 to 230 volts. Add \$2.00 to list. Motors can be modified promptly at slight extra cost. Make Carter your specialty motor source.

"CLASSIC" PM DC TACH-GENERATORS

A high output DC Tachometer-Generator for slow speed industrial and commercial purposes. Barium ferrite magnet. Couples to motor shaft and to meter for direct readings without belts or gears to step up speed. Requires no batteries, or external excitation. 2 lead reversible. Face or flange mount available. 5/16" dia. shaft. 1% linearity. Up to 15 watts capacity.

Model Number	DC Output per/1000	Mounting	Max. Speed RPM	List

CTA50AA	50 v.	base	6000	76.00
CTA25AA	25 v.	base	10000	74.00

Built-in capacitor filter assures ripple of less than 3%. Unfiltered models will average 5% or less AC ripple. Other voltages available.

"ECLIPTIC" TACHOMETER GENERATORS

Converts rotation rate into reference voltage for speed indication. Ideal for motor controllers and various industrial applications such as variable speed drives, textile machines, machine tools, etc. Couples direct to drive motor, requires no belts or gears. 2 lead, reversible. Linearity below 1%. 5 to 20 MA capacity. May be connected to a DC meter calibrated for RPM, GPH or other measurements. Size 1-3/8" x 2-1/4" plus shaft, .118 dia. 10/32" long.

A-C OPERATION — Standard SLO-SYN Synchronous/Stepping Motors are permanent magnet a-c motors having extremely rapid starting, stopping and reversing characteristics and a slow basic shaft speed of 72 rpm synchronous with a line frequency of 60 hertz. Three-lead types need only a single-pole, three-position switch for complete forward, reverse and "off" control. No excessive inrush current when energized because starting and operating current are nearly identical. Can be completely stalled without overheating and with no harmful effects on components. Starts or stops in less than 5° of shaft rotation; no need for mechanical or electrical braking. When used with an auxiliary high speed motor, the SLO-SYN motor can remain coupled to the load and safely overdriven. Phase shifting resistor and capacitor must be used when operating from a single-phase source but not from two-phase. All standard motors are rated for continuous duty at maximum ambient temperature of 40°C. Types SS150 and SS152 use Class A insulation; all others have Class B.

D-C STEPPING — When used for phase-switched d-c stepping, the motors can be connected to provide either 100 or 200

steps per revolution. Accuracy of the steps is $\pm 0.9^\circ$ noncumulative. Three-lead types require a center-tapped d-c supply and single-pole, double-throw switching; four-lead types require a single-ended power supply and single pole, double-throw switching. Bifilar motors can also be used with transistorized switching circuits. With a suitable control potentiometer instead of switches, a SLO-SYN motor can be made to rotate steplessly, permitting extremely accurate positioning. All motors have lubricated-for-life bearings.

PRECISION STEPPING

For phase-switched d-c stepping, types HS25, HS50, HS50L and HS50L make 200 steps per shaft revolution. Each 1. step is accurate within $\pm 3\%$ (.06°) noncumulative. May be operated at speeds greater than 500 steps per second if accelerating and decelerating circuits are used. With proper circuitry, the motors may be operated at speeds of 1000 steps per second or higher without missing any steps.

200 RPM

Types TS25, TS50 and TS52 are similar to standard models but operate at synchronous speeds of 200 rpm and take 36 72 steps per revolution when used for d-c stepping.

BIFILAR

Used for d-c stepping where use of push-pull circuitry and center-tapped power supply is not possible or where increased torque at high stepping speeds is required.

SPECIAL ENVIRONMENT

High Vacuum types for vacuums to 10^{-6} Torr; High Temperature types for temperatures to 130°C ; High Radiation types withstand dosage of 3,000 megarads. All available from 50 to 1800 oz-in; High Vacuum 25 oz-in also.

PLANETARY GEAR

Basic 50 and 150 oz-in types and type X250 available with planetary gear assemblies in speeds of 16.6, 3.32, 0.665, 0.133 or 0.027 rpm; 16.6 rpm available in other 250 and on 400 oz-in types.

FOUR-LEAD

Designed for d-c stepping to provide the flexibility needed for use with equipment requiring isolated windings with no common connection.

DOUBLE END

Three-lead, bifilar and four-lead types with output shaft at each end of motor available in all listed torque ratings. 50, 150 and 250 oz-in types available also with planetary gear assemblies in 16.6, 3.32, 0.665, 0.133 or 0.027 rpm speeds.

VISCOUS DAMPED

Type HS50D precision stepping motor has a unique fluid system resulting in a step function approaching critical damping. Speed of response and running characteristics are essentially unaffected by the silicone viscous damping fluid. Possesses characteristics of types described under PRECISION STEPPING on facing page.

SLO-SYN® Preset IndexersTWO-AXIS
TYPE 2SP1800-4SINGLE-AXIS
TYPE SP1800B-4ABSOLUTE
TYPE SA1800-5

Used to control indexing of SLO-SYN bifilar motors. The index angle, or position, can be preset by dial setting on the control panel the number of 1.8° steps to be driven. Have provision for actuating any external equipment needed to perform related operations. Index, jog and free run can be initiated manually from the control panel or from an external switch. Can be made to cycle automatically with proper external switching. Single- and two-axis models are available with counting ranges to 99,999 steps. Two axis models provide independent control of two SLO-SYN motors. Speed adjustable from 4 steps/second up to maximum possible with motor used. Optional backlash take-up circuit.

ABSOLUTE PRESET INDEXERS permit either absolute or incremental positioning modes. In the absolute positioning mode, the number set on the controls determines the final position of the motor relative to the starting, or "zero" point. When incremental positioning is used, the motor will move the preselected number of steps each time the INDEX button is pressed. Optional backlash take-up circuit.

SLO-SYN®

Translator

TYPE ST1800B

Pulse-to-step converter designed for use with appropriate bifilar SLO-SYN motors converted for incremental stepping. Convert low level signal pulses or square waves into the correct switching sequence needed to step a SLO-SYN motor at 200 steps/revolution (1.8° per step). Input is 105-125 volts a-c, 1 ampere. Signal input impedance is 500 ohms. Used for programmed positioning, indexing and indicating operations.

SLO-SYN®Adjustable Speed
Drive

TYPE ST1800BV

Essentially, SLO-SYN Adjustable Speed Drive type ST1800BV is a translator which includes a built-in oscillator to supply the triggering signals. Oscillator frequency can be adjusted to vary the speed from 4 steps/second up to the maximum permissible with the motor used. Direction of rotation can be controlled either from the front panel or from a remotely located switch.

SLO-SYN®

Translator Module

TYPE STM1800V

Plug-in circuit boards with logic capabilities for stepping a SLO-SYN motor in 1.8° increments. Type STM1800 is basic translator which will provide bidirectional motor operation. Type STM1800V is similar but includes built-in oscillator which can be adjusted to drive the motor at speeds from 4 steps/second up to maximum at which the motor will drive the load.

SLO-SYN® High Speed Drives

Translator

Drive SLO-SYN Precision Stepping Motors up to 2000 steps per second without losing any steps. Triggering the translator circuits is an internal oscillator which can supply a variable frequency range adjustable from 50 to 2000 steps per second. Triggering pulses can be supplied by tape readers, computers, oscillators, pulse generators and other signal producing equipment.

TYPE HTR400

TYPE HPR400R-5

Preset Indexer

Drive SLO-SYN Precision Stepping Motors in indexing and other positioning operations. Acceleration and deceleration circuits permit driving motors up to 2000 steps per second without missing any steps. Decade counter controls on front panel allow the operator to select any desired positioning increment. Optional backlash take-up circuit.

Transistorized A725 ON/OFF Control A750 and A750DA Timing Controls

AUTOTRON, INC., Danville, Ill. 61832

Features of

A725, A750 and A750DA

One connection changes from LIGHT- to DARK-energized operation (or vice versa). 5.8, 4.7, 3.3, 2.5, 2.2 and 1.1 Light Source Voltages makes available minimum suitable voltage for maximum lamp life and maximum speed of sensing cell response.

Rugged, 5-amp DPDT Plug-in Relay.

a. Plug-in mounting permits replacement in seconds without special skill or tools

b. Transparent enclosure protects against dust, physical injury and tampering.

Rectified output current for positive and QUIET operation of control relay.

Transistors protected from transient voltages.

Cad Cells are exceptionally well shielded from extraneous light.

All circuit components are securely mounted on a modern circuit board.

All contacts of the DPDT Relay wired to large, screw type terminals.

Operate at ambient temperatures to 115°F.

In JIC enclosures at \$12.50 extra.

Operate from 234, 208 and 117 V, 50-60 c.

A725 ON/OFF Control

FAST ACTING — .025 sec. light time and .025 sec. dark time minimum.

SENSITIVE — Adjustment has shaft lock.

Power Consumption, 25 VA.

Energizes LIGHT connected to LIGHT terminals.

Energized DARK connected to DARK terminal.

A870 Solid State AC Switch

Replaces plug-in relay to convert all models of A725, A750 and A750DA series for solid state operation from 117 VAC power supply ONLY. Wiring diagram included with each switch.

Output: 117 VAC; 400 watt, 3.4 amperes maximum load, 100 milliamperes minimum.

Ambient Temperature: 115° maximum.

Module temperature increases with load current. At 3 amp. load current, case temperature is normally 130° max.

A870 Solid State AC Switch including Jumper Wires and Fuse Holder with Fuse.....\$52.50

A870 Solid State Switch can also be furnished for other applications. Information on request.

W 8-3/8", H 10-3/8", D 4-1/4"

A725 ON/OFF Control

A750 and A750DA models come in the same cabinet with wiring diagrams mounted in the cover.

A750 Timing Control

Timing Ranges (specify)

Range No. .7 adjustable 1 to 8 seconds, approx. Range No. 1.0-2 to 16 seconds, approx.

(Other ranges available—tell us what you need) Timing adjustment has shaft lock.

Energizes LIGHT and times out DARK connected to LIGHT terminal. Recycle time is almost instant (.015 sec. max.) and is independent of light level on the sensing cell. Timing control is voltage regulated and variation in timing between 100 and 130 volts is negligible.

Energizes DARK and times out LIGHT connected to DARK terminal. Recycle time is 50 milliseconds min. depending on light intensity on the sensing cell. For minimum recycle time reduce light intensity to minimum operating value.

Power consumption, 25 VA.

■The suffix "M" in A725M, A750M, and A750DAM identifies extremely sensitive controls with sensitivity adjustment that operate with very short light change. The "M" type controls have been developed for operation by photo sensors that have the "5A Feature" described on the opposite page. This combination is used for scanning register marks, for sensing fast moving objects and other applications where light change is short. Sensors with the 5A Feature are also used where the sensing head is exposed to high temperature.

Sensitivity adjustment of A725M, A750P, A750M, A750 and A750DAM Controls

A750DA Extra Fast Timed Out Pulse Width Control

Timing Ranges same as A750

The Control Relay of the A750DA energizes instantaneously with adequate light change—energizes at expiration of pre-set timing period as follows:

With LIGHT Terminal connection the relay energizes instantly when the cell is enough light; remains energized even though cell goes dark and de-energizes when the Period expires, except; while the relay is energized, if the cell goes DARK and the LIGHT before the Timing Period expires, relay remains energized and a NEW Timing Period starts.

With DARK terminal connection, DARK cell produces the same relay action as LIGHT does in the above.

Timing and Sensitivity Adjustments are in cabinet.

Adjustable time delay repeat accuracy 1% Delay adjustment has shaft lock.

Power consumption, 25 VA.

†Distance between Scanner Lens and Reflector

‡When used with No. P380 Retro-Reflector

▲No. P380 Retro-Reflector, 3" diameter, \$1.50 add. □A750P has sensitivity adjustment with shaft lock.

All Sensors and Light Sources listed in these tables are illustrated and described on the opposite page.

Remote Sensing and Light Source Heads Including UL listed, Fiber Optic and Retro-reflective.

E8AP/E8A Remote Heads

E8A and E8B Construction

are machined from aluminum. Lenses and polished. Lens assemblies are moved without dismounting to provide for inspection or replacement of cell

can be turned to any position in the brackets. Overall height, including 2 1/4"; including cord grip, approx. 2 1/2"; width, including bracket, 15/16". Dimension diagrams on request.

5A Feature for Speed Sensing and Temperatures.

g. Heads with the 5A Feature rise in 4 seconds and decay in 60 microseconds. sensing cell withstands temperatures up to 250°F. When required, practically any AUTOTRON photo sensing head can be furnished with the 5A Feature at extra cost.

s with the 5A Feature are designed for with A725M, A750M and A750 DAM mounted on the facing page.

E8BP/E8B Remote Heads

Infrared Filter for E8B Heads Easily installed and removed. Gives Light Source invisible infrared beam. Shields sensor from ambient fluorescent light. Reduces max. distance about 50%

P204 FILTER ASSEMBLY \$3.45

EBP10LC-EBC Subminiature Heads

Each head is 3/4" diameter by 2 1/2" long; equipped with 6-foot cord potted to the head, equipped with 1/4" NPT fitting for connection to control. Lamp rating; .38 amps at 2.5 volts. Life expectancy, 7,500 hours. Cell and lamp is easily replaceable.

UL listed E8Z Series Heads

Series E8B cells, lamps and lenses in explosion proof housings, for use in hazardous locations. Underwriters' Laboratories listing: Class I, Groups C and D; Class II, Groups E, F, and G. E8Z10 rated 4.25 w, 2.5 v; E8ZP10L rated 0.125 va. maximum, 40 v. maximum; E8ZP5A rated 0.250 va maximum, 10 v, dc maximum. Mounting threaded for 1/2-14 NPT. Potted leads, 24" long. Overall size: Approx. 2 1/16" long; 2" high, 1 1/16" wide.

ELA10TH Retro-Reflective Sensor

Lamp and sensing cell are in the same housing. Light projected through the lens strikes a retro-reflective surface and returns through the same lens to the sensing cell. The retro-reflective surface may be tilted up to 15° from perpendicular to the light path.

Gasket-sealed, cast aluminum case with 6-foot multi-conductor cable. Slots in mounting flanges are 1" long on 3/16" centers. Overall width 3 1/16", height 2 1/16".

PF10LC-LFE Fiber Optic Remote Heads.

ed especially for resistance to vibration as simplicity of application and alignment - hard-to-get-at places. The Fiber Optic may be bent in any direction with curves of 180° or more.

sing head or light source has a gasket case housing the lamp or cell. The lens is assembled to a Fiber Optic Cable, 24" which is connected to the housing. A 6-foot installed cable connects the lamp or cell to the control. The heads are equipped

Lens, cell or lamp and 6-foot cable connection are potted in a tube, 3/8" diameter by 1" long. Potting for protection against application conditions and mechanical injury makes the assembly permanent. In case of failure the entire assembly must be replaced. Lamp rating; .38 amps. at 2.5 volts. Life expectancy, 7,500 hours.

EPB10C-E3BE and E4CE

Each above unit has 1 1/2 inch diameter lens in an aluminum lens holder mounted in a gasket sealed cast aluminum case with adjustable mounting bracket. Case is tapped for 3/4" conduit. Weight 3 1/2 lbs. Depth 5 1/16", Width 4", Height 5 1/4".

E3BE has No. 88L lamp, rated 1.6 amp. at 5.8 v. Focusing adjustment provides 1/2x1/2" focal size at 12" focal length; 3/4x1/4" focal size at 24" and 1 1/4x3/4" focal size at 36" focal length.

E4CE has No. 2330B prefocused two-filament lamp rated 3.6 amps. at 5.8 v. The two filaments maintain light source continuity; when one fails a built-in relay switches on the other filament and a signal lamp; also operates SPDT contacts which may be used for remote warning control. The prefocused lamp is replaceable with minimum change in light beam. Extra low voltage connection for prolonged life.

XPM/EX3M Remote Heads

Adjustable Focus Light Source has light adjustable from focal size of 1/8" x 1/4" at length to 7/16" x 1" focal size at 6" length. Also adjustable to straight light No. 88, 1.6 ampere lamp is housed with meter lens in brass tube mounted in aluminum bracket. Height 4 3/4"; width 1 1/2".

C Sensing Head has cad cell housed with meter lens in brass tube mounted in aluminum bracket. Height, 4 3/4"; width, 1 1/2".

E1AP/E1A Remote Heads

Series E1A heads have 3/4" diameter lenses mounted in flexible silicon rubber. Gasket sealed aluminum cases are tapped for 1/2" conduit. May be adjusted with rigidly positioned on 1/2" pipe or conduit with lock nut. Case easily opened for inspection of lamp or cell with mounting undisturbed. Depth of case in direction of light beam, 1 1/4"; width, 1-7/16"; height 3 5/8".

36-page Catalog including 51 application diagrams mailed promptly on request.

In the illustrations and in the Control-Paks photo sensors and light sources are shown in matched pairs for simplicity of arrangement. Any sensing head can be used with any light source if the light source provides enough light to operate the sensor.

A766 Photo-Control with Solid State Switching

A741B High-Speed Counting Eye

A766 - W 8-3/4", H 10-3/8", D 4-1/4"

A766 Transistorized Photo Control with Solid State Switching

A766 Photoelectric Control uses Solid State Switching instead of conventional relays, thereby avoiding weaknesses inherent with mechanical contactors.

Features

24 VDC Fused Output, 30 watt max.—20-ohm load min.

LIGHT- or DARK-actuated—a single connection adjusts phasing.

FAST ACTING—.04 second DARK time; .02 second LIGHT time.

Sensitivity Adjustment with shaft lock.

Transistors are protected from transient voltage.

Choice of 5.8, 4.7, 3.3, 2.5, 2.2 and 1.1 Light Source Voltage provides optimum operating voltage for prolonged lamp life and increased speed of sensing cell response.

All circuit components are securely mounted on printed circuit board.

Operates at ambient temperatures up to 115°F.

Furnished in JIC enclosures at \$12.50 extra.

Power consumption, 45 watts, maximum.

Operates from 234, 208, and 117 V, 50-60 C.

E8LP12G Specular Reflective Scanner Head

Dotted line represents path of reflection—not the light beam

reflective surface

E8LP12G Scanner Head for specular reflective control. Responds to ordinary reflective surface and light beam must be directed perpendicular to the reflective surface for light to bounce back and strike the light sensing cell.

For high speed scanning service in minimum space. E8LP12G Scanner Head combines the fast acting cadmium selenide cell and the light source lamp in a single miniature housing (approximately 3/4 inch in all three dimensions plus 3/8" male pipe thread connection. See dimensional diagram below.)

The light sensing element is a fast response, cadmium selenide cell. The lamp has a built-in lens. An infrared filter helps protect against ambient light. The lamp rating is 2.5 volts at .5 amperes-life expectancy up to 75,000 hours depending on operating voltage.

E8LP12G Scanner Head including mounting bracket, also 6-foot factory-connected cable with cable grip and seal for connecting to 800 control. \$28.75

E8S12G Retro-Reflective Scanner Head

Dotted line represents path of reflection—not the light beam

retro-reflective surface

E8S12G Coaxial Scanner responds to retro-reflective surface (tape, chalk, ink, paint, etc.). Light beam need not be perpendicular to the surface; with an angle of incidence up to 45° and more light bounces straight back to the source.

For use with retro-reflective tape or other retro-reflective material, be used with a retro-reflective mirror when it acts as a sort of limit switch or for detecting or identifying objects with retro-reflective marks, code marks, labels, etc.

The light beam does not need to be perpendicular to the retro-reflective surface; beams at angles up to 15° and more (depending on conditions) bounce straight back to the cell.

E8S12G Scanner Head† with mounting bracket, 6-foot factory connected cable, cable grip and seal for connection to the control.....\$

E8S12G-6A has a fixed pin-point beam; focal size 1/4x3/16 at 3 3/4"

A579C ON/OFF Control

A579CP Timing Control

Relay energizes when light is on the cell;
 relay de-energizes when light beam is interrupted.
 Delay is easily added by connecting capac-
 itors to marked terminals. The delay times out
 (delays de-energizing of control relay
 when light beam is interrupted). Instructions in-
 cluded with each control.

Relay energizes LIGHT: times-out DARK (when
 light beam is interrupted timing elapses before
 relay de-energizes) Time Delay adjustment from
 outside case; equipped with shaft lock.

Repeat accuracy 4%.

Adjustable Timing Range: No. 0.4: 0.1 to 5 sec.
 No. 2.0: 1.0 to 20 sec.

Sensing and Light Source Heads described on
 Page 2

800C and 800CM Dark-energized ON/OFF Controls

Controls with the sensing cell DARK.
 Free relay operation—due to square wave
 output to relay coil.

Best silicon transistors assure extreme tem-
 perature stability.

Timing: .02 second light, .03 second
 minimum. 800CM is exceptionally fast; 4
 seconds rise time, 60 microseconds decay

Timing adjustment has shaft lock.

Timing delay can be added by user.
 Timing included with each control.

Operates at temperatures up to 115°F. 800CM
 operates at temperatures to 200°F.

Terminals for 2.5 v light source.

5-ampere DPDT Relay, plug-in mounted
 see-thru" plastic cover.

Contacts of the relay wired to screw type
 terminals.

Transistors are protected from transient voltage.
 Circuit components are mounted on a circuit

Gasket-sealed cast aluminum case, tapped for
 conduit, has adjustable mounting bracket.

1/2" diameter, mounted in flexible silicon

Power consumption, 5 VA. For 115/230 v,
 50-60 c.

Size: 1 1/2", W 4", H 5 1/2". Weight 3 lbs.

Suffix identifies extremely sensitive con-
 trol with sensitivity adjustment that operate
 very short light change. The "M" type
 controls have been developed for operation
 on sensors that have the "5A Feature"
 described on Page 2.

This common control is used for scanning register marks,
 sensing fast moving objects and other
 applications where light change is short.

800C ON/OFF Control-Paks

Control-Pak Numbers	Max. Feet betw. heads	Control-Pak Net Prices
800C-L1A	15	\$ 90.45

Retro-Reflective Photoelectric Controls Tube Type Photoelectric Controls

A990 ON/OFF and A990P Timing Controls

A990 and A990P each is a Control-Pak in one case. Sensing cell, light source, amplifiers, sensitivity adjustment and control relay are all in the same housing. Only one connection to power is required. A retro-reflective surface completes the installation.

Light projected through the lens is reflected back through the same lens to the sensing cell. The retro-reflective surface can be up to 15° from perpendicular to the light beam. Retro-reflective tape, paint, etc. may be used. Retro-reflective quality of the target affects operating distance.

A990 ON/OFF Controls

Control relay energizes LIGHT; de-energizes DARK.

Fast Acting: .02 second light; .03 second dark, minimum.

Max. distance, lens to Retro-reflector, 12 ft.

A990 Retro-Reflective ON/OFF Control
Has pre-adjusted sensitivity.....\$59.00*

A990S Retro-Reflective ON/OFF Control
Has sensitivity adjustment from outside case.....\$65.00*

*P380 Retro-reflector, 3" dia. \$1.50 extra

*P380A Retro-reflector, 1½" dia. \$0.75 extra

*P380B Retro-reflector, ¾" dia. \$0.40 extra

A990 and A990P Features

High Sensitivity. Available with and without sensitivity adjustment.

Provides dependable operation when objects block the light beam; also with limited light change such as may be provided by retro-reflective tape on a moving carton.

Transistorized.

Rugged 5-amp DPDT plug-in relay, with dust cover.

Rectified output for DC operation of Relay.

Transistors protected from transient voltage.

All circuit components securely mounted on modern printed circuit board.

All Relay Contacts wired to screw type terminals.

Maximum ambient operating temperature, 115°F.

Gasket-sealed cast aluminum case tapped for ¾" conduit.

D (direction of light beam) 3½", W 6¼", H 5½". Shipping weight, 3½ lbs.

Power Consumption, 10 VA. For 115/230 v, 50-60 c.

A990P Timing Controls

A single switch adjusts Control Relay to Energize LIGHT and time out DARK or to Energize DARK and time out LIGHT. Max. distance, lens to Retro-reflector, 15 ft.

Timing Range

No. 0.5 — 0.5 to 4.5 seconds
No. 0.7 — 1 to 8 seconds

With above controls maximum distance between ELA10SH and P380 Retro-reflector is 15 ft.

ON/OFF and Timing Photo Controls with Tube Type Sensors

S Series ON/OFF Controls

Rugged, industrial Photoelectric Controls, factory adjusted for use where object interrupts the light beam 100%. Minimum dark time, .06 second; minimum light time, .06 second. Control relay contacts, SPDT, rated 8 amps. at 115 VAC, noninductive load. Splashproof cast aluminum case with adjustable bracket; tapped for ¾" conduit. Power consumption 10 watts.

S1A and S4A1 ON/OFF Controls

All above controls have ¾" lens mounted in flexible silicon rubber. Require 20 foot-candles minimum light. Weight, 2 lb. Dimensions, diagram 24A.

DARK† energized	LIGHT† energized	50-60 cycles VOLTS	NET each
S1A	S4A1	115/220	\$43.75

Light Sources are described on page 6

Light Sources for use with Photoelectric Controls

Compact Photoelectric Controls

Page 6

AUTOTRON

Series L1 Light Sources

D and L1DA Light Sources all have 1 1/2" diameter, mounted in flexible silicon

88L, rated 1.6 amps. at 5.8 volts, and 4.8V. transformer tap leads for operation; the EXTRA 4.8V. lead per-voltage operation where feasible to lamp life.

Gasket-sealed cast aluminum case that process to the lamp with mounting alignment.

L1A Light Source

Dø3 1/8", W 4, H 5 1/2

Has gasket-sealed cast aluminum case tapped for 3/4" conduit with adjustable and reversible mounting bracket. Weight, 3 1/2 lbs.

L1A Light Source.....\$19.75

LIAY	LIARY	LIABA	LIARBA
\$24.75	\$36.75	\$29.75	\$41.75

L3B Adjustable Focus Light Source

Dø5 1/8", W 4, H 5 1/2

Has 1 1/2" diameter lens in an aluminum lens holder. Gasket sealed cast aluminum case; tapped for 3/4" conduit and with adjustable and reversible mounting bracket. Has 88L lamp rated 1.6 amps. at 5.8V.

Transformer taps for 5.8 and 4.8 volt lamp operation which permits low voltage operation where feasible to prolong lamp life. Also has 3-way lamp positioning adjustment shown below with focusing adjustment from 1/2" x 1/8" beam at 12" focal length, and 7/8" x 1/4" beam at 24" focal length to 1 1/2" x 3/8" beam at 36" focal length. Weight, 3 1/2 lbs.

Three-Way Lamp-positioning Bracket provided in L3B Adjustable Focus Light Source.

The lamp can be positioned to adjust alignment without moving the case. Moving the lamp closer or farther from the lens changes the focus, depending on the size of the lens, as shown in the diagram.

L3B Light Source.....\$27.50

L3BR	L3BBA	L3BRBA
\$39.50	\$37.50	\$49.50

L6C Hi Intensity Light Source

Dø6 3/8", W 4 1/2", H 6

L6C Light Source is recommended for adverse conditions such as steam, vapor, fog, and rain fall where extra light intensity is required. Has #4515

sealed beam spot light swivel-mounted for alignment adjustment. Transformer has 5V and 3.8V taps for lamp operation. Average lamp life is 3000 hours at normal voltage and 10000 hours at low voltage. Gasket-sealed cast aluminum case has adjustable and reversible mounting bracket and is tapped for 3/4" conduit. Weight, 6 lbs.

L6C High Intensity Light Source.....\$36.00

L6R Hi Intensity Light Source

Has High-Intensity Lamp and SAFETY RELAY.

Dø 6,
W 7-1/4"
H 5-1/4"

L6R has the same operating features as L6C plus a built-in SAFETY RELAY. The SAFETY RELAY energizes when the lamp comes on; de-energizes when the lamp fails or goes off. The Safety Relay may be arranged to stop a machine, close a valve, operate a signal or other circuit in case the lamp burns out. Relay contacts are SPDT, rated 5 amperes at 115 VAC, non-inductive. Gasket-sealed cast-aluminum case with rigid mounting feet, tapped for 1/2" conduit. Weight 7 lbs.

L6R Light Source.....\$48.00

36-page Catalog including
51 application diagrams
mailed promptly on request.

L4 Dual Filament Light Source

Has Two-filament Lamp to avoid shutdowns.

Dø7 1/8", W 7 1/4", H 5 1/4

Has 2380B prefocused two-filament lamp rated 3.6 amps. at 5.8V. The two filaments maintain light source continuity: when one fails, a built-in

relay switches on the other filament and a signal lamp in the housing; also operates SPDT contacts which may be used for remote warning control.

The prefocused lamp permits replacement with minimum change in light beam. Extra low voltage connection for prolonged lamp life. 1 1/2" lens in aluminum lens holder. Gasket-sealed cast aluminum case with rigid mounting feet, tapped for 1/2" conduit. Weight, 6 lbs.

L4 Light Source.....\$49.50

BC2B, BC3B and BC3AB Controls

Light-Energized. Cad Cell sensing element. 3/4" lens mounted in flexible silicone rubber. Min. dark time .06 sec.; min. light time .06 sec. Contacts SPDT, 3-amps at 115 VAC resistive. Relay plastic enclosed. Power Consumption 0.5 w. Gasket-sealed cast aluminum cases. For 115 v. 50-60 cycle operation only.

BC2B
\$24.75

Dø3 1/8", W 4, H 5 1/2

Case tapped for 3/4" conduit. Adjustable mounting bracket. Weight 3 lbs.

BC2B-L1A Control-Pak.....\$44.50

BC3B
\$24.75

Dø 1.93 W 3.28", H 5.62"

Case tapped for 1/2" conduit. Flanges have four .76" mounting slots on 7/8 x 2 5/8" centers. Weight 1 1/4 lbs.

BC3B-L1D Control-Pak.....\$43.25

BC3AB
\$24.75

Dø 2.18" W 1.96, H 5.62"

Case tapped for mounting on 3/4" pipe. (Adjustable mounting bracket shown in left hand column.) Weight 2 lbs.

BA feature: BEAM INTENSITY ADJUSTMENT
Built-in potentiometer inside light source case but adjustable with screwdriver from outside case, for dimming lamp. To order add suffix BA to Light Source Number and add \$10.00 to Price. Example: LIABA, \$29.75.

R feature: SAFETY RELAY

Safety Relay built into the Light Source which may be used to stop a machine, close a valve, operate a signal or other circuit in case the lamp burns out.

The Safety Relay energizes when the light comes on; de-energizes when the lamp fails or goes off. Relay contacts are SPDT, rated 5 amperes at 115 VAC, non-inductive. To order, add suffix R to Light Source number and add \$12.00 to price.

Adjustable Mounting Bracket

L1DA Light Source and Control. Clamp fits 3/4" which screws into tapped hole in bottom of above housing. Pipe may be raised, lowered or rotated. Two socket-head set screws lock pipe in desired position.

Adjustable Mounting Clamp Net \$3.25

L2B Light Source

Dø5 1/8", W 4, H 5 1/2

Has 88L lamp, rated 1.6 amps. at 5.8V. 1 1/2" diameter lens in aluminum lens holder. Splashproof cast aluminum case with adjustable and reversible mounting bracket. Weight 3 1/2 lbs.

L2B Light Source.....Net each \$23.80

Price Totals		\$89.10*		\$103.70*

*P-309 Rod and P-310 Nuts not included

A2BX Solar ON/OFF Control

Automatically turns lights "ON" at preset light value—and turns lights "OFF" when light exceeds preset value.

DPDT Control Relay energizes when light exceeds intensity for which control is set; de-energizes when light falls below the preset level.

In case of tube failure the relay de-energizes; providing same control action as when light falls below preset level.

Dual Time Delays prevent operation by either momentary light flashes or shadows. Modern, simple circuitry uses one rugged, premium type power tube. Light intensity adjustment from outside of housing. Gasket-sealed cast aluminum housing, tapped for 1/2" conduit. For 115/230 v, 50-60 c. Power consumption, 20 watts

Available with three adjustment ranges:
No. A2BX-2; 1 to 5 fc for street lighting, parking lots
No. A2BX-5; 15 to 50 fc for signs, parking lots
No. A2BX-1; 20 to 150 fc for obstruction or tower lights

A2BX Solar Control (all models) Net \$76.95

Current Surge Overload Protection

Unique Protection for tools, equipment, personnel

The Surj-Switch uses electronic amplification for instant reaction to variations from normal load current. Easily adjusted on the job to operate at the desired value.

The 10-amp, SPDT Control Relay may operate a warning signal, a lubricating circuit, feeding rate control, etc. without interrupting operation or may be used to stop operation.

Used on surface grinders to warn when excessive pressures are applied; on machine tools to warn when tools become dull; on automated installations; whenever load change indicates trouble.

Model K1 Surj-Pick-up. Required for operation of Surj-Switch Controls—for 50-60 cycle, 0 to 80 amperes, one or 3-phase, any voltage...\$35.00

Model J Surj-Switch. For overloads.....\$55.00

Model JA Surj-Switch. For under loads...\$65.00

Impak-Switch Die Protection

In the above diagram each piece properly electrically connected from the die strikes the impact sensing plate which actuates the Impak Control and the control re-cycles the press control for another stroke.

The impact of falling parts against the sensing plate of the Impak-Pick-up activates the Impak Switch. Objects may be of practically any reasonably uniform size, ranging from ball bearings to heavy stampings, etc.

In other die protection applications the Impak Control has time delay set to barely exceed complete stroke cycle of the press. Each projected piece re-cycles the Impak Control before the timing period expires.

Model V Impak-Pick-up—with 6-ft. shielded plastic-covered cable.....Net \$30.00

Model Z Impak-Switch—for use where impact not less than one ounce falling 2 inches and object strikes only once.....Net \$60.00

Model C3 Impak-Switch—for use where impact force is limited, where high speed is required where objects may strike more than once.....Net \$140.00

Tubeless Bin Level Control

Tubeless Photoelectric actuation—unaffected by pressure of material in the bin. Only rigid, non-moving Lucite probes project into the bin. Cast aluminum, gasket-sealed housing mounts to bin wall as shown. Removal of cover makes all parts accessible. Dust-covered plug-in DPDT 8-ampere relay provides ON/OFF control for either high or low bin level. All wiring connections brought out of case in 3-foot oil-proof cable. For 115/230V, 50-60 C.

A700—Relay operates from cad cell output, light-energized. Power Consumption, 10 watts.....Net \$68.00

A700S—has transistor circuit and sensitivity adjustment—dark-energized. Power Consumption, 5 watts.....Net \$98.75

Includes 3-ft cable, face gasket and template.

AUTOTRON Counting Eye

Counts anything—Automatically—without touching the object. Each object must interrupt the light beam .06 second or more. Space between objects must permit restoration of the light beam .06 second or more. Max. distance between lenses, 8 feet.

Counting Eye Components

S1A Photoelectric Control (see page 5).....\$100.00

L1A Light Source (see page 6).....\$100.00

Cordset: two 6-foot rubber covered cords with plugs and attachment clamps

Plate and hardware for mounting counter

(4 mounting holes on 3-15/16 x 1-23/64" centers)

CE-600AS602 Electric Counter (6-digit, knob reset)

A-138A Counting Eye, 115v, 50-60c. Net \$100.00

Includes above items wired ready to plug in.

Photoelectric Controls with Infrared Light Beams

L160A
\$37.50

For burglar alarms, safety and other applications where an invisible light beam offers advantages. The control lens is shielded from normal light so operation continues night or day whether lights are on or off.

A880-L160A Infrared Control-Pak.....\$121.00
For 115/230v, 50-60c. Daylight Range, 50 feet; Night Range, 100 feet.

A880
\$83.50

Photoconductive Cells

This listing represents less than half of the Clairex standard and special photocells available. A 16-page design manual is available on request.

THREE-UNIT CONTROLS

For All General Applications

Model 63 Series represents a line of four high speed, precision Amplifiers; each engineered for a highly specialized use. Selection enables the user to get the amplification his application requires. Each amplifier is designed for amplification of energy developed by one set of Series 33/23 Fotoelectric Heads listed below. Each Amplifier will also respond to light radiance (other than light projected from a Light Source unit) when reflected to the Photocell. Model 63 Series Amplifiers are heavy duty construction throughout, size 9 1/4" x 11 1/2" x 5". Engineered for 110/120v. 50/60 cy. a.c.

Model 63 Amplifier
Door removed to
show components.

Model 63, the Worner Master Unit, serves most industrial uses. It is generally recommended for supervising fast moving objects and will operate normally up to 750 times a minute. Each \$144.12

Model 63-A, equipped with Time Delay Circuit giving delay from 0 to 45 seconds. Each \$160.77

Model 63-B, has added amplification to operate on less active change of light. Each \$171.87

Model 63-C, same as Model 63 but is "dark-energized", and operates when the photocell is dark. Each \$146.73

Model 64. Economy Unit. Operates up to 450 times a minute. Each \$87.90

WIDE RANGE OF FOTOELECTRIC HEADS

Series 33 Light Sources
Series 23 Photocells

Sharp Detection

Selection of any of the following seven combinations, with current flow amplified by a choice of any of the above Amplifiers, provides unbeatable control supervision. Both units are alike externally. Mounting brackets supplied.

Model 33 Series Light Sources and Model 23 Series Photocells are heavy duty units. Components are housed in solid metal castings equipped with conduit fitting. Size of case 3" x 3" x 4 1/2".

CROSS-OVER BEAM supervises small objects under 2" square at high speed. Distances listed are from lens to (cross-over) point of supervision. Moisture-proof units.

DISTANCE	LIGHT SOURCE	EACH	PHOTOCELL	EACH
Up to 3"	Model 33-3	\$28.95 use with	Model 23-3	\$36.00
3" to 6"	Model 33-6	28.95 use with	Model 23-10	28.80
6" to 9"	Model 33-9	28.95 use with	Model 23-10	28.80
9" to 12"	Model 33-12	28.95 use with	Model 23-10	28.80

DIRECTIONAL BEAM for objects over 2" square. Distances listed cover area of supervision (between units).

DISTANCE	LIGHT SOURCE	EACH	PHOTOCELL	EACH
1 to 10 ft.	Model 33-10	\$23.40 use with	Model 23-10	\$28.80
10 to 25 ft.	Model 33-25w	\$39.78 use with	Model 23-25w	\$40.32

Made moisture-proof upon order at \$7.50 per unit.

These units are moisture-proof.

FOR SUPERVISING LARGE OBJECTS UP TO 75 FT.

Model 33-C Light Source and Model 23-C Photocell supervise over an indoor distance over 25 ft. up to 75 ft. from unit to unit. 6 1/4" x 7" x 4 1/2". Use with any of the above Amplifiers.

Model 33-C.....each \$23.88.....use with Model 23-C.....each \$32.76

THE ELECTRONIC RECEPTIONIST

Model 61 Fotoelectric Announcer is a three-piece set. Projects light beam across entrance to signal entry or departure of persons. Breaking beam activates Chime, located where signal is desired. Efficient grid controlled rectifier circuit. Mirror reflects beam to Photocell in the unit. Case 8 1/4" x 6 1/2" x 3 3/4". Lamp-life rating 1000 hours.

Plugs into 110/120v a.c. outlet

Model 61. Fotoelectric Announces.....Per Set \$56.25

Model 61-T. Fully transistorized. Size 7 1/4" x 5 3/4" x 3 1/8".....Per Set \$64.80

Write For information On Solid State Equipment

AMPLIFIERS FOR MINIATURE HEADS

Model 66/67 Series Amplifiers are available in a choice of four units. For positive and accurate performance, the maximum speed rating of each unit can be regulated provided light projected to the Photocell will have an "on-period" equal to the "off-period" with wiring to Photocell having zero (0) capacity. 110/120v. 50/60 cy. a.c.

Model 67 Amplifier for general applications where fine detection at high speeds is not a factor or Relay is not required to operate in excess of 450 times per minute. Each \$97.83

Model 66 Amplifier, operates up to 900 counts a minute. Double-pole, double-throw relay with contact rating 110v. 60 cy. a.c., 10 amp.-non-inductive and 5 amp. inductive. Has light beam intensity control. Each \$154.80

Model 66-A Amplifier, designed for use with ultra high speed decade counters. Accurate counts of light beam interruption or variation of intensity up to 10,000 counts per minute. Output pulses up to 50 d.c. regulated by the sensitivity control. Each \$154.80

Model 66-T Amplifier, same operating features as Model 66 with a Time Delay circuit to give regulated time delay from 0 to 45 sec. Efficient for synchronizing operations. Each \$154.80

"MINIATURE" FOTOELECTRIC HEADS

Designed for use with Models 66/67 Amplifiers

Machined out of solid aluminum blocks. Light weight, unbreakable, piece, dependable. Only 1 1/4" x 2 1/2" x 3/4". Unsurpassed for pin-point detection. Distance to cross-over point 3" to 12". Distance of direct beam up to 8 feet. For desired speed, select Amplifier accordingly. Foot cable equipped both ends with prong-type connectors having standard tighteners. For 110/120v. 50/60 cy. a.c.

Model M-36 Vertical Light Source.....\$28.80

Model M-26 Vertical Photocell Receiver.....\$28.80

Model M-37 Horizontal Light Source.....\$28.80

Model M-27 Horizontal Photocell Receiver.....\$28.80

TWO-UNIT CONTROL

For Industrial
Applications
(Indoors)

Amplifier includes photocell, Relay and components. Efficient for distances from a few inches to 75 ft. For use where Relay is not required to operate over 400 times a minute, such as; counting, sorting objects; limit switches; start, stop operations; opening doors, etc.

Model 62 R & L "Two-Unit Set".....Per Set \$114.80

STOP FIRE BEFORE IT SPREADS

Automatic Control when
light beam projected across
duct, detects smoke.

Most catastrophic fires are due to sparks drawn into or originating in air-conditioning ducts, resulting in flames fan-driven throughout a building. The Worner Motor Stop minimizes this hazard by early detection, stopping of fans and sounding alarm. Consists of Light Source, Photocell Receiver and Control Cabinet. Meets requirements of National Board of Fire Underwriters, Factory Insurance Ass'n. List by U.L. Send for Bulletin 650.

BURGLAR ALARM SYSTEMS

EASY-TO-FOLLOW INSTALLATION INSTRUCTIONS • REQUEST ENGINEERING BULLETINS

THE WORNER MASTER CONTROL SYSTEM

MODEL 9000 SERIES

of Model 9000-S Master Control Panel. Can be ONE to FOUR Light Source and Photocell sets, hereafter referred to as "Foto-Sets".

Separate circuit, the Master Control Panel will supervise foil tape, door traps and window systems. Both circuits operate independently simultaneously. Sounds continuous alarm (until when either of these detection circuits is or wiring of Fotoelectric system is tampered

Control panel prevents false alarms should fail or drop momentarily and resets automatically when power is restored. Also operates with the electrical devices employed by professional alarm companies.

It contains Relays which energize alarm circuit. The cabinet size is 7" x 10 1/4" x 4 3/8" and its door is safeguarded by a pick-proof lock. The panel is installed remotely. Designed for 110/120v. a.c.

Diagram shows FOUR Relay plug-in location for 1 and 4 Relays as needed; one Relay for each detection Set used. Model 9000-S Master Control Panel is priced "less Relays," as only one relay is automatically supplied with each Model 9000 series Fotoelectric Set ordered.

Model 9000-S Master Control Panel.....	Each \$91.08
Range Fotoelectric Set Per Set	
100 ft. Light Source & Photocell.....	134.67
150 ft. Light Source & Photocell.....	153.57

LIGHT SOURCE & PHOTOCCELL SETS

All light beams are infra-red (invisible) light.

Sets for 100 and 150 ft. ranges are for indoor use. Sets for 75, 250, and 500 ft. ranges are for both indoor and outdoor use.

Sets for 75, 150, 250 and 500 ft. ranges have unwanted light rejector for maximum day-time operating efficiency.

Some cases are similar, but circuits vary greatly.

Light Sources and Photocell Units for 100 ft. Ranges. Models: 9100, 7100, 5100.

Light Sources for 150 ft. Range. Models: 9150, 7150, 5150.

Photocells for 150 ft. Range. Models: 9150, 7150, 5150.

Sets for 75, 250 and 500 foot ranges have hooded weather-proof cases. Photocell cases have locks.

MODEL 7000 SERIES

uses (light Source and Photocell) Fotoelectric units to operate in conjunction with burglar alarm companies' central control equipment. The Fotoelectric units do not interfere with operation of Central Companies', foil tapes or window traps. For 110/120v. 50/60 cy. a.c. For 24v. 60 cy. use Worner own Transformer.

Range Fotoelectric Set Per Set	
100 ft. Light Source & Photocell.....	\$134.67

150 ft. Two-Unit System.....	153.57

BURGLAR DETECTION UNITS

CONCEALED IN THE WALL

Light Source and Photocell Receiver units concealed behind light-switch-type face plates. Projects invisible light beam ranging up to 30 feet (indoors). Standard size wall plates concealing Fotoelectric detection units are high finish stainless steel. Light bulb rated 2000 hours. For guaranteed efficiency Model 81/82 Fotoelectric sets must be used only with specially engineered Amplifiers listed below. Complete installation instructions enable any electrician to install.

Model 81 "In-Wall" Light Source.....	Each \$32.67
Model 82 "In-Wall" Photocell Receiver.....	Each 38.22

AMPLIFIERS FOR ABOVE FOTOLECTRIC SET

Two specially engineered units for amplifying the energy of the above concealed units.

Circuits with no-voltage control relay prevent false alarms due to line voltage irregularities and will sound alarm if tampered with. Standard alarm continuous, Regulated warning signal "special" upon order. For 110/120v. 60 cy. a.c.

Model 86-1 is a single channel Amplifier Panel that will amplify current flow of one Fotoelectric Set.....Each \$140.76

Model 86-2 is a dual channel Amplifier Panel that will amplify current flow of two Fotoelectric Sets, guarding separate areas. Will also supervise one Fotoelectric Set, providing for future addition of a second Fotoelectric Set. Each \$214.83

TWO-UNIT WORNER WATCHMAN

This Two-Unit Set consists of a Light Source and a Photocell unit that supplies 6-volt energy for activating the alarm circuit.

The Light Source is equipped with removable infrared filter providing visible light beam ranging up to 50 feet. The Photocell unit is equipped with toggle switch for either continuous alarm or to sound only while light beam is broken. Extraneous light rejector maintains daylight range. Two-piece case construction enables removal of cover without mounting. Identical cases 5" x 5" x 5 1/2" welded steel, mahogany hammerloid finish. For indoor use; 110/120v. 60 cycle a.c.

Model 4000 Two-Unit Watchman (Indoors).....	Per Set \$ 96.30
Model 4100 Two-Unit Alarm (Weatherproof).....	Per Set 167.73

TRANSISTORIZED BURGLAR ALARM

Two-Unit Combination. Indoor Use.

Photocell Amplifier has 2-piece case for convenient installation and servicing.

The Photocell unit supplies 6-volt a.c. energy to activate a 6-volt a.c. alarm, thus providing a Two-Unit alarm set.

Alarm may be sounded at one or more remote locations. Knob control for continuous, limited or reset alarm. Built-in device minimizes unwanted light. Infrared filter provides invisible light beam ranging up to 50 feet. Both units are externally alike, 5" x 5" x 5 1/2". Two-piece hammerloid cases simplify installation and servicing.

Model 8002 R & L, Transistorized Burglar Alarm Set.....\$99.00

PILOT LIGHTS

PILOT LIGHT ASSEMBLIES

BNE Series — featuring a 1-piece body construction, this miniature neon pilot is ideally suited to indicate toggle switch positions, or for other display configurations with space limitations. A particular characteristic of this model is the compact lens system protruding slightly above the panel. Operating voltage, 75 VAC without resistor; for 115 VAC operations use external resistors (150K for standard intensity, 33K for high intensity) not supplied. Single $\frac{3}{16}$ -32 mounting.

BNF Series — similar to the BNE Series except that the lens system extends a greater distance beyond the panel for a bright illumination. This model has a permanent built-in neon and operates on 75 VAC. An external resistor required for 115 VAC. Turret type lugs are used for simplified hookup. Single $\frac{3}{16}$ -32 mounting.

BND Series — combines an entirely new look in a space-saving pilot assembly. The neon protrudes beyond the panel to provide maximum light intensity. This model is available with or without built-in series resistor for 75V or 115V operation, and is also available as standard or high intensity. Single $\frac{3}{16}$ -32 mounting.

Model	Color	Description	One-24	25-99	100-499	500-999

BRITE-GLO® NEON LAMPS

Extremely small size lamp (equivalent to T-1 $\frac{3}{4}$). Smallest neon in the industry. Bullseye appearance gives the largest glow where needed on top. Rounded top places the illuminated area closer to the viewing point. Metal base (Model MNE-4SL) increases light output and protects lamp from damage.

Model	Description	One-24	25-99	100-499	500-999
MNE-4	With Short Bare Leads	.49	.33	.29	.24

†Specify Choice — Red, Green.

BIM-B 100V NEON LIGHT INDICATORS

General purpose panel indicators have more versatility than similar models. 8 Lens Styles: Allow a greater variety to choose from (see below). **NE2H High Intensity Lamp** is incorporated and contains built-in series resistors for 110V operation. Flexible 6" leads, tinned conductors, high temperature insulation 105°C. Black wire size: solid 22 AWG. Polypropylene indicator housing (white) with acrylic lens — available in Red, Amber, and Clear — specify. Mounts $\frac{3}{16}$ " dia. hole.

RETAINER — use of the mounting retainer supplied with each BIM indicator allows the installer to have 2 methods of panel installation. One choice is the conventional way where the retainer is pushed against the back of the panel and the indicator is placed through it. An optional choice of mounting is to fit the retainer on the front side of the panel, in a $\frac{1}{4}$ " dia. hole, and then the pilot is inserted into position. The alternate method has the advantage of replacing the pilot without disassembling the apparatus.

BIM-R Metal Retainer (available separately) provides a snug-fit in a minimum of space. Used only with BIM Series having a $\frac{3}{16}$ " hole mounting. Packaged, sold in multiples of 25.

BIM-A SERIES NEON INDICATORS

These neon light indicators, with one lens style, are described in the BIM story (at left) but are fitted with solder lugs, and body lengths are shorter. BIM-A-1 has a NE2H lamp and is for use with an external resistor (not supplied); body length is $\frac{3}{4}$ ". BIM-A-4 has a NE2H lamp and contains a built-in series resistor for 110V operation; body length is 1". Colors available for both types: Red, Amber, Clear — specify. Retainer is included.

Model	Description*	One-24	25-99	100-499	500-999
BIM-A-1	Without Resistor	.69	.46	.41	.35
BIM-A-4	With Resistor	.79	.53	.47	.40

* Specify color: Red, Amber, or Clear.

MINIATURE NEON PANEL INDICATORS

General purpose sub-miniature panel indicator for use with an external series resistor. The 1-piece body houses a sub-miniature high intensity neon lamp. The metal mounting retainer push fits into a $\frac{1}{4}$ " dia. hole. Wire leads, metal retainer included. Choice of colors: Red, Amber, or Clear — specify.

Model	Description*	One-24	25-99	100-499	500-999
SM-1	Less Resistor	.89	.60	.53	.45

REPLACEABLE LAMP ASSEMBLIES

Ultra small, Brite-Glo lamp assembly has a simple lamp replacement feature. The removable round dome lens unscrews and the tiny T-1 lamp is exposed for easy removal from the front of the panel, without tools. Standard #680 lamp rated 5 volts @ 60 ma, supplied installed. Mounts with 9/32-32 nut. Colors available: Red, Green, Blue, Yellow, or White — specify.

Model	Description*	One-24	25-99	100-499	500-999

FEATURES

A Datalite Indicator consists of three parts: (a) the main body or **Datalamp Holder** which is adapted for permanent mounting on the panel; (b) the **Datalamp cartridge** which telescopes into the Datalamp Holder and makes electrical contact as the pins enter the receptacle in the holder; and (c) the screw-on **Data Cap**. The Data Cap secures the Datalamp and its lens controls the light emission.

250-8758-1471-504

250-8758-3331-504

Mount in 3/8" Clearance Hole

This series accommodate longer cartridges that use telephone type bulbs for higher voltages. Sufficient clearance is produced to be effective with either transparent or translucent Data Caps.

Datalamp cartridges are provided with 6 supply pins. For levels between nominal ratings, cartridge with the next higher value should be chosen.

DATALAMP CARTRIDGES

▲ Not for use with Datalamp Holders or Data Twin Assembly. Use only with separate 515-0050 or 515-0012 Cartridge Connector and 515-0051 Speed Clip.

**C.P. is the mean spherical candle power of the lamp used. Values are useful for relative effectiveness.

Mount in 3/8" Clearance Hole

Neon Datalite Indicator Lights consist of: (1) **Datalamp Cartridges** — a plug-in, replaceable light source, with either stovepipe or long cylindrical lens shape — with or without built-in current limiting resistor (see recommended resistance and appropriate code nos. below). Accommodated by **Datalamp Holders** — of longer length when cartridges without resistor is used; by **Datalamp Holders** of longer length when cartridges with built-in resistor are used. See charts for available selections.

Standard Finish: Black anodize. To obtain clear anodize finish, change the first digit in the catalog number suffix to 5 to -6.

Example: 508-8745-604.

COLOR: The digit before the last in the catalog number indicates that color of the Datalamp Cartridge is. When color other than red is used, change this digit to a figure from the listing below.

1; Green—2; Yellow (Amber)—3; Blue—4; Translucent—5; Yellow—6; Clear (Colorless)—7.

Examples: 507-3901-1432-600 (green). 507-4538-1533-610 (yellow amber)

Blue or green lens colors are not available with Neon light sources.

White Translucent—5 ... Light Yellow—6 ... Clear (Colorless)—7.
Example: 101-3830-0932-201 (Green)

Two Terminals — Fully Insulated

Meet or exceed environmental and operational requirements of MIL-L-6723 and MIL-L-3661.

RUGGED CONSTRUCTION

Lamp, socket, and all connections are completely insulated from the bushing and panel to which it is attached. The use of phenolic material for military specification grade assures permanent isolation from ground. These assemblies are solidly made to withstand usual vibration and corrosion resistance tests.

Order Complete with Lamp.
Specify Lamp Number.

DIMMERS — MECHANICAL or POLAROID

Choice of mechanical or polaroid dimming device. Polaroid produces some reduced intensity at all settings, but gives full diameter opening.

Mechanical varies opening size to complete blackout or has permanent small opening as in "semi-blackout" type.

WATER-TIGHT ASSEMBLIES

Water-tight construction: These Sub-Miniature Lights are completely water-tight on the face of the panel. Water-tightness is achieved by means of retained O-ring seals. One O-ring is retained within the back of the lens cap, the other behind the flange on the mounting bushing.

WATER-TIGHT DIMMERS

On the Dimmer type assembly, a third O-ring is mounted within the dimmer cap — so positioned as to assure absolutely no leakage through the dimmer slot. For data, request Catalog L-178.

183-9830-1471-604

187-9830-1871-604

The cap is effectively lighted by T-1 $\frac{3}{4}$ bulb with midget flanged base, extends completely into the luminous portion. Fine solid color are obtained. The two-part construction permits opaque sides with colored faces.

Caps may be rotated, permitting legends or cap edges to be easily into alignment after installation of the assembly; or they may be

keyed, thus permitting them to be pushed into place only in a predetermined position.

Unique anti-rotation (locked) construction provides for secure keyed mounting of mounting bushing on panels.

*LENS FACE COLOR: See listings at bottom of page. See lamp listing and range of voltages on Page 942.

ASSEMBLIES with BUILT-IN RESISTORS (U. S. Patent No. 2,421,321)

"Recognized under the component program of Underwriters' Labs Inc."

For T-3¼ Bulb with Miniature Bayonet Base—NEON

For operation on 105-125V AC-DC ... 110-125V AC ... 210-250V AC-DC

Assemblies conform to MIL-L-3661.

BUILT-IN RESISTOR VALUES (in ohms) for NEON GLOW LAMPS

B2A (NE-51H)—High Brightness			B1A (NE-51)—Standard Brightness		
Circuit volts applied to terminals 110-125 AC 210-250 AC-DC			Circuit volts applied to terminals 105-125 AC-DC		
BRIGHT LIGHT	■ 22,000	68,000	BRIGHT LIGHT	■ 56,000	
LONG LAMP LIFE	33,000	100,000	LONG LAMP LIFE	100,000	

■ Standard values of patented built-in resistors.

PROPER CHOICE OF LAMP AND BUILT-IN RESISTOR VALUES: The NE-51 glow lamp types are shown with resistor table. Lamps are the standard brightness NE-51 and the high brightness NE-51H. The latter may be operated at about three times the level of current that may be applied to the standard lamp and it will produce more than 8 times as much brightness.

+ To specify white translucent color, change so much of the catalog number that reads -1231- to -0835-; from -1131- to -0935-; from -1191- to -0995-. Example: 169-1363-0935-311.

WATER-TIGHT CONSTRUCTION: The assemblies on this page may be made water-tight on the face of the panel. To specify, change the last digit in the catalog number suffix to 3. Example: 95-1308-0931-343.

HOW TO DESIGNATE THE THREE DIGIT CATALOG NUMBER SUFFIX (-XXX)

FINISH	RESISTOR	HARDWARE
-1 white nickel	1-22K	1-brass
-2 black nickel	3-33K	3-water-tight
-3 polished chrome	4-56K	on the face
-4 satin chrome	6-68K	of the panel.
	7-100K	

NOTE: The part numbers given in this catalog indicate standard indicator lights. The table at left provides the standard and optional designations for Finish, Resistor and Hardware where appropriate. Example: 85-1308-1231-273 (black nickel finish, 100K resistor, water-tight construction).

LENS COLOR:—The last digit before the 3 digit catalog number suffix indicates that the lens is RED, color other than red is desired, change this digit figure from the listing below.

Red — 1; Yellow (Amber) — 3; White Translucent Light Yellow — 6; Clear (Colorless) — 7.

9/16" Assemblies mount from BACK of panel only

17-1308-0931-245
Screw-on lens cap

Optional Finishes: The catalog number suffix designates an assembly with standard black nickel finish. To specify optional finish, change the first digit of the catalog number suffix to -3 (polished chrome finish), or -4 (satin chrome finish).

Example: 17-1308-0931-345

The catalog numbers listed indicate complete assemblies with screw-on lens cap. These assemblies may also be obtained with **water-tight construction**. To specify, change, the **last digit** in the catalog number to 3. Example: 80-1310-1331-303. These assemblies are also available with **friction-fit** or **bayonet lock** lens caps . . . but can not be furnished with water-tight construction.

OIL-TIGHT INDICATOR LIGHTS

OIL-TIGHT • WATER-TIGHT • DUST-TIGHT

With Retained "O" Ring Seal Construction • Mount in 1" Clearance Hole

Rugged, designed for severe vibration conditions. 3 types of Incandescent Lamps may be used: S-6 with Candelabra Screw Base or with Double Contact Bayonet Base; or 10C7/1DC with Double Contact Bayonet Base. The latter is designed to withstand severe vibration and shock.

Assemblies feature: 3 retained oil-proof elastometer seals (1 gasket and 2 "O" rings); high impact phenolic insulation; use of legend discs inserted behind a flat lens shape to display letters, numbers or symbols.

ASSEMBLIES for T-3¼ BULB with MIN. BAYONET BASE
INCANDESCENT or NEON

For Mounting in 11/16" Clearance Hole

103-1231-403

In these Oil-Tight Indicator Lights, a high degree of resistance to shock and vibration is achieved by the use of the rugged Neon lamps on 120 and 240 V; and by choosing low voltage Incandescent lamps with short filaments, such as No. 44 or No. 1866 for circuits powered by transformers stepping down to 6.3 V.

Exclusive Features: Assemblies for use with B1A(NE-51) Neon Glow Lamps have "built-in" resistors—an exclusive Dialco feature (U.S. Pat. No. 2,421,321). Options include: binding screw, soldering or quick connect terminals. 7 lens colors are available; see bottom of page 946 for method of specifying color.

ELDEMA INDICATOR LITES

C-LITES

Eldema C-Lites are 2-pin cartridge lamps that are easily inserted from the front of the panel into the D-Holder assembly. C-Lites are in three basic series: CF—incandescent, CG—neon, and CR—neon with built-in resistor.

Clear anodized aluminum case — stainless steel pins — plastic lens cap — high dielectric insulation — meets Mil-L-3661. Mate with all DH Series holders.

C-LITES

SERIES CN, CL AND CM

These are special purpose C-Lite types, each with mating single lamp D-Holders. The CL and CM have long life, higher voltage incandescent telephone type lamp bulbs. The CN is an older style neon C-Lite with resistor.

NEON C-LITES

SERIES CN - neon lamp built-in resistor
Mate with DN Holders

CN01-RCS-N117

CN04-WCS-N123

Slightly longer than new CR series. Otherwise the two types are identical. Specify in same manner except use CN instead of CR. CN03 style is available.

INCANDESCENT C-LITES

TYPE CL24

Mate with DL lampholders with D06, D09 or D25 lens caps. Bulb end exposed.

PART NO.	VOLTS	MA	LIFE HRS
CL24-6PS	6	140	5,000+
CL24-12PS	12	170	5,000+
CL24-24PS	24	73	5,000+

CL24-60PS	60	50	5,000+
CL24-120PS	120	25	5,000+

INCANDESCENT C-LITES

TYPE CM65

Mate with DM lampholders with D06, D09 or D25 lens caps. Light diffusing frosted lens.

PART NO.	VOLTS	MA	LIFE HRS
CM65-6PS	6	140	5,000+
CM65-12PS	12	170	5,000+
CM65-28PS	28	40	5,000+
CM65-48PS	48	53	5,000+
CM65-60PS	60	50	5,000+
CM65-120PS	120	25	5,000+

LENS MARKING

Eldema flat top lens styles may be provided with hot stamped legends. Normal markings in black-other colors to order. Specify marking requirements in complete detail.

Q-SERIES

CLIPS AND SOCKETS

Q-082-4P P.C. Board Socket with CF03 C-Lite. Socket Mounts in 4 .040 Holes on .200 Centers.

Mounts C-Lites in 1/8" hole — 1/2" centers. Requires access to both sides of panel.

Q-081-905, Spring steel clip.
Q-082-2K, Socket with solder lug terminal.
Q-082-1M, Socket with solder cup terminals (not illustrated).
Q-145-008, Rubber washer to ease installation (not shown).

ELDEMA INDICATOR LITES

D-HOLDER

Eldema D-Holders mate with the plug-in C-Lite cartridge lamps. The standard DH-Series is available in single lampholders, dual lampholders and matching switchlites. Other special length single lamp holders — Series DN, DL and DM to mate with the longer C-Lites are included. Anodized housings, nickel plated hardware — high temperature plastic lens caps — meets MIL-L-3661. RFI/EMI shielded versions are also available.

DHO-10B-D14B
with CF03

DHN-10B-D15B
with CF03

DHO-30B-D09BWC

DHN-60B-D06BRT

DHN-60B-D25BRT

DH SERIES SINGLE LAMPHOLDERS

Mate with CF, CG and CR C-Lites

HOLDER STYLE

DHO - Rear mounting, 3/8" hole
DHN - Front mounting, 15/32" hole

HOLDER TERMINAL AND FINISH

10B - Turret pin black housing
30B - Solder cup black housing
60B - Solder lug black housing

SPECIFY HOLDER STYLE — TERMINAL AND FINISH THEN LAMP COLLAR OR LENS CAP STYLE AND LENS COLOR.

For example: DHO-10B-D14B
DHN-60B-D06BRT

For clear anodized finish change letter B in terminal - finish and in lamp collar or lens cap to S - DHN-60S-D06SRT.

An installation wrench that mates with the knurled ring on rear mounting holders and switchlites is available. Part number — Z-090-375

LAMP COLLARS

D14B - Use with DHO
D15B - Use with DHN or DHO

Note: No lens color specified for collars. For use with C-Lite cartridges with colored lenses.

LENS CAP STYLE

D06B - Smooth lens
D07B - Long smooth lens
D09B - Fluted lens, clear colors only
D25B - Shroud lens, translucent colors only.

Note: For use with C-Lite cartridges with water clear lenses.

LENS COLORS

AC - Amber Clear* AT - Amber Translucent

CC - Cloudy Clear* GT - Green Translucent
GC - Green Clear RT - Red Translucent
RC - Red Clear* WT - White Translucent
WC - Water Clear* YT - Yellow Translucent
YC - Yellow Clear*

*Recommended for neon C-Lites

DH SERIES - TYPE DHS MOMENTARY SWITCH-LITE

Rear mounting, 3/8" hole
Mate with CF, CG and CR C-Lites

DHS-60B-A-D16B with CF03
Black anodized finish

DHS-60B-A-D16B normally open
DHS-60B-B-D16B normally closed
DHS-60B-P-D16B press-to-test

Black or clear finish — specify B — black, S — clear (underlined letters in part numbers by illustrations, 2 places)

DH SERIES - TYPE DHT MOMENTARY SWITCH-LITE

Front mounting, 15/32" hole
Mate with CF, CG and CR C-Lites

DHT-61S-A-D16S with CF03
Clear anodized finish

DHT - 61B-A-D16B normally open
DHT - 61B-B-D16B normally closed
DHT - 61B-P-D16B press-to-test

Four lug terminals — separate light and switch circuit — 1/2 amp rating for normally open and closed types.

DH SERIES - TYPE DHF DUAL LAMPHOLDER

Front or rear mounting 3/4" hole.

DHF-61B-D17BWC

Mates with any two CF, CG, or CR C-Lites. Four lug terminals — clear lens. Black anodized finish.

DN SERIES SINGLE LAMPHOLDERS

Rear mounting 3/8" Hole.
Mate with CN neon C-Lites

DNO-10B-D14B with CN01

Slightly longer than DHO holder, otherwise identical and specified in same manner except use DNO instead of DHO. Rear mounting 3/8" hole only.

DL SERIES SINGLE LAMPHOLDERS

Rear mounting 3/8" Hole.
Mate with CL24 C-Lites

DLO-10B-D09BWC

Medium length holder for high voltage incandescent CL24. Specify in same manner as DHO — requires lens cap.

DM SERIES SINGLE LAMPHOLDERS

Rear mounting 3/8" Hole.
Mate with CM65 C-Lites

DMO-10B-D06BRT

Long length holder for high voltage CM65 C-Lites. Specify in same manner as DHO — requires lens cap.

For complete Technical information and detailed catalogs contact our representative listed in the EEM yellow pages.

ELDEMA DIVISION
GENISCO TECHNOLOGY CORPORATION

ELDEMA INDICATOR LITES

R - LITES

R-Lites are Eldema's product family of relampable holders and lens caps for the midget flange based T-1 $\frac{3}{4}$ incandescent and T-2-neon bulbs. The lamps and lens caps are replaceable from the front of the panel. There are five R-Lite groups — each with its own features — the holder and lens cap part numbers in each group start with the same two letters to insure mating parts.

RM AND RN SERIES

The RM-RN groups meet MIL-L-3661 and MIL-L-6723. The RM is for incandescent lamps — the RN Series with a built in resistor is for neon lamps. Standard types RMA and RNA — waterproof types RMW and RNW — two tin plated lug terminals — black anodized aluminum cases — high impact plastic lenses. Mount from the front in $15/32$ " holes.

LOGIC - LITES

Indicator lights with built-in transistorized lamp driver networks. Available in neon and relampable incandescent types for operation from IC and discrete component circuits. Matching indicator lights and switchlites are also available. Contact Eldema for more detailed information.

HL-LITES

Eldema Series HL holders and lens caps are for sub-miniature based T-1 incandescent lamps. Military type construction — brass housing — either single or two terminal style — relampable from the front of the panel — mount on centers as close as 0.360. RFI/EMI shielded versions available-see H-Lite brochure.

ELDEMA INDICATOR LITES

T-SERIES

Eldema T-Series lampholders and lens caps are for the T-3 $\frac{1}{4}$ bayonet based incandescent and neon lamps. Four basic types — TAF and TCF for incandescents — TAG and TCG with built-in resistors for neons. Meets Mil-L-3661 — polished chrome, black nickel or bright nickel finish — front mounting in 11/16" holes water proof types — lug or screw terminals.

TCF-6220-TC222RC

TAG-6032-TA263CD

TAF-7020-TA160AT

TAF-6030-TA120RT

TAF-7030-TA243RT

TAF-6030-TA223CD

HOLDER STYLE

- TAF - Incandescent lampholder
Screw-in lens caps
- TAG - Neon lampholder
Screw-in lens caps
- TCF - Incandescent lampholder
Screw-on lens caps
- TCG - Neon lampholder
Screw-on lens caps

NOTE: TAF and TAG holders mate with lens caps starting with letters TA. TCF and TCG holders mate with TC lens caps.

HOW TO SPECIFY HOLDER FEATURES

Example — 6010

- First digit: 6 = Solder lug
(Terminals) 7 = Screw terminal
- Second digit: 0 = Standard part
(Mounting) 2 = Water proof
- Third digit: 1 = Bright nickel
(Finish) 2 = Black nickel
3 = Polished chrome
- Fourth digit: 0 = None (TAF & TCF)
(Resistor) 2 = 27K Ω for NE51H lamp
4 = 56K Ω for NE51 lamp
7 = 100K Ω for NE51 lamp
25,000 hour life rating

SCREW-IN LENS CAP STYLE

- TA120 - Smooth dome — clear or translucent colors
- TA130 - Fluted dome — clear colors only
- TA140 - Semi-Fluted dome — clear colors only
- TA160 - Flat top — clear or translucent colors
- TA223† - Convex — clear or diffusing colors (no cloudy clear)
- TA243† - Flat top — clear, translucent or diffusing colors
- TA263† - Smooth dome — clear or diffusing colors (no cloudy clear)
- TA283† - Fluted dome — clear colors (no cloudy clear)

SCREW-ON LENS CAP STYLE

TC223† Smooth dome — clear or diffusing colors (no cloudy clear)

TC243† Fluted dome — clear colors only (no cloudy clear)

† These lens caps have a metal ring with polished chrome finish specified by the digit 3. For bright nickel, change to 1, black nickel, change to 2. For example: TA221¹RC and TC242²RC.

To specify water proof lens caps in the TA styles change the first digit as follows: TA100 series to TA400, TA200 series to TA300. For example: TA120RC to TA420RC. Standard TC lens cap may be used. All necessary sealing gaskets are on the TC holder when it is specified water proof.

To indicate lens colors, substitute one of the following numbers for the final digit of the catalog number. (Green, blue lenses recommended for neon type).

- | | |
|----------|-----------------------|
| 01 Clear | 04 Amber |
| 02 Red | 05 Blue |
| 03 Green | 06 Opal (translucent) |

*Neon type requires a 33K ohm current limiting resistor for operation at 115 volts a.c.

These convenient polyamide spacer bushings make it possible to snap FPC boards to a chassis and provide a choice of stand-off heights from .125" to .750". They provide mechanically secure, insulated mounting, yet FPC boards can be quickly removed. Machined to dimensions shown, the design provides permanent, snap-in insertion into pre-drilled or punched holes in 1/16" chassis or panel. (Also available as specials for other panel and board thicknesses.) The other end of the spacer snaps in or out of the PC board so that the board can be removed for service or modification.

SPECIFICATIONS (COMMON TO ALL STOCK NEON PILOT LIGHTS)

Voltage: 105–125 A.C.
 Leads: 4 1/2" 105°C plastic stripped 1/4" 22AWG
 Lamp: High brightness neon with built-in resistor.
 Speednut: Hardened spring steel, rust-resistant finish.

MINI-SLIDE pilot light assemblies

- Bright, highly visible ■ Long-lived — rated 5000 hours ■ Available complete
- Lamps from 6 to 120 volts ■ Variety of colors ■ Utilize miniature slide
- Incandescent lamps ■ Foolproof installation ■ UL recognized, CSA approved

INDICATOR LIGHTS

NEON AND INCANDESCENT AND SPECIAL ASSEMBLIES

TINEON INDICATOR LIGHTS

Long Life, High Brightness Lamps — Press fit into 5/16" hole — For neon types rated 110-250V — Nylon housing in colors (white standard) — Speed nut furnished — Plastic lens in colors — Legends — Built-in Resistor — Insulated Leads.

All Tineons are available with Incandescent Lamp.

No. 36N2311

No. 41N1315

No. 45R2111T8

No. 46N2311

WITH ALUMINUM BEZEL
All Tineons may be furnished with aluminum bezel. Please specify when ordering.

No. 36EN2111 (Hi-Hat red lens) With aluminum bezel

RECTANGULAR INDICATOR LIGHTS

Long Life High Brightness Neon Lamps — Snap into panel securely without additional hardware — Choice of lens colors — Series 3100 has chrome bezel and plastic lens — Series 47 has one-piece plastic lens and body — Complete range of voltages — UL and CSA listed.

Barrier separates light into two separate message areas. Individual or simultaneous operation.

No. 47-3T
(legend to specification)
For 1 1/8" x 3/8" hole

No. 31D-ORN
Dual Message Lights
For 1 1/2" x 1 1/2" hole

DUAL BEZEL
No. 31-ML2

For 1 3/32" x 1 3/16" hole.

No. 31-2111

2900 Series

REAR-ASSEMBLY, SNAP-IN LIGHTS Neon or incandescent. All voltages. Snap in from rear, lock firmly. Simpler, swifter assembly. Eliminate threading leads as in front-of-panel lights. No additional hardware. Mtg. hole .510-.520".

No. 51-2135T

SLIDELITE™

Pilot Indicator Light, Slide-Switch Combination

Ultra-compact. Simple snap-in installation. Wide voltage range, choice of lights. May be message stamped. Lens colors: red, amber, clear, white, blue, green, others on request. Leads or terminals. 1 3/4" x 1 3/8" x 3/4". Rating: 125 V. 6 Amps.

SNAPLITE INDICATOR LIGHTS

With long-life lamps, high brightness types. Built-in resistor when neon lamps — to suit applied circuit voltage, provide rec lamp life, eliminating replacement need. Features: Snap into 1/2" hole with no additional hardware. Wide variety of lens housing colors. Tab or solder terminals; or wire leads. AVAILABLE WITH CHROME RINGS. To specify Chrome Rings add R after 2 Digits, i.e., 32-2111 becomes 32R2111.

SQUARE LENS
32R2911T 3/32" high

FLAT CYLINDRICAL LENS
32-2111 3/16" high

STOVE PIPE LENS
32-2211 1/32" high

FLUSH LENS
32-2311T 3/32" high

HI-HAT LENS
32-2511T 3/16" high

NOTE: Total height above panel equal to lens height plus 3/16" fl thickness. 3/32" flange thickness for Square Lens.

HOW TO ORDER LEECRAFT INDICATORS WITH INCANDESCENT LAMPS

Incandescent lamps to meet low voltage characteristics may be placed in place of neon lamps with all indicators illustrated on page. To specify incandescent in place of neon lamps insert I code after series number. Some of more popular voltages are listed.

CURRENT (Milliamperes)	VOLTAGE (Volts)	CODE LAMP
200	6	G1
40	6	G2
14	10	G6
80	14	G3
40	28	G5

EXAMPLE: 41N2313
14 Volt 80 Mil. LAMP
comes 41N-G3-2313.
32-2111 with 6 volt 200
LAMP becomes 32-G1-2111

Leecraft Series	Volts	Terminations
3200	110-125	Insulated wire leads
3500	210-250	Insulated wire leads
3200T	110-125	.187 tab terminals
3500T	210-250	.187 tab terminals

1/32W, 125V
1/32W, 250V

CATALOG NUMBERS • 3200 SERIES WIRE LEADS*

Lens Color	Cylindrical Lens	Flush Lens	Stove Pipe Lens
Red	32-2111	32-2311	32-2211
Amber	32-2113	32-2313	32-2213
Clear	32-2117	32-2317	32-2217
White (Translucent)	32-2115	32-2315	32-2215

To specify Square Lens, use 32R2911 plus 1, 3, 7 or 5 for lens code. Example: With red lens—32R2911. To specify Hi-Hat Lens, use 32-2511 plus 1, 3, 7 or 5. Example: With clear lens—32-2517.

* To specify TAB TERMINALS in place of WIRE LEADS, add "T" and number, i.e., 32-2111 becomes 32-2111T.

ATR

Inverters, Vibrators, "A" Eliminators, etc.

ATR

DC TO AC UNIVERSAL INVERTERS

New, universal inverters for operating 110-v., 60 cycle AC equipment from DC voltages in autos, buses, trucks, boats, trains, planes and DC districts. Designed especially for standard 110-volt AC tape recorders, TV sets, radios, PA systems, electric razors, test equipment, etc. Units are carefully engineered and ruggedly constructed to provide long life operation. All feature complete RF interference suppression and exceptional frequency stability. Have operating efficiency in excess of 75%. Four-point voltage regulator corrects output voltage for minimum and maximum loads, and also helps compensate for input voltages lower or higher than normal. Inverters are recommended for use with loads having power factors in excess of 70%. Built-in toggle switch selects most efficient operation for use with TV sets or tape recorders. Inverters are not recommended for use with large motor driven appliances such as refrigerators, washing machines, etc. All have ON-Off switches. Housed in attractive brown hammerloid metal cabinet with leather carrying strap. Sizes: Standard Model RSF, 8½"x9½"x5¼"; Heavy-Duty Model RHG 6¼"x11¼"x8¾". Extra-Heavy-Duty Model HSG, 6½"x12¼"x8¾". With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles. *Recommended for 24 volt battery operation. Before ordering, check wattage of equipment with which inverter will be used.

Live brown hammerloid metal cabinet with leather carrying strap. Sizes: Standard Model RSF, 8½"x9½"x5¼"; Heavy-Duty Model RHG 6¼"x11¼"x8¾". Extra-Heavy-Duty Model HSG, 6½"x12¼"x8¾". With battery clips for instant connection to power source. Models with "P" suffix equipped with adapter cord for use in auto cigarette lighter receptacles. *Recommended for 24 volt battery operation. Before ordering, check wattage of equipment with which inverter will be used.

PORTABLE PLUG-IN TYPE INVERTERS

SPECIALLY DESIGNED FOR OPERATING STANDARD A. C. DICTATING MACHINES, RECORD PLAYERS, INCANDESCENT LAMPS, ELECTRIC RAZORS, ELECTRONIC TEST EQUIPMENT, AND OTHER SMALL ELECTRICAL AND ELECTRONIC DEVICES FROM D. C. VOLTAGES IN AUTOMOBILES, BUSES, TRUCKS, BOATS, PLANES, TRAINS, AND D. C. DISTRICTS.

Lightweight inverters for operating 110 v. AC equipment from DC voltage sources. Feature excellent frequency stability and high efficiency. 6 and 12-volt units plug into cigarette lighter receptacle of any vehicle; others are equipped with standard 2-prong plugs. All are designed especially for use with dictating machines; record players, electric razors, test equipment, etc. Not recommended for large tape recorders and motor driven appliances such as refrigerators, washing machines, etc. Brown Hammerloid case with leather carrying strap. Sizes: DME, 5¼"x4¼"x2¾"; RME and RMF, 8¾"x5¾"x¾". *Recommended for 24-volt operation. Check wattage rating of equipment before ordering. RMF/RME Model Inverters equipped with voltage regulator.

Stock No.	Mr's Type	Input D.C. Volts	A.C. Output 60 Cycles	Output Watt. Int.	Cont.	Shipping Weight	List Price	Net Price
6-DME (1)	6	110	Volts	40	30	5 lbs.	\$33.50	\$22.33

220-RME	220	110		150	100	12	74.95	49.95

(1) These Inverters primarily recommended for Edison VP dictating machines. May also be used with Model 200 Sound-scriber (with engine of car not running).

(2) Primarily recommended for Dictaphone's Time Master, DeJury Stenorette, and Gray Autograph dictating machines or other similar types. Also recommended for use with Norelco tape recorder Model EL-3516 and Geiselo Model G 255-S tape Recorder.

(3) This Inverter specially designed and recommended also for use with portable TV set.

ATR

VIBRATORS

FOR ALL AUTO RADIO SETS SINCE 1954 USE ONE OF THE ATR VIBRATORS LISTED BELOW ... ATR VIBRATORS FEATURE

Ceramic Stack Spacers with Two-Bolt Stack construction.

Instant Starting—as a result of highly efficient magnetic circuit with formed base for more uniform operation on both high and low voltages.

Large Oversize Tungsten Contacts having Full Wiping Action—for greater reliability and longer life.

Perforated Reed of Highest Quality Swedish Spring Steel.

Highest Precision Construction and Workmanship—Practically all parts used are held to within a tolerance of 0.0005 of inch.

Value Plus—as readily evidenced by the Larger Contacts, Ceramic Spacers and Precision Construction and Workmanship. Available in TEN-PAK.

ATR No. 1400 (Bulk), 4-Prong, 6-Volt For All 6-Volt Sets Since 1954

ATR No. 1843 (Bulk), 3-Prong, 12-Volt For All 12-Volt General Motors Since 1954

ATR No. 1843 also used in following automobiles: 1956 Ford (Philco), Lincoln (Bendix), and Mercury (Bendix); 1956 Chrysler (Philco); 1955-57 Packard; 1956-57 Plymouth (Philco); 1956 Studebaker (Philco) and 1957 Mercury (Philco)

ATR No. 1840 (Bulk), 4-Prong, 12-Volt For 12 Volt Cars other Than GM Since 1954

ATR

ELECTRONIC TUBE PROTECTOR

A "MUST" FOR EVERY TV HOME! WILL DOUBLE OR TRIPLE THE LIFE OF ALL TYPES OF ELECTRONIC TUBES, INCLUDING TV PICTURE TUBE. Automatic in operation, for use with any electronic equipment having input wattage of 100 to 300 watts. Fuse protected; rugged construction; and enclosed in interior decorator's golden brown hammerloid-finish metal case. Wall Model 250 is 1-15/16" OD x 3¾" in length and plugs directly into wall socket. Shipping weight is 1 lb.

—Wall Model 250

(115 volt A.C.) Net \$2.95

ATR

SHAV-PAKS

Every man should have this lightweight ATR Inverter in his car for that "Keep Clean-Shaved Look." Will operate standard A.C. Electric Shavers from your CAR or BOAT. Complete with 3 ft. cord set. Plugs into cigarette lighter receptacle. Fuse protected; rugged construction; and attractively housed in grey hammerloid-finish steel case. Size 4"x2¾"x2¾". Shipping weight 2¼ lbs.

Model 6-SPB (6 volt) Net \$14.75

Model 12-SPB (12 volt) Net 12.95

ATR

"A" BATTERY ELIMINATOR

FOR DEMONSTRATING AND TESTING TRANSISTOR OR VIBRATOR-TYPE AUTO RADIOS. Designed for testing D.C. Electrical Apparatus on regular 110 volt A. C. lines . . . equipped with full-wave dry disc-type rectifier, assuring noiseless, interference-free operation. Fully Automatic and Fool-Proof: has voltmeter, ammeter, and 8-position voltage control. Fuse protected, and housed in heavy gauge brown hammerloid-finish metal case. 6 ft. cord set included. Size: Model 610C-ELIF, 6½"x9½"x8¾"—shipping weight 22 lbs.; Model 620C-ELIT, 6½"x12¼"x8¾"—shipping weight 33 lbs.

IDEAL AS A POWER SUPPLY FOR MODEL RAILROAD TRAINS, RADIO SETS, ELECTRO PLATING OUTFITS, AND OTHER 6 OR 12 VOLT, D.C. EQUIPMENT. MAY ALSO BE USED AS A BATTERY CHARGER.

—Model 610C-ELIF (6 volt at 10 amps. or 12 volt at 6 amps.) Net \$59.82
—Model 620C-ELIT (6 volt at 20 amps. or 12 volt at 10 amps.) Net \$79.75

ATR

AUTO PLUG-IN, HOME-TYPE PORTABLE BATTERY CHARGERS

No installation . . . just plug into cigarette lighter receptacle! Makes motor starting easy! Keeps your car battery fully charged in your own garage. Operates directly from standard 110 volt A.C. Household Current. Available in three portable sizes for both 6 or 12 volt cars. Light in weight, rugged in construction, economical, and built to last. Each battery charger is housed in grey hammerloid-finish metal case. Complete with cord sets. Size of G1 is 5¾"x4¼"x2¾"—shipping weight is 6 lbs.; G2 is 8¼"x5½"x3¼"—shipping weight is 8 lbs.; and G3 is 8¼"x5½"x5¼"—shipping weight is 10 lbs.

Need custom power supplies?

Acme Electric can design and build to your specs.

Acme Electric's engineering and experience have developed thousands of custom designed regulated DC power supplies for a variety of industrial markets. You'll find our power supplies in computers and data processing, communications, nuclear research, machine tools, photography, medical apparatus, to name but a few.

In these and other fields we have solved such knotty power supply prob-

lems as: dynamic load regulation of 3000 DC amps at .002%; economically achieved high efficiency at extremely low voltage and high current for IC's; tough packaging problems and programming requirements; many others. We're also specialists at designing and manufacturing CVT regulated power supplies.

So, if you're looking for high quality, soundly engineered custom units,

yet want them made with production line efficiency, why not draw engineering know-how of Acme Electric Corporation? Our business satisfy the functions of power conversion and/or regulation, ever the industry or application.

Acme Electric
ACME ELECTRIC CORPORATION

Beckman®**HIGH VOLTAGE POWER SUPPLIES****PORTABLE HIGH VOLTAGE DC POWER SUPPLIES**

These general purpose supplies are particularly suited for laboratory or production line use to provide a convenient source of high voltage, low current dc power. Widely used for such applications as powering photo-multiplier tubes, image intensifiers, condenser charging, and routine insulation breakdown testing.

Output voltage readings are indicated by a 6" precision mirror scale kilovoltmeter of 1% accuracy. Polarity is reversible from the front panel (not applicable for 10-15kV model). An ac input protection fuse is included as well as an in-line limiting ballast lamp restricting maximum current output. These levels may be adjusted by changing ballast. A single continuous adjustment of output voltage from zero to maximum.

Output is unregulated (regulation is 20% for 10 to 100% load-current rating is 5 milliamperes. The ripple is 5% (rms) at full load and current load.

Model	Output Voltage	Output Current	Price
0-1ma-ms	0 to 1kV	5ma	\$250.00
0-5ma-ms	0 to 2.5kV	5ma	275.00
0-5ma-ms	0 to 5kV	5ma	300.00
0-5ma-ms	0 to 10kV	5ma	325.00
0-5ma-ms	0 to 15kV	5ma	350.00
0-5ma-ms	0 to 25kV	5ma	400.00

INDUSTRIAL DUTY DC POWER SUPPLIES

These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is simple and the units contain a number of safety features for protection of personnel and equipment. Output is continuous.

Output is variable from zero to full rated values. These supplies are unregulated and standard ripple is 5% or less. Ripple of from 0.01% to 1%, regulated supplies are available on special order. All power supplies have automatic overload cutout control circuits.

Model	Voltage	Current	Price
01	0-1000	2 Amp.	\$1000.00
02	0-2000	1 Amp.	1050.00
03-A1	0-3000	100 MA.	660.00
03-AV	0-3000	500 MA.	770.00
03-AK	0-3000	1 Amp.	1150.00
05-A1-H	0-5000	100 MA.	715.00
05-AV	0-5000	500 MA.	1175.00
05-A1K	0-5000	1 Amp.	1325.00
10-AV	0-10,000	500 MA.	2100.00
20-A05	0-20,000	50 MA.	1350.00
30-A3	0-30,000	300 MA.	2500.00

HIGH VOLTAGE SWITCHES

High voltage, low current circuits requiring complete isolation; nominal rating 5,000 volts (D.C. or A.C.) Model A or D may be used in duty circuits to 10,000 volts D.C. Steady state current rating 500 milliamperes—5MA when switching. Isolated for 15,000 volts D.C. test to ground... made of modified Diallyl Phthalate. May be ganged together for 2 gang operations.

Model	Type	Price
A	2 Pole reversible (for polarity reversing of power supplied)	\$22.00
B	D.P.D.T.	24.00
D	4 Position (1 Gang)	22.00
E	6 Position (1 Gang)	24.00
F	8 Position (1 Gang)	28.00
G	10 Position (1 Gang)	30.00

PACKAGED POWER SUPPLIES AND ZENER REGULATORS

These new low-cost units make D.C. voltage problems easy. Just wire input and output connections and the unit is ready to operate. Building block construction provides a basic transformer, a rectifier unit, and where necessary a regulating device. These three elements bolt together quickly and maintenance is simplified should any of the components fail. Each of the three basic building blocks are mechanically constructed in a molded Diallyl Phthalate shell and encapsulated with epoxy resin.

**ZENER REGULATOR****PACKAGED POWER SUPPLY**

The output is completely isolated and either post may be grounded or the unit operated as a floating supply. The D.C. voltage is filtered and provides 5% or less ripple. Output may be varied from full rating down to zero by simply inserting a small adjustable transformer in the input. Most units are rated for 5 MA current. Power supplies 7.5 KV and higher have modified mechanical construction from that described above. Input 115 V. 60 Hz.

Use with High Voltage Zener Regulators to obtain 1% line and load regulation.

Simply connect in parallel* with any high voltage power supply and automatically obtain line and load voltage regulation as well as ripple reduction. Nominal current rating is 0.5 to 1 MA for better than 1% stabilization. Regulation over range of 0 to 5 MA is 3%. Can be wired in series for high voltage service (five 4,000 volt types to regulate a 20,000 volt power supply). Twenty built-in taps included, each provides a regulated voltage to an accuracy of 20%. Ideal for photomultiplier tubes. Use as a high voltage reference in conjunction with regulator amplifier circuitry.

*If necessary, insert a series resistor to limit zener current to under 5 MA.

	Model	Output Voltage	Total Voltage	Volts at Each Tap	Price
POWER SUPPLY	05-KV-5 MA	500 volts DC			\$ 55.00
	1-KV-5 MA	1-KV-DC			65.00
	2-KV-5 MA	2-KV-DC			70.00
	3-KV-5 MA	3-KV-DC			75.00
	5-KV-5 MA	5-KV-DC			80.00
	10-KV-5 MA	10-KV-DC			110.00
	15-KV-5 MA	15-KV-DC			120.00
	20-KV-5 MA	20-KV-DC			200.00
	30-KV-5 MA	30-KV-DC			230.00
ZENER REGULATORS	ZA-1K		1,000 volts	50 volts	60.00
	ZA-2K		2,000 volts	100 volts	70.00
	ZA-3K		3,000 volts	100 & 200	80.00
	ZA-4K		4,000 volts	200 volts	100.00
	ZA-5K		5,000 volts	200 volts	110.00

(1 of each color)
30.00

Modified Diallyl Phthalate construction for superior arc resistance and low power factor; convenient miniature size with extra long air paths; sealed center conductor handles up to 20 amperes; neoprene gasket for mounting on oil filled tanks. For quick disconnect (easily mated with standard banana jack) or for permanent service with 10/32" machine bolt; neat styling—available in 10 colors—ideal for mounting on front panels.

Model C-1 rated for 25,000 volts D.C. max.
Model C-0 rated for 5,000 volts D.C. max.

1100CP	12	35	300	370.00
1200CP*	12	56	400	395.00

Includes meter and control as shown
hour duty cycle

Models listed at left have manually operated frequency control and meter to maintain 60 HZ output over a $\pm 10\%$ input voltage variation. All other custom converters from 210 to 750 watt output can be supplied with frequency control at \$90 additional to list price. Add 3" to height.

Filter available; add \$50 to list prices, 3" to height. Add \$15 for built in capacitor filter.

STAND-BY LOAD-TRANSFER CONVERTERS

Starts automatically should AC power fail. Shuts off when power restored. Runs from batteries. Operates paging and control circuits for hospitals, schools, utilities, etc. Popular models listed. Other ratings from 200 to 750 watt output. Batteries or trickle charger not supplied.

For stand-by feature on other custom converters listed above, add Y to code number and \$90.00 to list price.

Monarch

1000 - 1500 - 2000 WATT CONVERTERS

1000, 1500 and 2000 watt 60 HZ AC output, 24 to 230 volt input models. The Monarch series is ideal for heavy-duty industrial service, marine, mine, crane and railroad communications. Slow speed (1800 rpm), long life, 4-pole design; ball bearing equipped. No filter is necessary for most applications. Size: 19" x 11" x 12" high. Three-phase output available, add \$60 to list. 24 v. Input at 1500 w. rating.

Carter Number	DC Input Volts	Amps	Watts, AC at 60 HZ, 115 v.	List Price

± Reduced voltage starters necessary, add \$110.00 to list price.

"MARK II" SUPER CONVERTERS

Designed for high PF non-inductive AC loads such as amplifiers, lab and medical equipment, standby emergency lighting, telephone and marine communications. Not damaged by intermittent transients or sudden overloads. Will not operate refrigerators, large AC motors or low PF transformers. Ball bearing, con. duty. Size: 8 1/4" x 4 1/4" x 5" high. Weight: 13 lbs. (*10 1/4" long, 4 1/2" wide, 5" high. Weight: 10 lbs.)

B1020CB*	12	30	200	170.00

AC TO AC FREQUENCY CHANGERS

Produces 115 v., 50 or 60 HZ AC output from 25 to 400 HZ input. For operating standard equipment on non-standard frequencies. Standard units are for single phase input and output. Three-phase output available on order. For frequency meter, add \$50.00 to list price. Non regulated.

Number	Output*	List	Number	Output*	List
1025CP	250 w	\$650.00	FC10100M	1000 w	\$1,310.00

50 HZ output, 50 HZ available

REFRIGERATOR-APPLIANCE MARINE CONVERTERS

Operates standard refrigerators, compressors (up to 1/6 hp only), vacuum cleaners and other appliances from DC; for use aboard commercial and pleasure boats. Converter operates only when power is called for. Has handy AC outlet to run most appliances from DC. Input from 24 to 230 v. DC. Size: 14" x 6 3/4" x 11" high. Net Weight: 65 lbs. 750 w. con. duty rating. Models from 24 to 230 v. DC input.

Number	Input	List	Number	Input	List
RF34	34 v.	\$540.00	RF115	115 v.	\$540.00

CARTER DC to AC GENEVERTERS

Compact model for low power marine and industrial applications requiring up to 60 watt 115 v. 60 HZ output. High power factor. Models listed are for 115 v. DC input. Others available for 12, 24, 32 or 48 v. input. Size: 7 1/2" x 4 1/4" x 3 1/2" high. Weight: 1 1/2 lbs.

ELECTRO REGULATED AND INDUSTRIAL POWER SUPPLIES

Stocked at your franchised ELECTRO distributor

PRECISION BUILT

The ELECTRO line provides a wide range of DC outputs up to 125 volts with adequate filtering for requirements ranging from critical transistor circuitry to applications permitting up to 5% ripple.

Every model is engineered to give unusual performance

REGULATED

Models PSR-12-25 and PSR-12-50 Regulated Supplies. (Fig. A) Solid state units with continuously variable outputs. Line regulation $\pm 0.01\%$ + 2mV over 105-125V input range. Load regulation 0.01%, no load to full load, max. ripple 100 microvolts. Ideal for transistor circuit development and testing. Front panel controls include: on-off switch; meter function switch, coarse and fine voltage controls for precise adjustment. Rack-mount accessory for up to 4 units available. PSR-12-25 output: 0-25v, 0-500mA; PSR-1250 output: 0-50v, 0-250mA. Input: 105-125 VAC, 60 Hz.

Model PSR-500 Series (Fig. B) delivers watts of DC power with output voltage regulated to less than 1% for load and 0.1 line changes. Maximum ripple less than 0.1%. All solid-state circuitry. Uses silicon rectifiers and SCR regulation. Fused input, circuit breaker output protection.

Three models are available with output voltage ranges: 2-32v, 2-55v, and 2-125v. Input: 125 VAC, 60 Hz.

INDUSTRIAL

Model EF (Fig. C) provides variable voltage 0-28v or 0-14v at 5 amps continuous, 10 amps. intermittent load. Ripple less than 1%. Uses selenium rectifiers. Input: 117 VAC, 60 Hz.

Models EFB and EFBR (Figs. C, G) designed for very low ripple requirements of transistor work. Continuously variable voltage control. Selenium rectifiers. Employs chokes and capacitors in ripple filter. Model EFB Federal stock number 6130-957-1450. Model EFBR (Fig. G) same except with standard EIA rack panel. Input: 117 VAC, 50/60 Hz.

Models NFB and NFBR (Figs. D, G) for continuous heavy-duty. Continuously variable output, 0-32v for loads to 15 amps. Ripple: less than 0.75% at 15 amps. Ripple filter circuit uses chokes and capacitors. Variable autoformer for smooth control. Bridge-type silicon rectifiers. Model NFBR same except with standard EIA rack panel. (Federal stock number 6130-853-3127.) Input: 117 VAC, 50/60Hz.

Models GFL and GFLR (Figs. D, G) low cost, semi-regulated, low ripple, higher voltage. Ideal for designing and testing DC appliances, telephone circuits, relays and solenoids; laboratory work. Continuously variable output 0-125v DC at 5 amps. Ripple: 0.5%. Silicon rectifiers. Overload protection. Model GFLR same except with standard EIA rack panel. Input: 117 VAC, 50/60 Hz.

Models PS-5 and PS-5R (Figs. D, G) designed for 48-volt applications. Delivers 550 watts well-filtered DC output continuously variable 0-55v DC. Ripple: 0.5% rms at 10 amps. Silicon rectifiers. Model PS-5R same except with standard EIA rack panel. Input: 117 VAC, 50/60 Hz.

PS-1000 Series (Fig. F) For continuous heavy duty. Continuously variable output. Low ripple. Filter circuit uses chokes and capacitors. Variable autoformer for smooth control. Bridge-type silicon rectifiers. Three models are available with output voltage ranges 0-32v DC at 30 amps, 0-55v DC at 20 amps and 125v DC at 8 amps. Input: 117 VAC, 50/60 Hz.

**From 105-125 VAC.

††All 2% accuracy except 5% for general purpose units.

Rectifiers: Selenium and Silicon ("avalanche" characteristics on industrial units).

ELECTRO PRODUCTS LABORATORIES, INC.

ELECTRO GENERAL PURPOSE POWER SUPPLIES • INVERTERS

Available through your electronic distributor. Prices and models subject to change.

GENERAL PURPOSE

Model D-612T (Fig. E), Model H (Fig. I) low ripple, less than 1/2% rms up to 5 amps; for servicing transistor auto and portable radios. Maximum output power in this price range. Ideal for citizens' band transceivers, battery charging, solenoids, etc., requiring up to 16v DC. Model H heavy duty; dual range. Ideal as storage battery replacement in school laboratories, thermoelectric power source, and other high-current, low-voltage applications. Both types have voltage and current output meters. Input: 117 VAC, 60 Hz.

Model EC-1 (Fig. J) reliable, low cost. 12v DC with 5 amp output for school labs and industrial research, production testing, etc. Low-cost source for FM and AM auto radio demonstrations. Maximum ripple 1/2%. Four-position voltage adjustment switch; off, low, medium and high. EPL patented rectifier conduction cooling. Used vertically or horizontally. Input: 117 VAC, 60 Hz.

Model EC-2 (Fig. H) low priced unit for auto, tape disk and transistor radio servicing. Wide applications in research and development. Continuously variable voltage adjustment provides versatility. Maximum ripple 1/2% rms at 5 amps. Patented conduction cooling. Used vertically or horizontally. Output: 0-16 VDC combination edge-view voltmeter/ammeter. Input: 117 VAC, 60 Hz.

Models PS-30 and PS-50 (Fig. L) heavy duty adjustable 12-volt units for servicing auto, aircraft and marine communications equipment. Useful in industrial and educational labs, thermoelectric cooling power source, etc. Maximum ripple at maximum current 1%. Eight-position tap switch output voltage adjustable. Model PS-50 delivers 50 amps continuously. Model PS-30 delivers 30 amps continuously. Input: 117 VAC, 50/60 Hz.

Model 3301 (Fig. K) specifically designed for high school and college electrical and electronic experiments in science labs. Provides both AC and DC low-voltage outputs, adjustable and metered. Two circuit breakers protect primary and outputs, and line isolated transformer and three-wire line cord are safety features. Free 48-page manual of experiments supplied with each unit. Input: 117 VAC, 60 Hz.

ELECTRO DC TO AC TRANSISTORIZED INVERTERS

Convert 12v DC to 117v AC from car, boat or plane battery. Ample power for TV sets, lights, recorders, PA systems, etc.

ate portable TV, radio, lights, PA systems, tape
recorders, CB, small appliances, etc., from car, boat or
plane battery. All models feature on-off switch, AC
disconnect on control panel, battery-protecting fuse.
Automatic electronic turn-off circuitry protects trans-
istors from overload. Charge indicator light gives low
voltage or overload warning. Compact, lightweight,
stainless steel metal cases.

INVERTERS

Conversion	Output	Freq. Reg.	Size (in.)	Sh. wt. (lb.)	Price (Net)
12 Volt DC to 117V 60 Hz	250 VA	4 Hz NL to FL	4 1/2 x 10 x 7 1/2	11	\$79.50
	620 VA	.5 Hz	6 1/2 x 12 x 8 1/2	25	\$320.00
INVERT 12 VDC to 117V 60 Hz	620 VA	.5 Hz			
CHARGE 117 VAC to 14 VDC	25 Amp. Max.		6 1/2 x 12 x 8 1/2	30	\$400.00

ACCESSORIES

Description	Size (in.)	Sh. wt. (lb.)	Price
Remote Control Console for Model TI-250A (with 8-ft. cord for operation from remote location)	2 1/4 x 4 1/4 x 2 1/4	2	\$12.50
Battery Clip Adaptor for Model TI-250A	4 ft. cable	1	\$4.40

Model TI-250A has 250 watt output for a wide range of applications. Features (1) relay in circuit insures 100% reverse polarity protection, (2) electronic overload protection, (3) start switch, (4) battery indicator light, (5) includes cables for connection to battery or DC source.

Model RC-2 Remote Control. A remote control console is available for the Model TI-250A inverter. An 8 ft. cord is provided for operation from remote location.

New Dual Purpose TIC-620 Inverter/Charger incorporates a built-in 25 amp charger. A three-position switch provides low, medium and high charge rate. The 620 VA rated inverter has a nominal output of 5 amps at 120 volts. A fused secondary circuit protects the inverter and battery from overload.

TI-620 Inverter only. Identical with TIC-620 except without charger.

GATES POWER SUPPLIES

SILICON POWER RECTIFIER

For transistor circuits & electronic equipment
MODEL G92F

INPUT: 115 volts AC 60 cycles, 1 phase
OUTPUT: 0-32 Volts DC, 0-10 Amperes D.C. continuous duty
REGULATION: No load to full load 15%
RIPPLE: Less than 0.3% RMS
METERS: 2% Accuracy
DIMENSIONS: 17" x 9" x 9"
PRICE: \$169.50 NET
*Also available in 5 Amperes
PRICE: \$114.50 NET

INDUSTRIAL POWER UNITS

MODEL A10

INPUT 115 or 230 AC Volts, 60 cycles—Single Phase.
DC OUTPUT 115 Volts DC 125 Watts
APPLICATION: Power sources for operating DC Motors, Relays, Solenoids, Magnetic Chucks.
DIMENSIONS: 11" H x 9" W x 6 1/2" D
PRICE \$63.00 NET
250 Watts — \$72.50

SELENIUM POWER SUPPLY

INPUT: 115 Volts AC 60 Cycles—Single Phase
OUTPUT: 0-48 Volts DC, 0-6 Amperes
CONTROL: Continuously variable over entire range
RIPPLE: 1% RMS
DIMENSIONS: 19" W x 13" D x 10 1/2" H, Fits RETMA, Western Electric racks
PRICE: \$190.00 NET

MODEL G48-6FM

SILICON POWER SUPPLY

INPUT: 115 Volts AC, 1 Phase, 60 cycles
OUTPUT: 0-14 Volts DC, 0-15 Amperes, continuous duty
RIPPLE: Less than 1% RMS
METER ACCURACY: 2%
DIMENSIONS: 9" H x 17 1/2" W x 9" D
PRICE: \$159.50 NET
Rack Model Same Price

MODEL #GS 14-15F

SILICON RACK MOUNT SUPPLY

INPUT: 115 Volts AC 60 Cycles, Single Phase
OUTPUT: 26, 28, 30 Volts DC 0-10 Amperes Continuous Duty
REGULATION: 10% No Load to Full Load
RIPPLE: 0.3% RMS
DIMENSIONS: 8 3/4" H x 19" W x 10" D
PRICE: \$137.50 NET

MODEL #GX30-10

AIRCRAFT BATTERY ELIMINATOR

MODEL #G101F

INPUT: 115 Volts AC 60 cycles, single phase
OUTPUT: 0-32 Volts DC, 0-20 Amperes, continuous duty
RIPPLE: 0.5% RMS
Unique overload device prevents needle slam and shows overload condition
REGULATION: D.C.V. at full load: 30
D.C.V. at 1/10 load: 35
METERS: 2% Accuracy
DIMENSIONS: 19" x 14 1/4" x 12 1/4"
PRICE: \$275.00 NET
May be used for Rack or Bench

ALL TYPES OF POWER SUPPLIES

SILICON POWER RECTIFIER Model G50-50R

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-50 volts DC, 0-100 amperes continuous duty

REGULATION: 3% RMS

REGULATION: No Load to Full Load 8%

ACCURACY: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON INDUSTRIAL POWER UNIT Model G30-100

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-100 amperes continuous duty

REGULATION: 3% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and at maximum output voltage setting

ACCURACY: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON AIRCRAFT BATTERY ELIMINATOR Model G30-200

INPUT: 220 Volts AC, 60 cycles, 3 phase

OUTPUT: 0-32 Volts DC, 0-200 amperes continuous duty also avail. 300A

REGULATION: 3% RMS

REGULATION: 5-8% 1/10th load to full load with constant input and maximum output voltage setting

ACCURACY: 2% Accuracy

DIMENSIONS: 25" x 25" x 43"

SILICON REGULATED POWER SUPPLY Model G530-40M

INPUT: 115 Volts AC, 60 cycles, 1 phase

OUTPUT: 5-30 Volts DC, 0-40 amperes

REGULATION: 1% RMS

REGULATION: $\pm 1\%$ from no load to full load

ACCURACY: 2% Accuracy

DIMENSIONS: 21" x 15" x 19"

SILICON POWER SUPPLY

MODEL GX 30-5

INPUT: 115 Volts AC 80 cycles, 1 phase

OUTPUT: 28-30-32 Volts DC, 0-5 amperes, DC Continuous Duty

REGULATION: 12% No Load to Full Load

ACCURACY: 5% RMS

DIMENSIONS: 5" W x 13 1/2" L x 9" Overall Height 9"

PRICE: \$85.00 — 6 Amps \$95.00

SILICON GENERAL PURPOSE RECTIFIER

MODEL G-115

INPUT: 115 Volts AC 60 cycles, 1 Phase

OUTPUT: 0-32 Volts DC, 0-50 Amperes DC, Continuous duty variable over entire range

REGULATION: 1% RMS

DIMENSIONS: 22"H x 19"W x 15"D

PRICE: \$522.00 NET

DC POWER SUPPLY

MODEL G94F

INPUT: 115 Volts AC 60 cycles, 1 Phase

OUTPUT: 0-300 Volts DC Continuous Variable 0-1 Amperes.

REGULATION: 3 MV RMS

DIMENSIONS: Rack 8 3/4" H x 19" L x 9 1/2" D

CABINET: 10 1/2" H x 22" L x 12" D

PRICE: \$275.00

Also 0-2 Amp. PRICE: \$340.00

SILICON POWER SUPPLY

MODEL GX30-20

INPUT: 115 Volts, 1 Phase, 60 cycles

OUTPUT: 0-34, Volts, DC 0-20 Amperes, continuous duty

REGULATION: No load to full load: 18%

ACCURACY: Below 1%

Silicon Rectifiers, High Efficiency

DIMENSIONS: 10" x 17" x 3"

PRICE: \$185.00 NET

GATES

ELECTRONIC COMPANY, INC.

FIXED VOLTAGE, 1% LINE AND LOAD REGULATED POWER SUPPLIES

SPECIFICATIONS

AC INPUT: 105 - 125V, 57 - 63 Hz, 1 phase

REGULATION: $\pm 1\%$ for $\pm 10\%$ line change
 $\pm 1\%$ for no load to full load

RIPPLE: 0.1% + 10MV rms maximum

GROUNDING: Floating output; either positive or negative may be grounded

PROTECTION: Automatic short-circuit protection

HIGHEST QUALITY-LOWEST PRICE

SILICON POWER SUPPLY Model GX24-1

INPUT: 115 Volts AC, 60 cycles, 1 phase
OUTPUT: 24 Volts DC, 0-1 ampere DC,
continuous duty
RIPPLE: 0.3% RMS
REGULATION: 8% no load to full load
DIMENSIONS: 3" x 5" x 10"
PRICE: \$75.00
0-2 Amps PRICE: \$85.00

PORTABLE SILICON BATTERY CHARGER Model G612-20

INPUT: 115 Volts AC, 60 cycles, 1 phase
OUTPUT: 6/12 Volts DC, 20 amperes
continuous duty
METER: Amp. meter 2% Accuracy
DIMENSIONS: 11"H x 9"W x 6 1/2"D
PRICE: \$57.50

SILICON RECTIFIER Model GT32-30

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 30 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1% RMS
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy volt meter, amp. meter
DIMENSIONS: 10 1/2" x 13 1/2" x 19"
PRICE: \$350.00 — WT. 92 Lbs.

SILICON RECTIFIER Model GT32-24

INPUT: 115 Volts, 50-60 cycles, 1 phase
OUTPUT: 24 amperes, 0-32 Volts DC
RECTIFIER: Full wave silicon rectifier
RIPPLE: 1%
VOLTAGE CONTROL: Powerstat
DIMENSIONS: 8 3/4" x 13 1/2" x 19"
METERS: 2% Accuracy volt meter, amp. meter
PRICE: \$325.00 — WT. 75 Lbs.

BENCH PLATING RECTIFIER Model G50-8

INPUT: 115 volts, 50-60 cycles,
1 phase
OUTPUT: 50 amperes, 0-8 Volts
DC
RECTIFIER: Full wave silicon
rectifier
RIPPLE: 2% \$75. extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter,
amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: \$175.00

BENCH PLATING RECTIFIER Model G100-8

INPUT: 115 Volts, 50-60 cycles,
1 phase
OUTPUT: 100 amperes, 0-8 Volts
DC
RECTIFIER: Full wave silicon
rectifier
RIPPLE: 2% \$75. extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter,
amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: \$275.00

BENCH PLATING RECTIFIER Model G200-6

INPUT: 115 Volts, 50-60 cycles,
1 phase
OUTPUT: 200 amperes, 0-6 Volts
DC
RECTIFIER: Full wave silicon
rectifier
RIPPLE: 2% \$100 extra
COOLING: Fan
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter,
amp. meter
DIMENSIONS: 21" x 15" x 19"
PRICE: \$385.00

BENCH PLATING RECTIFIER Model G50-15

INPUT: 115 Volts, 50-60 cycles,
1 phase
OUTPUT: 50 amperes, 0-15 Volts
DC
RECTIFIER: Full wave silicon
rectifier
RIPPLE: 2% \$125 extra
VOLTAGE CONTROL: Powerstat
METERS: 2% Accuracy, volt meter,
amp. meter
DIMENSIONS: 21" x 15" x 10"
PRICE: \$210.00

GATES

ELECTRONIC COMPANY, INC.

A single source for all possible types of "brute" force regulated power supplies that can fill 90% of your OEM and application needs. Gates Power Supplies give you the lowest cost and long life. The units are excellently constructed of high rated components for trouble free, long service.

Silicon or Selenium. Single and three-phase units. 1000 volts, 1 to 1000 Amps. Metered and unmetered. Fixed or variable outputs. Rack, cabinet or chassis mounts. In quantities of 48 hour delivery. Two year guarantee. Power supplies for OEM Application, Testing Prototype units, Plating, Motor Control, Cathode Protection, X-ray power, Anodizing, Battery Charging, Battery Cycles, Marine types, Aircraft Starting.

*NEDA number same as an "Eveready" battery number on a different battery.

Omitted to prevent errors in shipping.

**Equipped with screw terminals unless Fahnestock spring terminals are specified.

***Equipped with Fahnestock spring terminals unless screw terminals are specified.

*Items differ from corresponding sizes in that they have tabs enabling the user to solder leads to battery without damage.

□ Flashlight types.

A number same as an "Eveready" battery number on a different type. Omitted to prevent errors in shipping.

differs from corresponding sizes in that it has tabs enabling user to solder leads to battery without damage.

These complete line specifications contain the basic data on all "Eveready" batteries in production at the time of preparation. Since the characteristics of individual batteries are sometimes modified, manufacturers who are designing their product to use a particular battery should contact the nearest Union Carbide Consumer Products Division Sales Office for verification of specifications.

AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment

General Electric a-c voltage stabilizers are static-magnetic transformer-type products which provide voltage maintained within $\pm 1\%$ variation while input line voltage fluctuates $\pm 15\%$. They are offered in the following variations:

Unfiltered output: output voltage waveform is relatively flat-topped, with harmonic content from 15 to 20%.

Harmonic filtered output: output voltage is filtered to near sinusoidal waveshape, with a maximum of 3% harmonic content.

Enclosed construction: completely metal enclosed for safe external mounting.

Open construction: for installation within electronic or electric equipment.

Cord/Receptacle units: for convenient temporary connections.

SINGLE PHASE — Magnetic-capacitor circuitry is frequency sensitive. Stabilizers designed for one frequency are not suitable for use on another.

THREE PHASE — Standard single-phase a-c voltage stabilizers can be connected for 3-phase, 4-wire loads with input connected delta. However, single-phase models cannot be connected for 3-phase, 3-wire loads; select from 3-phase delta-delta models.

Single Phase

Volt-amp Output Capacity	Input Voltage Range	Stabilized Output Voltage	Unfiltered Output		Harmonic Filtered Output

GENERAL ELECTRIC

STABILTRON^{*} AC VOLTAGE STABILIZERS

For Electronic and Electric Equipment Requiring **PRECISE** Voltage Control

ral Electric Stabiltron a-c voltage
ers can be used in a wide variety
ronic equipment applications where
control of voltage is required. The
on consists entirely of static com-
— there are no tubes to burn out
ing parts to replace or maintain.

Stabiltron senses deviations from
etermined output voltage level by
r detector. The error signal, through
con-controlled rectifier circuit, aug-
the voltage stabilizer action and
s almost instantaneous correction
out voltage.

cal applications include computers,
and communications equipment,
ial process control, and X-ray
ent.

Voltage — The most common power
voltages can be handled by the
d models listed. Stabiltron units
provided for special voltage levels
quest.

Voltage — Stabiltron voltage stabi-
maintain extremely precise voltage
in spite of wide fluctuations of line
e, frequency, load, load power factor,
ambient temperatures.

table below illustrates the effect
output of the maximum steady state
ions, within rated limits of some of
variables.

1 — TYPICAL OUTPUT VOLTAGE CHARACTERISTICS

	Excursion	Output Voltage Bandwidth†
Target	95 to 130	0.02 to 0.2%
Frequency	57 to 63 Hertz	0.15 to 0.4%
	0 to 100% rated load	0.02 to 0.1%
Power	0.4 lagging to unity	0.01 to 0.1%
Temperature	-25C to 40C	0.01%/degree C

age is indicated because exact amounts are
ndent on the static level of other variables.
the Stabiltron unit is operated at less than
load, the line voltage can be reduced con-
sibly below 95 volts without serious de-
ation of the output voltage.

Response — Under transient line or load
itions, elapsed time for correction of
t voltage and transient excursion
the normal bandwidth are key con-
itions to equipment operation.

Stabiltron provides fast response
small transient excursion through its
e combination of solid state and mag-
circuitry.

* Name of General Electric Co.

ENCLOSED CONSTRUCTION -
2-kva units are suitable for
either wall or floor mounting.
5- and 10-kva units can be
floor mounted only.

PANEL CONSTRUCTION is suitable for
standard 19-inch rack mounting.

OPEN CONSTRUCTION is suitable for horizontal or
vertical mounting surfaces in equipment enclosures.

57-63CPS; 3% HARMONIC; 0.4 LAG TO UNITY LOAD PF

TABLE 2 — TYPICAL TRANSIENT RESPONSE CHARACTERISTICS

Transient Change	Percent Peak Output Voltage Excursion	Re- sponse‡ Time	Total Re- covery§ Time
0 to 115V input	14%	4 Hertz	13 Hertz
95 to 130V input	14%	3 Hertz	8 Hertz
130 to 95V input	9%	5 Hertz	9 Hertz
0 to 100% rated load	24%	1 Hertz	2 Hertz
20% to 100% rated load	21%	1 Hertz	2 Hertz
100% to 20% rated load	34%	1 Hertz	10 Hertz

‡ The time required for the output to recover 63.3% from its maximum excursion.

§ The time required for the output to recover to normal bandwidth limits.

Harmonic Content — Under all rated ranges of line variation and most load conditions, the total harmonic content of the output wave form will not exceed three percent for a sine wave power source. Even under adverse conditions, when the power source is not a sine wave, the Stabiltron voltage stabilizer will correct the wave form to the load to approximately three percent harmonic content.

Rectifier-filter Loading — Since the output wave form is low in harmonic content, the Stabiltron voltage stabilizer can be connected successfully to a rectifier (capacitor input) filter load to the input of a d-c power supply having capacitor input filters.

GENERAL ELECTRIC

REGULATED DC POWER SUPPLIES

Improve Performance of Computers and Other Electronic Equipment

These component power supplies can be used in a wide variety of applications where relatively constant d-c voltage is required despite fluctuating line voltages. Computers, process control equipment, and electronic measuring devices are typical applications where demands for accuracy require constant regulation of voltage.

Performance-proved GE d-c power supplies can be designed to suit your needs for either 50- or 60-Hertz power sources.

† May vary $\pm 1\%$. All standard units come equipped with a plate for 19-inch rack mounting.

‡ Indicates approximate percent increase in output voltage due to decrease of load current from full load.

§ Rack mounting plate has four mounting slots on each end. Distance between centers of two outer slots is 7¹/₂ in., between two inner slots 3 in.

¶ Not available for 19-inch rack mounting.

Mounting holes suitable for 1/4-20 screws.
Length of screw may vary with chassis height.

Typical circuit showing voltage stabilizers and filter components.

EFFECT OF INPUT VOLTAGE VARIATION

D-c power supplies can be designed for various input voltages and ranges. With all other variables constant, the output voltage will not vary more than ± 1 percent for a change in input voltage over the rated range of 97 to 130 volts input.

EFFECT OF TEMPERATURE CHANGE

For every 40C change in the ambient temperature, the output voltage level will change approximately one percent.

EFFECT OF FREQUENCY

A change of one percent in frequency will change output voltage level approximately one and one-half percent.

ISOLATION

All d-c power supplies provide electrical isolation between the a-c power source and the d-c load.

POLARITY

GE d-c power supplies can be designed with the polarity you require. All standard units listed can be installed with either plus or minus grounded.

RIPPLE

Ripple levels of one percent R meet most requirements. However, other levels of ripple content can be designed into GE power supplies.

EFFICIENCY

Efficiency ranges from 70 to 85 percent for normal output voltage levels. For unusually low output voltages and low power ratings, some decrease in efficiency may occur.

REGULATION

Load regulation characteristics depend on the rated output voltage and rated power level of the power supply.

Prices subject to change without notice.

GENERAL ELECTRIC

**volt-pac[®]****VOLTAGE
REGULATORS**

- New solid-state control • Precise output voltage control
- Fast voltage-correction rate • Cabinet or rack-mounted models
- Magnetic circuit-breaker protection

General Electric's new automatic voltage regulator line provides regulated output voltages from varying input voltages. Models normally include a motor-operated Volt-Pac variable transformer, associated buck-boost transformers which handle a wide range of input-voltage variation, and a new solid-state control.

Automatic regulators maintain a preselected output voltage level within 1 percent bandwidth, and are temperature compensated from -20 to +40C. They can be bench or floor mounted, or in smaller sizes, mounted in standard relay racks.

† Nominal output voltage operation requires no change in power connection, but does require selecting correct control transformer ratio. When operated at nominal 208 volts output, the regulator will correct for an input range of 181 to 236 volts, with the output voltage adjustable from 199 to 217 volts.

† Specified input voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage will change proportionately with the change in output voltage level selected.

* KVA based on nominal output voltage.

Waveform Distortion

Harmonic waveform distortion is introduced at any load or with any voltage. The output voltage waveform is a precise reproduction of the input waveform.

Adjustable Output Voltage

Output voltage for units nominally rated 115 volts is adjustable from 110 to 120 volts. Output voltage also is adjustable from 220 to 240 volts for units rated 230 volts; from 440 to 480 volts for nominally rated units of 520 volts. Please note that the specified input-voltage range is applicable for nominal output voltage. When operating at any other output voltage within specified range, the input voltage range shifts in proportion with the selected output voltage.

Static-sensing Control

Static-sensing control combined with the new Sylvan-Kettler static-sensing transformer achieve the optimum in automatic accuracy. The voltage regulator is controlled automatically by a dead-band-type voltage-sensitive control circuit using either lamp or zener bridges. The circuit includes magnetic input transformers and an output voltmeter.

TYPICAL SPECIFICATIONS

Regulation Accuracy	±1.0%
Speed of correction	10.4 volt/sec
Output voltage	Adjustable from 110-120 volts
Input voltage	95 to 135, single-phase
Frequency	60-Hertz
Load Range	Zero to full load
Efficiency	Up to 99%
Power Factor Range	0 to 100%
Wave Form Distortion	None
Output Meter	0-150 Volts AC
Ambient Temperature	-20C to +40C
Operating Range	
Protection	Magnetic Circuit Breaker in Power Input Line — Control Circuitry Fused

Prices subject to change without notice.

HIGH VOLTAGE POWER PACKS

The Hipotronics wide range of compact miniaturized power packs with output voltages from 2 to 100 KV and current ratings of 2, 5 or 10 milliamperes are designed for long life and trouble free operation. Advanced high voltage techniques developed by Hipotronics permit greater size and weight reduction than previously possible.

All units are housed in a hermetically sealed MIL-T-27A can and vacuum filled with mineral type transformer oil or epoxy. The insulating medium insures corona-free operation and allows for running the supply at 3 or 4 times normal current rating for long periods of time. The corona free operation precludes component failure caused by long term corona degradation of insulation and guarantees a pure DC output free of any interfering high frequency signals which might possibly influence or affect the system which it is powering.

Every component in the supply is operated at well below its design rating and pre-assembly hipotted at one and one half times its operating voltage.

The output connections are high voltage ceramic type on models 30 KV and below and through plug in re-entrant receptacles for coaxial cables on greater than 30 KV units. Three foot cable assemblies are supplied with each re-entrant bushing type and longer ones are easily assembled if required.

FEATURES

- Hermetically sealed, oil or epoxy filled
- Solid state rectifiers
- 10 year life
- Low ripple
- Good regulation
- Compact, highly miniaturized
- Reversible polarity

Inquiries are invited for units with outputs different than our standards, with built in line regulation, short circuit current limited units, lower output ripple, with 220V, 50/60 cycle inputs or with center tapped output etc.

SPECIFICATIONS FOR ALL MODELS

Input	0-125 volts, output voltages and currents stated for nominal 117 volt input.
Regulation	10 to 15% no load to full load
Ripple	1/2% rms per milliamperere output
Life	10 years at 25°C ambient with rated output voltage and current
Terminations	Ceramic bushings on 30 KV and below models Re-entrant receptacles with 3 foot mating coaxial cables on 40 KV and up models

HIGH VOLTAGE POWER SUPPLIES AND POWER PACKS

Hipotronics has a complete line of unregulated high voltage power supplies with output voltages ranging from 1 to 600 KV and with current outputs from 2.5 ma to 10 amperes.

All units are conservatively designed for continuous use and are available with fully instrumented control consoles or less controls for use in OEM equipment or with existing controllers.

They are designed for maximum equipment and operator protection. The surge devices preclude injury to any component from repeated short circuits at full output and the many safety devices insure operator protection.

FEATURES

- Reversible polarity
- Output shorting relay with discharge resistor
- Surge limiting resistor in output lead
- Continuously variable output control
- Continuously variable overvoltage control (optional extra)
- Continuously variable overcurrent control
- Zero start interlock
- External interlock provision
- Door interlocks
- HV on and off push buttons
- Circuit breaker input
- Functional pilot lights
- Triple range KV meter, 2% accuracy
- Triple range current meter, 2% accuracy
- Surge protection on meters, relays, transformers
- Vernier output (optional extra)

OPAD ELECTRIC COMPANY, INC.

POWER SUPPLIES

POWER SUPPLIES — COMPACT "M" SERIES

*HOW TO ORDER

Select the part number for output voltage and current. This number has a rated input voltage of 118V. If a 220V. input is needed, add the suffix "X" to the part number. For 230V. input, add the suffix "Y", and for 240V. input, add the suffix "Z".

HV-M SERIES Power Packs have these important features:

Input Voltage 0 to rated input voltage* at 50 to 500 CPS.

Output Ratings 0 to 10 milliamperes in accordance with the rating of the power pack.

Ripple 1% RMS or 2.75% peak to peak at rated voltage.

Output Voltage can be varied from 0 to rated voltage and load by means of a variable auto transformer.

Two Output Terminals are isolated from the container, permitting either terminal or both to be operated away from ground.

Exception: The HV750-152M and HV750-502M has a small and a large output terminal. The power pack is normally furnished to deliver a positive output.

Ambient Temperature Range is minus 55° C to plus 85° C (with limited ratings). **Exception:** The HV300-502M, HV500-502M and the HV750-502M are limited to operation at an ambient temperature of 30° C maximum.

Design Life 40,000 hours at 35° C and 25,000 hours at 65° C at rated output. Life is 5000 hours at 85° C if the output current is no more than 80% of the rated current. Useful life is generally double the figure given above if an approximately 3% drop in voltage is tolerable.

Mounting Position: Any.

Altitude up to 10,000 feet operating 50,000 feet non-operating.

Vibration 10 to 55 CPS with a total of 0.06 inches for 2 hours in each plane for all power packs which have a base dimension of 3 3/4" x 9 1/16" or less.

Salt Spray per MIL-Q-151 for 50 hours.

Rectifiers are long life selenium type.

Filter Capacitors are special film types designed for long life.

Hermetically Sealed Container.

Oil Filled Container prevents corona.

Container Finish Zinc chromate primer and light blue-gray lacquer per MIL-L-7178.

Terminals are steatite, solder seal type with solder lug terminals.

Contact your distributor for prices

POWER SUPPLIES — LV SERIES — REGULATED LOW VOLTAGE

Input 105 to 125 volts. 50 to 420Hz.

Output Voltage Catalog items are available in the most commonly used voltages between 12 vdc and 100 vdc.

Regulation

1% for line voltages 105 to 125 vac.

5% for no load to full load.

Temperature coefficient is negative 0.015% per degree centigrade over the temperature range.

SPECIAL FEATURES

- All Solid State
- All Silicon Semiconductors
- $\pm 2\%$ Output Voltage Control
- Remote Sensing Terminals
- Less than 3 MV P-P Ripple and Noise
- 0 to 55° C Temperature Operating Range
- Unique Heatsink Design
- Natural Convection Cooling (NO FORCED AIR)

- Control Circuit maintained in a stable environment
- Input electrically isolated from Output
- Protected from Overload and Short Circuit
- Floating Output Potential allows Positive or Negative Output
- Output terminal, control, pilot light and reset button are mounted on the front panel
- Any mounting position

terado CHARGERS, INVERTERS AND VOLTAGE ADJUSTERS

CHANGES BATTERY CURRENT TO 110 VAC, 60 CYCLE, $\pm 1/2$ CYCLE, REGARDLESS OF LOAD*
CAN BE ADAPTED FOR 50 CYCLE USE †

PORTABLE 117 VOLT A.C. POWER SUPPLY

TRAV-ELECTRIC*†

Operates anything using 117 VAC. 60 cps from 25 amps rechargeable wet storage battery enclosed. Capacity, 175 watts; 125 watts continuous. Frequency stable within $1/2$ cps with load change. Plugs into AC outlet or car cigarette lighter to recharge battery. Charger has automatic overcharge protection. Meter shows charge rate and hours of anticipated output. Size: $10\frac{1}{2}$ x $5\frac{1}{2}$ x 6" h. Shpg. Wt., 30 lbs. including battery; shpg., 36 lbs.
Terado No. 50-160—Net Each.....\$7419

INVERTERS

FREQUENCY STABLE

DUAL CONTINENTAL*†

Transistorized, 600 watts

Converts 12 VDC to 110 V, 60 cycle, 550 to 600 watts. Filtered for tape recorders. Frequency stable within $1/2$ cycle with changing input voltage load. Includes battery cables, remote control, variable AC output. Size: $10\frac{1}{2}$ x $13\frac{1}{2}$ x 6" h. Shpg. Wt., 60 lbs.
Terado No. 50-202—Net Each.....\$32774

CONTINENTAL*†

Transistorized, 300 watts

Same as DUAL CONTINENTAL except: 275-300 watts capacity. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6" h. Shpg. Wt., 30 lbs.
Terado No. 50-191—Net Each.....\$15840

ATLAS*†

Transistorized, 200 watts

Same as DUAL CONTINENTAL except: 175-200 watts capacity. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6" h. Shpg. Wt., 21 lbs.
Terado No. 50-200—Net Each.....\$11453

TITAN*†

Transistorized, 175 watts

Same as DUAL CONTINENTAL except: less remote control; 150-175 watts capacity; on-off switch; AC receptacle. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-201—Net Each.....\$10051

SUPREME*†

Non-transistorized. Converts 12 VDC to AC. Power output, 175-200 W, filtered. Remote control has variable AC output switch and signal light. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6" h. Shpg. Wt., 20 lbs.
Terado No. 50-153—Net Each.....\$8407

RECORDER*†

150-175 watt version of SUPREME, less remote control. Plugs into cigarette lighter. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6" h. Shpg. Wt., 21 lbs.
Terado No. 50-175—Net Each.....\$7667

CHIEF*†

Operates tape recorders, power tools, dictation machines, mixers, blenders, etc. Front AC receptacle connects direct to battery. Toggle switch output control. Ventilated steel case. Size: $3\frac{1}{2}$ x $6\frac{1}{2}$ x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-137—Input, 6 V; AC power output, 75-100 watts. Net Each.....\$5390
Terado No. 50-138—Input, 12 V; AC power output, 100-125 watts. Net Each.....\$53.90

AUTOMATIC*†

Operates automatically from 6 or 12 VDC without vibrator change or switching (6 V, 55-75 watts; 12 V, 85-110 watts). Easy installation into cigarette lighter. For dictation machines, radios, tape recorders, phonographs, heating pads, etc. Steel case. Seal brown baked enamel. Size: $3\frac{1}{2}$ x $6\frac{1}{2}$ x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-134—Net Each.....\$4452

SUPER*†

Single input version of AUTOMATIC above. Size: $3\frac{1}{2}$ x $6\frac{1}{2}$ x 4" h. Shpg. Wt., 8 lbs.
Terado No. 50-126—Input, 6 V; AC power output, 60-75 watts. Net Each.....\$3847
Terado No. 50-127—Input, 12 V; AC power output, 75-100 watts. Net Each.....\$38.47

MASTER*†

Voltage input, 12 V; AC power output, 60-75 watts. Size: $3\frac{1}{2}$ x $6\frac{1}{2}$ x 4" h. Shpg. Wt., 6 lbs.
Terado No. 50-122—Net Each.....\$3255

ELECTRA*

Glove compartment size inverter, available in 12 volt input. Easy installation into cigarette lighter. Vinyl coated steel case with leatherette appearance. Size: 3" x $2\frac{1}{2}$ x $5\frac{1}{2}$ h. Shpg. Wt., 3 lbs.
Terado No. 50-167—Voltage input, 12 V; AC power output, 42-52 watts. Net Each.....\$2130

SENIOR*

Operates radios, lights, phonographs and small tape recorders. Available in 6 V or 12 V input. Simple to install into cigarette lighter. Aluminum case. Seal brown baked enamel. Size: $2\frac{1}{2}$ x $4\frac{1}{2}$ x $2\frac{1}{2}$ h. Shpg. Wt., 3 lbs.
Terado No. 50-115—Voltage input, 6 V; AC power output, 35-40 watts. Net Each.....\$1847
Terado No. 50-116—Voltage input, 12 V; AC power output, 40-50 watts. Net Each.....\$18.47

DYNAMO*

Permits operating AC radios and electric shavers on 12 VDC battery. Power output, 25-30 watts. Size: 2" x 2" x $3\frac{1}{2}$ h. Shpg. Wt., 2 lbs.
Terado No. 50-197—Net Each.....\$1380

AUTO SHAVER*

Operates all electric shavers. Available in 6 V (10-15 W) or 12 V (15-20 W) input. Plugs into cigarette lighter. Polyethylene non-breakable case. Size: $3\frac{1}{2}$ x $2\frac{1}{2}$ x $4\frac{1}{2}$ h. Shpg. Wt., 2 lbs.
Terado No. 50-102—6 V. Net Each.....\$1185
Terado No. 50-103—12 V. Net Each.....\$11.85

ULTRA FINE FREQUENCY STABLE INVERTERS

DUAL CONTINENTAL-3

Converts 12 VDC to 110 VAC, 60 Hz, 550-600 watts. Frequency variation plus or minus $1/4$ Hz with changing input and load. Ideal for operation of fine or critical equipment as: video-tape equipment and instruments. Includes battery cables, remote control and variable AC output. Size: $10\frac{1}{2}$ x $13\frac{1}{2}$ x 6"; shipping weight 60 lbs.
Terado No. 50-202-3—Net Each.....\$41764

CONTINENTAL-3

Same as DUAL CONTINENTAL-3 Except 275-300 watts, capacity—Frequency stable to plus or minus $1/4$ Hz. Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6"; shipping weight 30 lbs.
Terado No. 50-191-3—Net Each.....\$23340

24 VOLT TRANSISTORIZED INVERTERS WITH ULTRA FINE FREQUENCY CONTROL DUAL CONTINENTAL—24 VOLT

Converts 24 VDC to 110 VAC, 60 Hz, 700-800 Watts. Frequency stable to $\pm 1/4$ Hz with changing input and load. Designed for duty in aircraft or other 24 volt D.C. applications. Includes battery cables, remote control and variable A.C. output. Size: $10\frac{1}{2}$ x $13\frac{1}{2}$ x $7\frac{1}{4}$ "; shipping weight 60 lbs.
Terado No. 50-152—Net Each.....\$62123

CONTINENTAL—24 VOLT

Same as 24 Volt Dual Continental; except 350-400 watt capacity—Frequency stable to $\pm 1/4$ Hz; Size: $10\frac{1}{2}$ x $6\frac{1}{2}$ x 6"; Shipping weight 30 lbs.
Terado No. 50-190—Net Each.....\$30535

BATTERY CHARGERS

DYN-A-MITE

Baked seal brown paint over aluminum case. Charge rate 1 amp, both 6 and 12 volts. Size: $1\frac{1}{2}$ x $1\frac{1}{2}$ x $3\frac{1}{4}$ ". Wt., 1 lb.
Terado No. 50-186—Net Each.....\$719

CHARGRITE

Brown baked enamel, ventilated steel case. Charge rate 5 amps, tapers to trickle. 12 volts only. Charge rate meter. Brackets for colling wire provided. Size: $4\frac{1}{2}$ x $5\frac{1}{2}$ x 6". Wt., 7 $1/2$ lbs.
Terado No. 50-194—Net Each.....\$2330

TAPERITE

Brown baked enamel case. Charges 6 amps, or in low position charge automatically tapers to 0. Will not over-charge battery; has charge rate meter. Size: $4\frac{1}{2}$ x $5\frac{1}{2}$ x 6". Wt., 7 $1/2$ lbs.
Terado No. 50-192—Net Each.....\$2842

CHALLENGER

Brown baked enamel, ventilated steel case. Charge rate 6 amps, both 6 and 12 volts. Charge rate meter. Brackets for colling wire provided. Size: $4\frac{1}{2}$ x $5\frac{1}{2}$ x 6". Wt., 5 lbs.
Terado No. 50-189—Net Each.....\$2392

SUPER CHARGER

Brown baked enamel, ventilated steel case. Charge rate 10 amps, both 6 and 12 volts. Color coded meter shows condition of battery and charge rate. Size: $4\frac{1}{2}$ x $5\frac{1}{2}$ x 6". Wt., 7 $1/2$ lbs.
Terado No. 50-181—Net Each.....\$2905

POWERHOUSE

Heavy duty, heavy copper clad, ventilated steel case with handle. Full fast 20 amp charge rate on either 6 or 12 volt batteries, plus trickle charge. Full wave type with 4 silicon rectifiers. Complete with charge rate meter and 6 ft. cable with voltage clamps. Size: $11\frac{1}{2}$ x $6\frac{1}{2}$ x 5". Ship. Wt., 20 lbs.
Terado No. 50183—Net Each.....\$5415

VOLTAGE ADJUSTERS

POLARIS & SATURN

For TV, hi-fi and AC motorized equipment. Change high or low voltage over range of 95-135 V to normal. Input: 110 VAC line. Size: $3\frac{1}{2}$ x $2\frac{1}{2}$ x $5\frac{1}{2}$ ".
Terado No. 50-204—Polaris—Cap., 300 W cont., 500 W int. Wt., 3 lbs. Net Each.....\$11.40
Terado No. 50-172—Saturn—Same as Polaris, but with accurate AV voltmeter. Net Each.....\$1877

APOLLO

Cap. 1200 W Cont. 1500 W int. Wt. 8 lbs. Size: $3\frac{1}{2}$ x $6\frac{1}{2}$ x 4".
Terado No. 50-141—Net Each.....\$2275

KORECT-A-LINE

For CB and Ham radio equipment, monitor and correct abnormal voltage; accurate AC voltmeter. Cap., 300 W cont. Wt., 3 lbs.
Terado No. 50-150—Net Each.....\$1877

INVERTER-CHARGER COMBINATION

Transistorized—Solid State

Frequency Not Controlled

MARK I

Copper baked enamel case. Changes battery voltage to 117 volts. AC capacity 450 to 500 watts. Charges 12 volt storage battery at 20 amps, 10 amps or trickle. Has charge meter. Size: $12\frac{1}{2}$ x $6\frac{1}{2}$ x 6". Shpg. Wt., 21 lbs.
Terado No. 50-131—Net Each.....\$10450

MARK II

Same specifications as MARK I above except inverter capacity is 275-300 watts.
Terado No. 50-132—Net Each.....\$8950

12 VDC POWER SUPPLIES with BATTERY CHARGING FEATURE

POWR-MITE

Brown baked enamel, ventilated steel case. Supply and charge rate 10 amps. 12 volts D.C. Filtered for 1 amp. loads. Includes output meter. Size: $3\frac{1}{2}$ x $4\frac{1}{2}$ x $6\frac{1}{2}$ ". Wt., 10 lbs.
Terado No. 50-105—Net Each.....\$3290

POWR-ALL

Same type as Powr-Mite except: Capacity 25 amperes—continuous 40 amps, intermittent. Two complete circuits. SEPARATE CIRCUIT BREAKERS. Battery Charge rate 25 amps, to trickle. Filtered for 1 amp. loads. Size: $12\frac{1}{2}$ x $6\frac{1}{2}$ x 6". Wt., 21 lbs.
Terado No. 50-106—Net Each.....\$6120

SOLA ELECTRIC

DIVISION OF SOLA BASIC INDUSTRIES

What It Is

Solatron® LVR is the first regulator to combine in one unit the qualities of fast response, "tight" voltage regulation, no moving parts, adjustable output, remote sensing, compactness, and high KVA capacity. The Solatron is a solid-state device with no moving parts, requiring no adjustment, maintenance, or attention. It combines the ruggedness of transformers with the light weight of electronic control circuitry, resulting in a regulator of remarkable compactness. It has great suitability in mounting, and installation.

Solatron® regulators are available as standard units in KVA ranges from 1/2 to 500 KVA, and yet they furnish a degree of regulation associated in the past with small VA capacity constant-voltage transformers and power supplies.

Units are available for single or three-phase applications, for either delta or wye connection depending on the service available or the load requirements of your equipment.

What It Does

Regulation: $\pm 0.5\%$ for line changes. $\pm 1\%$ maximum for any combination of line, load, temperature and frequency changes within limits listed below.

Voltage limits: line $\pm 10\%$, or $+10\%/-20\%$. Frequency 57-63

SINGLE-PHASE (60 Hz ± 3 Hz)

Maximum Output KVA Rating 1	Nominal Output Voltage 2	Output Voltage Adjustability 3	Input Voltage Range 4	Maximum Harmonic Content 5	Catalog Number	Approx. Shipping Weight	Suggested User Price F.O.B. Factory

Other Capacities Available on order from factory. Contact your nearest Sola Electric distributor or representative. (6 to 8 week delivery).
NOTE: 50Hz units are also available.

SOLATRON® $\pm 1/2\%$ LINE VOLTAGE REGULATORS

cycles, 47-53 cycles, or 380-420 cycles depending on model chosen (see catalog listings). Load zero to full load. Temperature 15° to 40°C . Response: correction begins in first $1/2$ cycle and is typically 100% complete in less than 10 cycles of the AC frequency.

Harmonic content: no harmful wave-form distortion.

Adjustable output: output voltage is adjustable $\pm 10\%$ of nominal output voltage.

No maintenance: contains no relays, switches, contacts, solenoids, tap, bearings, or other moving parts. No drive motors, servos, or hand cranks. Requires no maintenance: operates completely unattended.

Current capability: withstands high inrush load currents and momentary overloads.

Motor loads: will handle inrush starting current without serious voltage collapse; provides adequate starting torque; no necessity to oversize KVA rating.

Mounting flexibility: may be mounted on wall, floor, or in equipment being regulated. Large terminal compartment, stud or screw-type terminals, knockouts for ease of wiring and installing.

Remote sensing: sensing leads easily connected to load for remote location of Solatron® LVR or for line drop compensation where desired.

FOOTNOTES

- At unity power factor and nominal output voltage. Although the KW efficiency is greater than 90%, the VA efficiency under worst-condition operation can be 60% for $+10\%/-20\%$ input voltage range units.
- The output voltage regulation is $\pm 0.5\%$ for line voltage changes or $\pm 1\%$ for any combination of line voltage, frequency, load or temperature changes within the limits specified.
- The output voltage adjustability is accomplished by an internal multi-turn potentiometer. Regulation in accordance with note (2) will be maintained at any output voltage setting within the specified adjustable range.
- The input voltage range (either $\pm 10\%$ or $+10\%/-20\%$) is based on the output voltage setting. The output voltage is adjustable $\pm 10\%$ of the rated nominal output by means of an internal multi-turn potentiometer. Therefore, the input voltage range shifts lineally with the setting of this control.
- Maximum additive RMS harmonic content at nominal frequency.
- 3% maximum additive RMS harmonic content may be obtained by using an auxiliary harmonic filter. See selection chart A.
- 3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-neutral). See selection chart B.
- 3% maximum additive RMS harmonic content may be obtained by using three auxiliary harmonic filters (one each line-to-line). See selection chart C.
- Special sensing circuit filters must be ordered when feeding a rectified load. These are furnished at no additional charge.
- F.O.B. Goldsboro, North Carolina. All other units are F.O.B. Elk Grove Village, Illinois.
- The lowest line-to-line load should not be less than 70% of the highest line-to-line load, and the highest line-to-line load equal to, or less than, $1/3$ of the three-phase delta nameplate KVA rating. Additionally, the lowest line current should not be less than 90% of the highest line current.

DIVISION OF SOLA BASIC INDUSTRIES

scrdc-III[®]THE THIRD
DIMENSION IN
POWER SUPPLY

Silicon Controlled Rectifier Regulated D.C. Power Supply . . . Sola

Until now, the user or specifier of regulated power supplies has had two basic choices:

(1) The CVDC or constant Voltage transformer bulk supply — a simple device gaining all of its regulation from the CV transformer. Under a given set of conditions the CVDC provides a total regulation envelope of about ± 10 percent. The CVDC type supply is typically quite economical. (2) A closely regulated transistorized supply . . . usually a series regulated unit providing an overall regulation envelope of $\pm .1$ percent. The cost of this unit is about two to four times the cost of the CVDC.

In between these two cost and regulation extremes, there has always been a need for a supply that performs better than the CVDC but that does not have to be quite as "good" or expensive as the transistorized series regulator.

The SCRDC-III fills this long time void. Now there is a power supply delivering overall static regulation of ± 3 percent costing little more than a CVDC type supply. Generally speaking, the SCRDC-III line is priced about 20 percent higher than the cost of a CVDC.

The SCRDC-III is especially designed for use with logic circuitry and as a bulk power source for point-of-use IC regulators. Here is the true THIRD DIMENSION in power supplies.

SCRDC-III FEATURES . . .

Long Life . . . SOLA SCRDC-III supplies are conservatively designed with quality controlled components, testing, and inspection to insure maintenance operation and long life.

Multiple Operation to Increase Current . . . To achieve higher current ratings than are available as stock designs, paralleling three stock units is recommended. Two modes of parallel operation are possible, master/slave or paralleled outputs. Contact your Sola engineer for details.

Series Connectable . . . To achieve higher output voltage than two or three supplies may be connected in series.

Three-phase Operation . . . Balancing heavy loads on three-phase lines can be achieved by connecting the inputs of three stock units to the same catalog number to the three-phase line and connecting the outputs in parallel as indicated above in "multiple operation."

SCRDC-III PERFORMANCE CHARACTERISTICS

Static Line Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within $\pm 0.1\%$ of nominal or 50 mV., whichever is greater for an input voltage range of 100 to 130 volts, 50/60 Hz.

Static Load Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within $\pm 0.5\%$ of nominal or less for static output load changes within the range of zero to 100%.

Ripple/Pard . . . The SOLA SCRDC-III will maintain the output voltage within $\pm 2\%$ of the nominal or less for both periodic and random load variations. The RMS ripple does not exceed 1% of the nominal, or 30 mV., whichever is greater.

Dynamic Line Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within $\pm 1.0\%$ of nominal or less for step line voltage changes of $\pm 10\%$ within the static load range given above.

Dynamic Load Regulation . . . The SOLA SCRDC-III power supplies are designed to hold output voltage variations to within $\pm 2.0\%$ of nominal or less, for step load changes of up to 25% of the full load rating within the load range of 25 to 100% of full load.

Frequency . . . The SOLA SCRDC-III will meet the above regulation criteria over an input frequency range of 47 to 63 Hz without customizing or jumpering.

Response . . . The SOLA SCRDC-III supply will recover from load changes within the specified range given above to levels within the specified static band in less than 250 milliseconds.

Efficiency . . . The efficiencies of the SOLA-SCRDC-III supplies will vary directly as the output voltage and load. Figure 1 below plots efficiencies as a function of load and output voltage respectively.

Operating Temperature . . . The SOLA SCRDC-III power supply is designed to operate with convection cooling over a range of input ambient temperatures of 0°C to 40°C. The output voltage will vary less than 0.5% over the operating range. Derate 2.5%/°C up to 50°C.

Isolation . . . Isolation between the primary and secondary of the transformer provides electrical separation between the AC source and the DC load.

FIGURE 1

FIGURE 2

FIGURE 3

Fig. 3 Current-limiting action causes output voltage to collapse on overload.

SOLA® CVDC power supplies, available off-the-shelf.

Sola offers a wide range of CVDC type power supplies which are available from stock of your local electronic parts distributor or the factory. These standard designs are available in any quantity and are the result of Sola custom engineering efforts.

Inherently highly reliable, the CVDC supplies are ruggedly built and use simple circuitry. Fast and dependable regulation, current limiting, and high efficiency are provided by the heart of the supply: the Sola Constant Voltage Transformer.

CHARACTERISTICS

Fast, dependable line-voltage regulation: within $\pm 1\%$ or fluctuations of $\pm 15\%$; voltage will return to regulation envelope in approximately 50 milliseconds.

Load regulation: from $1/2\%$ to 8% , one half to full load.

Automatic current limiting: short circuit protection; withstands load faults; high overloads cannot damage power supply or equipment components.

High efficiency: upwards of 75% ; low input-power requirements.

Simplified operation: no adjustments or maintenance; continuous duty.

Convection cooling.

Ripple: 1% rms maximum.

Ambient operating temperature: 50°C maximum.

Constant-voltage Sola transformer provides $\pm 1\%$ regulation for line voltage variations as great as $\pm 15\%$, serves as the heart of CVDC power supplies for voltage-sensitive equipment.

STABILINE® automatic VOLTAGE REGULATOR

- THE MOST EXTENSIVE LINE OF AUTOMATIC VOLTAGE REGULATORS
- RATED OUTPUTS FROM 0.25 TO 275 KVA

Deliver a constant output voltage regardless of variations in input voltage or changes in load current. Conservatively rated, ruggedly built, precision products. Submit specifications for ratings desired but not given in the charts. Input voltage ranges shown are at nominal output voltage; input voltage range shifts with output voltage setting. All are cabinet types; those with other construction also are indicated.

EMT series

Electro Mechanical Transistorized types in ratings from 2.3 to 118 kva. Control circuit is completely transistorized. POWERKOTE Coils in power section permit higher output ratings. Rated accuracy $\pm 0.75\%$ for all variations of line voltage or load current within stated range of unit.

TYPE EMT4115B

EMS series

Electro Mechanical Transistorized types for single or three phase duty with ratings from 25 to 275 kva. Several types available with individual line control for greater application flexibility. Plug-in transistorized control circuit permits quick replacement in event of malfunction.

TYPE EMS42100

TYPE EMK4105R

EMK series

Electro Mechanical high speed, high accuracy assemblies in ratings of 2.5/5.0 KVA. Accuracy $\pm 1.0\%$ of nominal output voltage.

TYPE IES9101

IES series

Solid-state types with accuracy within 100 millivolts bandwidth, efficiency up to 95%, fast response, low distortion and wide operating frequency range. No vacuum tubes, motors, blowers or relays are used. All units have provision for remote sensing and have removable plug-in solid-state circuit boards.

All-boost Marine

Electro Mechanical Transistorized type EMT10228 is fully enclosed in a weatherproof cabinet. Well suited for marine or industrial applications where equipment must withstand effects of dust and moisture. Has 6 KVA rated output.

TYPE EMT10228

Militarized

Standard Electro Mechanical and Electro Mechanical Transistorized types that meet the requirements of applicable military specifications. Type EMTH41007MH is $3\frac{1}{2} \times 6 \times 4\frac{1}{2}$ "; type EM4108MCR fits standard 19" relay rack. Accuracy $\pm 1.0\%$.

TYPE EM4108MCR

Overvoltage Detector OVK100

TYPE OVK100

Solid-state voltage level detector used with STABILINE Automatic Voltage Regulators. Actuates relay contacts when monitored voltage exceeds preset level. Relay contacts can be used to actuate protective equipment in a latching (relay remains closed) or nonlatching (relay automatically resets) connection. Trip level adjustable from 110 to 150 volts. Adaptable for higher voltage operation.

TYPE EMT4104BUT

Types EMT4104B, (U), (UT)

Have two primary windings for parallel or series (120 or 240 volt) duty. Type EMT4104B is cabinet enclosed; EMT4104BU is of open construction; EMT4104BUT has components screened or enclosed.

▲At 400 hertz. †Also available as rack model (suffix R when ordering). ¶For 60 hertz operation only.
 *Can also be operated on an input range of 95 to 135 volts with a rating of 57 amperes, 6.6 kva and a correction rate of 0.075 seconds per volt.
 ‡Also available as rack (suffix R when ordering) or wall mounted (suffix W when ordering) models.
 †Unit can be converted for 208 volt operation by simple tap changes. Input and output voltage ranges change proportionally.
 *At nominal output. Shifts with output voltage setting but not proportionally.
 †Also available in open construction (suffix U) and with screened and enclosed (suffix UT) construction.
 †At nominal output. Shifts proportionally with output voltage setting.

STABILINE®

FULL RANGE
REGULATOR CONTROLLERS

TYPE FR500MP

For use with any motor-driven

POWERSTAT®
Variable
Transformer
to provide
full range:

1

REGULATED AC VOLTAGE

—Regulates output voltage from any motor-driven 120 or 240 volt 50/60 hertz, single phase POWERSTAT Variable Transformer. For three phase, the unit monitors one line-to-neutral or one line-to-line voltage. Can be used for 480 volt duty by using step-down transformer. Output voltage remains within a 2-volt band on 120 volts and within 4-volt band on 240 volts.

2

REGULATED AC CURRENT

—Combined with POWERSTAT Variable Transformer, current/voltage transformer and current transformer, the unit will maintain constant output current accurate within $\pm 1\%$ of the maximum current setting.

3

REGULATED DC VOLTAGE—

Combined with a POWERSTAT Variable Transformer and a user-supplied d-c power supply, the unit provides regulated d-c voltage. Supplied for d-c use.

WANLASS TECHNOLOGY

Wanlass Electric Company was founded and is being perpetuated on contribution to technology for improved power conversion and conditioning. Toward this Wanlass has provided the personnel, facilities and motivation to lead the industry in the technologies that apply. In addition to the unique and proprietary technologies summarized below, the company is widely experienced in all techniques of design and construction that lead to better performance to specific requirements. The company's capabilities include the use of all state-of-the-art techniques such as magnetics, SCR, solid-state and high frequency switching; the use of conventional magnetic materials and/or ferrites; and the engineering know-how to produce units in any rating from microwatts to megawatts.

THE WANLASS PARAX™. This revolutionary concept controls AC power electrically, without mechanical or solid-state elements, by utilizing parametric techniques to eliminate the need for mutual inductance in electrical energy transformation. By rhythmically varying the inductance of a magnetic circuit, the Wanlass PARAFORMER™ achieves transient free energy transfer without relying on mutual inductance. While transient free energy is one of the most significant advantages of this advanced concept, the PARAFORMER™ also regulates voltage, exhibits minimum waveform distortion, provides electrical isolation and transforms voltage.

Another of its useful properties is bilateral filtering . . . the ability to prevent line voltage irregularities from being transmitted to the load and load voltage irregularities from being reflected back to the line. A PARAFORMER™ device will actually arrest lightning without damaging the secondary winding. This new technology has been applied to voltage regulators, filters, AC and DC power supplies, inverters, DC converters and frequency converters to meet custom specifications. A variety of off-the-shelf products utilizing the PARAFORMER principle are marketed under the trade name PARAX™.

PARAFORMER™ SYMBOL

THE WANLASS VARAX™. The VARAX™ is another all-new magnetic voltage regulating concept invented by Wanlass. The component is an electrically variable inductor which can be controlled over a wide range of inductance through the application of small DC control currents. It is generically related to the Wanlass PARAFORMER™ and is significantly different in concept and performance from the classical saturable reactor. Application of DC current to the control winding increases the effective reluctance of the AC magnetic circuit, hence decreases its inductance. Maximum inductance occurs with zero control current and decreases with increasing control current, reaching a minimum at maximum control current. When compared with conventional saturable reactors, the VARAX™ device offers smaller size, lighter weight, greater reliability, waveform distortion and lower cost. An additional, important characteristic of the VARAX™ is the inherent decoupling of AC power from entering the DC control circuitry. Since there are no semiconductors used in series with the load, extremely high overload currents are easily handled. Spike-free regulation to $\pm 0.5\%$ and efficiency to 95% is typical for units in ratings from 500VA to 5000VA output from 100-130 VAC single-phase, 47-63 Hz input.

VARIABLE INDUCTOR SYMBOL

THE WANLASS CLIP-AC™. This proprietary voltage regulating technology utilizes circuitry that symmetrically clips the peaks of unregulated input voltage to produce a constant output waveform, which can then be transformed into a variety of regulated output voltages through the use of an appropriate transformer. The circuit dissipates the peaks of the incident sinusoidal waveform in the following way: Output voltage is monitored by a sensor which uses a zener diode as a reference. In turn, control circuitry adjusts the clipping level of a pass transistor to maintain the desired constant output. Economy of design results from the use of a floated reference and a diode bridge to enable the same pass transistor to be used on both halves of the AC cycle.

Short duration surge currents from capacitor charging, motor or lamp starting loads, etc. are by-passed around the pass transistor by an SCR triggered by a bias resistor between the transistor and sense transformer. By the appropriate choice of the sensor, and the quality of the solid-state componentry, any desired AC voltage regulation precision can be achieved with true RMS, average or peak voltage held to a constant, in ratings up to 1KAV.

NOTE: The OEM Products in the catalog are covered by the following United States Patent Numbers where applicable: 3,403,323 - 3,409,822. Other Patents both U.S. and Foreign pending.

WANLASS PARAFORMER™ PRODUCTS FOR OEM AND SYSTEM APPLICATIONS

MODEL NO. PEC-60

ORDER A PARAFORMER™ TODAY AND SEE FOR YOURSELF

Knowing that every conceptually new component must be carefully tested by prospective users before it can be included within their own equipment, Wanlass Electric has available for immediate delivery a 60 watt Paraformer (Model PEC-60). May we suggest that you buy one of these units and satisfy yourself relative to its amazing properties. When you place your order, be sure to ask for our new book entitled "The Wanlass Paraformer™". This treatise on the subject of parametric power conversion discusses the theory and application of parametric devices and will assist you in evaluating your PEC-60.

WANLASS "PIC" LINE — PARAFORMER/SERIES REGULATOR ALL SILICON SOLID-STATE D.C. POWER SUPPLIES

POSITIVE PROTECTION! Provides over 100 DB noise attenuation for all sensitive loads! Because the Wanlass Paraformer can be employed in the manner as any other power, isolation or rectifier transformer, combining it with a series regulator D.C. Power supply, provides positive protection for voltage sensitive loads. The "PIC" line therefore represents truly "fail-safe" load conditions.

WANLASS PHASAC™ — SINGLE TO THREE PHASE CONVERTER

WANLASS MODEL NO. PAC-1000
PHASAC™ 1-3 Phase Converter.

FEATURES:

Operates from a standard single phase wall plug.
Phase Locked.
Economical Packaging for OEM Applications.

DESCRIPTION

Wanlass is pleased to introduce an all solid-state passive static converter for conversion of single to three phase A.C. power. The PAC-1000 is basically a Paraformer™ device which converts single phase AC line voltage through the use of the inherent phase shift phenomena of the PARAFORMER™. Both Wye or Delta outputs are available from the device.

SPECIFICATION ON MODEL NO. PAC-1000 — 1 ϕ — 3 ϕ 60 Hz Converter

A.C. INPUT:	105 to 125 VAC, 60 Hz, Single Phase
A.C. OUTPUT	Three Phase, 60 Hz, 120 VAC (4-wire), 208 VAC (3-Wire), 240 VAC (3-Wire)
POWER:	1 KVA, 333 VA Per Phase Output
CIRCUITRY:	Parametric Converter with regulation of $\pm 5\%$.
CONNECTION:	Wye (4-Wire) and Delta (3-Wire) Outputs
SIZE:	7"Hx6"Wx17"L (Suitable for Rack Mounting)
WEIGHT:	48 Lbs.

SPECIFICATIONS ON MODEL NO. PAC-4-1000 — 1 ϕ — 3 ϕ 400 Hz Converter

A.C. INPUT:	105 to 125 VAC, 400 Hz, Single Phase. All other specifications are the same as those shown above for the Model No. PAC-1000.
SIZE:	7.5"Hx5"Wx17"L.
WEIGHT:	50 Lbs.

WANLASS VARAX MULTIFREQUENCY POWER CONDITIONERS

VARIABLE INDUCTOR TYPE AC VOLTAGE REGULATORS... ALL STATIC-REGULATED A.C. POWER AT LESS THAN 15¢ PER WATT!

(Designed to replace ferroresonant type constant voltage transformers and silicon controlled rectifier type A.C. Regulators)

GENERAL DESCRIPTION

The Wanlass Variable Inductor Type A.C. Line Voltage Regulator is a major breakthrough in magnetic regulation of A.C. power. Because no silicon controlled rectifiers or transistors are used in the power circuits the reliability of this type of regulator makes it a very desirable device where continuously regulated uninterrupted power is a must! It is especially well suited for remote or unattended locations. Because of the new variable inductor regulation technique, the VVR is very economical, light in weight and small in size. Since it is a closed loop regulating device, it is frequency insensitive and provides true rms regulation for line AND load, with efficiency of up to 95% at maximum load.

VVR units are a ideal source for high starting current loads such as motors, lamps, heaters a combination of these loads and all lagging power factor loads. Because of the series inductor in the line, they inherently provide line transient suppression, VVR units incorporate no moving parts, are completely static and produce no spikes or conducted R. F. I.

SPECIFICATION ON VVR TYPE A.C. VOLTAGE REGULATORS

A. C. INPUT: 105-130 Volts 47-63 Hz, 1 phase

A. C. OUTPUT: See "Tabulation of Available Units"

REGULATION: LINE $\pm 1\%$ for 105 to 130 V. line change

(true RMS) LOAD $\pm 1\%$ for 400 to 1500 W. load change
($\pm 1\%$ for no load to full load with optional ballast inductor)

PROTECTION: Inherent short circuit protection;

TRANSIENT SUPPRESSION: Inherently suppresses 200 volt transients protecting both regulator and load being powered.

OPERATING TEMPERATURES: 0°C to +55°C up to 85°C with 200 CFM of forced air cooling

EFFICIENCY: Over 90% at full load

TABULATION OF AVAILABLE UNITS

MODEL	MAXIMUM CONTINUOUS RATING	RMS OUTPUT VOLTAGE	INDUCTIVE LOAD REQUIRED*	MOTOR LOAD CORRESPONDING TO INDUCTIVE LOAD REQUIRED
VVR-1500	1500 V.A. (1)	120 volts	1.8A to 3.6A	1/2 to 1/4 HP
VVR-1501	1500 V.A. (1)	120 volts	3.6A to 5.4A	1/2 to 1/4 HP
VVR-1502	2000 V.A. (2)	120 volts	5.3A to 8.0A	1/4 to 1/2 HP
VVR-2500	1500 V.A.	230 volts**	1.8A to 3.6A	1/2 to 1/4 HP

*Because of the unique operating characteristics of this device it functions best with combination inductive-resistive loads. The percentage inductive load indicated will insure operation within the specification indicated above. Where load is purely resistive (1.0 power factor) a ballast inductor Part #BI-1500 is available for use with the Model VVR-1500 Regulator.

(1) Units capable of 1800 V.A. on basis of 80% duty cycle.

(2) Unit capable of 2250 V.A. on basis of 80% duty cycle.

* Inductive load should be within the lagging power factor range of 0.45 to 0.65.

** For 210-250 V., 50/60 Hz input.

WANLASS CLIP-AC C-3000 LINE OF E RMS AC VOLTAGE REGULATORS

CLIP-AC™ Input Trace Superimposed
Output Trace,
"Peak Clipping" of Output Waveform

THE CLIP-AC™ PRINCIPLE

The CLIP-AC™ Principle of AC voltage regulation is shown in Fig. 1 and Fig. 2. It will be noted that regulation is achieved by symmetrically clipping (dissipating) the peaks of the incident sinusoidal waveform. The unretouched scope photograph reproduced as Fig. 1 shows that except for these peaks, the CLIP-AC™ output waveform is identical to the input waveform.

Fig. 2 shows in block diagram form how CLIP-AC™ regulation is achieved. The output voltage is continuously monitored by a sensor which uses a zener diode as a reference. The associated control circuitry in turn adjusts the clipping level of the pass transistor in order to maintain the desired constant output. Economy of design has been realized by using a floated referenced (with RMS sensor) and a diode bridge to make it possible for the same pass transistor to be used on both halves of the AC cycle. The SCR shown in the block diagram is used to accommodate short duration surge currents such as those encountered in charging capacitors, starting motors or starting lamp loads. Under such conditions, the bias resistor triggers the SCR and the excessive current surge is by-passed around the pass transistor. Should these excessive current conditions persist, the input fuse would be blown, thereby protecting the unit. Under normal operating conditions the SCR is inoperative. The output autotransformer steps the output voltage up to the 115V level and acts as a sense transformer as well.

In the C-3000 voltage regulator line, the appropriate choice of the sensor and the quality of the solid state componentry, provides the desired AC voltage regulation precision with true RMS voltage being held constant.

WANLASS CLIP-AC C-3000

117V. A.C. VOLTAGE REGULATORS

C-3003

C-3006

C-3012

C-3025

C-3050

C-3100

HERE ARE SOME OF THE OUTSTANDING CHARACTERISTICS OF WANLASS C-3000 VOLTAGE REGULATORS USING THE CLIP-ACT™ PRINCIPLE

C-3000 FEATURES

- Line and Load Regulator
- Wide Input Voltage & Frequency Range
- Peak Clipping Regulation Technique
- Quiet Operation—No Magnetic Noise
- Repairable All Silicon Solid-State Circuits
- High Efficiency
- Suppresses Line Transients
- Excellent Surge Loading Characteristics
- Instantaneous Response
- "Clipped" Sinusoidal Output
- Excellent Temperature Coefficient
- No "Magnetic" Fields Nor RFI

C-3000 APPLICATIONS

- Instruments Pre-Regulator
- Electronic Systems
- Electrical Systems
- Photo-Optical Systems
- Initial Surge Loading Applications
- Motor Starting and Regulation
- All Resistive Loads such as Lighting Heating

APPLICATION

The CLIP-ACT™ type AC regulator is the logical successor to the ferroresonant transformer for the bulk of the AC regulation requirements for up to 1

	CLIP-ACT™ Principle	Ferroresonant Principle
Input Frequency	Wide range acceptable without degradation in regulation (47-420Hz typical)	Single frequency (output voltage shifts 1.5% for 1% change in input frequency)
Line Regulation	Any reasonable degree of precision (0.1% easily achievable)	Cannot be modified (1-3% typical)
Load Regulation	Load compensation circuitry inherent in design (1% typical)	No compensation (5-7% typical)
Power Factor	No problem	Shifts output voltage level appreciably
Phase Shift	None	Appreciable — dependent on load current
Response Time	Typical 10-50 μ sec	Typically 25,000 μ sec
Cost	Smaller and Cheaper—less material content	Inherent weight and expense of iron and copper
Size		
Weight	(typically 50%)	

C-3000 SPECIFICATIONS

A.C. INPUT: 100-130V., 1-Phase, 47-420 Hz
 A.C. OUTPUT: 117V. nominal (see table of Model Numbers and ratings below)
 Surge output rating: 400% of full power rating for 10 seconds
 REGULATION (RMS): $\pm 0.5\%$ (for $\pm 10\%$ A.C. line change)
 $\pm 0.5\%$ (for 10% to full load change)
 TYPE OF VOLTAGE REGULATION: True RMS with RMS sensor type reference
 REGULATION TECHNIQUE: Peak Clipping
 POWER FACTOR REGULATION: $\pm 0.5\%$ (+0.7 to -0.7)
 FREQUENCY REGULATION: $\pm 0.5\%$
 EFFICIENCY: 75% minimum at nominal input voltage full load
 PHASE SHIFT: None
 RESPONSE TIME: 10-50 microsecond
 TEMPERATURE COEFFICIENT: 0.025% per degree C
 OPERATING TEMPERATURE: -20°C to +50°C. Convection self-cooling; no external heat sinking required
 OVERLOAD PROTECTION: Fused against overloads and short circuits

GENERAL DESCRIPTION

The CVR-120 is a CLIP-ACT™ type peak clipping AC regulator designed specifically for use as the regulating component for your D.C. power supply designs. By symmetrically clipping the peaks of the unregulated input voltage, a constant peak-to-peak output waveform is produced as described on the previous page. This voltage can then be transformed into a variety of regulated output voltages through the use of an appropriate transformer. Rectification and passive filtering of these resultant voltages will then produce regulated D.C. output voltages.

IMPORTANT FEATURES INCLUDE:

- (1) **LOW COST** — one regulator element provides the regulation for many separate outputs.
- (2) **SIZE AND WEIGHT** — 120 watts of regulated power for 10 ounces!
- (3) **ADJUSTABLE OUTPUT VOLTAGE** — simple compensation for your manufacturing tolerances.
- (4) **FREQUENCY INSENSITIVE** — no variation of output voltage with varying line frequency. Use the same unit for 50, 60 and even 400 Hz power requirements.
- (5) **LINE AND LOAD REGULATION** — precision unattainable with ferro-resonant transformers.

SPECIFICATIONS:

WANLASS DUAL OUTPUT D-OEM-1 DC POWER SUPPLIES

WANLASS NEW MODEL NO. D-OEM-1

The new dual output Wanlass Model No. D-OEM-1 is a most economical solution to system power supply needs for general purpose (lamps-relays, etc.) and precision (integrated circuits) D.C. power. The units 24V. D.C. provides 2 amperes of general purpose power while the 5V. D.C. output supplies 1 ampere of precision D.C.

REGULATED ECONOMY VARIABLE BENCH AND DUAL RACK MOUNT D.C. POWER SUPPLIES DESIGNED ESPECIALLY FOR INTEGRATED CIRCUIT, MOS/FET AND OPERATIONAL AMPLIFIER CIRCUIT LOADS.

Available in two different models, one providing 0 to 7 volts at 5 amps and the other a dual output of 0-18 volts at 1.25 amps each. The units are so designed that in the case of the MAVERICK I it can be seriesed or paralleled with a like unit to provide higher voltage and/or current while the dual output MAVERICK II can have its dual output seriesed or paralleled to provide higher voltage and/or current.

SPECIFICATIONS:

A.C. INPUT: 105-125 volts, 1 phase, 47-63 Hz.
D.C. OUTPUT: See Tabulation of Models and Ratings Available
REGULATION: $\pm 0.1\%$ or 5 mV for line and $\pm 0.1\%$ or 5 mV for load
RIPPLE: 0.01% or 1 mV RMS maximum
OUTPUT IMPEDANCE: 10 Milliohms maximum from DC-1 KC
FEATURES: Adjustable Automatic Current Limiting for overload and short circuit conditions. Adjustable from 0-110% current.
 Remote Sensing with auto-revert to local in the case of a disconnected or broken sense lead.
 5 Ft. 3-wire input cord with grounded plug
 Front & Rear output terminals
 On-Off & Meter Selector Switches on Front Panel
 Combination Voltmeter/Ammeter
 Front Panel Voltage Adjust
 Front Panel Current Limit Adjust
 Reset-Circuit Breaker on rear panel for A.C. Input protection against catastrophic failure. (No fuse to replace!)
 Floating Output — Either positive or negative may be grounded
 Dual Rack Mount — $\frac{1}{2}$ of Rack Mounting Hardware is furnished with each unit
 Natural Convection Cooling for 0-45°C operating temperature
DIMENSIONS: 8.5"Wx5.25"Hx8"D (Dual Rack Mount: 19"Wx5.25"Hx8"D)
WEIGHT: 9 Lbs.

CLASS "BRUTES" — HIGH POWER SLOT SUPPLIES

**ECONOMY
by
DESIGN**

**BRUTE II; REGULATED
5-50 V @ 12 A and/or
24A.**

FOR HIGH POWER D.C. SLOT SUPPLY REQUIREMENTS, CHOOSE ONE OF THE THREE WANLASS WIDE VOLTAGE RANGE "BRUTES"!!! AT LOWER THAN "SLOT" SUPPLY PRICES!

NO NEED TO STOCK A VARIETY OF "SLOT" SUPPLIES — ONE UNIT PROVIDES WIDE OUTPUT CONTINUOUSLY ADJUSTABLE VOLTAGE RANGE OF 5 TO 50 VOLTS OR 2-25 VOLTS IN RATINGS OF 300, 600 and 1200 WATTS!

GENERAL DESCRIPTION

High Efficiency, High Power, Low Cost, Quiet Operation and Immediate Availability are features of the new WANLASS "BRUTES"! These Silicon Controlled Rectifier Regulated D.C. Power Supplies employ high reliability phase control for power regulation. The efficient, noise-free operation is achieved through the use of a series inductance and capacitor filter circuit.

SPECIFICATIONS:

A.C. INPUT: 115/230 V $\pm 10\%$, 1 ϕ , 47-63 Hz
D.C. OUTPUT: See Tabulation
REGULATION:
 Line: $\pm 0.1\%$ or 50 mV
 Load: $\pm 0.1\%$ or 50 mV
RIPPLE: 1% or 500 mV RMS
PROTECTION: Adjustable Current limiting for overload & short circuit protection.
NOTE: Unit also features adjustable "damping" for reactive loads.

A.R.R.L. PUBLICATIONS

QST. Ranks high among the leading technical publications of the world. The oldest continuously published radio magazine (it was founded in 1915), its technical articles are aimed at all classes of radio enthusiasts. Construction articles are clearly illustrated with pictures and diagrams. Typography and clarity are tops. General interest articles and special columns abound. Complete advertising coverage. Truly, the "complete magazine on amateur radio." **QST and ARRL membership, \$6.50 in USA and Canada (US Funds), \$7.00 Elsewhere.**

The RADIO AMATEUR'S HANDBOOK. Internationally recognized as one of the most valuable and widely used books in electronics, the Radio Amateur's Handbook is universally consulted by both amateur and professional alike. Its more than 700 pages are annually revised and modified in the light of current application and technique. The Handbook is found on the desks of executives, engineers, technicians and purchasing agents of the radio industry as often as in the shacks of radio amateurs throughout the world. Twenty-five chapters plus a catalog section including data on all types of vacuum tubes and semiconductors **\$4.00**

HOW TO BECOME A RADIO AMATEUR. Pointing the way for the beginner, tells how to get started in this fascinating hobby. Special emphasis given to the needs of the Novice licensee with several complete simple stations featured **\$1.00**

The RADIO AMATEUR'S LICENSE MANUAL. Study guide and reference book, the License Manual points the way toward the coveted amateur license. Complete with typical questions and answers to all of the FCC amateur examinations — it provides an ideal means of self-study and examination. Continually kept up to date. Complete FCC regulations included. **\$1.00**

The ARRL ANTENNA BOOK. A complete book on antennas. Its fifteen chapters are divided into two principal divisions: (1) a basic text on antennas and transmission lines, wave propagation and its relationship to antenna design, and the performance characteristics of directive antenna systems, and (2) specific designs for a multitude of antennas for various amateur bands. **\$2.50**

The MOBILE MANUAL FOR RADIO AMATEURS. It is a collection of articles on tried and tested equipment that have appeared in QST. Contents include a section on receivers, transmitters, antennas and power supplies. A "must" for anyone interested in the installation, maintenance and operation of mobile stations. **\$2.50**

The RADIO AMATEUR'S OPERATING MANUAL. A ready reference source and guide to good operating practices. Written for the amateur who prides himself on good operating procedures. **\$1.50**

A COURSE IN RADIO FUNDAMENTALS. A complete course of study for use with the Radio Amateur's Handbook, it applies the time-tested principle of "learning by doing." Study assignments, experiments and examination questions make this book equally applicable to individual home study or classroom use. **\$1.00**

HINTS AND KINKS. If you build equipment and operate an amateur radio station you will find Hints and Kinks a mighty valuable book in your shack and workshop. More than 300 practical ideas give you a helping hand at all times. **\$1.00**

UNDERSTANDING AMATEUR RADIO. Written for the beginner. Explains in simple language the elementary principles of electronic and radio circuits, tells how transmitters, receivers and antennas work. Includes complete how-to-build-it information on low cost gear — receivers, phone and code transmitters up to 150 watts, v.h.f., measurements, and easy-to-build antenna systems. A "must" guide for every newcomer in setting up and operating his amateur station **\$2.50**

THE RADIO AMATEUR'S V.H.F. MANUAL. A thorough treatment of v.h.f. Contains the first authentic history of v.h.f. ever written. Covers receiving and transmitting principles, techniques and construction; antenna and feed system design, construction and adjustment; u.h.f. and microwaves; test equipment, construction and use; interference, causes and cures; v.h.f. hints and kinks. Emphasis throughout is on tried and tested equipment and practice. A book about things that work and the ideas behind them. **\$2.50**

SINGLE SIDEBAND FOR THE RADIO AMATEUR. This third edition of a popular ARRL publication is a digest of the best SSB articles that have appeared in QST. The newcomer to Single Sideband as well as the experienced SSB user will find it indispensable. Includes discussions of theory and practical how-to-build-it descriptions of equipment. Covers reception and transmission. **\$2.50**

LEARNING THE RADIOTELEGRAPH CODE. Supplying the key toward mastery of the International Morse Code, this publication trains you to handle the code skillfully and easily. Based on the accepted method of "sound conception," it is a boon to the beginner without access to the help of an experienced operator or code machine. Practical material for both home study and classroom use is included **50c**

ARRL WORLD MAP. Printed in eight colors on heavy map paper with countries clearly outlined. Call letter prefixes printed on the countries and in the margin. Continental boundaries and time zones plainly marked. Thirteen countries have call districts indicated. An equi-distant azimuthal projection centered on Wichita, Kansas. Prepared by ARRL and Rand-McNally. **\$2.00**

QST BINDERS. No need to let your copies of QST rest in a disordered pile. . . . A QST Binder will keep them neat and orderly. Sturdy binders hold a one year file, protecting and preserving your copies. QSTs in the Binder open and lie flat at any page permitting quick and easy reference **\$3.00**

ARRL LIGHTNING CALCULATORS. Quick as a flash the answer is yours when you use an ARRL Lightning Calculator to solve radio problems. TYPE A provides rapid, accurate solutions of problems involving frequency, inductance, capacity. TYPE B provides direct reading answers to Ohm's Law problems involving resistance, voltage, current, power. An invaluable aid for the amateur, technician or engineer. **\$1.50 each**

LOG BOOK. Record keeping made easy. Fully ruled 8½ by 11 inch pages with legible headings permitting all necessary entries. Spiral bound to lie flat when open. **50c**

MINILOG. Mobile and portable operational needs are met by this pocket size log. Spiral bound, 4 by 6 inch pages. Headings for all necessary information. **30c**

RADIOGRAMS. First impressions are important. Official ARRL Radiogram Forms add prestige; informs the addressee about amateur radio. Per pad of 70 blanks, **35c**

The AMERICAN RADIO RELAY LEAGUE, Inc.

RCA

TECHNICAL LITERATURE

THE MOST AUTHORITATIVE IN THE INDUSTRY

TECHNICAL MANUALS

Use 9 easy-to-understand and illustrated manuals (8 1/4" x 11 1/4") cover theory, applications and circuits, as well as performance data, for RCA electronic components and devices. Inexpensive and current reference sources on receiving tubes, transmitting tubes, photoconductive devices, transistors, tunnel diodes, and other semiconductor products.

RCA SOLID-STATE HOBBY CIRCUITS MANUAL — HM-90 — 224 pages. A remarkable book for electronic hobbyists, experts, teachers, and students. Features 35 different solid-state circuits. Contains theory, circuit operation, construction practices, and trouble shooting. Price \$1.75.*

RCA TRANSISTOR, THYRISTOR AND DIODE MANUAL — SC-14 — This new 656-page manual, the successor to the popular RCA TRANSISTOR MANUAL series, contains text, data, and circuit information on bipolar and MOS transistors, thyristors, silicon rectifiers, and other types of semiconductor diodes. Price \$5.00.*

RCA TUNNEL DIODES — TD-30. 160-page design manual written specifically for circuit designers... describes tunnel-diode theory for rectifying and micro-wave applications. Price \$5.00.*

RCA LINEAR INTEGRATED CIRCUIT FUNDAMENTALS — IC-41 (8 3/4" x 5 3/4") — 352 pages. Well-illustrated manual covering the basic principles involved in the design and application of linear integrated circuits. Includes description of silicon monolithic fabrication process, derivation of design equations and performance criteria, and schematic diagrams of silicon integrated circuits for use in a variety of linear applications. Price \$2.00.*

RCA SILICON CONTROLLED-RECTIFIER EXPERIMENTER'S MANUAL — KM-71 (8 3/4" x 5 3/4") — 6 pages. Contains schematic drawings and critical working control circuits which can be made with one or more basic RCA experimenter's kit (KD2105) and two add-on sensor kits (KD2106, KD2110). Also contains basic semiconductor device theory, construction tips, and trouble-shooting procedures. Price 95 cents.*

RCA PHOTOTUBES AND PHOTOCELLS — PT-60. First edition contains 192 pages on phototubes and photocells... selection chart for multi-tube phototubes... data for 90 photosensitive tubes. Price \$1.50.*

RCA TRANSMITTING TUBES — TT-5. More than 180 power tubes described in 320 pages... circuits for transmitting and industrial applications... application guide. Price \$1.00.*

RCA POWER CIRCUITS — SP-51 — 448 pages. Contains design information for a broad range of power circuits using RCA silicon transistors, rectifiers, and thyristors (SCR's, diacs, and diacs). Shows design examples and actual circuits. Price \$2.00.*

RCA RECEIVING TUBE MANUAL — RC-26. 656 pages containing data for 1400 Tube types including black-and-white and color picture tubes... new circuits including parts list... 46 page chart streamline data on RCA discontinued and renewal types. Price \$1.75.*

REFERENCE and SERVICE PUBLICATIONS

RADIOTRON DESIGNER'S HANDBOOK — RDH-05. Price \$7.00.*

TRANSISTOR SERVICING GUIDE — IA1673. Price \$3.50.

COLOR TV SERVICE HANDBOOKS — IA1553 — 960 — 1966. Price \$1.50.

IA1759 — 1967 — 1968. Price \$2.00.

FIELD SERVICE GUIDES — RCA COLOR TV RECEIVERS, 1955-1968. ERT-200, 1955-1966. Price 2.00. ERT-201 — 1967-1968. Price 1.60.

COLOR TV TROUBLE SHOOTING PICT-O-GUIDE — IA1389. Price \$5.75.

"BY-STAGE" GUIDE TO COLOR-TV RECEIVERS — ERT-205. Price 40 cents.

TV SERVICING — TVS-1032. Price 50 cents.

Semiconductor Devices

■ **DESIGN OF TRANSISTOR SWITCHING CIRCUITS FOR DATA-PROCESSING EQUIPMENT** — CTG-161. Price 75 cents.*

■ **GUIDE TO RCA SOLID-STATE PRODUCTS** — SPG-201-F. Price 35 cents.*

■ **INTRODUCTION TO JUNCTION TRANSISTORS** — 4T86-B. Single copy free on request.

■ **MOS FIELD EFFECT TRANSISTORS PRODUCT GUIDE** — MOS-160A. Price 20 cents.*

■ **MOUNTING HARDWARE FOR RCA SEMICONDUCTOR DEVICES** — MHI-300B. Single copy free on request.

■ **PHOTOCELLS — SOLID-STATE PHOTOSENSITIVE DEVICES** — CSS-800A. Price 35 cents.*

■ **PHOTOCONDUCTIVE CELLS** — File No. 312. Single copy free on request.

■ **POWER TRANSISTORS, TYPICAL AUDIO AMPLIFIER CIRCUITS** — ATC-500. Single copy free on request.

■ **RECTIFIER STACKS AND BRIDGES, DIFFUSED JUNCTION SILICON** — SRS-300. Price 20 cents.*

■ **RF POWER TRANSISTORS** — RFT-700E. Single copy free on request.

■ **SILICON SIGNAL TRANSISTOR QUICK CROSS-REFERENCE DIRECTORY** — PHP-150. Price 15 cents.*

■ **SILICON VHF TRANSISTORS APPLICATION GUIDE** — 1CE-228. Price 50 cents.*

■ **THYRISTORS — QUICK-REFERENCE GUIDE** — SCR-500B. Price 30 cents.

■ **TOP-OF-THE-LINE SOLID-STATE REPLACEMENT GUIDE** — SPG-202H. Price 20 cents.*

■ **TRANSISTORIZED VOLTAGE REGULATOR APPLICATION GUIDE** — 1CE-254. Price 25 cents.*

Integrated Circuits

■ **INTEGRATED CIRCUITS MOUNTING AND CONNECTION TECHNIQUES** — 1CE-338. Single copy free on request.

■ **INTEGRATED CIRCUITS PRODUCT GUIDE** — COL-820B. Price 25 cents.*

■ **MPDTL INTERCHANGEABILITY GUIDE** — 1CE-368B. Single copy free on request.

Memory Products

■ **MAGNETIC-CORE MEMORY STACKS** — MP-317A. Single copy free on request.

■ **MAGNETIC-MEMORY DEVICES AND SYSTEMS**. Single copy free on request.

ELECTRON TUBE HANDBOOK HB-3

SEMICONDUCTOR PRODUCTS DATABOOK SPD-100

Featuring over 7000 pages of design data, these Handbooks represent the most complete and up-to-date reference source for the design engineer. They contain definitive data on over 2300 tubes and semiconductor devices, as well as comprehensive selection and application charts. Frequent mailing service keeps the subscriber up-to-date on the latest new type developments and revisions. Prices for the RCA Electron Tube Handbook and the RCA Semiconductor Products Databook (including subscription service for the first year) are \$20 and \$15 (foreign \$25 and \$20), respectively. Both are available at a special rate of \$30 (foreign, \$35).

RCA CATALOGS

AND APPLICATION BOOKLETS

These fact-filled publications are a valuable guide to the practical use of electron tubes, semiconductor products, integrated circuits, memory products, and batteries. Convenient 10 1/2" x 8 3/8" size handy for 3-ring binders. (For complete technical data on individual RCA tubes and semiconductor devices, RCA Technical Bulletins contain authoritative and up-to-date specifications, and fully descriptive design curves.)

Electron Tubes

■ **GAS LASER SYSTEMS AND TUBES** — PWR-512A. Single copy free on request.

■ **GUIDE TO RCA INDUSTRIAL TUBE PRODUCTS** — TPG-200D. Single copy free on request.

■ **IMAGE ORTHICONS** — CAM-800. Price 40 cents.*

■ **INDUSTRIAL RECEIVING-TYPE TUBES** — RIT-104G. Price 20 cents.*

■ **NUVISTORS — INDUSTRIAL AND MILITARY** — NIT-140. Price 35 cents.*

■ **PENCIL TUBE CLASSIFICATION CHARTS** — MWD-102B. Single copy free on request.

■ **PHOSPHORS** — TPM-1508B. Single copy free on request.

■ **PHOTOMULTIPLIER AND IMAGE TUBES** — PIT-700. Price 60 cents.*

■ **PHOTOMULTIPLIER TUBES FOR NEW-EQUIPMENT DESIGN** — PIT-703. Price 35 cents.*

■ **PICTURE TUBE PRODUCT GUIDE — COLOR AND BLACK & WHITE** — PIX-300C. Price 40 cents.*

■ **POWER TUBES FOR NEW EQUIPMENT DESIGN** — PWR-505B. Price 75 cents.*

■ **PRODUCT GUIDE FOR POWER DEVICES** — PWR-506C. Price 30 cents.*

■ **RECEIVING TUBE AND PICTURE TUBE DIRECT REPLACEMENT GUIDE** — ERT-198A. Price 25 cents.*

■ **RECEIVING TUBES AND PICTURE TUBES** — ERT-1275P. Price 35 cents.*

■ **SOLID-STATE DEVICE CLASSIFICATION CHARTS — MICROWAVE DEVICES** — MWD-104C. Single copy free on request.

■ **STORAGE TUBES AND CATHODE RAY TUBES** — STC-900B. Price 20 cents.*

■ **TRAVELING-WAVE TUBE CLASSIFICATION CHARTS** — MWD-101C. Single copy free on request.

■ **VIDICONS** — CAM-700A. Price 60 cents.*

Batteries and Microphones

■ **BATTERIES** — BAT-134H. Price 35 cents.*

■ **BATTERY MANUAL** — BDG-111A. Price 50 cents.*

■ **BATTERY REPLACEMENT GUIDE** — BAT-137. Price 25 cents.*

■ **CHOOSING AND USING YOUR MICROPHONE** — MIC-640. Price 25 cents.*

■ **RECHARGEABLE ALKALINE BATTERIES** — BAT-135. Single copy free on request.

* Retail Price.

RCA DATA BULLETINS — Complete authorized information on RCA transistors and other tubes for communications and industry. Be sure to get the tube-type booklet desired. Single copy on any type free on request.

RCA TEST EQUIPMENT — Individual data bulletins containing complete specifications — electrical and mechanical data, uses, features, etc. — covering the complete line of precision RCA Test Equipment are available.

Copies of the publications listed above may be obtained from authorized RCA Distributors.

RELAYS • CERAMIC TERMINAL STRIPS

One of 28 Design Ideas Remote Switching Lamp

RELAY FOR REMOTE CONTROL APPLICATIONS

MODELS FR-101 SPST AND FR-102 SPDT — This remote control component combines an isolated step-down transformer and a sensitive AC relay in a single laminated core that fits in a compact midsize package measuring on $2\frac{1}{8}'' \times 1\frac{1}{4}'' \times 1\frac{1}{4}''$. It converts a 95-125 VAC power source to 30V that can be run through ordinary surface wiring without shocks and hazards. Operations of devices and machinery from remote distances are made possible for low voltage requirements. Typical uses are for safe switching and remote control applications, modern appliances, machine tools, and other automatic apparatus demanding remote control circuits thereby eliminating shock hazards. Contact rating 5 amp @ 117 VAC.

Maximum Load:
5 amps @ 117 volts.

Operating Voltage:
95 to 125 volts.

Current Consumed:
Under 40 ma.

Isolated Voltage:
Under 30 volts.

Terminals:
6-inch leads for FR-101 & 2.
Plug-in for FRE-103.
Octal Base for FRP-104

Life:
Over 50,000 operations.

Size With Cover:
 $2\frac{1}{8}'' \times 1\frac{1}{4}'' \times 1\frac{1}{4}''$ (FR-101 & 2).

SCHEMATIC
DIAGRAM
For FR-101

FRP-104 SPDT OCTAL PLUG — A standard octal base plug feature is added to the basic relay for the industrial user. The relay is protected by a plastic dust cover. SPDT @ 5 amps. Specifications are the same as FR-102.

FR-103 SPDT PLUG-IN — Simply plug relay into outlet; it provides the actuating voltage to a 115 VAC alarm or remote accessory. Has a 3-way receptacle to select N.O. or N.C. circuit. Side jack serves as plug-in for remote switch or sensor. Specs same FR-102.

Model	Contacts	Description	One-99	100-499	500-999
FR-101	SPST	Basic Relay for 117 VAC	3.85	3.01	2.62
FR-101-230	SPST	Basic Relay for 230 VAC	4.25	3.32	2.89
FR-102	SPDT	Basic Relay for 117 VAC	4.45	3.47	3.03
FR-102-230	SPDT	Basic Relay for 230 VAC	4.85	3.78	3.30
FRE-103	SPDT	Plug-in	4.95	3.82	3.37
FRP-104	SPDT	Octal	5.45	4.25	3.71
FR-105	SPDT	Basic Relay	4.45	3.47	3.03

28 Design Idea Booklet Supplied (Free) shows circuits on how to build typical remote control circuits of appliances; machine tools; TV commercial killers; fire, smoke and burglar alarms; garage doors; sprinklers — and other apparatus requiring safe, remote control circuitry.

CERAMIC TERMINAL STRIPS

Ceramic-base terminal strips with fired silver, copperplated and tinned terminals to facilitate high-temperature soldering of components and leads. Features permanent bond between metal and ceramic. Standard 2-56 threaded studs are extra long for cutting to any required dimension. Board ht. 0.590" from base. Depth of slots, 0.197". Dielectric Strength: more than 10 seconds at 1500 VDC between terminals. Insulated Resistance: over 1000 megohms at 500 VDC megger. Dip Solder Test: no exfoliation at 250°C for 5 seconds.

STANDARD TYPES WITH THREAD MOUNTING

Model	No. of Terminal Slots	Size Overall Width	Mtg. Ctrs.	One-24	25-99	100-499	500-999

MEP-NB-20	20	3.020	2.520	1.65	1.10	.99	.908

UNIVERSAL TYPES WITH SNAP MOUNTING

ALCO's new concept allows for horizontal or vertical mounting of terminal strips. Each strip is supplied with 2 types of mounting hardware. The selected positioning of the terminals permits the use of more components in a limited space (either singly or in pairs). Silverplated copper eyelets are swaged to the ceramic base.

Model	No. of Terminal Slots	Size Overall Width	Mtg. Ctrs.	One-24	25-99	100-499	500-999
MEH-NB-9	9	3.000	2.500	.80	.53	.48	.44

MEH-NB-19	19	3.000	1.750	1.45	.96	.87	.798
MEH-NB-40	40	3.000	2.500	2.20	1.46	1.32	1.21

Simplify Circuitry With These
DESIGN BOARDS
and Plug-in Terminal Strips

Ceramic Alcostrips are ideal for breadboarding which may be quickly inserted or removed as desired to simplify circuit design. A mating circuit board measuring only 5" x 6" is provided to form a base for experimental design work. Complete ceramic kit includes 16 strips (8 sizes) and one board.

USE WITH MEP-NB SERIES DESCRIBED AT LEFT!

	One-24	25-99
CB-2 Kit	10.97	7.67
CB-1 Board only	.95	.67

Designed for pulse operation. In the single coil version, pulse of 10 milliseconds nominal duration is required to activate the armature.

Weight: 2C-2 oz.
4C-4 oz.

Socket: 2C-30055-1
4C-30055-2

The dual coil functions similarly to the single wound version except that while the armature is actuated by pulse applied to one winding, it is reset by pulsing the second winding.

Weight: 2C-2 oz.
4C-4 oz.

Socket: 2C-30055-1
4C-30055-2

MOUNTING ORG DIA HOLES (.4)
(RECOMMEND USING 2 DIAGONAL HOLES)

Vibration: 20g to 2000 cp
Shock: 50g operational
Operate: 5 milliseconds
Release: 3 milliseconds
Temp: -65°C to +125°C
Weight: 0.5 ounces max.
Plug-in: Type WKYO (not s
Socket: Armel type HRK
equivalent

SK

Miniature size for front panel wiring with an efficient metal to metal hinge.

Terminals: elongated holes .062 x .125

Weight: 2.5 ounces max.

Mounting: (2) 4-40 NC-2B tapped holes

SKH

SK type hermetically sealed.

Temp: -55°C to $+85^{\circ}\text{C}$

Weight: 5.0 ounces max.

Mounting: (3) 6-32 NC-2A

TAH

Compact, rugged design
extremely long life

Operate: 15 milliseconds

Release: 8 milliseconds

Temp: —55°C to +71°C

Weight: 2.5 ounces max.

TAT-2C

Subminiature with the performance of a minial plus extra long life

Terminals: Elongated holes .080 x .040

Weight: 0.70 ounces max

Mounting: (4) 4-48 NF-2B tapped holes

*T154-2C

Features: no internal wiring
contact arms extended to
combination solder and
in terminals

Terminals: Printed circuit
available as

(Below chassis mtg.)

16189-1 MHU0-18
(Above chassis mtg.)

DESCRIPTION

Hardware: Saddle, spacers, screws and washers
Hardware Finish: Cadmium plated
Contacts: Beryllium copper, silver plated, tin dipped
Insulator: Mica-filled phenolic
Chassis Thickness: .062 recommended

GENERAL INFORMATION

- 1—Relay type—the letter H designates a hermetically sealed unit.
2—Contact ratings are for a resistive load at 29 volts, d-c. Low level contacts are available except on Power Relays and Types AS, BJ, CH, MHY and MHYO.

- 3—Ohms—d-c resistance, standard tolerance $\pm 10\%$
4—Contact ratings are for a resistive load at 29 volts d-c or 115 v
5—Other mounting variations are available.

How to order: Specify Allied relay type and coil voltage or current Example: MHYO-12D 26.5v d-c TS154-4C 8.4 ma d-c

**SERIES AZ 420 — MINIATURE GENERAL
PURPOSE RELAYS — UP TO 6 FORM C**

- International Standard type • Combination plug in/wire or PC terminals •
- Low level bifurcated, 2 amp or 5 amp contacts • Life expectancy more than
- 100 million operations • Form A, B, C and D contacts are available • Molded
- cradle eliminates phenolic dust inside the relay • Balanced, spring-held
- armature allows dependable operation in any position • Round core and larger
- coil volume provides more pull force, eliminating expensive, sensitive version
- Slim profile mounting with right-angle socket • Sockets are of unbreakable
- fiberglass-filled base and have unique knife-type connectors for dependable
- contact • Available from stock.

ELECTRICAL SPECIFICATIONS

CONTACT RATING — noninductive load
Light Duty (Code L): Fine silver goldplated — low level to 2 amps @ 250 VDC or 1 amp @ 115 VAC
Heavy Duty (Code H): Silver cadmium oxide — 5 amp @ 26 VDC or 3 amps @ 115 VAC (other contact material available)

LIFE EXPECTANCY — Mechanical Operations: 10⁶ — Operations at Rated Load

CONTACT RESISTANCE — 50 milliohms max. initially — 200 milliohms at end of life

OPERATE TIME — at two times "must operate" voltage or current: ≤ 8 ms

RELEASE TIME — at two times "must operate" voltage or current: ≤ 3 ms

CONTACT BOUNCE — at 10 ma contact current: 2 ms max. at operate, N.O. contact: 3 ms max. at release, N.C. contact

DIELECTRIC STRENGTH — 1000 V rms; 500 V rms across contact gap

INSULATION RESISTANCE — 1000 megohms minimum @ 25°C, 100 VDC, 50% RH

COIL TEMPERATURE — Max. 105°C (220°F)

AMBIENT TEMPERATURE — Operating: —55°C (–72°F) to 80°C (175°F)
nominal operating voltage

Storage: —55°C (–72°F) to 105°C (220°F)

VIBRATION — Operating: .062 DA @ 5-55 Hz; 10g @ 55-110 Hz
Non Operating: 10g @ 5-500 Hz

SHOCK — Operating: 20g @ 11 ms — Non Operating: 30g @ 11 ms

WEIGHT — 23 to 35 grams (approx. 1 oz.)

THERMOSTATIC

AMPERITE

DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT

STANDARD

AMPERITE THERMOSTATIC DELAY RELAYS

Amperite Thermostatic Delay Relays are manufactured on automatic high production equipment — result a low price — and top quality. Quality is not sacrificed at any point. For example, although contacts are rated 3 amps, 10 amp contacts are actually used. Similarly with all other parts—only the best available are used.

Amperite Thermostatic Delay Relays are actuated by a heater . . . and therefore can be used on A.C., D.C., or pulsating current. Being hermetically sealed, Amperite Relays are not affected by altitude, moisture, or other atmospheric conditions. REPLACED AS EASILY AS A RADIO TUBE.

CIRCUITS SPST: Available only — normally open or normally closed.

HEATER VOLTAGES AVAILABLE: 2.5, 5.0, 6.3, 12.6, 26, 50, 115V.

For 220V use a 6000 ohm-5 watt resistor in series, with 115V heater.

HEATER WATTAGE: Standard and Miniature Relays—all voltages—2.3w prox. All heaters may be operated continuously. Heaters will not be damaged by a 50% voltage overload for duration of 1 hour or less.

Amperite Delay Relays are recognized under component program of Underwriters' Laboratories, Inc. for all voltages up to and including 115V.

MINIATURE

VARIATION OF DELAY WITH HEATER VOLTAGE

FIG. 1—Effect of change in heater voltage on delay in seconds. Only low voltage heaters (2.5 to 26 V.) incorporate heater voltage regulations as shown in diagram.

For 22 to 30 V. supply: We recommend Amperite Delay Relays with 26 V. heaters for airplanes and similar power supplies. These heaters are regulated for battery variation of 22 to 30 V. as shown in this diagram.

Figure 1

CONTACT RATING

	Delay	Contact Rating Non-Inductive	DC Voltage Contact-to-Contact	Breakdown Heater-to-Contact
STANDARD RELAYS	2 to 10 Sec.	115V - 3a AC	250V	500V
	15 to 180 Sec.	115V - 3a AC	800V	800V
		220V - 1a AC	800V	800V
MINIATURE RELAYS	2 to 10 Sec.	115V - 2a AC	250V	500V
	15 to 180 Sec.	115V - 2a AC	800V	800V
		220V - 1a AC	800V	800V
FLASHERS		- 1/2a AC		

CONTACT DROP: — 0.1V — Prox. at 1A.

DELAYS AVAILABLE:—From 2 to 180 seconds. Relays can be used in series to obtain longer delays. The delay of any individual relay up to 120 seconds can be increased up to 25% by using a resistor in series with the heater. Delays above 120 seconds can be increased. Relays with short delays such as 2 to 5 seconds can be increased 50%.

LIFE of any individual relay will depend on the service the contacts are subjected to. With a 115V — 2A A.C. non inductive the contacts will withstand at least 250,000 operations. **SHELF LIFE** of Amperite Delay Relays is over 10 years.

INDUCTIVE A.C. LOADS: When breaking an inductive A.C. load, use a condenser of .01 to .1 mfd across contacts. In some cases putting a 20,000 ohm, 5w. resistor across the contacts reduces the arcing considerably.

Relay Contacts should not be used on voltages above 220V.

FOR INSTANTANEOUS RECYCLE AND ELIMINATION OF CHATTER

For instantaneous recycle and elimination of chatter. Cannot be used with Sensitive Relays.

Magnetic Relay requires extra N.O. contact as shown at "E".

Fig. 1

For instantaneous recycle and elimination of chatter when Sensitive Relay is used.

Magnetic Relay requires an extra SPDT contact as shown at "F".

Fig. 2

INSTANTANEOUS RECYCLE: This can be obtained by using a normally open Amperite Delay Relay in conjunction with a Magnetic Relay as shown above. If normally closed is required — use a normally open Amperite Delay Relay — and use contacts on the magnetic relay. Choose the Amperite Delay Relay for the voltage required and the delay required (e.g. 115N030 — would be used on 115 volt supply — for a 30 second delay).

LONG CYCLE RELAYS: are also available. For example, Amperite Delay Relay 115N07T has a delay in closing of 7 seconds. After heater is disconnected, contacts will remain closed for 30 seconds minimum. Write us about your requirements.

THERMOSTATIC

AMPERITE

DELAY RELAYS

GLASS ENCLOSED • HERMETICALLY SEALED • A.C., D.C., OR PULSATING CURRENT

Breaking D.C. Current: When Relay contacts open D.C. current above 50 volts, a condenser with a resistor in series with the condenser must be connected across the contacts. The following condenser values are approximate.

	50 V. D.C.	115 V. D.C.	230 V. D.C.
0 to .5 Amp.	None	.1 MF	.25 MF

- FLASHER CIRCUITS -

Flashers operate approximately 1/3 on, 2/3 off. The percentage time on can be increased by reducing voltage of heater.

115V Flashers ONLY made in quantities of 12 or less. Cannot be supplied in production quantities.

Normally closed flashers are standard, and are indicated by the letter "F." The number following letter "F" denotes flashes per minute. For example a 6F30 flasher, has 6.3V heater, normally closed 30 FPM with a ± 15 flashes per minute tolerance. A 6F30T, would be the same type but in 9-pin miniature. Flashers are available from 30 to 90 Flashes per minute with tolerances as shown in the chart below:

FLASHERS have contact rating of 1/2a 115V AC, non-inductive.

Tol. FPM - 20°C	Standard Flashers Available		
30 ± 15	6F30	26F30	115F30
45 ± 15	6F45	26F45	115F45
60 ± 20	6F60	26F60	115F60
75 ± 20	6F75	26F75

60 SERIES SPDT TYPES

Remote-operation SPDT coaxial relays for low-level to 1-kW operation. Available with 2 Form C auxiliary contacts, and with high isolation "G" connector at NC or receive position in transmit-receive applications. The "G" connector increases isolation to greater than 100 dB up to 500 MHz, reduces the power rating to 20 W, and increases VSWR above 400 MHz. Range, 0 to 1000 MHz (UHF types not recommended for use above 400 MHz). RF power rating, 1 kW to 1000 MHz; 750 W at 400 MHz; 500 W at 1000 MHz. VSWR, 1.05:1 0-50 MHz; 1.3:1 at 1000 MHz. Impedance, 50 ohms. Body size, 3.00" x 0.88" x 0.88". **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC; or 115, 220, 6 or 24 VAC. See **Coil Voltage Table**.

61 SERIES SPDT TYPES

Small switches for military and severe environmental requirements. Withstand applicable requirements of MIL-S-3928B specifications. Balanced armature actuator prevents contact chatter under high-frequency vibration and severe shock. Offered with many connector types and 1 or 2 Form C microswitch aux contacts. RF power rating, 150 W to 50 MHz; 75 W at 1000 MHz. VSWR, 1.03:1 0-50 MHz; 1.18:1 at 1000 MHz. Operating time, 15 msec max. Aux contact rating, 5 A at 115 VAC. Life expectancy, 1,000,000 cycles. Body size, 1.58" x 0.64" x 1.20" h. max. Wt., 3 1/2 to 4 oz. **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC; or 115 VAC. See **Coil Voltage Table**.

77 SERIES SPDT TYPES

Medium-size, lightweight, low-priced coaxial switches for industrial and less critical military uses. T-shaped connector configuration has common connector at one end and NO and NC types 180° apart at other. Available with or without 1 Form C aux contact. RF power rating, 150 W to 50 MHz; 60 W at 1200 MHz. Impedance, 50 ohms. Size, 1.88" x 0.68" x 0.68". Weight, 3 oz. (Other specifications similar to 61 Series above.) **Specify Coil Voltage:** 6, 12, 26, 48 or 110 VDC (115 VAC available at additional cost). See **Coil Voltage Table**.

Dow-Key Model	Conn. Type	With 1 Form C Aux Cont.	Net Each, Lots of

*Available with mating plugs; prices on request. †With NC "G" connector as described.

Space does not permit listing various modifications or variations of the standard relays shown. The following types and variations of relays however, are also available.

1. Additional types of coaxial connectors on many relays.
2. 72-ohm type in some relays (50-ohm standard).
3. Gold plated contacts and others (silver contacts standard).

COIL VOLTAGE TABLE

To specify voltage desired, substitute two digits (21 thru 29) from this table for **XX** in the Dow-Key Model No.; e.g. 260-XX04 with 6 VDC coil becomes 260-2104, etc.

Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage	Model No. Digits	Nominal Voltage
21	6 VDC	24	48 VDC	27	220 VAC
22	12 VDC	25	110 VDC	28	6 VAC
23	26 VDC	26	115 VAC	29	24 VAC

260/260B SERIES DPDT TYPES

Remote-operation switches for low-level to 1-kW operation. The 260B Series is a standard DPDT switch with six connectors; 260 Series similar but has internal connection between its NC contacts, leaving only four connectors; 260B is widely used for inserting a circuit element between two normally connected elements (e.g., inserting power amplifier between exciter and antenna). RF power rating, 1 kW to 100 MHz; 750 W at 400 MHz. VSWR, 1.05:1 0-50 MHz; 1.06:1 100 MHz; 1.12:1 at 400 MHz. Impedance, 50 ohms. Aux contacts rated 5 A, 115 VAC. Operating time 25 msec approx. Life, 1,000,000 cycles. With UHF connectors (others available). Body size, 3.00" x 1.75" x 0.88". Weight, 12 lb approx. **Specify Coil Voltage:** 6, 12, 26, 48 or 100 VDC; or 115, 220, 6 or 24 VAC. See **Coil Voltage Table**.

71/72 SERIES MULTI-POSITION TYPES

Weatherproof, high power switches for switching antennas, transmitters or receivers up to 500 MHz. Separate actuating coil at each position. RF power rating, 1 kW to 200 MHz; 750 W at 500 MHz. VSWR, 1.06:1 0-50 MHz; 1.3:1 at 500 MHz. Impedance, 50 ohms. Operating time, 25 msec approx. Life, 500,000 cycles. With UHF connectors (BNC, C, N, TNC connectors available). Body size, 71 Series, 4" x 3.5" x 2.62"; 72 Series, 5.7" dia. x 2.75" d. Wt., 71 Series, 3 lbs. approx.; 72 Series, 1 1/2 lb approx. **Specify Coil Voltage:** 6, 12, 26, 48 or 100 VDC; or 115, 220, 6 or 24 VAC. See **Coil Voltage Table**.

Dow-Key Model	Description	Net Each, Lots of

78 SERIES MULTI-POSITION TYPES

Manually operated switches with true coaxial switching members (not wafer switches). Useful frequency range, 0 to 500 MHz. RF power rating, 1.5 kW at 50 MHz; 1 kW at 100 and 400 MHz. VSWR, 1.05:1 at 50 MHz; 1.15:1 at 400 MHz. Impedance, 50 ohms. Crosstalk, 60 dB at 50 MHz; 45 dB at 400 MHz. Insertion loss, .03 dB at 50 MHz; .05 dB at 400 MHz. Dial plate and knob included. With UHF connectors (also available with BNC, C, N, TNC connectors). Size, 3" dia. x 1" deep. Weight, 10 oz. approx.

UHF CONNECTORS AND ADAPTERS

Types C-201, C-60P and C-60PT have UHF female or male connector to solder terminal, and mount through panels 1/8" thick max. C-201 mounts through 3/8" hole. C-60P mounts into 3/8" tapped hole or through 1/2" hole. C-60PT similar to C-60P except Teflon* insulation and better impedance match.

*Registered DuPont TM

MERCURY-WETTED CONTACT RELAYS

HG Series

HG relays have SPDT make-before-break form D contacts rated at 5 amps, 500 volts, 250 VA max. Operating time can be as short as 2 milliseconds. The Series HG2 relay utilizes two switch capsules to furnish DPDT, operating time can be as short as 2½ milliseconds. Series HG3 relay utilizes three capsules providing 3 PDT, operating time can be as short as 2½ milliseconds. Series HG4 relay utilizes four capsules providing 4 PDT, operating time can be as short as 3¼ milliseconds. Life expectancy is 22×10^9 at specified ratings. Resistance, $\pm 10\%$ tolerance at 25 degrees C. Typical applications include computers, data logging and low-level dry circuits.

HGS Series

HGS Mercury-wetted relay offer increased speed and reliability along with high sensitivity. HGS 1000 Series provide SPDT make-before-break and HGS 5000 Series provides SPDT break-before-make. Both are rated at 2 amps, 500 Volts, 100 VA max. Operate time as fast as 1 millisecond. Standard design available only in single element assemblies, they come in the following, single side stable, bi-stable and chopper. Life expectancy is 22×10^9 at specified ratings.

MERCURY-WETTED CONTACT RELAY

HGP Series

HGP is similar to the HG series except for the inclusion of permanent magnets making a slight increase in height. Magnets provide single-side-stable, bi-stable and chopper operations. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250 VA maximum with operating time as short as 2 milliseconds. Life expectancy is 22×10^9 at specified rating.

HGM Series

HGM relays are Clare standard HG switch capsules in module form, are provided with plate steel covers for excellent mechanical protection and magnetic shielding. The standard HG switch in the HGM is not polarity sensitive. Contacts are SPDT make-before-break rated at 5 amps, 500 Volts, 250 VA maximum. Life expectancy is 22×10^9 at specified ratings.

HGSM Series

HGSM Relay modules for Printed Circuit Board mounting are available in HGSM 1000 series SPDT make-before-break HGSM 5000 series SPDT break-before-make. Contacts are rated in amps, 500 Volts, 100 VA maximum at rated load. Maximum dissipation 2 watts continuous at degrees C. The temperature rise is 30 degrees C per watt at 25 degrees C ambient. Life expectancy is 22×10^9 .

MERCURY-WETTED CONTACT RELAYS

HG2M Series

HG2M has the same characteristics as the HGM but contains 2 capsules to give you double-pole, double-throw configuration make-before-break. This results in saving space and cost over single element units. Contacts are rated at 5 amps 500 Volts, 100 VA maximum with life expectancy of 22×10^9 .

Part No.	Coil Resistance	Must Operate Current (ma-dc)	Must Release Current (ma-dc)	Must Operate Voltage (vdc)	Max. Voltage (vdc)	PRICES

HGSR Series

The subminiature HGSR relay module combines sensitive, high speed operation with a small size, low profile enclosure for extremely compact printed circuit board mounting. HGSR 11111 Series are SPDT, make-before-break. HGSR 51111 are SPDT break-before-make. Contacts are rated at 2 amps 500 V max., 100 VA max., with a carry load of 5 amps maximum (not switched). Life expectancy is 20×10^9 operations when operated within contact ratings.

HGR2MT Series

The subminiature Clare HGR2MT is a high-speed two-pole relay designed for low-level switching applications. Available with "common open time" characteristics, the HGR2MT is specifically designed for applications which make use of the "capacitor transfer" analog multiplexing technique. This module combines sensitive, high-speed operation with a small-sized, low profile enclosure for extremely compact printed circuit board mounting. Life expectancy is 20×10^9 operations when operated within contact rating. Contacts are rated 2 amps 500 V max., 100 VA max.

HGS2MT

Mercury-wetted relay is designed to minimize the noise and thermal problems of low level switching circuits. They are capable of handling the input switching functions for any type of reasonable high speed, low level data acquisition system. Contacts are rated at 2 amps 500 Volts, 100 VA maximum DPDT. Form C break-before-make. Life expectancy 22×10^9 .

REED RELAYS

Picoreed Series PRA and PRB

The Clare Picoreed relays represent a state-of-the-art advancement in sealed contact reed relays; they are the fastest and smallest reed-contact relays made. Their response time, physical size, sensitivity, and reliability characteristics combine to give the Picoreed complete electrical and packaging compatibility with IC solid-state devices. These characteristics provide an answer for economical and reliable solid-state input-output isolation buffering.

High speed — up to 500 μ s operate time, including bounce, at nominal coil power.

Contact rating — 0.5 amperes max., 100 volts max., 10 va max.

Life expectancy — 100 x 10⁶ operations at low-level loads.

5 x 10⁶ operations at 28 vdc, 0.125 ampere.

* The 5 volts series of Picoreed relays have been designed especially for compatibility with standard 5 volt DTL and TTL logic families. These relays have a must operate voltage value of 3.75 volts @ +25°C.

PRA Series has axial leads. PRB Series has straight pin. High sensitive relays allow P.C.B. spacing of .500 inch centers. H in part number denotes more sensitive unit. Low profile units allow .375 spacing.

MicroClareed Series MRMC and MRME

The Clare MRME and MRMC MicroClareed relays offer you the same high standard Clareed relays in only one-fifth the size. They provide isolation between coil and contacts. They are immune to false operation by the type of transients that affect solid state devices. They are insensitive to overload transients that would damage a solid state device. They offer switching speed as fast as 500 microseconds, which is fully compatible with other mechanics of process control. Type MRME is an epoxy molded module and Type MRMC is an open type module. Both types are designed for printed circuit board application. Operation and internal construction of both types are the same. Contacts rated at 15 VA maximum $\frac{3}{4}$ amp maximum.

C. P. CLARE & COMPANY

REED RELAYS

TELEPHONE RELAYS

Clareed — CRT Series

Ultra reliable reed relays for printed circuit boards. Reed contacts are sealed in an inert gas atmosphere within a glass tube. Coils wound on molded bobbins capable of accepting up to six Clareed switch capsules. The standard Clareeds are Form A. Life expectancy is over 20 million operations at rated load. Contacts rated at 15 VA Maximum, non-inductive, 1 amp maximum, 250 Volts maximum with carry load 5 amps maximum (not switched).

LB Series — New (Telephone Relays)

Designed for the user who must have a high quality at a reasonable price. This miniature relay has extraordinary switching capacity and versatility for its size. 6PDT contacts rated at 2 amps with life of 100 million operations (Mechanical). LB Series is for direct P.C.B. mounting; LBP Series, for direct plug into socket mounting. This relay is an ideal component for military, industrial and commercial application.

VP Series (Telephone Relays)

Has contact configuration of 2 P., 4 P., 6P. DT; contacts rated at 1 amp 100 volts 30 watts D.C. resistive load. Operating temperature -40°C to +80°C. Operating time is 3-13 milliseconds. VP is protected from dust and contamination by a polycarbonate cover. Can be used for P.C.B. mounting with socket. Typical applications are business machines, process controls, communication equipment, digital instruments and many others.

J & JDP Series (Telephone Relays)

Compact, industrial telephone-type relay, for applications ranging from simple switching in alarm circuits to complex computer functions. Switch combination of 2, 4, and 6 pole DT with contacts rated at 4 amps 150 watts with an operate time of 5 milliseconds minimum. Mechanical life of 70 x 10⁴ operations. Series JDP is dust cover enclosed, socket with soldering lug terminals. Series J is open type.

C. P. CLARE & COMPANY

MILITARY TYPE RELAYS STEPPING SWITCHES

Type F & HF

Clare provides full and half-size military-type relays of unusual versatility, capable of reliable long life operation under adverse environments. These relays are ideal for use in industrial application as well as airborne and aerospace. Relays employ a rigid frame to maintain permanent alignment of all elements. Contact arrangement are 2 form C. These relays are manufactured to meet Mil-R-5757/10 and 5757/19.

Stepping Switches

Clare stepping switches offer an economical answer to switching problems by providing the most working capacity in the smallest space.

Type 20 offers up to 16 levels of 20 points or 12 levels of 40 points with a life expectancy of 50 million steps at 16 levels. Contacts rated at 0.1 amps 115 VAC or 30 VDC with carry of 3 amps. Operate time of approx. 20 MS at 25 degrees C. Release time approx. 10 MS at 25 degrees C. Standard terminals are solder lug.

Type 26 has the same characteristic as above but has the capability of 16 levels of 26 points or 10 levels of 52 points.

Type 210 offers up to 12 levels of 10 points with life expectancy of 100 million steps at 12 levels. Contacts rated at 0.1 amps 115 VAC or 30 VDC resistive will carry 3 amps; operate time is approx. 20 MS at 25 degrees C. Standard terminals are solder lug.

Type 211 has the same characteristic as above but has the capability of 12 levels of 11 points or 10 levels of 52 points.

ALL SWITCHES LISTED ARE NON-BRIDGING WITH 1C OFF-NORMAL CONTACTS AND 1C INTERRUPTER CONTACTS.

C. P. CLARE & COMPANY

GENERAL PURPOSE RELAYS

TIME DELAY RELAYS TO-5 TYPE RELAYS

GP1 Series — General Purpose

GP1 Relays are miniature 4PDT relays available for AC or DC operation with dust cover enclosure built to meet UL Component recognition. Contacts are fine silver-gold flashed, rated 3 amps at 30 VDC or 120 VAC resistive. Life expectancy in excess of 100 million operations AC. Solder terminals are standard. Sockets come in both solder terminals and printed circuit.

TLMA1 Series — Time Delays

Clare Time-delay relays with delay of 1 second to 180 seconds is available in both AC and DC series will provide $\pm 5\%$ repeat accuracy of timer setting at nominal voltage and room temperature. Reset time is 100 milliseconds. DPDT contacts are rated for 1,000,000 cycles at 10 amps 120 VAC resistive.

Type TF — TO-5 Military Type

The Clare TF relay is a TO-5 transistor case relay engineered to meet or exceed Mil-R-5757/38 and 40. The relay offers you a dependable relay which combines electromechanical performance with packaging compatible with solid state circuitry. Operating temperature range is from -65 degrees C to $+125$ degrees C, with a 2.0 MS maximum operate time. Must operate voltage at $+25^\circ\text{C}$ is 13.0 VDC. All with 1.5" straight leads.

Type TFC — TO-5 Commercial Type

The Clare TFC industrial relay is a TO-5 transistor case relay with the consistent high standards of the well-known Clare Military type relay. Operating temperature range is from -55 degrees C $+75$ degrees C with a 4.0 MS maximum operate time. Must operate voltage at $+25^\circ\text{C}$ is 17.0 VDC. All with 1.5" straight leads.

*All characteristics are nominal and subject to normal manufacturing tolerances, other voltages available on special order.

**115 VAC units are made with a full wave bridge rectifier and use the same coils as listed under 110 VDC units.

***Four-wafer relays with all "A" form contacts use three-wafer relay coils.

NOTE 1: ONE WAFER RELAYS USE A SHORTER ACTUATOR ASS'Y. — INSTEAD OF 2-1/32 AS SHOWN. THE ACTUATOR IS 1-15/32 HIGH.

SERIES 802
Bat Handle T-Bar Switches

SERIES 803
Push Button Switch

Ganged T-Bar Switches

Toggles may be ganged for controlling additional circuits . . . 48, 72, 108, etc. Shown here, 108 poles.

T-BAR Connectors save time and reduce installation costs using individual snap-in crimp terminals crimped to pre-stripped wire and then snapped into a contact block, which forms the connector. The connector is pushed onto the wafer terminals, eliminating soldering. Because we offer a connector, rather than a receptacle, harness work can be completed outside the chassis and therefore no fancy chassis work is required to accept a receptacle. It not only makes the metal work simpler, but it also saves layout engineering and drafting time. Since T-Bar Switch/Relays are so easily mounted, they are often found on the back of meter panels or on their own brackets.

6 P/N88601 Shown

Can be used with all units shown above

8601-51
Crimping Tool

PHYSICAL PROPERTIES:

Wire Accommodated: (1) #18, #20, #22, #24, #26, STD (2) #22, #24, #26 STR

Connector Material: Nylon Zytel or Lexan®

Snap-in Contact Material: Phosphor Bronze

Snap-in Contact Finish: Tin Plated (other on request)

Retaining Clip Material: Stainless Steel

Connector Weight: Approximately 0.3 oz.

MANUFACTURED BY:

electronic controls, inc.

T-Bar Switch/Relay Div. •

Manufactured under 1 or more of the following patents: 3,206,990, 3,226,508

® "T-Bar" — Reg. T.M.

GENERAL FEATURES:

The series 801 T-Bar Relays are solenoid actuated multi-pole relays with a unique design permitting stack-up of enclosed contact "wafers." Each wafer has a maximum of 12 pole double throw contacts thereby allowing ECI to supply the 801 relay with any combination from 4 to 60 poles.

CONTACT RATING:

3 amp, resistive load 150 watt maximum make or break;
5 amp, 500 watt maximum carry.

CONTACT MATERIAL:

Gold bonded, fine silver, standard. Others available on special order.

CONTACT FORMS:

"A" single throw N.O.
"C" single throw N.C.
"D" double throw, break before make
"D" double throw, make before break

NUMBER OF POLES (RELAYS):

One Wafer — 12 poles
Two Wafers — 24 poles
Three Wafers — 36 poles
Four Wafers — 48 poles
Five Wafers — 60 poles
("A" form only)

OPERATE VOLTAGE:

Min. voltage: 80% of nominal at 25°C

RELEASE VOLTAGE:

Max. voltage: 20% of nominal at 25°C

OPERATE TIME:

One Wafer Relay — 15 ms. max.
Two Wafers — 25 ms. max.
Three Wafers — 30 ms. max.
Four Wafers — 35 ms. max.
Five Wafers — 40 ms. max.

RELEASE TIME:

5 ms. max. (36 pole) — 10 ms. max. (12 pole)

TERMINALS:

Solder tab that also mates with T-Bar connector P/N 88601 (two required per wafer)

ENCLOSURE:

Contacts enclosed in dust tight plastic enclosure that is separated from the actuator assembly. Withstands Mil. Std. — 202 method 106B moisture resistance test.

LIFE:

Mechanical — 20,000,000 operations minimum for relay
Electrical — 20,000,000 operations minimum at 100 milliamperes to 100,000 minimum at 5 amps, 150 watts resistive load.

DIELECTRIC:

1000 vrms terminals to case at sea level and 25°C
1000 vrms terminal to terminal at sea level and 25°C
1000 vrms coil to case at sea level and 25°C

TEMPERATURE RANGE:

—55°C to +85°C

INSULATION RESISTANCE:

5,000 megohms @ 25°C minimum

ORDERING INFORMATION:

Specify Series No. — number of poles plus contact form letter-coil voltage. For example a 36 pole double throw relay with a 24 VDC coil is: 801-36C-24

magnet coils designed for continuous duty. Do not operate at rate higher than indicated under Mechanical Life.
 based on steady state test under laboratory environmental conditions. Consult factory if application involves unusual load, speed of operation, off-on ratio,
 environmental or operating conditions. Electric life substantially greater when operated below rated load.
 and tests — making inrush ratings (0.4 to 0.5 P.F.) — breaking 125% continuous rating (0.65 to 0.8 P.F.).
 cross-bar contacts.

TYPE 93**Solder Terminals**
(Fig. 1a)

Solder terminal type has combined front, single hole screw and stud mounting, screw and stud included. All terminals out front. One piece molded bobbin and terminal board construction. Highly resistant to arc tracking. Printed circuit type may be controlled by SCR if firing angle, is no more than 10 degrees.*

Size: $1\frac{1}{8}" \times 1\frac{1}{8}" \times 1\frac{1}{8}"$ U.L. and C.S.A.

TYPE 93**Printed Circuit**
(Fig. 1b)**TYPE 93P****8 Pin Plug-In**
(Fig. 2)

8 pin octal base for single and two pole. 11 pin base for three pole. High impact case. Standard pin connections.

Size: $2\frac{1}{8}" \times 1\frac{1}{8}" \times 1\frac{1}{8}"$ U.L. and C.S.A.

TYPE 93P**11 Pin Plug-In**
(Fig. 2)**TYPE 93Q****Quick Connect**
(Fig. 3)

Enclosed quick connect type designed for front mounting or polarized socket mounting. For socket mounting use 93-153-1 socket kit. Front mounting relay has .20 x .187 terminals. High impact case.

Size: $2\frac{1}{8}" \times 1\frac{1}{8}" \times 1\frac{1}{8}"$ U.L. and C.S.A.

CONVERSION INSTRUCTIONS

All 10 and 15 ampere contact assemblies on RBM standard type C contactors are normally open. To convert to normally closed, use screwdriver. No special parts needed.

1. Remove movable contact assembly and lock washer by backing off terminal nut "A".
2. Loosen screws "B" and remove stationary contact assemblies.
3. Invert movable contact assembly, and replace on contactor with flat "I" spring resting on contact block. Contacts facing out.
4. Remove screws "B" from, and reinsert into opposite end of, stationary contact assembly. Re-install stationary contact assemblies; holding contacts in alignment with movable contacts while tightening screws.

Normally Open Normally Closed

movable — 8 Stationary per kit.

** Reversing type — 2 sets required. † Not standard catalog items.

TYPE 59

SIZE 3 3/8" x 2 1/8" x 7/8"

- Ambient Compensated
- 1/4" Quick-Connect Termination
- Wire Terminals Included
- Resilient Mounting
- Non-Positional

THERMAL TYPE**SINGLE POLE NORMALLY OPEN**

FIXED TIME DELAY TO CLOSE — AFTER ENERGIZATION — 15 TO 45 S

Operating		Catalog Number	Contact Rating
Voltage (50/60 cy.)	Watts		
24	3.0	59-901	3 Amp. 125/250 V.A.C. Pilot Duty
115/120	7.0	59-902	
230/240	10.0	59-903	

Reset time — approx. 60 seconds.

TYPE 84T

SIZE 2 5/8" x 2 1/4" x 1 1/2"

- Fixed Timing
- 1/4" Quick-Connect Termination
- Wiring Terminals Included
- Totally Enclosed
- Approx. Reset Time 4 Seconds

**RECTIFIER/CAPACITOR TYPE
SINGLE POLE DOUBLE THROW**

Coil (50/60 cy.)	Contact Action		Catalog Number	Time Delay in Seconds ±25%	Contact Rating (A.C. Induct)

ALL ENCLOSED RELAYS HAVE CIRCUIT DIAGRAMS STAMPED ON UNIT

When requiring U.L. and/or C.S.A. approval, refer to the file number which will save you time and money. Approval is simplified when product includes components having prior approvals. Regulations then require that a component be checked only for the application within its approved ratings. If a component does not have prior approval — the component must undergo complete testing to determine if it meets U.L. requirements. This entails added expense and time.

The following A.C. Controls have U.L. and C.S.A. recognition.

RBM Type	*U.L. Recognition File #	*C.S.A. Recognition File #
59	E34447	None
75	E12139	LR13360
80	E12139	LR13360
84	E12139 or E22381	LR13360
85	E12139	LR13360
91	E12139	LR13360

RBM Type	*U.L. Recognition File #	*C.S.A. Recognition File #
92	E12139	LR13360
93	E12139	LR13360-31
129, 129AR	E12139	LR13360
S30, S40	E12139	LR13360
189	SA-1984	

U.L. and C.S.A. listing covers RBM production part number stamped on relay. Production part number (not standard catalog part number) should be submitted with file number. RBM will supply report date when required.

CONSULT FACTORY FOR POSSIBLE U.L. AND C.S.A. RECOGNITION FOR OTHER THAN ABOVE.

OBsolete LISTING

The following standard catalog controls are obsolete as of 3/1/69. Units will be available until 2/28/70 from Chicago warehouse subject to prior sale or discontinuance from RBM production.

GUARDIAN® ELECTRIC

SERIES 900 & 910 10 AMP RELAY

- *U/L Recognized Component
- Designed with reduced number of parts for long, trouble-free service
- Has keyed and locked lifters

Series 910 is exactly the same as the 900 relay, both electrically and mechanically, but with $\frac{3}{4}$ quick disconnects instead of soldered termination.

Dependable, low cost, DPDT relay featuring new, trouble-free design that incorporates a minimum of parts. Contacts all rated 10 amps, 115V., AC resistive load. Has molded switches, one-piece mounting clip and return spring; molded bobbin and coil cover. Average shpg. wt., 6 oz.

SIZE: $2\frac{1}{8}" \times 1\frac{1}{8}" \times 1\frac{3}{8}"$

Further savings are available when Series 900 relays are purchased in bulk packs of 50 units. Relays are supplied nested in new convenient "form fitted assembly line trays... one package of 50—\$76.50 ea.; 2 and up—\$67.00 ea.

ALL PURPOSE ECONOMY RELAY IR-640U AC—IR-645U DC—10 AMPERE

A compact, lightweight relay capable of unusually heavy power control for its size. Long life, high quality relay available in a variety of AC and DC voltages with a selection of contact combinations.

All contact ratings are 10 amps. Contact ratings at 60 cycles, 115V. non-inductive load. 8-32 single screw, center pole mounting. Shpg. wt., 3.5 oz.

ENCLOSED PLUG-IN RELAY 1210 AC—1215 DC—10 AMPERE

A powerful and economical relay enclosed in a transparent, lightweight Lexan case which has high impact strength; unaffected by weather, and is resistant to temperatures of 200°F. Relay available with 8 pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated for 10 amps at 60 cycles, 115V., AC, non-inductive load.

DPDT 11 pin for 3PDT Shpg. wt., 3.5 oz.

SERIES 1220 AC—1225 DC RELAY

VERSATILE ENCLOSED RELAYS • PLUG-IN • SOLDER TO OR QUICK CONNECT TERMINALS 1220AC—1225DC—10 AMP 1220/1220AC—1225/1225DC LATCHING—1220M-AC—1225M-DC MANUAL RESET

Newly designed relay is reduced in height and cost by the elimination of the radio-type plug, extra wiring and sub-assembly between relay and plug. Features "UNI-GUARD," continuous loop moving blades; snap lock cover; and terminals that can be used as solder lug, AMP Faston 110 Series quick connect or socket plug-in. The 1220 Relay comes complete with mounting bracket. 1220/1220 is an electrical reset relay. 1220M is a manual reset relay with same concept design as the standard 1220 series.

ENCLOSED PLUG-IN AC RELAY—1210-N

With Built-In Neon Lamp to Indicate Circuit Faults—10 AMPERE

This plug-in relay utilizes a miniature neon lamp connected across coil terminals. The lamp lights each time the coil is energized, or indicates a circuit fault when lamp is "dark." Ideal for detecting circuit faults in relay banks, mass arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Available with 8 pin octal plug for DPDT and 11 pin for 3PDT. Contacts rated 10 amps at 115V., AC. 60 cycles, non-inductive load. Shpg. wt., 3.5 oz.

NEW 1350PC AND 1355PC PRINTED CIRCUIT RELAYS 2PDT SWITCHING

For low power solid state circuitry. All terminals on .1 grid spacing for standard printed circuit board. Solders right on PC board. Conform to UL requirements for Office Appliances and Business Equipment. 1 watt normal power... 1/2 watt on request. 3500 OHMS coil resistance (120 VAC-60 Hz). Mechanical life in excess of 10 million operations. 3 amp resistive 115V 60 Hz contact rating. DPDT switching.

Size: 1 1/4" x 3/4" overall.

Solenoids available in both intermittent and continuous duty types. Intermittent types should not be energized for more than 5 minutes, or be permitted to rise more than 85°C. above 24°C. ambient, without giving sufficient time to cool between operation cycles. Continuous duty types are designed so they will not rise more than 85°C. above the 24°C. ambient temperature when operated at rated voltage. Plunger has slotted end with 1/8" diameter hole for coupling.

When Ordering give the following information: (1) Solenoid Number; (2) Operating voltages and AC or DC current; (3) Continuous or Intermittent duty (if intermittent, give the cycle of operation, length of time current will be passed through the coil, and any other pertinent information); (4) Maximum stroke and maximum pull required.

Pull Data listed in this bulletin obtained during "cold" operation.

"S" indicates single pole double throw switch, rated at 10 amps 115 vac.

GUARDIAN NEW
TUBULAR
SOLENOIDS - 24VDC

New tubular type solenoids pull type with lift up to 11 lbs. Clean design permits side-by-side mounting with ease. Threaded bushing is inserted through mounting hole and secured with furnished nut. Life at rated load 10,000,000 operations minimum. Tubular solenoids from a 1/4" to a 1 1/2" diameter available in both Intermittent and Continuous Duty 24VDC. Computers, Aircraft and Missiles, Office Equipment and Copy Machines are some of the typical applications.

GUARDIAN POWER RELAYS

2100U DPDT — Contacts: double pole, double throw. Size: $3\frac{3}{8}$ " L. x $2\frac{1}{2}$ " W. x $\frac{3}{8}$ " H. Shipping Weight: 11 ounces.

Series 2100 and 2110 power relays are rated at 25 amperes, continuous duty at 230 Volts AC, with 75% power factor. Operating power requirement for AC is 9.5 volt amperes, 60 cycles. Coil drain approximates .080 amperes at 115 volts, 60 cycles. Approximate weight of replacement coil assemblies is 6 ounces.

MOUNTING: 2 holes .196" dia. on $1\frac{7}{8}$ " centers.

GUARDIAN SERIES 2300U AC
SERIES 2305 DC POWER RELAY

15 Amperes

Size: $3\frac{3}{8}$ " x $2\frac{1}{2}$ " x $2\frac{1}{8}$ ". Shipping Weight: 8 ounces. Mounting: Two .196" Diam. holes on $1\frac{7}{8}$ " centers.

In power applications that require up to 15 ampere contacts the Guardian Series 2300 AC, or Series 2305 DC Power Relays are Specified. Both have standard DPDT contacts rated for 15 amperes non-inductive, or 1 HP at 115/230 volts, 60 cycles. Series 2300 standard coil voltages are 6, 12, 24 and 120 VAC. Series 2305 standard coil voltages are 6, 12, 24 and 110 VDC. Inverted coil construction protects armature and contacts. Armature extension permits manual circuit testing. Screw type terminals easily accessible for top or bottom connections. Easy to mount recessed auxiliary switch, up to SPDT for 10 ampere operation, available for both AC and DC versions.

NEW SOLID STATE RELAY
6100 AC - 6300 DC

Universal AC or DC control voltage with circuit isolation from load switching circuit. Internally-adjustable pull-in voltage level. Used to maintain circuits continuously without coil consumption. Unit is electrically pulse operated mechanical hold and electrical release. Contacts rated 130 volts AC or DC, with close differential between pull-in and where accurate voltage sensing is required. Control of high inrush inductive or normal resistive loads from 10ma to 3 amps. Internal prevents random turn-on of "off" contacts.

INTERLOCKING RELAY — AC IR-1200/1200 — 10 AMP

Two interlocking AC relays in sturdy metal frame. Used to maintain circuits continuously without coil consumption. Unit is electrically pulse operated mechanical hold and electrical release. Contacts rated 10 amps, at 60 cycles, 115V., AC, non-inductively. Coil resistance is 1,100 ohms. Shpg. wt., 5.5 oz.

SIZE: $1\frac{1}{2}$ " x $1\frac{1}{8}$ " x $3\frac{3}{8}$ "

SERIES 200 RELAY
WITH COMPLETELY INTERCHANGEABLE
COIL AND CONTACT ASSEMBLIES

COIL ASSEMBLY

CONTACT ASSEMBLY

MIDGET CONTACT ASSEMBLY. Dotted line shows size of standard unit.

The coil consists of the coil and field piece; the contact assembly consists of switch blades, armature, return spring and mounting bracket. The Midget Assembly is interchangeable with the standard Series 200 coil assembly. Available with SPDT, DPDT or 4PDT contact switch assemblies interchangeable with all AC or DC coils.

STEPPING CONTROLS—For accurate sequence selecting, pulse multiplying, pulse dividing, circuit selecting, automatic homing, remote homing, counting and more. Guardian Steppers are specified for automatic control of electrically operated business machines, accumulators (coin and other), animated displays, control scoreboards, automatic overhead garage doors, assembly line controls, automatic packaging (loading) controls, sump pump controls, commercial slide doors, among others. All Guardian Steppers are intermittent duty direct-drive units with switching operations completed upon energization.

CONTINUOUS ROTATION

Circuit selection wiper on Continuous Rotation Steppers moves in one direction only, upon energization of the step coil. This type of stepper is available in standard 24 point (MC) or 40 point (PC). The IR-MC 24 point Continuous Rotation Stepper is particularly adaptable to repetitive sequence functions. The 24 bridging contact deck is evenly divisible into 12 possible sequences. The PC stepper features stepping speeds up to 30 steps per second and an average life expectancy of over 4,000,000 steps. Circuit selecting wiper on Electrical Reset Steppers can be reset to zero or home from any desired position, by energization of the reset magnet. They are frequently employed to record counts by various electrical groups, then resetting automatically.

ELECTRICAL RESET

Type M.E.R. A direct drive (steps on energization) with positive mechanical reset interlock actuated by the reset magnet and unlocked on the first energization of the step magnet. Assures positive reset on as short a pulse as one-hundredth of a second. By interconnecting two or more Steppers, count can be increased to any desired total counting by tens, or any convenient multiple. Will control a sequence of operation and then automatically reset to starting position.

Type P.E.R. Operation same as M.E.R. but with up to 36 active contacts.

Add and subtract steppers are basically continuous rotation types with the added feature of being able to reserve the movement of the selecting wiper when required.

ADD AND SUBTRACT

Type IR-MAS A midsize add and subtract stepper incorporating a cam actuated switch which operates at zero position. Used primarily to indicate a zero balance between pulses supplied to the "add" coil as compared to pulses received by the "subtract" coil.

Type MER-SOL All features of the widely used Guardian MER 24 point electrical reset stepper... PLUS Solenoid "lifts" wiper contacts when stepping to reduce friction... and arcing. Increased contact ratings to 5 amps resistive at 120 volts AC. Increased function capability. Increased dependability. Increased life expectancy — now up to 10,000,000 steps. Compact design.

Type IR-PAS New Bi-directional steppers whereby the selector wiper moves either direction depending on which of the coils are energized. This unit replaces the RAS-Supplied with 45 amp quick-connect terminals and also includes a form "C" cam switch.

Stepper contact points are rated 1½ amps resistive, at 115 V., 60 cps. Coil* Voltages are 120 AC, 60 Hz and 24 DC.

*Steppers will operate satisfactorily at 15% below or 10% above rated voltage. **Listings are for stepping coil and reset coil, respectively. ***Includes zero position. ****Zero (0) position switch only.

ROTOMITE STEPPER—DC IR-705-12P

An entirely new concept in stepper design, the Guardian "Rotomite" is first with maximum stepper control in minimum space. Offering high contact rating of 3 amps resistive, 1 amp inductive (50% PF). Featuring continuous duty operation with life well in excess of one million steps, the completely enclosed Rotomite is geared for continuous rotation of 12 positions. A few Rotomite applications presently include computers, business machines, lighting and vending controls, counting and sorting devices, and model trains. Shpg. wt., 5 oz.

Intended to perform switching operations in a desired, repetitive sequence. Each electrical impulse moves the relay contacts to the next position in the sequence. Applications include lights, signs, motors, appliances and similar units. Contacts rated up to 12½ amps, 115V., 60 cycles, non-inductive load. Shpg. wt., 8 oz. Mounting: 4 holes 8-32 (NC-2B).

WATCHING ON/OFF RELAY—AC—IR-640L—5 AMPERE

Midsize Latching Relay with single coil and 5 amp contact rating for SPST, or SPDT, contact combinations. Recommended for positive ON/OFF control of positioning devices, remote controls, lighting circuits and many additional applications. Impulse as short as 20 M.S. energizes coil to reverse position of snap-action switches. Holds last position of switch with coil de-energized. Contacts rated for 5 amps, at 60 cycles, 115 V., AC, non-inductive load. Shpg. wt., 4 oz.

HEAVY DUTY INDUSTRIAL AC RELAY—IR-220—20 AMPERE

This rugged unit makes and breaks up to 20 amps, at 230 volts. Armature is equipped with phenolic contact mounting block carrying ¾" dual contacts. Phenolic is tested at 1500 volts breakdown to ground. Contacts are silver alloy. Relay is available in dual SPST, normally open contact combination only. Contact rating 20 amps at 60 cycles, 230V., AC, non-inductive load. Mounting: Mounting holes—clearance for 8-32 with 2½" centers. Shpg. wt., 5.5 oz.

ELECTRICAL RESET OVERLOAD RELAY—X-300-ER

Applicable for use in industrial panel installation, provides precise protection from current surges and continuous overloads.

Remote panel installation of control potentiometer simplifies adjustment of relay to operate on any current value from 250 to 750 milliamperes, DC. Auxiliary for pilot light indication of "overload" or "clear" position. Reset relay can be operated from any point convenient to operator. Insulation between coil and ground rated at 3,000 volts. Shpg. wt., 13 oz.

RING INFORMATION

Series Number — determines terminal Grid:

3500 = Inline Pins } .100 Grid
 3700 = Stagger Pins }
 3600 = Inline & Plug-in } .150 Grid
 3800 = Stagger Pins }

Variation Code — 00 through 99 determines shielding and special features.

Number of Poles — 1 through 4.

Contact "form" or configuration — A, B, or C.

A = Normally open contacts

B = Normally closed contacts

C = one normally open and one normally closed contact

Contact code — A through Z describes specific plating and blade designs.

Coil Voltage (rated) — 5, 6, 12, 24 or 48 dc.

EXAMPLE:

describes a .100 grid PC mounted relay with external magnetic shielding. It has 4 form C contacts designed for the heavy duty switching of 10 watts and a coil rated at 12 volts dc.

SPECIALS: Special versions of Series 3500/3600 relays are limited only by the bounds of imagination and budget. Let our APPLIED IMAGINATION work to produce specials such as these for you!

RELAYS WITH EXTRA DIMENSIONS

TO-5 MICROMINIATURE RELAYS — SERIES MA AND MS

Product Bulletin 90

All welded, DPDT relays manufactured in accordance with MIL-R-5757.

NEW

CONTACT RATING

1 ampere at 32 volts DC max, low level 0 to 0.1 ampere at 50 mV DC or AC, minimum current per MIL-R-5757/40 and /70.

UNIQUE PROCESSING TECHNIQUES ENSURE LONG LIFE

All handling and processing techniques are fully controlled and documented. Complete identification and traceability records are maintained. All parts are 100 percent inspected and cleaned prior to assembly. Critical assembly and inspection stations are housed within laminar flow work stations.

HI-G'S CLEANING PROCESS REMOVES ALL TYPES OF CONTAMINATES

A unique cleaning system entirely housed in a laminar flow bench utilizing vapor degreasing, ultrasonic agitation, spray cleaning, and use of solvents with an organic base, water and detergent is capable of removing organic as well as inorganic soils. A special spray cleaning process using a highly volatile solvent is used as a final cleanup of the completed assembly.

VACUUM DEGASSING

After final cleaning, the relays are immediately placed into a

vacuum outgassing station. The vacuum system is fully purged against contamination with molecular sieve traps, liquid nitrogen and water cooled optical baffles. A high temperature vacuum with controls capable of maintaining temperature limit gradients within $\pm 1^\circ\text{C}$ is connected to the pumping station. are outgassed above 200°C at vacuum levels of 10^{-6} torr (micron) for 16 hours.

FINAL SEAL OPERATION

At the conclusion of the outgassing cycle, the open relay is passed from the vacuum oven through an interlock into an airtight controlled dry box. The back filling gas is continuously recirculated through an inert gas purification system, changing the entire volume of gas within the dry box every 48 hours. Within the dry box is a projection seal welder, which hermetically seals the housing to the relay assembly.

FINAL TEST

All relays are checked for contact resistance, pull in and out, dielectric strength, insulation resistance, contact bounce, operate and release time, and coil resistance. Additionally, each relay is submitted to a 5000 cycle low level miss test.

SIZE

ELECTRICAL CHARACTERISTICS

Sensitivity at 25°C : MA Series — 125 mW.
MS Series — 65 mW.

Life: 50,000 operations at min current loads.
100,000 operations min at max rated load.
1,000,000 operations min at low level.

Overload: 2 amps at 32 VDC for 100 operations min.

Contact Resistance: (a) 100 milliohms initial at rated load.
(b) 200 milliohms after rated life.
(c) 3Ω max during min current life. 0.5Ω after life.
(d) 50Ω max at $15\ \mu\text{A}$ and $15\ \text{mV rms}$.

Contact Bounce: 1.5 ms max.

Operate Time: 2.0 ms max at nom coil voltage at 25°C (MA Series).
4.0 ms max at nom coil voltage at 25°C (MS Series).

Release Time: 1.5 ms at 25°C (MA Series).
2.0 ms max at 25°C (MS Series).

Dielectric Strength: 500 V rms between all mutually insulated points at sea level.

Insulation Resistance: 5000 M Ω min between mutually insulated terminals.

ENVIRONMENTAL CHARACTERISTICS

Temperature Range: -65°C to $+125^\circ\text{C}$.

Vibration: 0.5" DA from 5-34 Hz, 30 G from 34-3000 Hz, $10\ \mu\text{s}$ contact opening.

Shock: 75 G (11 ms duration), saw tooth, $10\ \mu\text{s}$ max contact opening.

Acceleration: 100 G.

Leakage Rate: 1×10^{-8} cc/s max.

WEIGHT

Series MA: 2.9 grams max.

Series MS: 4.5 grams max.

.150 GRID RELAY — SERIES G Product Bulletin 95

All welded, DPDT relay manufactured in accordance with MIL-R-5757.

the
MINI-G¹

ELECTRICAL CHARACTERISTICS

Sensitivity at 25°C: 135 mW.

Life: 100,000 operations min at rated load and 125°C.

Overload: 2 amps at 30 VDC for 100 operations min.

Contact Resistance: (a) 50 milliohms initial at rated load.
 (b) 150 milliohms after rated life.
 (c) 3Ω max during min current life.
 (d) 50Ω max at 10 mA and 30 mV rms.

Contact Bounce: 1.2 ms max measured at 100 mA at 6 VDC.

Operate Time: 4.0 ms max at nom coil voltage at 25°C (including bounce)

Release Time: 4.0 ms max at 25°C (including bounce)

Dielectric Strength: 500 V rms between all mutually insulated points at sea level; 750 V rms between contacts and case.

Insulation Resistance: 1000 MΩ min between mutually insulated terminals.

Trademark pending registration

CONTACT RATING

1 ampere resistive at 30 volts DC max, 0.125 ampere resistive at 115 volts rms, 400 Hz, case grounded, low level 0 to 0.1 ampere at 50 mV DC or AC, minimum current per MIL-R-5757/37.
 2 ampere resistive at 30 volts DC max (50,000 operations min)

ENVIRONMENTAL CHARACTERISTICS

Temperature Range: -65°C to +125°C.

Vibration: 0.5" DA from 5-34 Hz, 30 G from 34-3000 Hz, 10 μs max contact opening.

Shock: 100 G (11 ms duration), saw tooth, 10 μs max contact opening.

Acceleration: 100 G.

Leakage Rate: 1 x 10⁻⁸ cc/s max.

WEIGHT

0.13 oz.

GENERAL PURPOSE RELAYS

MINIATURE OPEN TYPE
(SERIES MK)

Open type relay in standard contact arrangements up to 3PDT. 5 or 10 amp contact rating. Voltages up to 230 volts, A.C. or D.C. Factory adjusted to pull in at 75% max. of nominal voltage D.C. and 80% max. of nominal voltage A.C. Designed to pass 1,000 volt A.C. Hipot test between all elements. UL File #36213

AC	5 amp contact rating	6, 12, 24, 115V	220V
	MK1A SPDT	\$3.10	\$3.55
	MK2A DPDT	3.75	4.15
	MK3A 3PDT	4.15	4.55

All models available in 10 amps. DIMENSIONS: 1-11/16 × 1-3/16 × 29/32
All models available in 10 amps. Ask for series MKO.

PLATE CIRCUIT RELAYS 5 amp. open type

	2500Ω	5000Ω	10,000Ω	20,000Ω
MKC-1 SPDT	\$3.15	\$3.25	\$3.80	\$4.05

	MKP2D DPDT	6.00	6.40
	MKP3D 3PDT	7.45	7.90

MINIATURE MULTIPLE LEAF
(SERIES MW)

A small, versatile relay available in a variety of contact configurations consisting of forms A, B, C or D (make before break), up to a maximum of 12 springs. Coils can be supplied for operation on D.C. or A.C. 60 cps. Operation on 400 cps. source is available with self-contained rectifiers on relays with covers.

	10 amp contact rating	6, 12, 24, 115V	220V
AC	MW1A SPDT	\$2.70	\$3.10
	MW2A DPDT	3.30	3.75

	MW14D 4PDT	6.35	6.80

DIMENSIONS: 1-17/32 × 1-21/32 × 1-0

SPOTLIGHT RELAYS (SERIES A)

High quality, general purpose plug-in relay with built-in circuit indicator lamp. Available in C-11 Styrene colored cases for circuit identification or in metal can. Saves panel space, reduces costly labor. UL File #36213.

	5 amp contact rating	6, 12, 24, 115V	220V
AC	A-1A SPDT	\$6.40	\$6.85
	A-2A DPDT	7.00	7.40
	A-3A 3PDT	8.45	8.85
		6, 12, 24V	110V
DC	A-1D SPDT	\$6.35	\$6.75
	A-2D DPDT	6.95	7.35
	A-3D 3PDT	8.40	8.80

All models available in 10 amps. AH series.
DIMENSIONS: 2-1/4 × 1-3/8 × 1-3/8

SPOTLIGHT RELAYS.
LOW COST. (SERIES ATR)

A plug-in relay which is identical in construction to our miniaturized low profile SERIES MKTR (see page 3) but with built-in circuit indicator lamp. It can be used in conjunction with our 92-67 or 92-82 sockets and 91-49 spring clip. UL File #36213.

	5 amp contact rating	6, 12, 24, 115V	220V
C	ATR1A SPDT	\$5.25	\$5.60
	ATR2A DPDT	5.90	6.30
	ATR3A 3PDT	6.35	6.80

MINIATURE PLUG-IN LOW PROFILE LOW COST (SERIES MKTR)

Despite its compact size this new totally enclosed, low cost, low profile miniature relay has not compromised the high quality of its progenitor the Series MK open relay. The low mounting profile (dust cover included) has been made possible by incorporating the frame of the relay with the connector-header. Thus a certain basic hardware has been eliminated resulting in important size reduction. Versatility is also assured since the standard terminals can be used with Amp snap-on connectors, printed circuits, or plug-in receptacles. Also available with studs for chassis mounting. Termination can be used for soldered connections. The plug-in-receptacle is true 10 ampere construction. Lugs can be used for either solder or snap-on connections. UL File #36213 10 Amps series MKTRO

	5 amp contact rating	6, 12, 24, 115V	220V

GENERAL PURPOSE RELAYS

NEW MINIATURE SENSITIVE RELAYS 60 MILLIWATTS PER POLE

(SERIES SK)

Type
SKType
SKA

This entire series of SK type relays is identical in construction to our MK series miniature relays, with one essential difference—the special alloy used in pole and frame increases the magnetic

flux many times thus making the relays very sensitive low power levels—only 60 milliwatts per pole.

NEW MINIATURE CRADLE TYPE RELAYS (SERIES JMR)

AND (SERIES JM RB BIFURCATED)

The JMR is an imported miniature cradle type relay incorporating a unique reed hinge. The reed hinge eliminates the possibility of binding and wear, thereby providing exceptional long life.

All contact connections are molded directly through the base; the only solder connections in the relay are those to the coil.

The JMR features gold diffused, silver contacts which are suitable for low level as well as full rated 5 amp. loads. The relay is enclosed in a high impact polycarbonate housing and the relay base is black bakelite. All internal phonoelec spacers are baked and out-gassed prior to assembly, thereby assuring reliable operation under the most adverse conditions.

Model Number	Poles	6, 12, 24 VDC	48 VDC	115 VAC

GENERAL PURPOSE RELAYS

MINIATURE 4-POLE RELAY

(SERIES JA)

The series JA is a high quality, miniature 4PDT relay for AC or DC operation. The JA relay features nylon dust cover, gold flashed fine silver contacts rated at 3 amps. This imported relay features exceptional quality and rugged design to meet the most exacting requirements. It is excellent for computers, logic systems and data processing. Standard configuration features solder terminals and 3-48, 23/64" mounting stud. Can be used with our 92-79 solder lug socket or 92-80 P.C. socket (50c each)

	Voltage	Resistance	Nominal Power	Price
DC	6 VDC	40 OHMS	800 MW	\$4.10
	12 VDC	160 OHMS	800 MW	4.10
	24 VDC	650 OHMS	800 MW	4.10
	48 VDC	2500 OHMS	800 MW	4.20
	90 VDC	10000 OHMS	800 MW	4.90
	110 VDC	10000 OHMS	800 MW	4.90
AC	6 VAC	10.5 OHMS	1.1 VA	\$4.40
	12 VAC	43 OHMS	1.1 VA	4.40
	24 VAC	160 OHMS	1.1 VA	4.40
	115 VAC	3900 OHMS	1.1 VA	4.90

MEDIUM POWER RELAY OPEN TYPE

(SERIES LR)

Open type, heavy-duty type relay designed for many applications. Standard fine silver contacts rated at 10

amperes, optional Silver Cadmium load contacts rated at 15 amps. Ambient temperature operating range, continuous duty: A.C., -45° to 55°C.; D.C., -45° to 75°C.

AC

10 amp contact rating	6, 12, 24, 115V	220V
LR1A SPDT	\$4.00	\$4.20
LR2A DPDT	4.85	5.05
LR12A SPDT-DB(15A)	5.05	5.25

DC

10 amp contact rating	6, 12, 24V	110V

LR12D SPDT-DB(15A)	5.85	5.05

DIMENSIONS: 2-3/8 × 1-1/2 × 1-21/32

MEDIUM POWER RELAY OPEN TYPE

(SERIES LRT)

Same quality features of the LR series (above) but in a special configuration utilizing .250 quick connect terminals.

AC

10 amp contact rating	6, 12, 24, 115V	220V
LRT-1A SPDT	\$4.50	\$4.70
LRT-2A DPDT	5.35	5.55
LRT-12A SPDT-DB	5.55	5.75

DC

10 amp contact rating	6, 12, 24V	110V
LRT-1D SPDT	\$4.30	\$4.50
LRT-2D DPDT	5.15	5.35
LRT-12D SPDT-DB	5.35	5.55

for single and double pole types. Eleven pin headers are also available. The standard LRP plastic enclosure is a clear C-11 Styrene, colors are available at no extra charge. Female sockets for 8 and 11 pin headers are also available.

MEDIUM POWER RELAY PLUG-IN TYPE

(SERIES LRP)

This relay is available in either metal or plastic enclosures, equipped with a standard octal plug in header

AC

10 amp contact rating	6, 12, 24, 115V	220V
LRP1A SPDT	\$7.00	\$7.10
LRP2A DPDT	8.20	8.50

LRP12D SPDT-DB(15A)	8.70	8.80

DIMENSIONS: 3-1/4 × 1-15/16 × 1-15/16

HEAVY DUTY RELAY OPEN TYPE

(SERIES LG)

Open type relay, specifically designed for extremely heavy-duty applications. Standard Fine Silver load contacts are rated at 15 amps. with optional Silver Cad-

mium Oxide contacts where larger inrush loads are encountered. Loads are rated at 115/60 non-inductive. All load contacts are factory gold-flashed to prevent contact oxidation prior to use.

AC

15 amp contact rating	6, 12, 24, 115V	220V
LG1A SPDT	\$4.30	\$4.50
LG2A DPDT	4.85	5.05
LG3A 3PDT	5.40	5.60

DC

DIMENSIONS: 2-1/8" × 2-1/2" × 2-5/16"

MECHANICAL LATCH RELAYS

OPEN TYPE (SERIES RL)

Open type for use where a sustained relay closure is required, and current drain of a relay coil is to be eliminated. Incorporates two coils, one to close load con-

tacts, the other to reset them. Requires only momentary electrical contact to operate or release. Provides positive mechanical latch, eliminating chatter during sustained relay closure.

AC	5 amp contact rating	6, 12, 24, 115V	220V
RL1A SPDT		\$7.15	\$8.00

HERMETICALLY SEALED RELAYS

PLUG-IN TYPE (SERIES HKP)

The Series HKP relay incorporates the basic MK frame into hermetically sealed plug-in configuration. All units are thoroughly vacuum baked and out-gassed and back filled with nitrogen before sealing. The HK series will fit any standard octal based receptacle and is in the classification of a general purpose relay.

	10 amp contact rating	6, 12, 24, 115V	220V
AC	HKH1A SPDT	\$8.50	\$8.95

REED RELAYS — 3 STANDARD TYPES

In computer, data processing and guidance system development, design engineers are enthusiastically applying dry reed relays in place of switching diodes. The reasons: miniature profile—life expectancy exceeding 100,000,000 operations—less heat generated compared with switching diodes—3 millisecond operating time and very high resistance in the open contact stage.

To efficiently serve the growing demand for dry reed relays in these and other applications, Line Electric now stocks these 3 standard types for immediate delivery in prototype quantities.

NEW MINIATURE POWER RELAY (SERIES PF)

The PF Series Relays are especially designed for applications where limited space is a factor. This relay, although small in size, is ideally suited for heavy duty industrial control applications where long life and fast action are a requirement. The PF Relay is supplied with 1/4" quick connect terminals on the contacts for ease of installation. Other type terminals are available upon request. Consult factory for details.

CONTACTS

Material 1/4" dia. silver cadmium oxide gold flashed.

Contact Terminals 1/4" quick connect. Pierced for soldering.

SOLID STATE TIME DELAY RELAYS PLUG-IN TYPE (SERIES XL)

GENERAL DESCRIPTION

The essential difference between solid state electronic timers and other types is the absence of mechanical moving parts within the controlling circuit. For this reason they often require less installation space than the equivalent electro-mechanical models, while delivering longer performance.

Since the circuitry used in Line Electric electronic time delay relays is transistorized no warm-up time is required. To provide extremely

stable repetitive timing within wide input voltage fluctuations reference elements are used when required.

Today the incorporation of solid state electronic time control original equipment is an indication of advanced engineering and a strong factor in influencing preference for your company's products. We invite your inquiries.

TYPE XLA

SERIES XLA FIXED TIME DELAY

115 VAC input* Isolated load output SPDT Relay. (DPDT available on request.) * Time range within $\pm 5\%$ at 117 VAC line* Repeatability $\pm 5\%$. * Load Capacity 5 amperes (non-inductive.) * Fixed Delay from 0.125 to 60 seconds. (Specify time when ordering.) * Unit is transient protected.

Model	Time Setting	Price
XLA-0.125s	0.125 sec.	\$17.5
XLA-5s	5 sec.	17.5
XLA-10s	10 sec.	17.5
XLA-15s	15 sec.	17.5
XLA-30s	30 sec.	17.5
XLA-60s	60 sec.	17.5

TYPE XLB

SERIES XLB VARIABLE TIME DELAY

This is the same as Series XLA above except that it has a setting potentiometer (with locking device) for adjusting the time delay.

Model	Min. Setting	Max. Setting	Price
XLB-5s	.1 sec.	5 sec.	\$18.
XLB-10s	.1 sec.	10 sec.	18.
XLB-15s	.1 sec.	15 sec.	18.
XLB-30s	.1 sec.	30 sec.	18.
XLB-60s	.1 sec.	60 sec.	18.

TYPE XLC

SERIES XLC VARIABLE TIME DELAY

Essentially the same as Series XLB above except that it has a knob and 0-10 scale dial control for adjusting the time delay.

115 VAC input* Isolated load output SPDT Relay. (DPDT available on request.) * Repeatability $\pm 2\%$ of full scale setting. * Load capacity 5 amperes non-inductive at 115/60. * Time accuracy not affected by 95 to 130 volt line fluctuation. * Unit is transient protected. * Longer time delays up to 5 minutes available on request. * Precision temperature compensated units available on request. * DC units available: 12, 24 or 48 VDC

Model	Min. Setting	Max. Setting	Price
XLC-5s	.25 sec.	5 sec.	\$23.5
XLC-10s	.25 sec.	10 sec.	23.5
XLC-15s	.25 sec.	15 sec.	23.5
XLC-30s	.25 sec.	20 sec.	23.5
XLC-60s	.25 sec.	60 sec.	23.5

BUZZERS D.C. - A.C.

VARIABLE SOUND AND PITCH D.C. - A.C.

The series BD buzzers are designed for use in offices, plants, etc., where quality, good appearance and dependable operation is demanded. Three sizes of buzzers are available, each size varying in tone and volume of sound. However, the volume of sound and pitch of each size buzzer can be varied by means of double, locking adjustments. The three sizes of buzzers are equipped with phosphor bronze springs and pure hard-drawn silver contacts. They are bug and dust-proof with tight-fitting polished chrome covers.

LINE ELECTRIC COMPANY

Magnecraft® general purpose relays

Magnecraft designed the Class 88 line of clapper type general purpose relays to provide versatility and trouble-free performance in switching control applications. The Class 88 relays have rugged hinge-pin armature bearings with oversize bearing surfaces. This is the same construction as used in the finest telephone type relays for lowest friction and maximum contact effectiveness with stabilized adjustment. Other outstanding features are as follows.

CLASS 88 OPEN TYPE RELAYS

Small, 10 Amps., AC & DC
Wt. — 2 ozs. approx.

- Silver alloy contacts rated 10 amps. Gold flashed.
- Solder terminals for easy wiring.
- One #6-32 tapped mounting hole with locating boss.

GREATER DIELECTRIC STRENGTH provided by glass insulation with completely unaffected by humidity and temperature changes.
NO POSSIBILITY OF SHORTS thanks to a molded nylon bobbin rugged-coil terminal inserts.
BUILT-IN CONTACT WIRE with riveted contacts further advance life reliability.
AVAILABLE IN STOCK across the nation from many Magnecraft distributors.

Wiring Diagrams for Class 88 Plug-in Mounted Relays.

- Silver alloy contacts rated 10 amps. Gold flashed.
- Built-in neon circuit indicator light comes on when coil is energized. Eliminates need for expensive pilot lamp assemblies, saves panel space and shows circuit condition at a glance.
- Encl. 40-279 crackproof dust cover of polycarbonate resins — clear as glass; tough as steel.

WD is Abbreviation for Wiring Diagram

† Voltage Operated Relays pull in at 80% of nominal or less for DC relays and 85% of nominal or less for AC relays, at 25°C.

†† 10 Ampere Silver Alloy contacts — Gold Flashed.

* Resistance values ±10%, measured at 25°C.

Magnecraft® general purpose relays

CLASS 88HP HERMETICALLY SEALED RELAYS††

g-in, 10 Amps., AC & DC
Wt. — 5 ozs. approx.

hermetically sealed and filled with a dry high purity gas to afford maximum protection against severe ambient conditions.
40-180 Hermetically sealed enclosure.
Silver alloy contacts rated 10 amps.
Standard 8 or 11 pin octal style plug mates with standard 8 or 11 pin octal style socket.
Available in DPDT or 3PDT Contact Combinations.

CLASS 88L LATCHING REALAYS 4PDT & 6PDT

all, 10 Amps., AC & DC
Wt. — 6½ ozs. approx.

Silver alloy contacts rated 10 amps. Gold flashed.
Gold flashed.
Combination of two Class 88 relays
with interlocking latch-in levers
mounted on common base.
Each armature latches when pulled in. Energizing one
armature releases or rests the other.
Each relay is complete with independent operating coil.
Designed for continuous duty.

Magnecraft® heavy duty power relays

CLASS 99 — HEAVY DUTY INDUSTRIAL CONTROL POWER RELAYS — UL LISTED

Three Class 99 Power Relays featured in this section are listed by Underwriters' Laboratories under Motor Controllers, Magnetic, Across-the-line starters: Open (File No. E43641).

The one exception is the Class W99AX-7 DPDT 440 VAC relay indicated below with two asterisks (**).

CLASS 99
AMP. — 1 HP
DT
— 8 ozs. approx.

Dimensionally interchangeable with relays made by others. Superior quality hinge-pin design, molded nylon bobbin and adjustment stability features give it longer life. $\frac{3}{16}$ " contacts of silver alloy, gold flash. Standard dielectric strength: 1500 VAC, RMS. Screw type terminals and molded phenolic base.

Magnecraft® air dashpot time delay relays

CLASS 112C AIR DASHPOT TIME DELAY RELAY DPDT 10 Amps.

Operate and release delay adjustable 1 to 150 seconds
Wt. — 20 ozs. approx.

Class 112C features rugged all metal enclosure with grommet or customer feed through wires. Internally wired by customer to .187 quick disconnect terminals. The solenoid assembly added to air dashpot/snap switch combination initiates time switching function by electrical actuation. Available in operate or release delay. Release delay accomplished without standby power. Time repeat accuracy $\pm 10\%$. Mounting: two $\frac{3}{16}$ " diameter holes on 3" centers.

CLASS 112M AIR DASHPOT TIME DELAY RELAY DPDT 10 Amps.

Plastic enclosure — screw type terminals — operate and release delay adjustable 1 to 150 seconds
Wt. — 14 ozs. approx.

Class 112M comes in molded high impact plastic enclosure and built-in screw type terminals for easy customer wiring. The solenoid assembly added to air dashpot/snap switch combination initiates time switching function by electrical actuation. Available in operate or release delay. Release delay accomplished without standby power. Timing adjustable with knob or capped Allen screw. Factory wired internally. Time repeat accuracy $\pm 10\%$. Flange mounting: Six $\frac{3}{16}$ " diameter holes $\frac{1}{2}$ " x $4\frac{1}{8}$ " centers.

CLASS 110 AIR DASHPOT TIME DELAY — OPERATE DELAY ADJUSTABLE 0.2 TO 45 SEC.

High Reliability and long life assured by —

- Proven relay contacts and construction.
- Air Dashpot Timer precision built of nonaging, low friction material.
- Solenoid Assembly completes magnetic circuit instantaneously for positive switching that protects contacts from chattering and fritting.

OPEN TYPE WITH SOLDER TERMINALS

Wt. — 6 ozs. approx.

Output contacts DPDT silver alloy gold flashed 10 amps.

Dimensions: $3\frac{3}{8}$ " long, $1\frac{1}{8}$ " high, $1\frac{1}{8}$ " wide.

SCREW TERMINALS — 40-348 COVER

Wt. — 15 ozs. approx.

Heavy metal enclosure with snap-on cover. Snap-on cap access to timing adjustment. Screw terminals with phenolic barriers. Wiring diagram, contact specifications, coil voltage and part number on cover. Output contacts DPDT silver alloy gold flashed 10 amps.

PLUG-IN WITH 40-347 COVER

Wt. — 15 ozs. approx.

Phenolic octal plug with hold down bracket. Heavy metal enclosure with snap-on cover. Snap-on cap access to timing adjustment. Wiring diagram, contact specifications, coil voltage and part number on cover. Output contacts DPDT silver alloy gold flashed 10 amps.

A high reliability Magnecraft Class 88 DPDT relay with its long life and precision built hinge pin armature is mounted internally.

The Class 211CP offers the following outstanding features.

- Available in three adjustable timing ranges, 1 to 10 sec., 1 to 18 and 2 to 300 sec.
- Available for AC and DC operation.
- For delay on operate.
- For delay on release.
- Plug-in mounting (mates with standard octal style sockets).
- Knob adjusting timing.
- Nylon dust cover.
- Reverse polarity protected. (DC models).
- Timing repeatability $\pm 5\%$ of setting at nominal voltage @ 25°C.
- Reset time: 100 ms. typical.
- Transient protection: Protected for twice the nominal input voltage a period not to exceed 8 ms.
- Temperature range: Operate -10°C to $+55^{\circ}\text{C}$
Storage -55°C to $+85^{\circ}\text{C}$

**CLASS 212M PRECISION
SOLID STATE (HYBRID)
TIME DELAY RELAY
WITH 1% REPEATABILITY
Wt. — 10 ozs. approx.**

- Adjustable to 500 seconds • 1% repeatability • 10 Ampere DPDT output switching
 - Calibrated dial • Fast reset time • Transient protection against 1000 volts • Available for AC or DC operation • Molded plastic enclosure for surface mounting • Screw type terminals • Versatility — 2 basic models provide 6 different timing functions possible with a jumper wire to the appropriate terminals:
- 
- A black and white photograph of a rectangular electronic component, likely a timer, with a dial and screw terminals. The component is shown from a side-on perspective, highlighting its physical features.

Will meet the increased demands for highly reliable, precision accurate, industrial electronic control components. Utilizes precise components for close tolerance of operation with 1% repeatability.

CLASS 113C AIR DASHPOT TIME DELAY SWITCH

Push Button . . . Release Button . . .
Time Delay Is On SPDT — 10 Amp.
Single hole panel mounting with
5/8" threaded bushing
Wt. — 8 ozs. approx.

The Class 113 Air Dashpot Time Delay Switch is built with a non-aging, low friction graphite and precision ground tempered glass air dashpot timer. All metal parts are corrosion resistant. Pushing the button instantly transfers the SPDT switch. Releasing the button initiates the timing cycle. At the end of the timing period (when the dashpot piston travel is completed) the snap action output contacts are instantly reset, ready to perform another timing operation. Wired by customer thru grommet.

Available in SPDT with 10 ampere contact rating up to 32VDC or 250VAC resistive load. Knob adjustable timing range from 1 to 180 seconds. Equipped with 1/2" diameter push button. This new Class 113 Time Delay Switch is a masterpiece of simplicity with few moving parts. Ideally suited for industrial control applications as machine tool control, supervisory control equipment, test equipment, conveyor control, elevator control, automation equipment, etc.

Magnecraft® telephone type relays

**CLASS 77CS — MINIATURE — 5 AMP — 4PDT
JUST COVER AND SOCKETS
— 2 ozs. approx.**

Switches up to 5-amps — has greater contact pressure without increasing coil operating power. No internal wiring, solder connections or pigtails. Hingepin armature bearings with oversize bearing surfaces guarantee longer life. Molded insulation of contact terminals provides higher dielectric strength. Comes in molded insulated snap-on dust cover.

Magnecraft® telephone type relays

CLASS 22T — SMALL DC — 4 AMP. — TWIN CONTACTS

Wt. — 5 ozs. approx.

Class 22T — miniature long form relay with accuracy, reliability and long life equal and sometimes superior to larger relays. A unique, pin type armature hinge of heavy duty design and precision construction assures stabilized adjustment through millions of operations. Twin contacts with long, flexible bifurcated contact springs assure the ultimate in switching reliability.

Twin contacts, 4 ampere rating. All mounting and wiring at heel end. Tinned solder terminals with easy-to-wire spacing. Two #6-32 tapped

CLASS 33 — SUB-MINIATURE — DC — 3 AMP

Wt. — 1 oz. approx.

Class 33 midget sub-miniature; the smallest telephone type MAGNECRAFT Relay on the market. Class 33 is also the most operating and inherently more shock resistant and vibration resistant. Long life reliability and accuracy fit Class 33 for a wide range of small space requirements. They are extensively used for

craft, computer and mobile applications where small size, light weight and resistance to shock and vibration are essential. Contacts; 3 amp rating. Four 4-40 tapped mounting holes on 3/8"x3/8" centers.

Magnecraft® hermetically sealed relays

CLASS 33HS — HERMETICALLY SEALED MINIATURE DC — 5 AMP. — DPDT — 4PDT SILVER ALLOY CONTACTS

— 3 ozs. approx.

Maximum telephone type relay reliability. Fast operate and release time. One of the smallest hermetically sealed telephone type relays.

Highly adaptable to applications involving shock, vibration and severe atmospheric conditions.

Widely used in both military and civilian applications such as: aircraft radio equipment, aircraft radar sets, aircraft flight recorders, etc.

Full 5 ampere 4PDT switching capability.

CLASS 102V 5000 VOLT HI VOLTAGE REED RELAY — SPST — NC

Solder Terminal
Construction
Switching Voltage
As High As 5000 Volts Peak
Wt. — 3 ozs. approx.

This relay is similar in design to the 102V SPST-NO Form A High Voltage Relay, and will meet all of the specifications indicated, except for the DC coil power required and DC coil resistance. By the use of a biasing magnet, a normally closed contact is obtained. It should be noted that these are polarity sensitive and voltage of the indicated polarity must be applied to the proper coil terminals for operation. These relays are designed to pull in at 80%, or less, of the nominal voltage at 25°C. Due to the use of the biasing permanent magnet, it is not recommended that these units be operated on more than 25% higher than the nominal voltage to obtain maximum reliability and proper contact switching.

Magnecraft® reed relays

CLASS 102HV 10,000 VOLT HI VOLTAGE REED RELAY — SPST — NO

Solder Terminals
Molded Construction
Switching Voltage
As High As 10,000 Volts Peak
Wt. — 2 ozs. approx.

Contact Combination, SPST-NO (1 form A).
 Contact Load Rating, 10,000 volts peak at .001 amperes.
 Nominal Coil Power, 1.5W average.
 Operate Time, Typically 25 ms including bounce.
 Contact Resistance, 100 milliohms average.
 Typical Life at Rated Load, 1 million — longer at reduced loads.

A reliable 10,000 volt high voltage reed relay . . . at a reasonable price.

The Class 102HV 10,000 volt relay is the natural addition to the fast growing line of Magnecraft's high voltage reed relays. Made with contacts of special material, the Class 102HV switches voltage as high as 10,000 volts at .001 amperes with the inherent reliability of reed relay operation. It utilizes a specially designed insulation system which provides maximum dielectric strength to insure utmost safety to the user.

Magnecraft® reed relays

CLASS 103LCP PLUG-IN LATCHING REED RELAY

Stable SPDT, .2 Amp.
— 5 ozs. approx.

Magnetic latching action requires coil current to hold either of latching positions. In the case of the single wound coil switching is achieved by reversing coil current polarity. The double wound coil requires separate polarized winding; latching is achieved by use of 1/2 input.

Operate, 2 ms. average.

Contact Bounce, 2 ms. average.

Contact Load Rating, 10VA at 0.2 amp. max. 200VDC max., resistive.

Contact Resistance, 150 milliohms average.

Capacitance across contacts, 4.0 pf. average.

Life Expectancy, 25 million cycles — longer at reduced loads.

Nom. power, single coil 150MW, double coil 300MW.

CLASS 103LMPC BI-STABLE LATCHING RELAY — DRY REED

Magnetic Latching Relay
Wt. — 1 oz. approx.

Ideal for memory applications. Bi-stable SPDT Contacts — biased permanent magnet holds either contact position **without coil power until coil polarity is reversed.** Dimensions and wiring same as 103MPC, page 19.

Operate, 2 ms. aver. Bounce, 3 ms. max.

Contact Resistance, 150 milliohms aver.

Contact Load Rating, 10VA, 0.2 amp. max. or 200V max., non-inductive.

Life Expectancy, 25 million cycles at rated load; longer at reduced loads.

Operating Position, any.

Nom. power, single coil 150MW, double coil 300MW.

CLASS 44 MICRO-MINIATURE ROTARY RELAYS CRYSTAL CAN TYPE DPDT — 2 AMPS.

MAGNECRAFT Class "44" Rotary Relays have been developed to provide increased reliability in the crystal can size relay by incorporating rugged bridge construction, balanced armature construction, a sturdy hinge construction (using oversize instrument type bearings at BOTH ends) and the use of the finest high temperature insulation materials available. Because of this unique design, the MAGNECRAFT Class "44" Relay assures trouble free operation even under extreme conditions of shock, vibration and temperature conditions as required in military applications. Some of the Class "44" capabilities are:

1. Ambient Temperature: —65°C to +125°C
2. Vibration: 10-55 cps. @ 10g's 55-2000 cps. @ 20g's
3. Shock: 50g's for 11 milliseconds
4. Enclosure: Hermetically sealed in inert gas
5. Life: 100,000 operations minimum at rated load

Contact Combination: Double Pole, Double Throw
Contact Rating: 2 amperes @ 28 VDC or 115 VAC, non-inductive
Terminals: Solder Type, Plug-in and 3" Leads
Operate Time: 5 milliseconds maximum at nominal power
Release Time: 5 milliseconds maximum

Standard Contact Arrangement

*Resistance values ±10%, measured at 25°C.
†Voltage operated relays pull in at 80% of nominal or less for DC relays at 25°C.

ENGINEERS' RELAY HANDBOOK by NARM

Designed to aid engineers in understanding, application, selection and specifying of relays. Covers a wide range of subjects including Relay Terminology and Bibliography of Information Sources. Major divisions are Classes of Service, Relay Classifications, Principles of Operation, Relay Application Consideration, Relay Reliability, How to Specify Relay, Testing Procedures, and Government Specifications.

Magnecraft® coaxial relays & plastic plug-in enclosures

CLASS 128 COAXIAL RELAYS FOR RF SWITCHING

Class 128
Coaxial Relay

Class 128 Coaxial Relay with
DPDT Auxiliary Contacts

Low Capacity RF Switching Relays See Class 33F.

Small compact relay combining a heavy duty coaxial cavity and the MAGNECRAFT 88 Relay structure described on page three. The precision-built, hinge-pin type armature bearings of the Class 88 assure consistent pull-in stability with maximum reliability over long life.

The coaxial contact structure is enclosed in a heavy duty precision machined brass cavity with removable plug for convenient inspection of contacts.

SPDT RF switching contacts are silver cadmium oxide, gold flashed, conservatively rated 100 watts of RF power; impedance matched to 50 ohm cable using standard type UHF connectors. VSWR 1.25: 1 maximum from 0 to 500 megacycles.

Operate time: 25 ms. maximum.

Release time: 25 ms. maximum.

OHMITE general purpose relays

MODEL GPR — INDICATOR, PLATE, THYRATRON AND LATCHING VERSIONS IN UNENCLOSED AND ENCLOSED TYPE

Simple, rugged, low cost relays handling substantial power for small size. Uncomplicated design provides unusual flexibility for making and changing connections and mounting. Stock includes

relays in versatile enclosures, some with indicator light, plate, thyatron and latching versions. Wide commercial and industrial use where economy and versatility are important.

ENCLOSED RELAYS

(GPRTA, GPRTT, GPRTS, GPRTP)

Four types of clear plastic enclosures as follows:

Chassis Mounting Types: "GPRTA" — ("Terminals-Above-Chassis" type) has terminal panel opposite to mounting flange; "GPRTT" — ("Terminals-Through-Chassis" type) has terminal panel on same end as mounting flange, requires chassis cutout; "GPRTS" type (Terminals for Socket Use) is similar to GPRTT but has no mounting flanges. It is intended strictly for plug-in mounting in Ohmite socket "SOGPR" (see "Socket" below).

Plug Base Type: "GPRTP" — employs octal plug for 1 and 2 pole relays; 11-pin plug for 3-pole. The octal plug base is integral with relay for rigidity — is designed with recessed pins which meet UL spacing requirements (150V).

Socket (SOGPR): Unique socket fits the terminal panels of all GPR relays and provides over-the-surface spacing to meet UL

UNENCLOSED RELAYS

Basic (Unenclosed) Relay: All connections terminate on barrier-type terminal panel on combination solder — quick-connect (push-on) lugs which accept AMP 110 female connectors. The terminal panel is conveniently incorporated into printed circuit boards. Fixed contacts are integral inlay on terminal itself. Normally furnished with a 6-32 x 1/2" mounting stud and non-turn boss (or lug for 4-pole relays). A 6-32 threaded hole is optional. Unenclosed relays can also be mounted by

plugging their panels into Ohmite sockets. See "Socket" below.

Contact Ratings: Two ratings — fire-resistant; silver-cadmium contacts, 10

Insulation: Tested at 1500 VAC.

Coil Wattage: 1.4 watts DC operation (2.0 volt-amps) AC except 2.4 (3.70 volt-amps) for 4-pole AC and AC latching relays.

requirements for 150 volts. Requires chassis cut-out to hold down springs (see illustration) for unenclosed and enclosed relays, are provided with each socket but are not required under conditions of vibration or shock. Socket solder terminals will also accept AMP 11 quick-connectors. See socket list.

SOCKETS FOR GPR, GPRTS RELAYS

For up to 3PDT: 1 3/4" square, requires 1 1/4" x 1 1/2" cutout.* 2 holes (for No. 6 screws) on 1 5/8" centers. Stock No. SOGPR-9 Net 1-24 \$1.10

For 4-pole models, 1 3/4" x 2", requires 1 1/2" x 1 1/2" cutout.* 2 holes (for No. 6 screws) on 1 5/8" centers. Stock No. SOGPR-12 Net 1-24 \$1.25

*Std. punches and dies from Ward Machinery Co., Chicago. No. 28 22N, 1 1/4 x 1 1/2, for SOGPR-9; No. 28, Style 14R, 1 1/2 x 1 1/2, for SOGPR-12.

Indicator Relay: Incorporates light bulb to indicate energized condition of coil. Stocked only in GPRTP enclosures described in preceding. Neon bulb furnished with coil ratings 70 volts and above; incandescent bulbs for coil ratings below 70 volts.

UL & CSA Approval: Column heads in the stock tables carry the

UL (Underwriters' Laboratories) or CSA symbol (Canadian Standards Association) where applicable. The grey tint in the column indicates the relays are recognized under the "UL component program." The acceptability of such relays by UL depends on their combination with other equipment such as socket

MODEL DO RELAYS AC or DC

Particularly adaptable to aircraft and mobile equipment applications where severe shock and vibration are encountered. Design of molded parts around contact arms protects against mechanical injury. Stocked in 3-pole or 4-pole type, and also in hermetic enclosures and in latching types.

Coil Wattage: 3.00 watts, DC operation; 6.00 watts, 60 cycle AC. Maximum temperature rise 45°C; DC operation; 75°C, AC.

Coil Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycle. Stock voltages in table.

Contacts: 10 amps nominal. Ratings are for 115 VAC or 32-VDC, resistive load.

Weight: Unenclosed 3-pole, 5 oz.; 4-pole, 6 oz.

DO RELAYS IN HERMETIC ENCLOSURES

Stock DO relays with 115 volt coil in hermetically sealed metal enclosures, filled with dry nitrogen. Enclosures provide protection for relay under most adverse ambient conditions. Both 3 and 4-pole DO relays are supplied in these enclosures with plug (DOHPX-) or solder terminal (DOHX-) connectors as illustrated. See listings in stock table above.

Weights: 3-pole hermetic relay approx. 14 oz.; 4-pole approx. 15 oz.

OHMITE general purpose relays

STOCK DOS RELAYS AC or DC

Application, general purpose relay, compact and lightweight. Meets loads usually demanded of much larger relays. Meets aircraft relay standards.

Wattage: 2.5 watts, DC operation; 3 watts, 60 cycle AC. Maximum temperature rise 45°C, DC operation; 65°C, AC.

Operating Voltage: Any voltage up to 230 VDC or 440 VAC, 60 cycles. Table lists stock voltages.

Contacts: 15 amps nominal. Rating is for 115 VAC or 32 VDC, resistive load.

Weight: Unenclosed, 4 ounces.

RELAYS WITH PLUG-BASE OR IN TIGHT OR HERMETIC ENCLOSURES

Relays with 115 volt AC coils are available from stock with a standard octal plug base, unenclosed (DOSPX-1T) or with an octal plug base and drawn aluminum, removable dust-tight enclosure (DOSHXP-5T).

Weight: 8 oz. each.

Hermetically Sealed non-removable enclosures, filled with dry nitrogen, are also available to provide protection under adverse operating conditions. DOS relays with 115 volt AC or DC coils are available in these enclosures with either octal plug (DOSHXP-) or terminal (DOSH-) connectors as illustrated. See listings and prices in DOS stock table.

Weight: 8 oz. each approx.

VALUES APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS.

OHMITE latching relays

Enclosed Latching Relay (GPRLETP)

6PDT Latching Relay (GPRLE)

Latching Relay: Consists of two GPR relays with armatures linked so that the n.o. contacts of one are mechanically latched in closed position when, and after, this relay is energized. When 2nd relay is energized, first relay restores and latches 2nd. Permits switching of twice the number of circuits and holding without coil current. Unenclosed type "GPRLE." Enclosed type "GPRLETP" in clear plastic case with Jones plug P-324-SB fitting S-324-AP socket.

MODEL DO LATCHING RELAY (DOLEX-)

Weights: 3-pole — 16.5 oz.; 4-pole — 17 oz.

Consists of Model DO relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to

normal position when the reset is pulsed. Permits "holding" of stock units (both relays and coils) are 115 VAC. Available on 4-pole DO relays

LATCHING TYPE

Catalog No. ¹	Type	Volts	Coil Data † Amps	DC Ohms
DOLEX-3T	3PDT	115VAC	.110	145.0
DOLEX-5T	4PDT	115VAC	.110	145.0

[†]Coil data applies to relay part of latching assembly. Reset magnet on 115VAC, 60 cycle also.

MODEL DOS LATCHING RELAY (DOSLEX-)

Consists of Model DOS relay and a "reset magnet" with both armatures mechanically latched so that the normally open contacts of the relay remain closed when the relay energizing voltage is removed. The relay releases to normal position when the reset coil is pulsed. Permits "holding" of circuits without continuous coil current. Coils of stock units (both relay and reset magnet) are 115VAC.

Weight: 14.2 oz.

LATCHING TYPE

Catalog No. ¹	Type	Volts	Coil Data † Amps	DC Ohms
DOSLEX-1T	DPDT	115VAC	.043	450

[†]Coil data applies to relay part of latching assembly. Reset magnet operates on 115 VAC, 60 cycle also.

MODEL DOSY RELAY FOR PLATE CIRCUITS

Similar in construction to Model DOS relay but equipped with twin coils for increased sensitivity. The DOSY relay is adaptable to a wide range of electronic control applications such as plate circuit controls, or as overload or underload controls for circuits to signal attainment of predetermined current levels.

Coil Wattage: 1.00 watt, with maximum temperature rise of 45°C. Lower wattages available.

Contacts: Stock combinations as listed. Ratings are for 115 VAC or 32 VDC, resistive load.

Weight: Approximately 4½ ounces.

O-Matic Sec. 23

Relay contacts are rated at 120V, 60 Hz, non inductive load. When ordering specify type and coil voltage or resistance.

Example: PR5AY, 120 Volts AC, 60 Hz or LB5, 2500 ohms resistance.

Operate 110V DC relays on 220V DC use a 5 watt wire-wound resistor of a value

approximately the relay coil resistance in series with the relay coil.

CONTACT LEGEND: S-Single; D-Double; P-Pole; T-Throw; N-Normally; O-Open; C-Closed; B-Break; M-Make.

Prices and Specifications subject to change without notice. For latest prices refer to United Pricing Service.

IN STOCK AT LEADING ELECTRONIC PARTS DISTRIBUTORS

GA SERIES Low cost, all purpose, multiple contact, voltage switching relay. Used for many industrial control applications. Tinned, lead solder type terminals. Contacts: dia. silver, designed for maximum self-cleaning action. Mounting: No. 8-32 tapped hole with locating boss. Weight: 3½ ozs.

GF series for similar relays having 10 pin ratings. (Page 4).

HP SERIES This commercial microminature relay is recommended for applications requiring high performance in minimum space, such as TV cameras, dictating machines, desk top computers, copying machines and others. For circuit board or socket-mounting and encased in a nylon heated (non hermetic) cover, the HP is a 1/2 inch crystal case size relay with terminals on a .200" grid. Weight: .3 oz.

PI solder terminal socket and retainer for HP relay.

§Enclosed Relay

Potter & Brumfield Relays

KA AND KAP SERIES Small, low cost, highly efficient general purpose relays for handling light power loads such as small motors, solenoids and other relays, and general automation work. All KA and KAP relays with "Y" suffix bear CSA* listing and carry U/L component recognition (File No. E22575). Mechanical life expectancy: 10 million operations. Duty: Continuous. Contacts: Movable, $\frac{1}{8}$ " dia. gold-flashed silver; stationary, $\frac{1}{8}$ " dia. wide silver overlay.

The KA is the open version of this series. Mounting: One No. 6-32 threaded stud and locating tab on $\frac{1}{8}$ " centers. Weight: 2 ozs. The KAP is the enclosed model and is protected by a clear, high impact plastic dust cover. Terminals: 8 or 11-pin plug. Weight: 3 ozs.

"G" suffix indicates silver-cadmium-oxide contacts on movables rated 10 amps.

HOLD DOWN SPRINGS

Designed to insure secure mounting of relays in any position. Will accommodate machine screws or rivets.

For KAP relays: (shown above)
9KA1 50 per box **NET \$5.80**

For KCP and KRP relays (pages 6 and 3)
9KR15 50 per box **NET \$5.80**

For KUP plain case relays (page 3)
9KU3 50 per box **NET \$5.25**

KHU/KHP/KHS SERIES Small, rugged, 4PDT, available for AC or DC operation. Only KHU relays carry Underwriters' Laboratories component recognition. KHU has Lexan and KHP has nylon dust cover; KHS is hermetically sealed in metal enclosure. These relays are designed to meet the exacting requirements of data processing, computer and process control applications. Contacts are $\frac{1}{8}$ " gold-flashed silver and are rated 3 amps @ 30V DC or 120V AC resistive for 100,000 operations. "12" suffix indicates silver-cadmium-oxide contacts. Mounting: Solder terminals with a No. 3-48 $\frac{1}{8}$ " long. Adaptable to sockets (below) with printed circuit or solder lug terminals. Weights without sockets; KHU or KHP 1 $\frac{1}{2}$ ozs.; KHS 1 $\frac{1}{2}$ ozs.

KHU/KHP hold down spring (similar to KCP-KRP, above.)

9KH3 50 per box, weight 3 ozs. Net \$5.50

9KH1 Solder terminal sockets and retainers. Box of 10 Net \$6.60

9KH2 Printed circuit terminal sockets, Box of 10 Net \$6.60

Weight per box: 4 ozs.

KL SERIES Multiple contact relay. Varied contact combinations and high dielectric phenolic insulation affords extreme versatility and utility. Widely used in such applications as industrial controls, elevator controls, communications equipment and electronic measuring devices. Mounting: All models—Two No. 6-32 tapped holes on $\frac{1}{8}$ " centers. Contacts: $\frac{1}{8}$ " dia. gold-flashed silver. Weight: 5 ozs.

Potter & Brumfield Relays

KR3-H SERIES Ruggedly constructed but small size, KR3-H is a heavy duty relay specially designed for applications where space is a factor. Its heavy duty alloy movable contact carrier has 1" dia. silver-cadmium-oxide contacts 20 amps @ 120V AC 60 Hz resistive, 10 HP DC; 1 HP 120/240V 60 Hz. Contact arrangement is 1 Form X (SPST-NO-DB). Terminals: suitable for 1" quick connect; also solder; for contacts: solder only. Size: 1.6" x 1.671" x 1.52". Seated height: 1.21". Mounting: One 6-32 stud and mounting tab on .437" center. Weight: 2 ozs.

KRP3-H SERIES All electrical specifications listed above for the KR3-H series apply to the KRP3-H. However, the KRP3-H is enclosed in a clear, high impact dust cover and features an octal base. Weight: Approximately 3 ozs.

KRP-N INDICATOR LAMP RELAY Versatile, multi-contact arrangement. Enclosed in a clear high impact dust cover. Standard 8-pin octal-type plug for KRP5 and KRP11, 11-pin for KRP12. Weight: Approx. 3 ozs. Contacts: 5 1/2" dia. gold-flashed silver, 10 amp 1/2" dia. silver cadmium-oxide. See KCP-Hold Down spring for special mounting applications. See KRP-N indicator lamp relay for current monitoring applications.

KRP-N INDICATOR LAMP RELAY A general purpose relay incorporating a lamp to indicate current or voltage availability in power circuit. Contacts: 1/2" dia. silver cadmium-oxide. Enclosure: Clear, high impact plastic dust cover. Mounting: Standard octal plug. Weight: Approx. 3 ozs. Hold down spring (Please see page 2).

CASE A clear high impact plastic for mounting rectifiers, capacitors, resistors or a combination of these. Available octal-type plug with 8 or 11-pins. Complete with four screws. Weight: 2 ozs. each. See KCP-KRP Hold Down spring for special mounting applications.

70 Case (8-pin plug) NET \$.65
72 Case (11-pin plug) NET \$.80

KUP SERIES This reliable 10-ampere relay for industrial control is available with a contact that is also rated 10 amperes. The terminals of the relay are of the quick-connect/solder type. Sockets are priced separately and their terminals are of the solder type. The KUP is enclosed in a clear, high impact plastic dust cover. Silver-cadmium-oxide contacts assure long contact life. Operation: Continuous.

KUP SERIES with slotted flange case for chassis mounting. Identical in both electrical and mechanical specifications as KUP described above, except that they are not suitable for socket mounting. The terminals are of the quick-connect/solder type. Slot width: .156". Weight: 3 ozs. Models carry U/L Component Recognition.

9KU1 pierced solder terminal sockets and terminals for KUP plain case relays. Rated 10 amperes; molded nylon. Two .165" dia. mounting holes.

of 5 NET \$3.95

9KU2 printed circuit pin terminal sockets for KUP relays. Will accept .187" terminals in plain case. Molded nylon. Two .165" dia. mounting holes.

of 5 NET \$4.75

9KU3 hold down spring (See page 2).

9KU4 screw terminal socket for KUP plain case relays to 2 Form C. The nylon socket accepts .187" terminals) is riveted to the slide frame that provides screw terminals.

of 5 NET \$13.15

9KU5 sockets with .187" quick-connect terminals. Two .165" dia. mounting holes.

of 5 NET \$6.30

sockets except 9KU5 are included in the U/L Component Recognition of the KUP relays.

Potter & Brumfield Relays

AB SERIES For appliance and general purpose applications where rugged construction, long life and quiet operation are required. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L component recognition (File No. E29244) and CSA* listing. Mounting: Two No. 8-32 tapped holes, on $\frac{1}{4}$ " centers. Silver contacts. Weight: Approx. 5 ozs.

ABC SERIES Medium duty power relay with dust cover. For small motors, industrial control and similar applications. All equipped with terminals to fit snap-on connectors and may also be applied to printed circuits using dip soldering. Snap-on screw adaptors packed with each relay. All AC models carry U/L component recognition (File No. E29244) and CSA* listing. Mounting: One No. 8-32 threaded stud $\frac{1}{8}$ " long and locating tab on $\frac{1}{8}$ " centers. Contacts: $\frac{1}{4}$ " dia. silver. Weight: Approx. 7 ozs.

GF SERIES Medium duty power relay for industrial control applications. Long contact arms have $\frac{1}{4}$ " dia. silver contacts rated at 10 amps at 120V AC or 28V DC resistive. Contacts have excellent wipe or self-cleaning action. Tinned, pierced solder terminals. Mounting: 8-32 tapped core with locating boss. Weight: 4.75 ozs. (See GA series, page 1, for similar voltage actuated relays.)

MR SERIES A medium duty power relay that can handle small motors, transmitters, and general purpose applications. Mounting: Two $\frac{3}{8}$ " dia. holes on $2\frac{1}{2}$ " centers for MR3 and 11, $2\frac{1}{2}$ " centers for MR2, 5 and 14. Contacts: $\frac{3}{8}$ " dia. silver. Weight: 4 ozs.

MS/MR Metal dust cover similar to PM/PR shown below. $3\frac{1}{2}$ " x $2\frac{1}{2}$ " x $2\frac{1}{2}$ ". Weight: 7.5 ozs.

35D130 fits MS/MR

NET \$2.20

PM SERIES A compact heavy duty 4PDT power relay for polyphase and heavy duty switching applications. Screw terminals. Has $\frac{1}{4}$ " silver-cadmium-oxide contacts rated at 25 amps at 120V, 25 amps at 240V. 50/60 Hz resistive AC, 1HP per movable arm at 120V. br 240V. AC single phase, U/L (File No. E22575) and CSA* listed, except 480V. Mounts by one front key-hole and two rear channel slots for 8-32 screws on $2\frac{1}{2}$ " x $2\frac{1}{2}$ " triangular centers. Weight: 14 ozs.

9PM1 Adaptor plates for mounting PM on PR mounting holes. Box of 10 NET \$1.75

Enclosures for PM relay — see below.

PR SERIES Heavy duty relay for industrial control applications requiring long life and fast action. Heavy duty screw type terminals. All AC and DC models except PR-11AL5 carry U/L (File No. E22575) and CSA* listing. Mounting: Two $\frac{1}{8}$ " dia. holes on $\frac{1}{4}$ " centers. Weight: 11 ozs. max. Contacts: $\frac{1}{8}$ " dia. silver. Enclosure: See "PR" cover. The PR11AL5 relay is equipped with $\frac{1}{8}$ " dia. silver SPDT auxiliary contacts rated at 5 amps.

PM and PR DUST COVERS These dust covers have a sheet metal base with knock-outs for $\frac{1}{8}$ " dia. conduit and an aluminum cover fitted with two screws. Finished in gray hammertone. Mounting: Three No. 10 holes on $\frac{1}{4}$ " x $\frac{1}{4}$ " centers. Approx. weight: 1 lb.

Potter & Brumfield Relays

SPECIAL PURPOSE RELAYS

SERIES RATCHET, IMPULSE

Reliable compact unit for applications requiring on-off or reversing action on alternating operations. Positive ratchet operation at speeds on impulses as short as 60 ms. Intermittent operation only. Mounting: 1/8" dia. holes on 3/8" x 1/4" triangular ears. Contacts: 1/8" dia. silver. Weight: 7 oz. Coils for intermittent duty only.

Buzzer AC operated coil with a steel armature which buzzes when energized. Used extensively in test equipment, laboratories and a host of other applications where a small light weight, dependable buzzer is required. Carries U/L Component Recognition File No. S1154. Weight: 1 1/2 ozs. Mounting: No. 6-32 tapped

GM Series Unusually versatile switch makes this impulse/sequencing relay especially suitable for single coil latching. 2 Form C contact arrangement is switched alternately by cam action during in-out of the armature. It can also be furnished with additional 2 Form C auxiliary contacts (designated by "L"). AC version operates on a 50% coil duty cycle (5 Min. on, 5 Min. off). Mounting: 8-32 tapped core with locking boss. Weights: With aux. contacts 2 ozs. Without aux. contacts 4 ozs.

GM1N10 and GM1N12 AC or DC use basic GM structure with uni-directional circuit boards with 10 or 12-steps, respectively. The board is attached to an extension of the ratchet shaft. The movable contact arm advances one position each time armature drops out. Contact rating: .25 A. Contact arrangement: SP-10 pos. and 2 pos. Size: 2.312" x 1.875" x 2".

GP Series Separate AC and DC coils to use with 2PDT or 4PDT switches. AC (GPA) available in 6, 12, 24, 120 and 240 volts; DC coils (GPD) available in 6, 12, 24 and 110 volts; current coils: 2,500, 5,000 and 10,000 ohms. Contacts: 1/8" dia. silver.

Switch Assembly DPDT 5 amps \$1.90
Switch Assembly 4PDT 5 amps 3.25

100 A complete kit of GP Series coils switches consisting of the following: Coils: Two 6V., two 12V., four 24V., six 120V., two 240V. DC coils: Two 6V., two 12V., four 24V., four 110V. Also two 2,500 four 10,000 ohm coils; eighteen DPDT assemblies. Fourteen 4PDT switch assemblies. The complete kit is ideal for experimenters, school and industrial laboratories.

SERIES LATCHING RELAY Both use and trip coils must be for the same voltage. One coil operates relay to set latch other coil releases it. Ideal for memory and overload applications. Operates on intermittent impulse to either coil. Mounting: 1/8" dia. holes on 1 1/8" centers. Weight: 1 1/2 ozs. Contacts: 1/8" dia. silver rated 5 amps; suffix indicates silver-cadmium-oxide contacts on movables rated 10 amps. AC with 5 amp. Contacts carry U/L component recognition (File No. 29244) and are listed. AC coil for intermittent duty

SERIES LATCHING RELAY

Used in a translucent polypropylene cover, the KBP is furnished with 20-pin type plugs for socket mounting. Contact arrangements of 4PDT and 5PDT are available. Otherwise all specifications are the same as the KB series described above. Component recognition does not apply to the KBP series. Weight: 8 ozs.

Potter & Brumfield Relay

KM SERIES Subminiature relay for applications requiring unusually small relays with up to 3-poles $\frac{1}{8}$ " dia. silver contacts. Withstands 30g mechanical shock and .06" excursion 10 to 55 Hz mechanical vibration. Used extensively in small business machines, alarm systems, automatic toys and communications systems. Mounting: One 2-56 tapped core and locating .062" dia. half-punch on .187" centers. Solder terminals. Weight: .58 ozs.

KT SERIES ANTENNA SWITCHING RELAY Glass base insulation for minimum RF loss to switch 300 ohm line. Mounting: One No. 6-32 threaded stud and locating tab on $\frac{1}{8}$ " centers. Contacts: $\frac{1}{8}$ " dia. gold-flashed silver. Weight: 1 $\frac{1}{2}$ ozs.

**MS SERIES MOTOR STARTING**

RELAYS For starting capacitor start, induction-run motors. Operates on back EMF of start winding. Armature gap can be altered to change pull-in. Carries U/L component recognition (File No. 29245). Mounting: Two $\frac{1}{8}$ " dia. holes on 1 $\frac{1}{8}$ " centers. Contacts: $\frac{1}{8}$ HP, $\frac{1}{16}$ " dia. fine silver; 3 HP, $\frac{1}{16}$ " dia. silver cadmium. Weight: 5 ozs. max. MS/MR Metal dust cover similar to PM/PR shown on page 4. 3 $\frac{1}{8}$ " x 2 $\frac{1}{8}$ " x 2 $\frac{1}{8}$ ". Weight: 7.5 ozs.

35D130 fits MS/MR

NET \$2.20

PC SERIES Single coil impulse latching relay for on-off and current reversal switching on alternate pulses. Mounting: Two $\frac{1}{8}$ " dia. holes on 2 $\frac{1}{8}$ " centers. Weight: 5 ozs. Contacts: $\frac{1}{8}$ " dia. gold-flashed silver-cadmium-oxide. Coils for intermittent duty only.

**SA SERIES STEPPING SWITCH**

A twelve position stepping relay with printed circuit strips to switch currents up to 250 milliamperes. Armature-driven pawl operates a ratchet wheel to drive the movable contact in steps of 30 degrees over 12 positions. Used widely for audio-level switching in TV remote control units, scoreboards and process controls. Mounting: Two 6-32 holes on 1 $\frac{1}{8}$ " centers. Weight: 4 ozs. AC coil for intermittent duty only.

SENSITIVE RELAYS

GB SERIES (See GA series page 1 for similar voltage actuated relays.) Sensitivity 115 milliwatts for single pole and 275 milliwatts for 4 pole. Medium cost, high quality relay. Pick-up is not adjustable. Mounting: No. 8-32 tapped core and locating boss. Contacts: $\frac{1}{8}$ " dia. silver. Weight: Approximately 5 ozs.

SERIES A small telephone type relay giving excellent sensitivity and outstanding switching capabilities. Ideal for transistor-computer networks, telephone systems, battery powered communications equipment. Single contact arms have $\frac{1}{8}$ " dia. gold-plated silver contacts rated at 3 amps for 100 operations. Pierced solder terminals. Mounting: Four 3-48 holes on $\frac{3}{8}$ " centers. Weight: 2.5 ozs.

SERIES (In both voltage and current actuated models.) Sensitivity: 40 mw for current actuated models, 180 mw for voltage actuated models. Precision, light weight, hermetically sealed relay for aircraft and missile applications. Will withstand 10g vibration 500 Hz. Mounting: Standard 7-pin miniature tube base. Weight: Approx. 1 oz.

SERIES (In both voltage and current actuated models.) Sensitivity 75 mw for current actuated models. Medium cost, light weight, dust covered (right) or hermetically sealed (left) relay for light contact loads used in computers, model airplanes and other applications. Extremely long mechanical life because of reed armature. Mounting: Sealed, standard 7-pin miniature socket; dust cover, two $\frac{3}{8}$ " dia. holes on $\frac{1}{8}$ " centers. Contacts: Stationary silver; movable rhodium. Weight: 1 oz. max.

SERIES Ultra sensitive precision relay. Low sensitivity. Dual series-connected with balanced armature on needle-point springs for all low energy circuits such as instruments and bridge balancing. May also be used as a differential relay by connecting two coils in separate circuits. Mounting: Two No. 6-32 tapped holes on $\frac{3}{8}$ " centers. Contacts: $\frac{1}{8}$ " dia. silver. Weight: Approx. 1 oz.

†Sealed Relay
§Enclosed Relay

See ordering information on page 1.

Potter & Brumfield Relays

BS SERIES Long coil telephone type. Suited for computer and automatic test equipment applications requiring large number of poles. Tinned, pierced solder terminals for rear panel wiring. Mounting: Two No. 8-32 NC 2B tapped holes on $\frac{1}{2}$ " centers. Contact arms: Bifurcated with $\frac{1}{8}$ " dia. twin palladium contacts. Weight: Approximately 9 ozs.

BS DUST COVER Sheet metal enclosures for BS relays up to 6 Form C (6PDT, BS23), measures: H: $2\frac{1}{4}$ ", W: $1\frac{1}{4}$ ", L: $3\frac{3}{4}$ " exclusive $\frac{1}{8}$ " knob; weight: 6.5 ozs.

35D188 NET \$2.10

LS SERIES Short springs and light weight armature provide fast action without sacrificing reliability and long life. Stainless steel hinge bearing designed to give 100 million operations. Tinned, pierced solder terminals. Mounting: Two No. 6-32 tapped holes on $\frac{1}{2}$ " centers. Bifurcated contact arms with $\frac{1}{8}$ " dia. twin palladium contacts. Weight: Approximately 4 ozs.

The LSP version has identical specifications as the LS, except that it is enclosed in a high impact, clear plastic cover and is provided with a rectangular socket with combination taper tab or solder terminations. Enables plug-in like any other plug-in component. Two sizes of sockets and covers are available: 16-pin for 4 Form C (4PDT) or 28-pin for 6 Form C (6PDT). Dimensions: LSP17D: 1.71" x 1.39" x 2.52" seated; weight: 4 ozs. LSP23D: 2.11" x 1.39" x 2.52" seated; weight: 4½ ozs.

MB SERIES Miniature DC contactor. Designed for very high current applications. Extra rugged construction insures long life. Handles 150 ampere surges for 0.3 sec. Contact arms: Stationary, heavy brass, $\frac{1}{4}$ " dia. silver contacts pierced solder terminals. Movable, $\frac{1}{4}$ " x $\frac{1}{8}$ " silver bar contact. Mounting: Four No. 8-48 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Weight: 2 ozs.

MC SERIES Built with ceramic contact spaces for RF switching to minimize losses at high frequencies. Intercontact capacitance 1.5 mmfd. max. Tinned, pierced solder type terminals. Mounting: Four No. 8-48 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Contacts: $\frac{1}{2}$ " dia. palladium. Weight: 2 ozs.

MG SERIES Sub-miniature telephone type relay can be furnished open, sealed or in nylon dust cover. Mounting: Open model has four No. 8-48 tapped holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Sealed model has three No. 4-40 threaded studs on 1" x $\frac{1}{2}$ " centers. Dust cover model has plug-in header that fits Amphenol receptacle No. 57-20140 or similar. Contacts: $\frac{1}{2}$ " dia. silver. Weight: Open 1.2 ozs.; Dust cover 2.0 ozs.; Sealed 2.75 ozs.

MH SERIES MINIATURE TYPE Ideal for applications where space and weight are factors. Mounting: Open model, MH11L, one No. 6-32 threaded stud $\frac{1}{8}$ " long plus locating boss. All other open models have four No. 8-48 holes on $\frac{3}{8}$ " x $\frac{3}{8}$ " centers. Sealed models, M enclosures, three 6-32 NC 2 threaded studs on $1\frac{1}{4}$ " x $\frac{1}{2}$ " centers. D enclosures, three 6-32 threaded studs on $1\frac{1}{4}$ " x $\frac{1}{8}$ " centers. All sealed models have hook end solder terminals. All models have $\frac{1}{8}$ " dia. gold-flashed silver contacts. Weight: Open models 2½ oz. max. Sealed models 5 ozs. max.

Potter & Brumfield Relays

HIGH PERFORMANCE RELAYS

SERIES Conventional micro-miniature relays flat on printed circuit board. Withstands 150g shock, 400g linear acceleration, vibration to 2000 Hz. Ambient temperature range: -65° to $+125^{\circ}\text{C}$. Hermetically sealed. Bifurcated contacts. Plugs in on .2" MIL-R-5757E, and MSFC-SPEC-339. Weight: .75 oz.

SERIES Dual-coil latching relay has same specs as above, except operates by pulsing each coil alternately (observing coil polarity); or connecting the coils in series to a reversing (polarized) source. Relatched without coil power.

SERIES A micro-miniature, non-polarized, non-latching half-size crystal case for high reliability performance. Its torque motor structure and bifurcated, plated silver DPDT contacts, rated dry to 2 amps @ 28V DC resistive, provide positive performance in low level applications. Temperature range: -65° to $+125^{\circ}\text{C}$. Hermetically welded. HC11D has plain case; HC11DA has hook-end terminals and shoulder brackets; HC11DB has hook-end solder terminals and mounting plate with 2 holes. The HC11D meets or exceeds all applicable sections of MIL-R-5757E, and complies with MSFC-SPEC-339. Size: Plain case .8" x .4" (seated). Weight: $\frac{1}{4}$ oz.

SERIES A companion micro-miniature relay with identical specifications as the HC11D above, except that it is a dual-latching relay. The HL can be operated: (1) pulsing each coil alternately, observing coil polarity; or (2) from a reversing (polarized) power source by connecting polarities. Approximately 150 milliwatts $^{\circ}\text{C}$ coil temperature are required for coil. Coils will operate in less than 3 seconds at nominal voltage @ 25°C .

SERIES Micro-miniature permanent magnet relay for low power, high shock/vibration applications. 200g shock, 30g vibration to 2000 Hz with no contact openings. Ambient temperature range: -65° to $+125^{\circ}\text{C}$. Features single coil action and conforms to standard micro-miniature coil operation except polarized connections because of magnetic circuit. Positive terminal marked with red dot. Mounting: SC11D**, SC11DA, DC and DD correspond to SC11D. Rectangular header with terminals on side. Weight: $\frac{1}{4}$ oz. Model No. HRK-1, 8-pin receptacles available from distributors for plug-in applications.

SERIES Dual coil micro-miniature magnetic latching relay with same shock/vibration resistance and ambient temperature range as SC. Coils may be connected in series for polar operation. Mounting: SC11D** for plug-in applications; —DA has solder flanges with two .104" x .136" holes 1.062" center; —DB has a welded bracket with four .125" dia. holes on 1.062" x .900" centers; —DC has two No. 4-40 NC threaded studs on .488" x .220" diagonal; —DD has plain case with hook end terminals. SLG11D has plug-in terminals on .2" grid. Weight: 2 oz. Mounting No. P/N VB10/3DV 1 10-pin receptacles available from distributor for plug-in applications.

SERIES High performance 4PDT micro-miniature magnetic latching relay for severe environments. Hermetically welded case. Strong permanent magnetic assembly keeps the contacts locked in desired position when relay is de-energized. Approx. 1 ms transfer time. Temperature range: -65° to $+125^{\circ}\text{C}$. Meets or exceeds applicable sections MIL-R-5757E and MSFC-SPEC-339. Weight: Approx. 1 $\frac{1}{4}$ oz. Mounting: —D = plain case, plug-in header. DA = solder bracket .300" from base, hook-end terminals. DB = flat plate, .593" wide x 1.60" high, 4 —.125" dia. holes on .281" x 1.30" area, hook-end solder.

DRY REED RELAYS

TYPE JR STANDARD

TYPE JRM MINIATURE

Fast response, reliable performance, high sensitivity, and long life make JR standard and JRM miniature series relays especially suited for data processing applications, computer equipment, logic circuitry and various other sophisticated control circuits.

TWO TYPES OF BASIC CAPSULES

Both JR and JRM relays employ dry reed glass capsules with two basic types of contact arrangements, Form A (SPST-NO) or Form C (SPDT). Biasing with a permanent magnet changes Form A to a Form B (SPST-NC). This arrangement

requires that coil polarity be observed. It uses a two-cavity bobbin. Combining one Form A with one Form B results in a single Form C (SPDT) break-before-make; this uses a three-cavity bobbin. A "true" Form C (SPDT) uses a reed switch with two stationary and one movable contact. The movable contact is normally closed until the coil is energized, causing a "true" Form C (SPDT) break-before-make; it uses a single-cavity bobbin.

SPECIFICATIONS

Pick-up: 75% of nominal @ 25°C.

Operate Time: At nom. voltage @ 25°C.: JR: 3ms. JRM: 1ms.

Release Time: At 25°C.: JR: .5ms. JRM: .05ms.

Coil Power: Based upon nom. voltage and resistance. JR: 1 capsule — 240 mw; 2 capsules — 360 mw; 3 capsules — 720 mw; 4 capsules — 960 mw; 5 capsules 1.5 w.

JRM: 1 capsule — 180 mw; 2 capsules — 275 mw; 3 capsules — 420 mw; 4 capsules — 540 mw; 5 capsules — 720 mw.

For additional specifications see columnar listings and drawings.

A SERIES MERCURY-WETTED CONTACT RELAYS

For long life, high speed, and unvarying dependability — all are the result of the basic component of these relays: a hermetically sealed glass capsule. It contains the contact arrangement and a small reservoir of mercury sealed in a high pressure hydrogen atmosphere. A film of mercury is renewed for every operation—that's why you can think in terms of billions of operations without contact bounce, pits or welds.

TWO TYPES OF CAPSULES

capsule used in JMF and JMF2 (with 2 capsules) modules and L relays has a SPDT, break-before-make (Form C), non-bridging contact arrangement. Each capsule used in JMP, and JM1 to JM4 relays has a SPDT, make-before-break (Form D), bridging contact arrangement. JMF, JMF2, JML and JMP series achieve a high rate sensitivity by factory-adjusted magnet biasing.

Mounting Position: Upright mounting required, but deviation from right up to 30° causes only minor deviation in operating characteristics.

CONTACT RATINGS

J, JMF2 and JML: 500V max., and 2 amps max., 100VA max.*
P and JM1 to JM4: 500V max., and 5 amps max., 250 VA max.

with contact protection unless in a low level circuit. Details of a simple protection circuit consisting of resistor and capacitor in series are packed with each relay.

Potter & Brumfield SOLID STATE TIME DELAY RELAYS

● ON DELAY ● OFF DELAY ● KNOB ADJUSTABLE ● RESISTOR ADJUSTABLE ● FIXED TIME DELAY

A wide selection of solid state time delay controls are represented by Potter & Brumfield. The differences are in their degree of accuracy, the variety available in each series, and their cost.

BASIC TIMING CIRCUIT

The basic timing circuit of all three series consists of a resistor in series with a capacitor. When the input voltage is applied to the resistor-capacitor circuit, the voltage across the capacitor slowly increases. When the firing level is reached a solid state trigger circuit acts to turn on a solid state output switch that energizes a switching relay or external electrical load.

CD SERIES

Remarkably dependable, accurate and flexible, the CD series offers an unusually wide selection of operational configurations, all with accurate time delay values, fast reset time and excellent repeatability. It is available in two types: Knob-adjustable in two versions, one with the relay in the same enclosure as the solid state unit, the other with an auxiliary relay. A second type is adjustable with an external resistor. The CD series is available for time delay on operate or on release.

CH SERIES

The CH series is intended for a wide range of industrial applications where economy is of greater interest than highly critical performance. It is available in two types:

Knob-adjustable with the relay in the same enclosure as the solid state unit. The second type has a fixed time period that is set at the factory and cannot be modified. Its case has no knob. The CH series is available for delay on operate and on release.

CU SERIES

An outstanding value in a solid state time delay relay at low cost, the CU series is designed for delay on operate applications in machine tool controls, copiers, office equipment, coin-operated machines, process controls and many others. It is available in two types: Fixed time delay is set at the factory and cannot be modified. Second, adjustable with an external resistor. For minimum time terminals, 2 and 5, must be shorted; for maximum time listed external resistor between terminals 2 and 5 must be added. For intermediate times select a lesser value resistor or a potentiometer. Either model can be furnished in any of the types of enclosures with the relay in the same enclosure as the solid state unit. The CU series is offered with delay on operate only.

CJ SERIES

CJ Series time delay dry reed relays combine the best timing characteristics of time delay relays with the life and performance of miniature dry reed relays. In all series are available, the CJC fixed time delay on operate and the CJH external resistor adjustable time delay on operate.

COMPARISON OF SPECIFICATIONS OF CD WITH CH AND CU SERIES

TYPE	DIAL SETTING	TEMP. RANGE	ACCURACY AND TOLERANCE	TRANSIENT PROTECTION	INHERENT FALSE OPERATION	RESET TIME	REPEATABILITY	POLARITY PROTECTION
CD	Time, calibrated $\pm 5\%$ of full scale	-40° to $+55^{\circ}\text{C}$	$\pm 5\%$ of nominal	Tested to 1000V, $\frac{1}{2}$ cycle surges (on all 120V AC models)	None	60 Milli-seconds	$\pm 1\%$	Yes
CH	Reference scale	-10° to $+55^{\circ}\text{C}$	$\pm 10\%$ of nominal	Twice rated input voltage for 8 milli-seconds	Contacts may transfer momentarily if timing interval is interrupted	100 Milli-seconds	$\pm 2\%$	Yes
CU	Not applicable	Norm. room temp.	Tolerance: Fixed $\pm 5\%$ of nominal; resist. adj. $\pm 10\%$ of nominal	Twice rated input voltage for 8 milli-seconds	Contacts may transfer momentarily if timing interval is interrupted	150 Milli-seconds	$\pm 3\%$	Yes
CJ	Not applicable	Norm. room temp.	Tolerance: Fixed $\pm 5\%$ of nominal; resist. adj. $\pm 10\%$ of nominal	Twice rated input voltage for 8 milli-seconds	None	60 Milli-seconds	$\pm 2\%$	No

SOCKETS FOR CU-41 PLAIN CASE RELAYS

All CU series time delays have an internal DPDT 10 amp relay of the KUP series featured on page 3. The cases for the CU and KUP are dimensionally the same. The plain cases* fit the same sockets, and the same hold down spring (9KU3) can be used. Please use the KUP type designations (9KU1, 9KU2 and 9KU4) and prices (page 3) for these accessories when ordering.

*Except the CU resistor-adjustable type.

NOTES

1. Has internal relay with DPDT contacts rated at 10 amperes, 120V AC. 2. Use with Potter & Brumfield relay KRP5AG-120V AC, KRP11AG-120V AC or KRP14AG-120V AC. 3. Use with Potter & Brumfield KRP5DG-24V DC, KRP11DG-24V DC or KRP14DG-24V DC relay. 4. Use with Potter & Brumfield KHP17D11-24V DC relay. 5. Supplied with 180 seconds delay; adjustable to 1.8 seconds with external resistor (not furnished). 6. Use with Potter & Brumfield PR11AY-120V AC relay. 7. Provides delay on release; all others have delay on operate. 8. Internal relay contacts rated at 10 VA, other ratings available upon request.

Potter & Brumfield Relays

CS SERIES SOLID-STATE VOLTAGE SENSORS

- CLOSE-DIFFERENTIAL
- UNDER-VOLTAGE

Fixed pick-up and fixed drop-out.

Fixed pick-up and adjustable drop-out. One knob for setting drop-out value.

Adjustable pick-up and drop-out. Two knobs for setting desired values.

A voltage sensor is designed to energize and de-energize a relay at predetermined voltages. These solid state voltage sensors actuate an internally-mounted relay when a specific voltage level is reached. This pick-up level is either fixed or knob adjustable. Fixed sensors are factory set and cannot be changed. Knob-adjustable versions allow the pick-up levels to be varied over a predetermined range.

If the sensing voltage decreases to a pre-set level after pick-up occurs, the internal relay de-energizes. This is the drop-out level and may be fixed or knob adjustable. The pick-up voltage point must be set higher than the drop-out voltage point.

Voltage sensors consist of a sensing circuit that acts to turn on a solid state switch, energizing the accompanying relay. Both the solid state switch and a DPDT relay rated at 3 amperes are enclosed in the same molded nylon dust cover.

Three types of voltage sensors are available. They are:

Type 1. A custom series with pick-up and drop-out voltage levels factory set to the customer's specifications.

Type 2. A series with factory fixed pick-up and single knob-adjustable drop-out voltage levels.

Type 3. A series with both knob-adjustable pick-up and drop-out for selecting desired voltage levels.

Type 1 is offered in various AC or DC configurations with voltage levels specified by the customer. This series can be supplied open, in nylon dust enclosures, or hermetically sealed in metal cases with octal plugs or other terminal arrangements. Certain limits as to voltage ranges apply.

The second and third types are offered in three voltage ranges in both AC and DC versions. They are provided with octal plugs for

convenient plug-in mounting and are enclosed in nylon dust cover.

These reliable solid state voltage sensors can be used as protective devices in alarm circuits, motor controls and to activate or cut off a system automatically. It is possible to combine certain the above sensors into a custom unit designed for specific individual control functions.

GENERAL:

Operate Time @ 25° C: 25 milliseconds approximately at nominal voltage.

Temperature Range: -10°C to +55°C

Reverse Polarity Protection: Yes, on DC types.

Size: Plain Case: 2.375" x 1.750" x 2.875" seated height.

With Knob: 2.375" x 1.750" x 3.593" seated height.

Approximate Weight: 8 ozs.

Mounting: Octal plug

Enclosures: Nylon dust cover.

CONTACTS:

Load Switching Relay: Arrangement: 2 Form C (DPDT).
Rated: 3 amps @ 28V DC resistive;
120V AC resistive.

Expected Life: Electrical: 100,000 operations at rated load.
Mechanical: 10,000,000 operations.

COILS

Operate Power: DC: 1.5 watts approximate.

AC: 1.0 volt-ampere approximate.

Duty: Continuous.

12 volts d.c.	\$4.95	\$5.55	\$6.75
24 volts d.c.			
110 volts d.c.	\$5.50	\$5.95	\$7.15

5 AMP ALSO AVAILABLE

Same basic design as CA series; however, with clear plastic dust cover and octal-type plug-in base. Case is secured firmly to base by 4 "upset" plastic studs. Contact carrier base is self-centering. Contact carrier is made of "KERIPOLE," a polyester material with glass fibre filling.

CSD SERIES

A plate circuit relay, similar to the CAD Type; however with increased sensitivity (125 MW per movable arm).

Contacts	SPDT	2 Amp. Rating DPDT	3PDT
Relay Type	CSD5	CSD11	CSD14
2500 ohms	\$5.20	\$5.60	\$6.80
5000 ohms	\$5.30	\$5.70	\$6.90
10,000 ohms	\$5.70	\$6.10	\$7.30

SENSITIVE RELAY — CMD SERIES

In this series there are eleven types in three classifications.

No.	Coil	List Price
CMD-5D	600Ω	\$4.95
CMD-5D	2400Ω	4.95
CMD-5D	9600Ω	5.20
CMD-11D	450Ω	6.10
CMD-11D	1890Ω	6.10
CMD-11D	7300Ω	6.10
CMD-5A	540Ω	5.00
CMD-5A	234Ω	4.75
CMD-5A	1000Ω	4.75
CMD-5A	3850Ω	4.75
CMD-5A	6900Ω	5.30

1. D.C. Relays with one form C contact Type CMD 5D—Pull-in sensitivity 40 mw; Coil Windings — 600 ohm, 2400 ohm, 9600 ohm

2. D.C. Relays with two form C contacts Type CMD 11D — Pull-in sensitivity 60 mw; Coil Windings — 450 ohm, 1890 ohm, 7300 ohm

3. A.C. Relays with one form C contact Type CMD 5A — Pull-in sensitivity 80 MVA; Coil Windings — 540 ohm, 234 ohm, 1000 ohm, 3850 ohm, and 6900 ohm

Contact ratings are 2 amps at 115 VAC.
Contact points are gold-flashed silver.

NEW MINIATURE UNIVERSAL TYPE RA

A precision piece of equipment at a commercial price —

1.515" high, 0.847" wide with dust cover

designed for use in computers, data processing equipment, communications equipment, process control applications, and other equally important systems.

Type RA is a four pole universal type relay for 4 PDT or double-make, double-break (DPDT-DB) action. $\frac{3}{32}$ " contacts rated at 3A — normally supplied in gold-flashed silver. Also available in silver cadmium oxide, gold nickel, silver palladium, etc.

STANDARD COIL DATA

Sockets Available

DC Voltage	Resistance in Ohms $\pm 10\%$ at 25° C	List Prices	AC Voltage	Average AC current in MA (relay closed)	List Prices
6	40	\$3.50	6	200	\$4.10
12	160	3.50	12	100	4.10
24	650	3.50	24	52	4.10
48	2,600	4.20	48	25	4.80
90	9,000	4.20	115	10.5	4.80
110	11,000	4.20			

Printed Circuit Terminals at Same Prices

TYPE RR REMANENCE RELAYS

Magnetic Latching for miniaturized circuitry. Same physical characteristics as RA. Voltages from 24-220 AC and 12-110 DC. Same electrical characteristics as CRD and CRF on opposite page. Prices range from \$4.50-\$5.30 list.

ROTARY STEPPING SWITCH TYPE RT

The SCHRACK Rotary Stepping Switch is a combination of three reliable components:

1. Standard Relay with 1 Form C heavy-duty contact.
2. Ratchet driven Rotary Switch consisting of four banks of twelve or ten points each with sliding bifurcated wipers.

3. Ratchet driven Stepping Relay with two cams which actuate one Form C contact each.

Schrack Rotary Stepping Switches have a highly efficient magnetic circuit and a driving mechanism designed for maximum operating safety. All components are mounted on a rigid die-cast light metal frame and contacts are permanently molded in a sturdy melamine plastic.

ROTARY SWITCH terminals are arranged in a circular pattern with four groups of twelve points each. A conversion can make it operate with 3 groups of 16 each. An alternate version with 4 x 10 points is available for applications requiring decimal counting. Each group occupies a quadrant of the circle and contains a common bus which is connected to the twelve or ten insulated points in sequence by means of a sliding wiper as the switch is operated.

TYPE RT 304 — 4 x 12 Contact Points \$22.00 ea.

TYPE RT 404 — 4 x 10 Contact Points \$22.00 ea.

SCHRACK ELECTRICAL SALES CORPORATION

SCHRACK

RELAYS

SINGLE COIL MAGNETIC LATCHING RELAYS — TYPES CRD & CRF

This is a bi-stable power relay held in operated position by a strong residual magnetism of the coil core after the coil is de-energized. The coil core is of a special alloy having sufficient remnant magnetic force to hold the armature locked-in for an indefinite period of time after being energized momentarily.

In design, these magnetic latching relays are identical, except for the base, with the Schrack Type CAD plug-in relay. Contacts are rated at 5 or 10 amps depending on materials used. DPDT (2 form C) or 3 DPDT (3 form C) versions are available.

LATCHING RELAY — TYPE CBT

A dual coil mechanical latching relay. Each relay operates on a momentary impulse on either coil and is held in the set position until released by an impulse on the other

coil. Both coils must be for the same voltage and are continuously rated.

Contact rating: 10 amps. (Based on 600 operations per hour at 115 volts AC 60 cy. resistive load).

May be operated continuously at 1000 cycles per hour.

The CBT relays have a transparent dust cover and a sturdy base plate of insulating material. Screw-type terminals are provided for all contact and coil connections. Available in voltages from 6-230 AC and 6-110 DC.

Plug-in version "CBF" available.

MULTI-POLE CONTACTORS TYPES M4, M6, M8, M10

Small, low-cost units

Versatile — with auxiliary contacts.

These are compact 8-pole air-break contactors. Principal applications for the M4 type are control circuits (pilot duty), but also may be used for switching of small single-phase or three-phase motors. Type M8 has 4 contacts with increased rating and 4 contacts identical with M4. Types M6 and M10 have same features as M4 and M8, but have 3 main contacts and 1 auxiliary contact — intended for industrial applications.

M4 — \$12.00

M6 — 15.00

M8 — 12.00

M10 — 15.00

A robust and dependable open-type relay, equipped with lugs suitable for soldering and for mounting of AMP-FASTON Connectors, Series 110. Contact rating: 5 amps or 10 amps; according to contact material. Standard coils available: 6, 12, 24, 115, 230 volts a.c.; 6, 12, 24, 110 volts d.c. Standard versions include 1, 2, or 3 Form C contacts. Optional: solder lugs and for printed circuit boards.

DRY REED RELAYS TYPE RU

May be incorporated into printed circuits as easily as other components. These are rugged, compact, high-power units available in a wide range of voltages and contact arrangements featuring long mechanical life (100 mill. operations). They are not influenced by mounting position and are fully protected against corrosive atmospheres.

New types now in production. Prices on request.

LOW COST PROTECTION AGAINST SINGLE PHASING IN A THREE WAY SYSTEM

Operates by the use of bi-metallic strips and dissimilar coefficients of expansion under temperature changes. When temperature increases due to overload, a microswitch is activated in any leg of a three phase circuit. Microswitch is normally placed in series with the solenoid of any switching device in the 3 phase line. Reset button may be manually or automatically operated.

RESISTANCE DEVICES

"GREENOHM V"™ VITREOUS-ENAMEL RESISTORS

Based on years of research and engineering development, these vitreous-enamel wire-wound power resistors offer superlative performance and life as proved by countless tests. "Greenohm V" resistors provide all the outstanding quality which made Clarostat "Greenohm" cement-coated units famous, plus a glass-smooth vitreous-enamel coating in a handsome bluish-green for maximum eye appeal. Made to MIL-R-26C specifications.

- Fixed and adjustable
- 5-watt to 200 watt sizes
- $\pm 5\%$ tolerance, 1 ohm and over. $\pm 10\%$ tolerance, 0.9 ohms and under. $\pm 10\%$ for adjustable.

RESISTANCE DEVICES

AXIAL LEAD VITREOUS RESISTORS

Available in three sizes 3, 5 and 10 watts, Series VC3D, VC5E and VC10F. Axial lead resistors are particularly adapted to printed circuit, terminal board, and point-to-point wiring applications. These resistors save considerable space because of the elimination of mounting brackets and terminal lugs. Standard resistance tolerance is $\pm 5\%$ for 1 ohm and higher and tolerance below 1 ohm is $\pm 10\%$. Attractively packaged in a newly designed carton particularly adapted to this new axial lead resistor, beautifully finished with Clarostat's new vitreous shade of teal green.

POWER RESISTOR DECADE BOX

The Resistance Decade Box, Model 240-C for bench use — Model 250 for rack mounting, provides any resistance from 1 to 999,999 ohms for working circuits at the flip of a switch. Six front-panel dials enable selection in 1 ohm increments, the total value being read directly from the dial. Each decade has a power rating of 225 watts maximum, 1,000 VDC or 660 VAC maximum.

Resistance changing switches are of the type that prevent a resistance breakdown between steps, thus protecting delicate meters and measuring instruments in the circuit. Knobs indicate the resistance

value being used at a glance.

Clarostat GREENOHM Power Resistors are used throughout. These components are wire-wound power resistors on ceramic tubes and coated with an exclusive Clarostat inorganic cold-setting cement, providing the most rugged, long-lasting, trouble-free power resistor available. The resistors are mounted in rigid metal supports.

Overall length: 240C: 13" long x 8 1/2" deep x 5 1/2" high, weight 1 1/2 lbs. 250: 19" long x 13 1/2" deep x 7" high (fits in standard 19" relay rack), weight 18 1/2 lbs.

SUGGESTED USES: Resistance determination, Load Resistance, Meter Multiplier, Calibrating Meters, Providing any desired ohmage as a universal power resistor.

SERIES U39

UNIVERSAL "HUMDINGER" CONTROL 2W. WIRE WOUND

Series U39 is a shaftless potentiometer with the contact arm grounded to the housing. The design of terminals and mounting tabs, meets the following requirements: Above chassis mounting, as a potentiometer or rheostat; printed circuit mounting, as a potentiometer or rheostat. The terminal layout meets the popular industry standards. A fiber adapter plate is furnished with each control. Series U39 is ideally suited for radio and television requirements, as well as many industrial applications. Resistance tolerance $\pm 20\%$. Linear only.

RESISTORS • CONTROLS
RESISTANCE DEVICES

"GREENOHM"* WIRE-WOUND RESISTORS

FIXED TYPES Wire-wound resistors for most rugged applications. Will withstand tremendous overloads and temperature changes without altering resistance values or appearance. Wire windings on high grade ceramic tubing and coated with special inorganic cement. In accordance with EIA standards, overall tolerances are $\pm 5\%$ for resistors of 50 ohms and higher. For resistors of 49.9 ohms and lower, overall tolerances are $\pm 10\%$.

ADJUSTABLE TYPES Same electrically and mechanically as Fixed types, but incorporating sliding band or bands for tapping any desired resistance values. Slider band tightened by means of screw. In accordance with EIA standards, overall tolerances are $\pm 10\%$.

We make resistors for guys who can't stand failures

New glass tin oxide film resistors—with tighter, ½ to 5% purchase and load-life tolerances, precision temperature coefficients—make CORNING Resistors more than ever your best buy for stability and reliability. Add these new and

improved characteristics to the established physical and electrical inter glass tin oxide film resistors and you will see how CORNING Precision, G purpose, and Power Resistors can add real value to your equipment.

DALE**for Optimum Value in Wirewound Resistors****INDUSTRIAL WIREWOUND POWER RESISTORS,
SILICONE AND VITREOUS ENAMEL COATED**

Expanded industrial wirewound provides both silicone and vitreous coated models. Silicone models are recommended where maintenance free and T.C. is of primary concern. Vitreous models are recommended where maximum resistance to mechanical action is required.

FOR PRICES.**

TYPE	APPLICATION	APPLICABLE MIL SPEC AND TYPES	WATTAGE RATING	RESISTANCE RANGE	CORE SIZES	TERMINALS	MOUNTINGS	TOLERANCE
W Axial Lead	Axial leads. For applications requiring high performance at low cost	MIL-R-26 RW-67, 68, 69	2.5-13 watts	.1 ohm to 100K ohms	Body Dia. .188 to .375" Body Length .500 to 1.781" Leads 1.5 to 2"	Leads	Terminals	±5% (10% below 1 ohm)
L Tubular	General purpose wirewound resistors with a broad power range.	MIL-R-26 RW-29, 30, 31, 32, 33, 35, 36, 37, 38, 47	5-225 watts	.1 ohm to 1.3 Megohms	O.D. 1/4 to 1-1/8" Length 1-10 1/2"	Lugs	Push-in bracket or thru-bolt	±5% (10% below 1 ohm)
HL, VL Non-Inductive	High frequency circuits and applications requiring low inductive effect and minimum distributed capacity	None	5-225 watts	1 ohm to 90K ohms	O.D. 1/4 to 1-1/8" Length 1-10 1/2"	Lugs or Leads	Push-in bracket or thru bolt	±5%
L Flat	For limited space requiring high power-to-size ratio. Vertical or horizontal stacking.	MIL-R-26 RW-20 thru RW-24	24-95 watts	.1 ohm to 150K ohms	Length 1 1/4 to 6"	Lugs	Spring push-in	±5% (10% below 1 ohm)
M, VLM Miniature Flat	For limited space, high power-to-size requirements particularly in high vibration areas.	None	10-20 watts	.1 ohm to 51K ohms	Length 3/4 to 2-1/16"	Lugs	Thru mount with spacers	±5% (10% below 1 ohm)
LA, VLA Adjustable	For resistance or voltage adjustment	MIL-R-19365C RX-29, 32, 33, 35, 36, 37, 38, 47	12-225 watts	1 ohm to 100K ohms	O.D. 5/16 to 1-1/8" Length 1 1/2 to 10 1/2"	Lugs	Push-in bracket or thru bolt	±5%
HLT, VLT Tapped	For voltage divider networks	MIL-R-26 RW-22, 23, 24, 33, 35, 36, 37, 38, 47	11-225 watts	.1 ohm to 1.1 Megohms	O.D. 5/16 to 1-1/8" Length 1 1/2 to 10 1/2"	Lugs	Push-in bracket or thru bolt	±10% each section (±10% total)
HLW, VLW Tubular	General application where terminal wires are required for direct electrical connection	None	3-20 watts	.1 ohm to 80K ohms	O.D. 13/64 to 7/16" Length 1" to 2"	Lugs with terminal wires	Terminals, thru bolt or push-in bracket	±5% (10% below 1 ohm)
HLZ Edgewound	For heavy duty requirements where space is at a premium. High thermal capacity.	None	35-375 watts	.05 ohm to 32 ohms	O.D. 1/4 to 1-1/8" Length 1 to 10-1/2"	Lugs	Push-in bracket or thru bolt	±10%

MOUNTING BRACKETS for TUBULAR STYLES

HORIZONTAL THRU-BOLT

PUSH-IN

VERTICAL THRU-BOLT

**EXCLUSIVE BRACKET DESIGN FOR MINIATURE FLAT STYLE**

Mounting strap fits snugly through core and is bound tightly against unit by two eccentric spacers. Eliminates expensive cements and improves heat transfer and power handling capabilities.

DALE*for Optimum Value in Wirewound Resistors***WIREWOUND PRECISION RESISTORS, SILICONE COATED & MOLDED
TYPE RS**

Coated and molded models meet applicable requirements of MIL-R-26E, MIL-R-26C and MIL-R-23379. Non-inductive styles available.

Charles T. Gamble Industries

PRECISION WIRE WOUND RESISTORS & NETWORKS

Charles T. Gamble Industries has engineered and designed non-inductive precision wire wound resistors to meet the requirements of Mil-R-93D. These resistors are completely sealed against the effects of high humidity and salt water immersion cycling. The material used in the manufacture of our resistors has a very high dielectric strength. The bobbin material used in winding the resistors is one and the same as the encapsulating material. All resistors use resistance wire with very low thermal E.M.F. to the copper leads. Where thermal effects can be disregarded, welded construction with nickel alloy leads may be specified.

Standard temperature coefficient is ± 10 PPM/ $^{\circ}$ C. Lower T.C.'s, and T.C.'s as high as 6000 PPM/ $^{\circ}$ C can be supplied.

Tolerance available (non power styles): 1%, 0.5%, 0.1%, 0.05%, 0.025%, 0.02% and 0.01%. Resistors with tolerances of 0.1% and below are stabilized by artificial aging and temperature cycling.

NETWORKS: RC NETWORKS, LADDER NETWORKS, VOLTAGE DIVIDERS, BINARY NETWORKS

Sub-miniature Axial lead Precision resistors have been designed for applications where space is a prime factor.

Encapsulated printed circuit resistors are designed for printed circuit board application, where space is a factor.

Radial lug type resistors have been designed to meet the requirements of Mil-R-93D.

All resistors are hermetically sealed with epoxy resin to protect the windings against the effects of high humidity and salt water immersion cycling. Resistors can either be inductive or non-inductive wound.

The materials used in the construction of radial lug type resistors are identical to those used in the construction of axial lead types.

These resistors are supplied with a thru hole for mounting to the chassis by means of a #6 thru bolt.

MEMCOR Components ... resistors and rheostats ... are manufactured by the MEMCOR Components facility of the MEMCOR Division of LTV ElectroSystems, Inc.

MEMCOR Components represent the cumulative design skill and production knowledge of two great lines of resistance products — Tru-Ohm and Hardwick, Hindle. This "second generation" product maintains all of the proven features of both original lines plus the manufacturing refinements that can only result from industry experience.

The values of resistance listed in this section are in stock for immediate delivery—special resistance values or terminal diversions are readily available. **When ordering** — identify type and value of resistor by stock number.

These widely-used fixed wire wound vitreous enameled resistors have solidly anchored welded tabs (lugs) and shock-absorbing mounting brackets to withstand vibration. Multi-layer vitreous enamel coating locks the uniformly-wound resistance wire in position and also seals out moisture. MEMCOR resistors have a high-temperature stability and a com-

patible coefficient of expansion which prevents crazing and cracking.

MEMCOR resistors have a standard tolerance of $\pm 5\%$ on all values above one OHM and a $\pm 10\%$ tolerance on resistance values lower than one OHM (available in closer tolerances).

All MEMCOR resistors listed in this section manufactured to the

rigid requirements of MIL-R-
Specifications... MEMCOR res-
torts meet and exceed all requi-
ments of this specification.

FR and FRL TYPES

MEMCOR fixed wire wound vitreous enameled types in 5, 10 and 20 watt sizes (FRL) are light enough to be mounted by attaching leads and are also available without (FR) tuned leads.

FR type resistors can be mounted by brackets, vertically through bolts or by their S.

The sturdy terminals are hot-
tinned for soldering ease, and
the holes in the terminals are
suitable size to accommo-
date screws.

Mounting brackets are furnished **only** on request at **no** additional cost. If required, please specify bracket stock number.

Standard packaging — 5, 10 and 20 watt sizes are packed 10 units per carton and larger sizes are packed individually.

ADJUSTABLE VALUE RESISTORS

MEMCOR adjustable resistors are used in applications where it is necessary to make adjustment in resistance periodically... where intermediate values of resistance are needed... or when multi-tabs are required. The AR types are especially useful in laboratories for experimental work, circuit design, etc.

A section of the winding is exposed on one side to enable the adjustment band to make contact at any desired point. This adjustable band **should not** be moved unless the screw holding it in position is completely loosened to prevent abrading or possible damage to the resistance wire.

Adjustable lugs are formed to the exact contour of the body of the resistor to assure positive contact with the exposed section of winding. Standard adjustable bands are screw driven style and have an embossed area on the lug.

Special adjustable lugs are available with silver contact... also, bakelite thumb screw type bands are available.

The AR wattage ratings (and the $\pm 10\%$ tolerance) given in this section are for the entire resistor. Never exceed the maximum rating through any portion of the resistor.

OVAL (FLAT CORE) RESISTORS

MEMCOR wire wound flat core resistors are applicable for individual and/or stack mounting. Their high watt rating per unit of space and the bracket construction which facilitates stacking (integral mounting brackets are supplied as standard)... make the MOR and OR types space savers par excellence.

The line of ovals (OR) was designed particularly for applications where available space is limited... and the supplementary line of midget ovals (MOR) are

very desirable for applications where the size of components must be kept to an absolute minimum. The through bracket helps dissipate heat and reduces hot spots. This permits higher wattage dissipation without requiring additional space.

When stack mounted, the OR and MOR resistors should be derated. For an ambient temperature higher than 40°C, the maximum rise of these resistors will not exceed 300°C. when mounted on steel panel.

Tapped or adjustable ovals are available.

MOULDED SILICONE RESISTORS

These resistors will operate at 350°C. (660°F.) and will withstand thermal shocks to minus 55°C. Because of the moulded construction the resistors are effectively hermetically sealed and will withstand severe moisture conditions without deterioration.

The construction of the resistors are uniform in all dimensions within a few thousandths of an inch, which facilitates their use in automatic-insertion machinery... for which use they may be obtained special packaged. They will improve the appearance of any assembly in which they are used.

Temperature co-efficients of plus or minus 20 parts per million per C. degree are standard.

The moulding compound used in these resistors was developed through research and development extending over several years, and represents a marked advance in the "state-of-the-art" for such compound.

DISCOUNTS

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

INQUIRE ABOUT LATEST PRICES AND DELIVERY.
Prices in this MASTER should not be considered as final.

Trade discounts apply in most cases where LIST PRICES are shown.

NEW! Precision Resistors - WIREWOUND POWER SERIES

Nytronics Precision Wirewound Power Resistors are engineered for the maximum performance characteristics and stability. Designed to meet a circuit designer's requirements, Nytronics Wirewound Power Resistors stand out in quality, performance, service, life, and reliability.

Part No.	Dia. (In.)	Body Length (In.)	Max. Overall Length (In.)	Leads (AWG)	Max. Power (Watts)	Max. Res. (Ohms)	Max. Voltage	Mil. Type	Mil. Char.

29	.375 ± .031	1.780 ± .062	1.842	18	10.0	200K	750	RW 78	U

OPTIONAL FEATURES

Tolerance & Ratio Matched Sets
 Temperature Coefficient Tracking
 Temperature Coefficients $0 \pm 5 \text{ PPM}/^\circ\text{C}$ to $+5000 \text{ PPM}/^\circ\text{C}$
 Tolerances to 0.05%
 Weldable Leads—Grade "A" Nickel or Nickel Variation, Gold Dumet, etc. on request

SPECIFICATIONS

Accuracy to 0.05%
 Matching to 0.005%
 Temperature Coefficient to $\pm 5 \text{ PPM}/^\circ\text{C}$
 Temperature Coefficient Match to 1 PPM/ $^\circ\text{C}$

NEW! Molded Resistors - NYTOHMS

Nytronics SQ series, designed for high density packaging in wood and multiple resistor networks. The SQ series meets the most stringent requirements of industrial and commercial applications, and meets all applicable requirements of MIL-R-93.

STACKPOLE

FIXED
COMPOSITION
RESISTORS

Stackpole Resistors offer superior performance in terms of load life, moisture resistance, shelf life, and other important characteristics. Available in 1/2, 1, and 2 watt insulated type resistance values with 5%, 10%, 20% tolerances as shown below.

EASIEST SOLDERING

is assured thanks to an exclusive solder coating applied after the tin dipping. Leads of Stackpole Resistors solder readily by any method—dip iron—stay tarnish free even after months in storage. And, their baked color codes resist solvent scrubbing operations... maintain uniform, attractive appearance.

AVAILABLE THROUGH LEADING INDUSTRIAL ELECTRONIC PARTS DISTRIBUTORS

Electronic Components Div., STACKPOLE CARBON COMPANY

OHMITE type 200 *brown devil*® fixed resistors

BROWN DEVIL® (Type 200) resistors, are vitreous enameled, wirewound units famous for ruggedness and durability in small power resistors. With emphasis towards miniaturization and the current industry trend towards lower operating temperatures, Ohmite has been able to increase the ratings of two Brown Devil sizes. The 5 watt size is now rated **8 watts** and the 10 watt size is now rated **12 watts**. The 20 watt unit retains the same rating. Higher ratings may be confidently applied to any 5 or 10 watt unit now in the possession of users or distributors. At this time also, to meet the demand for lower wattage units, Ohmite introduces two, new, small stock sizes — 3 and 5½ watts.

Standard resistance tolerance is $\pm 5\%$ for values 1 ohm or higher; $\pm 10\%$ for values below 1 ohm. Tinned leads 1½" long: 3 and 5½ watt, 20 AWG; 8, 12 and 20 watt, 18 AWG.

ITEMS APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS.

OHMITE Type 995 MOLDED axial lead vitreous enameled resistor

- FIRST MOLDED WIREWOUND, VITREOUS ENAMEL RESISTOR
- INSULATED! Meets 1000 VAC Test
- WITHSTANDS 1500°F Temperatures without Distortion
- RESISTS Chipping, Breaking
- VITRIFIED MARKINGS, Resist Abrasion and Active Solvents
- UNIFORM SIZE Permits Clip-Mounting with Significant Heat Sink Benefits
- HIGH OVERLOAD CAPABILITY

An exclusive technique (U.S. Patent No. 3,229,237) permits application of the

vitreous enamel coating by mol instead of the conventional "dip". The dimensionally consistent and coating that results, guarantees VAC insulation rating plus un capability for withstanding very h peratures, high humidity and in in salt solution.

These resistors are normally i by their axial leads. However, th sistent form also permits moun clips with heat sink benefits up t (see "Clips" lower left). Resistor r are also vitreous and will not t even under extreme overloads. Re tolerance is $\pm 5\%$. Series 99 r meet the requirements of MIL-R "insulated" resistors. See Catalog specific MIL types.

MOUNTING CLIPS

Uniform shape and consistent dimensions of Series 99 and 88 (pages 6-7) resistors, permits them to be conveniently mounted in clips. If the clip is on a metal surface, the wattage capability of the resistor can increase by as much as 100%. Holes in clip base permit fastening to chassis by means of machine screws, eyelets or rivets.

M'S LAW CALCULATOR ...

Solve Ohm's Law/Parallel Resistance problems with Ohmite's pocket-sized calculator. Also convenient A, B, C, and D slide rule scales for supplementary calculations. Resistance scales from 0.01 ohm to 100 megohms. Varnished cardboard or deluxe plastic model.

Type	Stock No.	Price

OHMITE type 884 Riteohm® Resistors—1% tolerance

**1% RESISTORS
STOCKED IN 505 VALUES**

**molded
for uniform
shape and size**

miniature precision resistors—1% tolerance

OHMICONE® molded • wirewound • aged for stability
• insulated for 1000 volts • low T.C.

Type 884 Riteohm® Resistors are stocked in power ratings of 3, 5 and 10 watts depending upon resistance. Single layer wound on ceramic cores, Riteohm resistors feature a pressure-molded coating of tough, resilient Ohmicone® silicon ceramic material which meets the MIL-R-26, 1000 VAC insulation test. Riteohms are aged for long term stability, exhibit negligible inductance at audio frequencies. Temperature coefficient of resistance is $0 \pm 10 \text{ ppm}/^\circ\text{C}$ for most values. Values shown are based on the MIL-Bell system of standard values. For non-standard values, closer tolerance etc. contact your local Ohmite office.

² ITEMS APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS.

OHMITE

Uniform shape of Riteohms permits clip mounting for extra heat dissipation. The wattage capability can be increased by as much as 100% when clip is mounted to a metal surface. See Series 99 listings for clip ordering information.

². of values in 3 Watt size under 97.6 ohms is as follows: From 97.6 thru 10 ohms, 0±20ppm/°C; from 9.76 thru 1.0 ohms, 0±50ppm/°C; below 1 ohm, 0±90ppm/°C.
ITEMS APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DEALERS.

OHMITE type 270 vitreous enameled fixed resistors

These lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel—the time-proved standard covering that is the best conductor of heat for a material which must also be a good electrical insulator.

Resistance tolerance is $\pm 5\%$ for values 1 ohm or higher; $\pm 10\%$ below 1 ohm.

Wattage ratings are for use in free air. When resistors are mounted in

closed spaces or where the circulation of air is restricted, they should be used at more than one-half rating. Currents and voltages for ratings can be obtained by multiplying full rating by the following:
 $75\% \text{ load} = .86, 66\% = .81, 50\% = .71, 33\% = .57, 25\% = .43$

Mounting brackets are automatically supplied in individual unit supplied only when specified in bulk pack orders. See page 9, "Mounting Brackets for Tubular Resistors" to specify other brackets.

OHMITE PAGE 8

OHMITE non-inductive type 270N vitreous enameled fixed resistors

These non-inductively wound power resistors are widely used at radio frequencies for such purposes as dummy antennas, terminating resistors for antennas, and in diathermy apparatus. Their properly proportioned Ayrton-Perry type windings, reduce the inductance to low proportions (less than 1% of regular solenoid type resistors) while the distributed capacity is small. R.F. resistance is the same as the D.C. resistance over the useful range of frequencies.

Change of impedance with frequency is so slight that the resistors can be used throughout the broadcast band and at even higher frequencies, depending on the particular resistance to be used. All the resistors are lug-type tubular units which mount by means of non-magnetic mounting brackets (furnished). Ohmite's high grade ceramic construction and exclusive vitreous enamel coating assure long, reliable performance under full rated load. Resistance tolerance is $\pm 5\%$.

Dummy-antenna resistors NON-INDUCTIVE

Ohmite Models D-101 and D-251 Dummy Antenna Resistors provide a simple, accurate, and direct means of measuring R.F. power for the radio amateur, experimenter and manufacturer and for operators of aviation, police and broadcast stations. These units consist of a number of special, vitreous enameled resistors connected in parallel in a concentric arrangement and mounted inside a perforated metal cage. The dummy antenna resistors feature constant R.F. resistance (within their recommended frequency range), low reactance, high wattage dissipation, and compactness. Actual D.C. resistance tolerance is $\pm 5\%$.

The residual inductance and distributed capacitance have been kept to a minimum, thereby making the natural resonant frequency as high as possible. These factors and the D.C. resistance have been proportioned in such a manner as to give the best possible response characteristics. This resistor may be considered practically a "Non-Reactive Resistor."

Mounting brackets for stock resistors

fit inside the cores of tubular resistors and remain in place by friction. Standard bracket (indicated by catalog number without suffix) is cadmium plated. An "S" suffix on the catalog number indicates spring steel; a "B" indicates brass; a "BN" suffix indicates brass bracket for 100 Watt type non-inductive resistor with flat sided core.

Spring steel brackets are excellent where vibration is involved; brass brackets are used with non-inductive resistors or for corrosion resistance. A pair of standard brackets is supplied with each individually boxed resistor sold through distributors. Brackets are not automatically supplied for bulk resistor orders. Brackets are sold in lots of 100 pieces (50 pair).

OHMITE**dividohm® type 210 adjustable vitreous enameled resistor**

"Dividohm" resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Such tapped "bleeders" are made by using one or more adjustable lugs, as required. "Dividohms" are also handy for obtaining odd resistance values, for adjusting circuits, and for use on equipment which must be set to meet various line voltages.

"Dividohm" resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to any wire in this strip is made by an embossed contact on the adjustable lug (supplied).

WATT RATING: The stated wattage rating applies only when the entire resistor is in the circuit. When the adjustable lug is set at an intermediate position, the wattage rating is reduced in approximately the same portion, i.e., if the set at half the resistance, the wattage is reduced by one-half. A safe follow is to make sure that the maximum rated current is not exceeded should be carefully checked particularly if the resistor will be used as a divider with several adjustable lugs. Resistance tolerance is $\pm 10\%$ for the resistance value.

adjustable lugs

One "Screw Driver Type Adjustable Lug" is supplied with each unit. Lugs with a silver contact button can be ordered from the table shown below.

MOVING THE LUGS: Lugs always should be loosened completely before moving

and not moved except while the current is off, in order to protect the exposed from mechanical or electrical injury and to protect the operator from dangerous voltages.

DOUBLE THUMB SCREW ADJUSTABLE LUG

This adjustable lug, which is illustrated above, features two advantages — of adjustment and less chance of aging the resistance wire while in lugs. Available for 1 1/8" cores. Catalog No. 2160 Net 1-9

OHMITE type 250 "THIN" vitreous enameled resistors

ite "Thin" Resistors are intended for use in equipment where space is a premium. They are wound on flat, oval shaped ceramic cores, and are coated with Ohmite's exclusive vitreous enamel coating. Resistance tolerance, $\pm 5\%$.

Integral mounting brackets extend through the resistor core to equalize heat distribution and to conduct heat directly to the mounting surface — provides equivalent wattage with less bulk and in less space. Wattage ratings assume the use of a metal mounting surface. Reduce ratings 15% on non-metallic surfaces.

"Thin" resistors are mounted or compactly stacked by means of bracket studs which are hollow to receive assembly bolts. The load should be reduced for each unit when resistors are stacked or used in confined, poorly ventilated spaces. Total height from bottom of mounting stud to top of resistor is approximately $\frac{3}{16}$ " for the Standard units and $\frac{1}{32}$ " for the Miniature units.

For other sizes, closer tolerances, non-stacking brackets, Dividohm adjustable or other features, consult factory.

VALUES APPEARING IN BOLD PRINT ARE POPULAR VALUES AND ARE USUALLY STOCKED BY AUTHORIZED OHMITE DISTRIBUTORS.
Ratings are based on use of steel panel mounting and should be reduced on non-metallic mounting surface because of reduced thermal conductivity.

"Tally Tape," Ohmite's wonderfully convenient packaging presently provides for 1/4, 1/2, 1 and 2-watt resistors. Each perforated segment holds 5 resistors—prevents spilling or tangling—simplifies counting—is printed for quick identification—guarantees original, factory-fresh stock.

Now Includes MIL-R-II Types

Little Devils, Ohmite's famous molded composition resistors, find broad use in commercial and military applications. The 1/8, 1/4, 1/2, 1 and 2-watt sizes, which conform respectively to Styles RC05, RC07, RC20, RC32 and RC42 of MIL-R-11, meet all the stringent requirements of this military specification. The five sizes available satisfy a wide range of design and service needs.

Little Devils have molded insulation for high dielectric strength. Noted advantages of these units are great stability, low noise level, low voltage coefficient, high insulation breakdown voltage and rapid heat dissipation. They may be used at full rated wattage at 70°C (158°F) ambient temperature.

Little Devils are available from stock in standard EIA resistance values in the tolerances and resistance ranges shown in the price table. Ratings for maximum continuous RMS voltage drop are high: 150 volts for 1/8 watt units, 250 volts for 1/4 watt, 350 volts for 1/2 watt, 500 volts for 1 watt, and 750 volts for 2 watt units. See "Little Devil" Resistor Assortments, page 14.

OHMITE*Little Devil*® industrial and service resistor assortments**RESISTORS AND HANDY CABINET FOR THE PRICE OF THE RESISTORS**

Select the composition resistor you need, right on the job from time-saving Devil® Assortments. Ohmite now offers seven industrial assortments in addition to the four service assortments that have been so popular for many years. complete line, there is an assortment to fill every industrial and service requirement. Each drawer of a single 5-drawer cabinet has eight compartments individually labeled. Dimensions of the single cabinet are 9" long, 4 5/8" deep. Dovetail tops and bottoms facilitate stacking. Cabinet assemblies are riveted to metal strips which afford rigidity and hanging of the unit on the wall.

Of the seven industrial assortments, there are three $\pm 10\%$ tolerance assortments of 1/4, 1/2 or 1 watt sizes each containing 80 values. A two-cabinet assembly is furnished for these assortments. Four 5% tolerance assortments provide values each of resistors in the 1/8, 1/4, 1/2, or 1 watt sizes. A four-cabinet assembly is furnished for each of these assortments.

The four popular service assortments provide $\pm 10\%$ tolerance resistors in single cabinet in 1/4, 1/2, 1 or 2 watt sizes.

Cabinets are factory packed in accordance with the tables shown below.

THRU-BOLT MOUNTING BRACKETS FOR CORRIBS

Includes 2 brackets; bolt; centering, mica, and lock washers; nuts. Diagram below.

No. of Resistors	Catalog No.	Net 1-9
1	6126P8 1/2	\$.55
2	6127P8 1/2	1.08
3	6128P8 1/2	1.49
4	6129P8 1/2	1.76

High current, low resistance, heavy duty units used in motor starting, dynamic braking, etc. "Corrib" type units employ a corrugated ribbon of resistance alloy. This is space-wound edge-wise around a ceramic tube. Vitreous enamel is fused around the alloy ribbon to lock the turns securely in place. Heavy lug terminals. Resistance tolerance is $\pm 10\%$.

Available in fixed or Dividohm® adjustable types. Dividohm® type is similar to fixed and includes one adjustable lug. Rating of Fixed or Dividohm® stock units—300 watts—reduce unit load for stack-mounted resistors; core size (bare) 8 1/2" long x 1 1/8" diameter. Other sizes made to order.

Powr-Rib® HIGH CURRENT LOW OHMS resistors

Higher power handling capability—approximately 700 to 1000 watts—is available in stock, "Powr-Rib" resistors. These are available in two types and are wound either edgewise with ribbon (Edgewood Ribbon type) or with round wire (Round-Wire type).

The core of these units consists of ceramic segments on a metal bar which is slotted on both ends for rapid installation. Resistance tolerance is $\pm 10\%$. Terminals clamp onto the resistor wire and may be moved in from the ends for intermediate resistance values. Extra terminals available for use as shown in diagrams for terminals. Terminal Stk. No. 2172G (not shown) has screw connections.

EXTRA TERMINALS

For Round Wire Powr-Rib

Descr	Catalog No.	Net 1 Qty.
In-Line Mtg.	2175	\$.64
90° Mtg.	2176	1.12

For Edgewound Powr-Rib

Descr	Catalog No.	Net 1 Qty.
30 Amps & more	2172B	\$1.17
29 Amps & less	2172G	.44

SPRAGUE RESISTORS

KOOLOHM® AXIAL-LEAD WIREWOUND RESISTORS FOR INDUSTRIAL APPLICATIONS

- Insulated-Shell Design for Easy Mounting
- Feature Improved Internal Construction in Which Winding Leads are Welded to End-Cap for Superior Mechanical Strength
- Ceramic-Insulated Wire is Space Wound and Cemented to Prevent Turn-to-Turn Shorting. Permits Higher Resistance Value in a Given Size Than in Conventional Resistors
- Non-Porous Tubular Ceramic Shells Sealed With High Tensile Silicone Cement
- Unexcelled Insulation and Mechanical Protection. Can be Mounted in Direct Contact With Chassis
- Call Your Sprague Industrial Distributor for Quantity Prices
- For Complete Technical Details, Refer to Latest Issue of Sprague Engineering Bulletin 7300

- Types 450E, 452E, 454E, 456E and 458E are Standard Resistors. Types 451E, 453E, 455E, 457E and 459E are Non-Inductive Resistors

Ohms	Type 450E 3 WATTS 1/4" x 5/16"		Type 452E 5 WATTS 1/4" x 1"		Type 454E 7 WATTS 1 1/2" x 1 1/8"		Type 456E 10 WATTS 1 1/2" x 1 3/4"		Type 458E 14 WATTS 1 1/2" x 1 3/4"

Commercial Tab-Terminal KOOLOHM® Wirewound Resistors

- Ceramic Outer Jacket. May be Mounted Anywhere—Even Flat Against Chassis or Grounded Parts.
- Each resistor is Tropicallized by a Glazed Ceramic Outer Coating and Improved End Seals Which Offer Complete Protection Against Moisture or Any Other Climatic Conditions
- Extremely High Insulation Resistance—10,000 Volts From Surface of Ceramic Jacket to Inner Resistance Elements
- Insulated Wire Permits Winding Higher Values in Layers Which Means Much Smaller Physical Sizes for Each Wattage Rating
- Insulated Wire Permits True Non-Inductive Wound Designs
- Standard Resistance Tolerance: $\pm 5\%$
- These Resistors Are Also Available in 5 and 10 Watt Ratings, Axial-Lead Style. See Latest Issue of Sprague Catalog C-618

SPRAGUE RESISTORS

BLUE JACKET® INDUSTRIAL WIREWOUND RESISTORS

- Improved Minified Resistors Designed for Thorough Reliability and Stability Under Extreme Operating Conditions
- Matched Coefficient of Expansion Allows Uniform Expansion of Vitreous Enamel Coating, Ceramic Base, and End Caps, Eliminating Cracking, Cracks, and Protects From Fumes and Humidity
- Windings and Leads Welded to End-Caps for Superior Mechanical Strength
- For 2BJ, 3BJ, 5BJ and 10BJ Commercial or Service Equivalents to These Resistors, Refer to the Latest issue of Sprague Catalog C-617

TYPE RW57, RW58, RW59 BLUE JACKET® WIREWOUND RESISTORS

This Series of Blue Jacket Wirewound Resistors Meet All Performance Characteristics of Military Specification MIL R-26C, Characteristics V and G

SPRAGUE RESISTORS

FILMISTOR® METAL-FILM RESISTORS

- Filmistor® C Series Resistors are Ideal for Circuits Requiring High Accuracy, Reliability, and Stability with Low Temperature Coefficients.
- Physical Size of Types RN55 and RN60 is Compatible With Those of Other Resistors, Capacitors, and Diodes for "Cordwood" Packaging.
- Designed to Meet the Stringent Performance Requirements of Spec. MIL-R-10509D.
- Low Self-inductance, Low Distributed Capacitance. Equal or Surpass the Characteristics of Precision Wirewound Resistors, Yet Are Smaller in Size.
- Metallic Resistive Film is Firmly Bonded to Special Ceramic Core, Automatically Spiralled to Desired Resistance Value.
- Tough Molded Shell Provides Protection Against Mechanical Damage as Well as Catastrophic Failures From Electrolysis Caused by Moisture Penetration.
- Standard Resistance Tolerance, $\pm 1\%$
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 7025

1/20 WATT TYPE 415E/RN50C

.065" Dia. x .140" Long
20 ohms thru 100K

1/4 WATT TYPE 419E/RN65C

.200" Dia. x .600" Long
49.9 ohms thru 1 meg.

1/10 WATT TYPE 416E/RN55C

.095" Dia. x .250" Long
49.9 ohms thru 100K

1/2 WATT TYPE 420E/RN70C

.250" x Dia. .750" Long
49.9 ohms thru 1 meg.

1/8 WATT TYPE 418E/RN60C

.135" Dia. x .400" Long
49.9 ohms thru 499 K

1 WATT TYPE 421E/RN75C

.375" Dia. x 1.062" Long
49.9 ohms thru 2 meg.

SPRAGUE RESISTORS

ACRASIL® PRECISION/POWER WIREWOUND RESISTORS

- Exclusive Silicone Coating Has Such Excellent Protective Qualities That Extremely Fine Diameter Wire is Used in Winding Resistor Body—Result is Higher Values of Resistance Than Were Previously Available.
- Extended Range of Resistance Values In No Way Impairs the Stability or Reliability of These Resistors, Even Under Extreme Operating Conditions.
- Small Size—Ideal for High-Density Circuitry.
- Both Standard and Non-Inductive Windings Are Available.
- Designed to Meet the Stringent Requirements of MIL-R-26E.
- Standard Resistance Tolerance, $\pm 1\%$.
- For Complete Technical Data, Refer to Latest Issue of Engineering Bulletin 7450.

Thermistors and varistors for mil. and industrial applications

PLUSISTOR® POSITIVE TEMPERATURE COEFFICIENT THERMISTORS—Solid State silicon resistors for temperature control or compensation. Approximate $+0.7\%/^{\circ}\text{C}$ temperature coefficient from -60°C to $+150^{\circ}\text{C}$... Available in $\frac{1}{4}$ and $\frac{1}{2}$ watt dissipation rating at 25°C , decade multiples of standard 10% resistance values and a choice of bodies and sizes.

PULSISTOR®—A special thermistor designed into an electric heat sink for surge protection of high wattage loads. Protects or lengthens life of high inrush devices having steady-state dissipations up to 4,000 watts. Effectively applied in filamentary loads, capacitor charging circuits, power supplies, transmitters, modulators.

SYNCHRONOUS CONTROLLER—A solid state temperature controller with standard sensitivities of 0.01°F . Adjustable proportional band controllable from 0 to 2°F . Available with plug connector or barrier strip connection for applications including process control equipment, heating and alarm systems, kilns and drying equipment, constant or variable temperature baths, etc.

MILITARY GRADE DISK (MIL-T-23648)

Rugged, high reliability, general purpose thermistors... temperature range, -55°C to 125°C ... well-suited for temperature measurement & control applications... particularly in transistor circuitry.

BEAD THERMISTORS

For applications involving temperature measurement and control... and liquid or gas flow... where space is minimal and medium cannot be disturbed by the sensor element... such as gas chromatography and thermal conductivity gas analysis. Available in diameters from .005" to .043" for different time constants. Available also with adjacent leads.

BUTT-MOUNTED THERMISTORS

For simplified application... where feedthrough terminals are required... bead thermistors are available ready-mounted... for gas chromatography and thermal conductivity gas analysis.

BEAD-IN-GLASS BULB—Bead-in-glass bulb thermistors... are most advantageous... in applications where power sensitivity is a primary concern. Also available in nitrogen atmospheres.

INDIRECTLY HEATED BEAD THERMISTOR

Thermistor bead with separate heater... for changing or controlling thermistor temperature... where electrical circuit resistance need adjustment without use of moving parts.

BEAD-IN-GLASS RODS

Bead thermistors... with sintered-in platinum alloy leads... embedded in solid glass structures... air or gas never come in contact with thermistor bead.

BEAD-IN-GLASS PROBES

Hermetically sealed in solid glass... with dumet leads... resist internal mediums, harsh environments... impervious to conductive corrosive mediums... unaffected by high density radiation. Available various diameters and lengths, also moisture-proof seal.

THERMISTOR SENSOR ASSEMBLIES

Complete... ready-to-mount... for a variety of applications and mounting methods. "SS" series for surface mounting... heat sealing or process controls, heat sink and mold temperature measurements, other applications... "SF" series for use in temperature measurement and control, liquid level and gas control.

VECO LOX THERMISTORS

Thermistor beads & probes... developed specifically for measurement and control of fluid temperature... level and flow in the temperature ranges of liquid oxygen and liquid nitrogen.

THERMISTOR DISKS

Characterized by long time constant... high power dissipation. Used for temperature compensation of electronic components.

THERMISTOR RODS

Characterized by moderate power dissipation, long time constant, high resistance... for greatest application use in temperature measurement and control elements... or in temperature compensators and time delay devices of electronic circuits.

THERMISTOR WASHERS

Designed for mounting in bolted pile-ups... in any combination of series or parallel... for applications requiring higher power dissipation ratings.

THINISTOR® THIN FILM THERMISTORS

The latest advance in thermistor technology... two basic types... 5 micron thick films and 20 micron free standing... both featuring relatively high dissipation constants, short thermal response times, extreme sensitivity... for application in microcircuitry, gas chromatography, infrared energy detection, medical instrumentation, many, many more.

VARISTORS

Voltage sensitive resistors... exhibit a symmetrical non-linear change in electrical resistance with an applied voltage change... typically applied as noise suppressors in telephone circuits. Useful in volume limiting and metering protection.

MOUNTING HARDWARE

- H-01 — 1½", 2-56 machine screw
H-02 — 2-56 Stainless steel rod stock (12" length only)
H-03 — 2-56 Hex nut, stainless steel for use on H-01 and H-02
H-04 — 1-72 machine screw, 1" long
H-05 — 1-72 hex nut, stainless steel (for use on H-04)
H-12S — Stainless steel side bracket for models with 1" mounting centers

- H-22S — Stainless steel side bracket for models with ¾" mounting centers
H-25 — Stainless steel stacking straps for models with 0.520" mounting centers
H-11E — Stainless steel end bracket for models with 1" mounting centers
H-21E — Stainless steel end bracket for models with ¾" mounting centers
H-26S — Stainless steel side bracket for models with 0.520" mounting centers

NOTES

¹ Key to terminal types: L=Insulated stranded leads, S=Solder Lugs (includes panel mount bushings on models 3300S, 3301S, 3367S, 3368S only), P=Printed circuit pins (flat mounting), W=Printed circuit pins (edge mounting). Additional worm gear terminal classification: W=Printed circuit pins (edge mounting—top adjustment), H=Printed Circuit pins (edge mounting—side adjustment).

² Franchised local distributors quote factory prices to 500 pieces; Contact factory for prices in high quantities.

³ The following resistances are standard if they fall within the limits listed: Wirewound—10, 20, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 25K, 50K, 100K. RESISTOR, RESISTALLOY—5K, 10K, 20K, 50K, 100K, 200K, 500K, 750K, 1 Meg., 2 Meg., 5 Meg. PALIRIUM—2, 5, 10, 20, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K, 200K, 500K, 750K, 1 Meg. Other resistances available on special order.

⁴ Closer tolerances available on request except commercial models.

⁵ All models are sealed against sand and dust.

⁶ Humidity-proof versions available on special order. Contact factory for number, price and delivery.

⁷ BOURNS, TRIMPOT, TWINPOT, TRIMIT, E-Z-TRIM, RESISTALLOY, RESISTOR, PALIRIUM, SILVERWELD, KNOBPOT and QUADRATRON are registered trademarks of Bourns, Inc. Other products made by Bourns, Inc., are identified trademarks which include: TRIMISTOR, TRIMM, MIL-F-TRIM, CARBON, PANLTRIM, MILISEAL, CLOCKPOT, TRIMM, MICROTRIM, RESISTRIM, TRIM JR., B, LABPOT, INFINITRON, DIALPOT, and TRIMPOINT. Other patents pending. Bourns products are under issued and pending foreign patents.

BOURNS INC

ADJUSTMENT POTENTIOMETERS

CERMET ELEMENT TRIMPOT POTENTIOMETER

PRODUCT DEVELOPMENT

vast improvements following the original design and prototype of the adjustment potentiometer has now, as in the past, meant that Bourns the standard for the industry. The new products and processes currently being developed — RESISTON® carbon and PALIRIUM® cermet elements, and the virtually indestructible SILVERWELD® termination, to a few—serve to show that Bourns produces today what others predict tomorrow.

Bourns potentiometers — not merely first, but the largest producer in the industry.

PRODUCT ENGINEERING

This group of highly trained, professional personnel utilize their specialized training to provide rapid, accurate technical assistance. Their individual experience and technical knowledge about adjustment potentiometers enables them to provide this service in a concise manner which saves you time and cuts costs. Such vital and time-saving assistance—available, incidentally, only from Bourns—is another part of the Bourns Total Value picture.

or two for nothing

Here's the only Replacement Guide that lets you find any control part when all you know is the TV or Radio model number.

Or the manufacturer's part number.

Or the chassis number . . .

and the component function.

The guide costs \$25.00 by itself because there's nothing else like it in the world AND it's worth it to you!

But you can get 2 of them free!

Just buy a Uni-Tite Replacement Center that lets you make up any control part from its components in seconds.

It slims your control inventory to just 15 cubic feet.

It speeds your service. Saves you time and money.

Saves work. And you'll always have, right in stock, every control

in popular demand. Best of all, you'll be offering your customers famous Clarostat quality.

Send for your Clarostat Replacement Guide, today.

At either price.

COMPOSITION-ELEMENT CONTROLS

Graph Explanation:
Taper S—Straight or uniform resistance change with rotation.
Taper T—Right-hand 30% resistance at 50% of C.C.W. rotation.
Taper U—Left-hand 1% resistance at 33 1/3% of C.W. rotation.
Taper V—Right-hand 20% resistance at 50% of C.C.W. rotation.
Taper W—Left-hand 20% resistance at 50% of C.W. rotation.
Taper Z—Left-hand (Log. audio) 10% resistance at 50% of C.W. rotation.
Taper Y—Left-hand 5% resistance at 50% of C.W. rotation.

SERIES "A47" 1/2-WATT CONTROLS

Composition-element controls in the popular 15/16" dia. size. Series "A47" controls are field-assembled with the selected "Pick-A-Shaft" and "Ad-A-Switch". These controls are also available with factory-assembled shafts at no extra charge, by omitting prefix "A" from catalog number and designating the type shaft desired when ordering. Example: 47-100K-S with FKS-1/4 shaft.

SERIES "A47F"

Series "A47F" controls are field-assembled with the selected "Pick-A-Shaft" and "Ad-A-Switch". "A47F" controls have taps 1, 2, 3 located at 40%, 50% and 60% of rotation, double taps at 35 and 65% of electrical position. These controls are also available with factory-assembled shafts at no extra charge, by omitting prefix "A" from catalog number and designating the type of shaft desired when ordering. Example: 47F-200K with FS-3 shaft.

SERIES 44 — 0.02 WATT CONTROLS

Composition Element Controls rated at 0.2 watt, designed specifically for miniaturized applications such as transistorized circuits, pocket radios, hearing aids, etc. Stocked controls have Clarostat "W" taper (20% log audio). Other tapers available on special order. Series 44 is without switch, while Series 44S has factory-attached 0.5 am. 25 v.d.c. DPST switch. Other ohmages available on special order. 200 ohms to 5 meg. linear; 1500 to 2.5 meg. tapered. Also available on special order, controls with 0.5 a. 25 v.d.c. SPST switch. Items not listed are special. Prices and information on request.

SERIES 53 — 2 WATT

MOLDED COMPOSITION ELEMENT POTENTIOMETERS

SERIES 53C1

SERIES 53C2

SERIES 53C3

A 2-watt molded composition element potentiometer totally enclosed and sealed against moisture and other environmental conditions. Meets the need for a high quality resistance device incorporating high-stability under extreme climatic and operational conditions. For use in critical applications, such as, test equipment, military requirements, computers, servo systems and industrial metering devices.

1 1/16" diameter and 1/16" deep, wiper assembly of one piece construction; carbon to carbon contact insures exceptionally low noise level; brass nickel plated, gold plated terminals. Electrical tolerances are plus/minus 10% for all values up to 1 meg. 1 meg. and above plus/minus 20%.

Fabricated in accordance with MIL-R-94 Style RV4.

Items not listed are special, prices and information supplied upon request.

The C1 designation indicates a 1 1/8" round shaft beyond bushing; 3/8" long bushing with 3/8-32-NEF-2 thread. The C2 designation is a 1/8" screwdriver slotted shaft with a 1/2" split locking bushing. The C3 designation is a 3/8" round shaft FMS, 3/8" long bushing with 3/8-32-NEF-2 thread.

RESISTANCE DEVICES

WIRE-WOUND CONTROLS

These are "Pick-A-Shaft"* controls which take any one of 12 shafts listed on page R-24 including High Voltage Coupler and insulated shaft. Your choice of any one of the 12 shafts listed (this does not include insulated shaft) with each control. Tolerances of these controls are in accordance with EIA standards. Overall resistance

tolerance of plus/minus 10% for all values. All controls are linear. Available with factory-assembled shafts at no extra charge, by omitting the prefix "A" from the catalog number and designating the type of shaft desired when ordering. Example: 43-500 with FKS-1/4 shaft, or 43S-10K with FS-3 shaft and SPST switch.

SERIES "A58" and "A58S" 3- WATT CONTROLS

"A58" is without switch, while "A58S" has factory-attached SPST switch. Available with factory-assembled shafts, at no extra charge, by omitting prefix "A" from catalog number, and designating type of shaft desired when ordering. Example: 58-50K with KSS-3 shaft, or 58S-25K with RS-3 shaft and SPST switch. Controls with other than SPST switch are special. Prices and information on request.

SERIES BHM ROTARY SWITCHES

Series BHM switches are rated at 50 ma. at 300 V. a.c. or d.c., and 500 ma. at 30 V. a.c. or d.c. All moving parts and contact mechanism are totally enclosed, and the switch assembly is sealed for protection from dust and atmospheric conditions. They are particularly adapted to portable radios, receivers and transmitters, X-ray and medical instruments, calculating machines and computers.

Current: 50 Milliamps. at 300 volts a.c. or d.c.
Rating: 500 Milliamps. at 30 volts a.c. or d.c.
Protection: All moving parts and contact mechanisms are totally enclosed and switch is sealed, which protects it from dust and atmospheric conditions.
Shaft: 1/4" diameter round 1" beyond bushing.
Finish: Nickel Plating.
Bushing: 3/8" x 32 NEF-2 Thread. 3/8" Long.
Torque: 30 to 50 oz. in.

BHM-SP12P-S	Single Pole 12 Positions — Shorting
BHM-SP12P-NS	Single Pole 12 Positions — Non Shorting
BHM-2P6P-S	2 Pole 6 Positions — Shorting
BHM-2P6P-NS	2 Pole 6 Positions — Non-Shorting
BHM-3P4P-S	3 Pole 4 Positions — Shorting
BHM-3P4P-NS	3 Pole 4 Positions — Non-Shorting
BHM-4P3P-S	4 Pole 3 Positions — Shorting
BHM-4P3P-NS	4 Pole 3 Positions — Non-Shorting

Meets or exceeds test paragraph 4.5.3 thru 4.5.13 of MIL-S-3786.

(Mod. DPST has one pole "on", one pole "off" or with jumper it is SPDT.)

POWER RHEOSTATS

Clarostat Power Rheostats maintain their full power rating at settings as low as one-third rotation without excessive temperature rise. Standard overall resistance tolerance plus/minus 10%. Closer tolerances are available upon special order.

AN Types (aircraft type) are basically the same units mechanically and electrically except that they are encased in a metal housing (versus ceramic). Terminals are screw type lugs to prevent corrosion. Approved under MIL-R-6749.

Units mount through a single hole, a locking pin is provided for rear panel mounting.

RESISTANCE DEVICES

SOUND-SYSTEM CONTROLS

For proper control of volume and tone alike, Clarostat offers a choice of several controls, such as L- and T-pads, output attenuators, and individual-speaker volume controls as used for drive-in theatre instal-

lations. These are not ordinary radio controls but rather sound system controls designed and built for critical requirements.

CONSTANT-IMPEDANCE CONTROLS

Self-compensating volume controls known as L-pads and T-pads for use in sound systems. Rated at 2½ watts DC, but will handle up to 10 watts audio. Continuous range from 0.5 to 30 decibels attenuation in 90° rotation. Last 10% affords infinite attenuation. With Clarostat constant-impedance L-pads and T-pads the input and output impedances of associated circuits can be kept within the limits of a constant required value. Knob and dial plate furnished with each control.

CONSTANT IMPEDANCE OUTPUT ATTENUATORS

Series "CIB" rated at 10 watts, but will handle up to 30 watts in audio circuit. Linear attenuation provided in 3 decibel steps up to 24db, then 30db followed by infinity. Equipped with dial plate and bar knob. One-hole mounting, ⅜" bushing diameter. 1" shaft. This control has been developed to meet the need for a constant-impedance attenuator capable of handling considerable power without measurable insertion loss. Recommended as an output level control for power amplifiers, or as an input attenuator for individual or for a group of speakers in a public address system.

NET PRICE \$7.70

SPECIAL DRIVE-IN THEATRE L-PAD

To meet the needs of theater sound systems, more especially those of drive-in theaters, a special 8 ohm L-Pad is now available, containing two separate windings of 5 ohms and 40 ohms. Also 50 ohm linear rheostat and 35 ohm tapered rheostat, as listed. Units have ⅜-32 bushing ¾" long, and 1½" round shaft. (Knob furnished with each control).

Cat. No. CM8727-1 8 ohm L-Pad
Net Price \$1.80

SPACE-SAVER CONSTANT-IMPEDANCE ATTENUATORS

Characterized by reduced depth and diameter, these attenuators are ideal for use in remote control of speakers since they are small enough to be installed in standard electrical boxes in the home, office, stockroom, etc.

These controls are rated 2 watts D.C., but will handle up to 4 watts of audio, depending upon the type signal being handled. (As the frequency becomes constant, wattage reduces to 2 watts or the same as the D.C. rating).

uni-tite FIELD ASSEMBLED CONTROLS

Your Distributor's Uni-Tite Replacement Center will answer more than 95% of your replacement control requirements including 15/16" diameter wire-wound controls, push/pull singles, dual controls, dual controls with rotary switches, and single controls with rotary switches. These field-assembled, snap together controls provide you with the exact combination required for radio and TV replacements. In addition, a complete line of Uni-Tite field-assembled, dual controls, operating on a single shaft are available to meet all your audio, hi-fi and sound system requirements.

TAPER EXPLANATION:

TAPER S Straight or uniform resistance change with rotation.

TAPER V Right-hand (Log. audio) 50% of C.C.W. rotation.

TAPER Z Left-hand (Log. audio) 10% resistance at 50% C.W. rotation.

SERIES 76JA

Multi-turn Trimming Potentiometer

A miniature, 10-turn trimming potentiometer that offers up to 15 times the winding length available in comparable units. This feature results in setability and resolution exceeding that of trimming potentiometers several times the size. Brief specifications include a power rating of $\frac{3}{4}$ watt at 85°C derated to zero power at 150°C, resistances from 100 ohms to 20K ohms standard with other values offered on special order, standard resistance tolerance of $\pm 5\%$, printed circuit or solder lug mounting, overall dimensions of only 1.250" x 0.437" x 0.328".

Stock Values	Resolution %
100	0.1
200	0.09
500	0.08
1,000	0.075
2,000	0.06
5,000	0.05
10,000	0.04
20,000	0.036

SERIES 62JA

Commercial Multi-turn Potentiometer

A 10-turn potentiometer offering electrical operating characteristics comparable to units costing far more. Designed specifically for the industrial instrumentation market, the Series 62JA has the inherent advantages of far greater resolution in trimming, better instrument control and settings for all types of electronic equipment. Brief specifications include: $\frac{7}{8}$ " diameter, $1\frac{1}{4}$ " deep behind panel, bushing and shaft or split-locking bushing with screwdriver slot, 2 watts @ 25°C, derated to zero @ 85°C, 1000 to 100K ohms standard — others available, absolute linearity of $\pm 0.25\%$ standard, closer on order.

Stock Values	Resolution %	Stock Values	Resolution %

10,000	.024	200	.048
5,000	.026	100	.062

CLARODIALS

Ten-Turn Concentric Scale Dials

Calibrated dials designed for multi-turn potentiometers up to 10 turns or other rotary devices. CLARODIALS require only one inch of panel. The knob attaches directly to the shaft, and the body of the dial is mounted rigidly to the potentiometer. As a result, accurate readings with a ratio of 10:1 for ten turns are provided with zero backlash and no reading error. CLARODIALS are made of an aluminum for years of attractive use. Mounting requirements are $\frac{1}{4}$ " shaft and $\frac{3}{16}$ "-32 M bushing. Adapters for $\frac{1}{8}$ " dia. shafts are available.

Cat. No.	Description
411	Commercial 10 turn, black anodize $\frac{1}{4}$ " shaft, with knob
412	Commercial 10 turn, black anodize $\frac{1}{4}$ " shaft, without knob
461	Commercial 10 turn, clear anodize $\frac{1}{4}$ " shaft, with knob
462	Commercial 10 turn, clear anodize $\frac{1}{4}$ " shaft, without knob

SERIES 54-48JA

3" Dia. Vari/Phase Single Turn Potentiometer

Permits external phasing of electrical rotation to mechanical rotation. Ultra precise unit for professional use. Exclusive Clarostat design eliminates bulky, hard-to-adjust clamping rings. Anodized aluminum housings for minimum weight. Widely used in aircraft instrumentation.

Stock Values	Resolution 100/Total Turns

SERIES SC42-970 SINE-COSINE

Single-Turn Potentiometer

Used in radar, computer and servomechanisms, or any application requiring two output voltages accurately proportioned to the sine and cosine rotation angle. Due to functional use, units are designed and built for exceptionally long rotational life.

SPECIFICATIONS

FUNCTION: Sine-Cosine.
TOTAL RESISTANCE: $16,000 \Omega \pm 10\%$
POWER RATING: 2.46 watts @ 40°C (198 volts R.M.S.)
ROTATION: (Eff., Elec., Mech) 360° CCW
MAXIMUM SPEED
RECOMMENDED: 30 RPM (20 gm. constant pressure)
EXPECTED LIFE: 500,000 Cycles.
RESOLUTION: 0.14% maximum of full scale to peak voltage.
CONFORMITY: Standard, $\pm 1\%$ peak to peak voltage (Available, $\pm \frac{1}{2}\%$ peak to peak voltage. Not stocked — may be ordered special price and information on request.)
SHAFT TORQUE: 1 oz. in.
WEIGHT: 6 oz.

PRODUCTS OF THE HOUSE OF RESISTORS®

RESISTORS • CONTROLS RESISTANCE DEVICES

SERIES 57M & 57EJ

1/2" Single Turn Potentiometers

High performance potentiometer packaged in a 1/2" diameter housing. Quality construction throughout. Available in two models; Series 57M rated at 1.5 watts at 40°C and Series 57EJ rated at 2 watts at 70°C. The high-temperature Series 57EJ features glass-sealed terminals. Both units are corrosion resistant.

SERIES 42-900

High Versatility Single-Turn Potentiometer

Used and approved by the millions in all types of applications ranging from ultra-critical military systems to ultra-dependable hard-working industrial equipment. Extra tap affords greater electrical versatility. Shaft extension through rear of unit permits addition of switching or other functions actuated by single shaft.

Stock Values	***Terminal Linearity	Resolution 100/Total Turns	Temp. Coefficient of Wire

50	±1.0%	.35%	.00017 Ω/Ω/°C

***Absolute Linearity: The maximum deviation of the actual output characteristic from a straight reference line extending between zero and the total applied voltage over the theoretical effective rotation.

MINIATURIZED POTENTIOMETERS

Consistent with miniaturization in Military and Commercial equipment, such as; Guided Missiles, Aircraft Electronics, Mobile Radio and Radar, Computers, Range Finders, Pocket Radios and Hearing Aids; Clarostat offers miniaturized composition element Series 48M and wire-wound

Series 49M Potentiometers, and a Rotary Selector Switch designated as Series BHM to meet the switching requirements of the above mentioned and other applications.

SERIES 48M — 0.3 WATT COMPOSITION ELEMENT

Available in single or dual, standard or shaft locking bushing. Standard bushing potentiometers have 1/4" x 32 NEF-2A x 1/4" long bushing and 1/8" dia. x 1/2" long shaft beyond bushing.

Shaft locking bushing potentiometers have 1/4" x 32 NEF-2A x 3/8" long bushing and 1/8" dia. x 1/4" long screwdriver slotted shaft.

All potentiometers furnished with mounting nut 1/8" thick x 5/16" across flats, and one internal tooth lockwasher. Potentiometers with split locking bushings furnished with jam nut also.

Insulation: Breakdown test between terminals and ground for 1 minute 1000v.a.c.; 350v.a.c. @ 3.4" Hg.

Resistance Range (Ohms): Linear 200 to 5 Meg. Tapered 1.500 to 2.5 Meg.

Resistance Tolerance: Linear ±10%. Above 100,000 ohms ±20%. Tapered ±20% all values.

Tapers: Linear. Left hand — 10% resistance at 50% rotation. "Z"

Mechanical and Electrical Rotation: 300° ±3°

Effective Rotation: 300° ±3°

Torque (oz.-in.): 0.5 to 6

Dual Construction: Available.

RESISTANCE DEVICES

CLARO-DEC PRECISION RESISTANCE DECADE BOX

most flexible innovation yet in precision resistance decade boxes, the Claro-Dec serves many applications with all the versatility needed for the Claro-Decs (within established parameters of current) are used whenever rate steps of resistance values between .1 ohms and 900K ohms, $\pm 1\%$ * required. Selection of desired steps of resistance is accomplished by in-

Net Each: \$3.95

sertion of a banana plug into the proper, marked front panel hole on the unit. Individual or multiple Claro-Dec units are flush panel or breadboard mounted with equal ease. Units may be physically ganged by sliding the molded-in tongue-and-groove together and electrically series connected with a supplied wire jumper or accessory banana plug.

MODEL	TOTAL RES. OF DECADE	RESISTANCE PER STEP	ACCURACY (+C)*	MAXIMUM CURRENT
260-1	0.9 Ω	0.1 Ω	$\pm 5\%$	1 Amp.
260-2	9 Ω	1.0 Ω	$\pm 1\%$	350 Ma
260-3	90 Ω	10 Ω	$\pm 1\%$	100 Ma
260-4	900 Ω	100 Ω	$\pm 1\%$	35 Ma
260-5	9K Ω	1K Ω	$\pm 1\%$	10 Ma
260-6	90K Ω	10K Ω	$\pm 1\%$	3.5 Ma
260-7	900K Ω	100K Ω	$\pm 1\%$	1.0 Ma

* C — Contact Resistance, .005 - .03 ohms, typical, .01 ohms.

CONSTRUCTION

Housing — Two piece molded housing, color — grey.

Marking — Permanently marked with resistance multiplier, current rating, schematic and model number.

Resistors — Plastic coated wirewound for Models 260-1 and 260-2. Plastic coated metal film for all other models. Temperature coefficient less than 100 ppm.

Temperature — 40°C. max. at rated current, de-rated to zero at 85°C.

Weight — 2 oz. (approximate) per individual unit.

SERIES 63M TRIMMING POTENTIOMETERS

igned specifically for application on printed circuit boards, this new construction permits extremely close board-to-board spacing. Both metal and plastic shafts and faceplates with wire or solder terminal leads provide mounting facilities to meet virtually every application.

SPECIFICATIONS

Power Rating — .25 watt @ 70°C. Derated to zero power @ 120°C.

Working Voltage — 350 V.D.C. across end terminals, but power not to exceed rating.

Resistance Range — 100 Ω to 1 megohm, linear.

Resistance Tolerance — $\pm 20\%$

Mechanical & Electrical Rotation — 295°, $\pm 3^\circ$

Voltage Breakdown — 750 V.A.C. between terminals and ground for 1 minute.

Torque — 0.5 to 3 oz. in.

SERIES 371 HOT MOLDED, LOW COST, TRIMMING POTENTIOMETERS

Construction consists of a hot molded carbon element, carbon contact brush, pressure spring and cover. Series 371-5 have standoffs to insulate metal element from printed circuit board and a screwdriver adjustment slot.

SPECIFICATIONS

Power Rating — $\frac{3}{8}$ watt @ 70°C derated linearly to zero watts @ 120°C.

Working Voltage — 350 V.A.C.

Resistance Range — 100 Ω to 1 megohm.

Resistance Tolerance — $\pm 20\%$

Tapers — Linear and audio.

Mechanical & Electrical Rotation — 290° $\pm 5^\circ$.

Dielectric Strength — Variable arm hot to case. Case to mounting plane — 750 volts R.M.S. @ atmospheric pressure.

Torque — Operating: 6.0 oz. in. max. Stop: 1 lb. in.

ICATION INFORMATION

CERMET Potentiometers are designed for applications requiring higher power, temperature and stability than have been previously available with carbon elements and higher resistance and better resolution have been available with wirewound potentiometers. They are ideal for applications now using carbon

element potentiometers where an ultra conservative rating is desired for high reliability.

CTS CERMET Trimmers are used in applications where wirewound distributed capacitance and inductance are intolerable due to high frequencies and in applications where a trimmer with high stability and better reliability than obtainable from a carbon trimmer is needed.

SHEETS

Complete electrical and mechanical data on each of the products covered in this catalogue are available, upon request, from the local CTS industrial distributor.

Parts or exceeds MIL-R-23285B.

CENTRALAB POTENTIOMETERS

Ranging from transistor circuit, highly miniaturized units to heavy-duty types, Centralab controls are outstanding for adaptability and quality of construction.

Included in this product line are carbon film, hot molded carbon and wirewound types. Physical descriptions include the hearing aid transistor radio types as well as the typical $\frac{1}{8}$ " and $\frac{1}{4}$ " diameter shaft units.

All of the controls shown here are available for immediate delivery at factory prices; your Centralab Industrial Distributor serves you as your field source for controls identical in performance, price and quality to those obtained from the factory.

Centralab controls are quality units that have been satisfactorily applied in the most demanding commercial, industrial and military applications.

	1183	JC-JCS — $\frac{1}{4}$ Watt Miniature, Carbon

Model B16 ULTRA MINIATURE Composition Potentiometers

Controls fulfill needs for a 1/10 watt, 0.625" dia. unit. Applications include hearing aids, miniature radios, laboratory instruments, communication equipment, business machines, computers and military equipment. Plain and switch covers are available.

Produced under Patent No. 2,499,711.

ELECTRICAL SPECIFICATIONS

RESISTANCE RANGE: 500 ohms to 5 megohms
TOLERANCE: $\pm 20\%$, except * $\pm 30\%$
TAPER: Linear (C1) log modified clockwise 1/5 watt C1 taper, 1/10 watt C2 taper.
WATTAGE RATING: 1/10 watt
RESISTANCE ELEMENT: Composition
DIELECTRIC STRENGTH: 900 VAC-RMS to ground
EFFECTIVE ROTATION: Plain type, 260°; Switch type, 225°
ROTATIONAL LIFE: Tested to a minimum of 25,000 cycles
SWITCH: SPST, factory assembled, 6.5 amperes @ 1.5 VDC; 0.2 amperes at 45 VDC

MECHANICAL SPECIFICATIONS

SIZE: $\frac{1}{32}$ " diameter with knob. Can be reduced to $\frac{5}{64}$ " diameter without knob.
MECHANICAL ROTATION: 260°
PLAIN TYPE: Plain Type: Stud mounted. Two No. 1-72-NF-2 thd. x .140" long studs on centers.
SWITCH TYPE: Bracket mounted
CONTACTS: Double wiping phosphor-bronze contact arm to resistor element, combined special spiral spring electrical contact between arm and center terminal, assures smooth variation and extremely low noise level.
ROTATIONAL TORQUE: 0.3 inch-ounces
COVERS: Covers control completely. Removing the knob does not disassemble the control.
PACKAGING: One per individual display carton with mounting nuts, and/or screws and instruction sheet.

Model SM ULTRA MINIATURE Composition Potentiometers

SM controls (1/10 watt, 0.502" diameter) were designed for hearing aids, telephone equipment, military communications equipment and other miniature applications. Furnished complete with on-off switch.

Produced under Patent No. 2,887,553.

ELECTRICAL SPECIFICATIONS

RESISTANCE RANGE: 2500 ohms to 25K ohms
TOLERANCE: $\pm 20\%$
TAPER: Log modified clockwise (C2)
WATTAGE RATING: 1/10 watt
RESISTANCE ELEMENT: Composition
DIELECTRIC STRENGTH: 500 VAC-RMS to ground
EFFECTIVE ELECTRICAL ROTATION: 205°
ROTATIONAL LIFE: Less than 10% resistance change after 25,000 cycles
SWITCH: SPST, rated 2.5 amperes at 2 VDC; 0.1 amperes at 45 VDC

MECHANICAL SPECIFICATIONS

SIZE: $\frac{1}{32}$ " diameter with knob. Can be reduced to .502" diameter without knob
MECHANICAL ROTATION: 250°
MOUNTING: Two No. 0-80NF-2A—thread x .134" long studs on .285" centers
CONTACTS: Double wiping phosphor-bronze contacts assure smooth, noise-free rotation
ROTATIONAL TORQUE: 0.4-1.0 inch-ounces
KNOB: Covers control completely. Removing the knob does not disassemble the control.
PACKAGING: One per individual display carton with mounting nuts and instruction sheet.

JMP-JML Models 1/5 WATT MINIATURE Composition Potentiometers

Style RV1, Designed to Meet MIL-R-94B

Model JMP and JML miniature controls are manufactured to meet the requirements of MIL-R-94B, Style RV1.

The resistance elements of these controls are completely enclosed, permitting sealing and potting without damage. Ideally suited for military equipment, geophysical apparatus and miniature amplifiers.

JMP
PLAIN BUSHING TYPE

JML
LOCKING BUSHING TYPE

PHYSICAL DIMENSIONS SAME AS RV1 STYLE MIL-R-94B

ENVIRONMENTAL SPECIFICATIONS

VIBRATION: Meets the requirements of MIL-R-94B

MOISTURE RESISTANCE: Meets the requirements of MIL-R-94B.

PACKAGED: One per individual display carton.

ELECTRICAL SPECIFICATIONS

RESISTANCE RANGE: 500 ohms to 2.5 megohms

TOLERANCE: $\pm 10\%$

TAPER: Linear, except JMP2-103 and JMP2-504 which are semi-log (C2)

WATTAGE RATING: 1/5 watt at 70°C. derated to 0 watts at 120°C.

RESISTANCE ELEMENT: Composition

DIELECTRIC STRENGTH: 900 VAC-RMS to ground at atmospheric pressure. VAC at reduced barometric pressure per MIL-R-94B.

ROTATIONAL LIFE: Resistance change less than 10% when tested per MIL-R-94B.

MECHANICAL SPECIFICATIONS

SIZE: $\frac{3}{16}$ " $\pm$ $\frac{1}{64}$ " diameter, $\frac{3}{16}$ " deep

SHAFTS: Stainless steel, screwdriver slotted shaft, $\frac{1}{16}$ " diameter. Model JMP: $\frac{1}{4}$ " long from mounting surface. Model JML: $\frac{1}{2}$ " long from mounting surface.

TERMINALS: Brass, lead-tin plated

LOCATING LUG: Left only

MECHANICAL ROTATION: $260^\circ \pm 3^\circ$

MOUNTING: Bushing type; mounting nut and lockwasher furnished

BUSHING: Model JMP: $\frac{1}{4}$ "-32 NEF-2A thd., $\frac{1}{4}$ " long from mounting surface. Model JML: Locking Type, $\frac{1}{4}$ "-32 NEF-2A thd., $\frac{3}{8}$ " long from mounting surface. Shaft locking nut furnished.

ROTATIONAL TORQUE: 0.5 to 6.0 inch-ounces

JWP-JWL Models 2 WATT MINIATURE WIREWOUND POTENTIOMETERS

These are high quality miniaturized units; external appearance is similar to JMP and JML controls.

The resistance elements of the JWP and JWL controls are completely enclosed permitting sealing and potting without damage.

PHYSICAL DIMENSIONS
SIMILAR TO RV1
STYLE MIL-R-94B

MECHANICAL SPECIFICATIONS

SIZE: $\frac{3}{16}$ " $\pm$ $\frac{1}{64}$ " diameter, $\frac{3}{16}$ " deep

SHAFTS: Model JWP: Stainless steel screwdriver slotted shaft $\frac{1}{16}$ " diameter, long from mounting surface.

Model JWL: Screwdriver slotted stainless steel shaft $\frac{1}{16}$ " diameter, $\frac{3}{8}$ " long from mounting surface.

TERMINALS: Nickel-silver, gold plated

LOCATING LUG: Left only

MECHANICAL ROTATION: $250^\circ \pm 3^\circ$

MOUNTING: Bushing Type; mounting nut and lockwasher furnished.

BUSHING: Model JWP: $\frac{1}{4}$ "-32 NEF-2A thd., $\frac{1}{4}$ " long from mounting surface.

Model JWL: Locking Type, $\frac{1}{4}$ "-32 NEF-2A thd., $\frac{3}{8}$ " long from mounting surface. Shaft locking nut furnished.

ROTATIONAL TORQUE: 0.4-6.0 inch-ounces.

ENVIRONMENTAL SPECIFICATIONS

VIBRATION: Meets the requirements of MIL-R-19A.

MOISTURE RESISTANCE: Meets the requirements of MIL-R-19A.

INSULATION RESISTANCE: Meets the requirements of MIL-R-19A.

requirements for Style RV4
MIL-R-94/5C

WARE

TING NUT: Nickel-plated brass. $\frac{1}{2}$ " across flats (hex), .093" thick.

WASHER: Nickel-plated phosphor bronze. .507" O.D. x .391" I.D. (internal type).

NUT: Nickel-plated brass. $\frac{1}{2}$ " across flats (hex), .156" or .218" thick. (shd with HML Series only.)

ELECTRICAL SPECIFICATIONS

RESISTANCE RANGE: 50 ohms to 5 megohms inclusive.

TOLERANCE: From 50 ohms through 500K ohms, inclusive, $\pm 10\%$. Above 500K ohms, through 5 megohms, $\pm 20\%$. Linear taper.

EFFECTIVE ELECTRICAL ROTATION: $312^\circ \pm 3\%$.

WATTAGE RATING: 2.25 watts at 70°C , 500 volts.

RESISTANCE ELEMENT: Special carbon composition hot molded with mineral-filled phenolic base.

DIELECTRIC STRENGTH: 900 VAC to ground.

MECHANICAL SPECIFICATIONS

DIMENSIONS: $1\frac{1}{4}$ " diameter.

SHAFTS: Solid—.250" diameter. $\frac{5}{8}$ " long, with $\frac{1}{2}$ " long locking bushing (Series HML); $\frac{3}{4}$ " long with $\frac{3}{8}$ " long plain bushing (Series HMP), and $2\frac{1}{2}$ " long with plain bushing (Series HMS). All lengths measured from mounting surface. Screw-driver slotted.

TERMINALS: Solder lug. Gold plated or hot tin dipped for ease of soldering.

LOCATING LUG: Left (location determined by viewing potentiometer from operating end with terminals down).

EFFECTIVE MECHANICAL ROTATION: $312^\circ \pm 3^\circ$.

MOUNTING: Clearance hole for the $\frac{3}{8}$ " bushing and .130" dia. hole at $\frac{1}{32}$ " radius for locating lug.

CONTACT: Carbon composition pick-up brush.

BUSHING: Plain or locking, $\frac{3}{8}$ " dia.—32 NEF thd. See drawings.

PACKAGED: One per individual display carton.

C-1 Linear, has uniform resistance change from either end. Used for Hor. & Vert. Centering; Hor. & Vert. Hold; Hor. Drive; Vert. Linearity; Focus; Brightness; Height; Contrast. Volume or Tone.

C-2 Semi-log (audio) 10% center. Used for Volume or Tone.

C-3 Right-hand semi-log. Reverse of C-2. Decreases with clockwise rotation.

The Model T extends Hot Molded construction to the trimmer resistor trimmer potentiometer. All critical parts non-magnetic and silver plated superior performance and long life. Especially designed for printed circuit u May be encapsulated.

RESISTANCE RANGE: 500 ohms to 500K ohms
TOLERANCE: $\pm 20\%$
TAPER: Linear (C1)
WATTAGE RATING: $\frac{1}{3}$ watt at 70°C .
RESISTANCE ELEMENT: Hot molded carbon composition
DIELECTRIC STRENGTH: 900 VAC-RMS to ground

SIZE: 1/32" diameter, 1/32" deep
SHAFT: Screwdriver adjust with concentric screwdriver lock
TERMINALS: Silver-plated, pin type 1/32 long
MECHANICAL ROTATION: 300° ± 3°
MOUNTING: Two stub terminals and a threaded centerpiece serve as both electrical terminals and mounting means. All these terminals may be used in dip soldering on printed wiring board applications; or a nut on the center terminal may be used to mount the Model T to an insulated chassis, with the other two terminals serving as conventional solder lugs.

Single		
	Ohms	Type
	500	C1
	1000	C1
	2500	C1
ROTATIONAL TORQUE: Locking type	5000	C1

Can be encapsulated in either flexible or rigid encapsulating compounds for endurance to atmospheric attack. All metal parts silver-plated. Temperature stable plastic is used in the insulating base molding.

MEMCOR COMPONENTS**12½ thru 225 WATT**

Originators of TRU-OHM & HARDWICK, HINDLE Products

RHEOSTAT**POWER****VITREOUS ENAMEL**

MEMCOR power vitreous enameled rheostats are exceptionally rugged and are "made better than they need be." They exhibit characteristics that meet the most exacting specifications. Special design features assure long life and protection under extremes of humidity and abnormal atmospheric conditions.

In the 225, 500, 750 and 1000 watt sizes the "buss bar" contact arm automatically adjusts for complete, continuous contact, and smooth, flexible control. MEMCOR high temperature enamel gives increased service life with an extreme factor of safety.

MEMCOR rheostats are stocked in eleven sizes; 12½ through 1000 watts resistance from 0.5 to 10,000 ohms with diameters from ⅞" through 12". All standard stock units are identified by stock number.

MEMCOR COMPONENTS**300 thru 1000 WATT**

Originators of TRU-OHM & HARDWICK, HINDLE Products

RHEOSTATS
POWER
VITREOUS ENAMELED

MEMCOR rheostats are made in a wide assortment of variations, among which are included tapers, positions, ventilated enclosures, dust-proof enclosures, tandems, toggle switches, micro switches, switching relays and many variations of shaft and mounting. Extra length flattened, and or screw driver shaft assemblies and special length bushings or other special requirements per customer drawing are available.

MASTER.**
- 2. Manufacturer's Catalog Numbers
and Page Numbers.**

This will avoid confusion and expedite delivery.

Thank you!

OHMITE hot molded single-turn trimmers

AFR — SINGLE TURN

OHMITE type AFR Trimmers are single-turn controls built to withstand severe environmental conditions. Their unique design includes a hot-molded resistor track bridged by a single moving molded contact brush. Resistance material, collector track material, insulation material and metal terminals are all molded together at one time into a single, solid, integral structure. There are no cracks or crevices to admit moisture.

Enclosure of the Ohmite type AFR is non-magnetic, corrosion resistant, and splash-proof. Type AFR Trimmers are designed for screwdriver adjustment. Fixed stops withstand a maximum shaft torque of 2 inch-pounds.

In excess of 50,000 operational cycles with low "noise" level initially — decreasing with use — can be expected in conventional applications.

CHARACTERISTICS:

Power Rating: ¼ watt @ +70° C ambient temperature. Derate power linearly to zero at +120° C ambient for resistance values to 0.5 megohms. Additional derating required for resistance values over 0.1 megohms at ambients higher than 70° C.

Resistance Range: 100 ohms to 5.0 megohms. Resistance change is nominally linear with shaft rotation.

Tolerance: ±20% standard.

Temperature Range: —55° C to +120° C.

Working Voltage: 350 volts, RMS, maximum.

Dielectric Strength: 750 VAC, RMS, at sea level.

Adjustment: Single turn, 295 ±5 degrees.

Torque: 0.25 to 3.0 inch-ounces.

Leads: Designed for mounting directly on printed wiring boards using the terminal leads which are spaced to fit the 0.1" printed wiring board standard spacing.

OHMITE hot molded 25-turn trimmers

ANP — 25-TURN

Ohmite type ANP Hot-Molded Trimmers are continuously adjustable 25-turn variable resistors intended primarily for trimmer applications. Designed for use on printed circuit boards, these dependable three-terminal devices can be applied as either rheostats or potentiometers with equally satisfactory results. Stepless and relatively non-inductive regardless of resistance value. Unexcelled stability of setting in normal environmental conditions.

The ANP Trimmer is produced by a hot-molding process using a high temperature material together with a hot molded resistance track, low resistance collector track and terminal pins — all combined into a single, solid, integral structure. The type ANP is splash-proof, dust-tight and can be adjusted by its own rugged terminals.

CHARACTERISTICS:

Power Rating: ⅓ watt @ 50° C ambient temperature. Derate power linearly to zero at 100° C.

Resistance Range: 100 ohms to 0.1 megohms. Resistance change is nominally linear with shaft rotation.

Tolerance: Standard resistance tolerance is ±20%.

Temperature Range: —55° C to +100° C.

Working Voltage: 350 volts RMS, maximum at sea level.

Dielectric Strength: 700 volts RMS maximum, at sea level.

Insulation Resistance: 1000 megohms minimum.

Adjustment: 25 ± 3 turns for continuous resistance change.

Mechanical release at end positions. Turning torque is 0.10 to 8 inch-ounces. Slotted for screwdriver adjustment.

Leads: Pin type terminals, spaced in accordance with 0.1" printed wiring board grid system.

OHMITE vitreous enameled rheostats (potentiometers)

Now, Ohmite offers TWELVE sizes in its line of famous rheostats ranging from 7.5 to 1000 watts. Nothing to shrink or burn, all models are metal and ceramic construction and coated with Ohmite's exclusive vitreous enamel. The revolutionary Model C, 7½ watt miniature unit, the smallest rheostat of its rating available, employs this same construction! All Model C stock units and the enclosed Model E unit, are normally supplied in a corrosion-resistant dust-proof case. Model C units are stocked in both standard and locking type bushings.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

Models H, J, G, K, L, P, and N, marked "Series A," are listed under the Underwriter's Laboratories Reexamination Service. RHEOSTAT KNOBS are listed on page 20. Rheostats can be supplied to meet military specification MIL-R-22.

RATINGS: Current ratings shown, assume use in free air. If units are enclosed, currents should be reduced to as much as 50% depending upon ventilation. The rated current causes the rheostat to dissipate its rated wattage when its full resistance is in the circuit.

SPECIAL RHEOSTAT FEATURES: Hundreds of features to meet your special rheostat requirements can be furnished. Submit your specifications.

OHMITE rheostat tandem coupling kits

Tandem rheostat assemblies can be ordered from the factory or assembled by the user with these kits which permit assembly of two units. Each kit consists of a steel "U" frame, a coupling with set screw, mica washer, Allen wrench and instructions.
